C'mon Fellers!

Here's a whole motor fleet 'n a FREE garage 'n everything!

You can't beat this for Christmas joy!

Christmas morning . . . the faint jingle of sleigh bells, tossed on the horns of reindeer, heralds the departure of the kindly old benchwarmer gentleman who has just climbed up the chimney and dashed away to spread joy to other kiddies.

. . . a restless movement of bed clothes, as a tired little warrior climbs out of the land of Nod . . . sleepy eyelids open, hesitatingly . . . widely . . . and a fevered, ish scramble as they bet pastor to the fireplace where he hung the biggest stocking he could find!

"Daddy! Mother! Look! Look! A whole motor fleet 'n a garage and everything! See my Yellow Cab and my blue Coupe with doz wheels! 'N my Fordson Tractor to plow 'n haul 'n everything!"

Wonderful reproductions
No mechanism
to get out of order

Toys that last almost forever! They won't break because they are built of sturdy cast iron, with no clockwork to get out of order and soon cause the toy to be cast aside. These toys continue to give joy long after most children's gifts have gone to the "happy hunting ground."

Really wonderful toys—faithful reproductions of their "big brothers." The Toy Yellow Cab with a removable driver looks exactly like the big Yellow Cabs that fill the streets of cities all over the world. The Toy Fordson Tractor is a small edition of the one built by Henry Ford, finished in gray, red and gold. The Toy Coupe is a classy car, finished in suburban blue.

Cut-out Garage Free when whole fleet is ordered

And now is the best news of all. When the whole fleet of three is ordered (of course, every real boy and girl wants the whole toy motor fleet), you will receive absolutely free a beautiful garage big enough to hold the three toys. It comes all ready with directions for putting out. There will be a lot of fun in putting it together, with its two big swinging doors, front sidewalk, gasoline pump, skylight and windows.

These are the original and genuine Arcade motor toys—which is less than a year have become the most popular toys in America! Insist on seeing the name "Arcade" printed on every carton or stamped on the bottom of each toy. That "Arcade" name stands for quality most through.

Here you have the opportunities of giving some youngsters more real fun than you ever believed $3.50 could buy. Where economy is necessary the fleet of three and free garage will make their youngsters happy.

These splendid toys, either singly or "all three with the garage free," can be bought for Christmas at the guaranteed low prices quoted below at almost every department store, general store, toy department, hardware, novelty, one store or two, even many cigar stores, railway stations, hotel lobbies and local novelty companies. If by any chance your dealer can't supply you, order direct from the factory and we will prepay the parcel post or express charges anywhere in the United States. Ordered separately, the No. 1 Toy Yellow Cab is $1.50; Toy Fordson Tractor 50c; Toy Coupe, $1.50; and the Arcade Garage is worth $1.50. When you buy all at one time for only $3.50, you get the beautiful Arcade Garage included FREE, and save a dollar.

If you order separately be sure and use one of the coupons, as it must be sent by your nearest dealer. Canadian shipments are made exactly as above.

Don't overlook the coupons. Be probable that next year, too, and the fleet Santa Claus is almost up to the limit.

Aladdin Homes Save $200 to $800

An Aladdin Home in Stucco

Aladdin success is chiefly due to the money saved for Aladdin home owners. You will save a substantial amount thru eliminating dealers' profits, saving over 18 per cent waste in lumber and lowering labor costs in building. Aladdin Homes come to you direct from one of our mills located in the nearest timber country, thereby reducing freight charges. They are built of standardized materials saving waste, and are cut to fit saving hundreds of hours of carpenter labor. Over a hundred beautiful and modern homes are pictured and priced in the Aladdin catalog. Send stamps for this catalog No. 1614 at once.

Cozy 6-room Bungalow

Story and Half Bungalow

Reduce Labor Costs

The lumber that's wasted costs just as much as the lumber that's used. Aladdin can prove to you a saving of practically every fifth dollar spent for lumber. That's surely worth while. Aladdin can prove a saving of practically every fourth dollar in labor. That's worth saving too. Will you be satisfied to build without getting the Aladdin catalog and proving these statements?

A Bungalow of 7 Rooms

What You Get

You receive in one shipment all the timbered frame work, millwork, the siding, outside finish, porch, shingles, windows, doors, interior woodwork, lath, glass, nails, hardware, lock sets, paints, stains, and varnish. Send stamps today for Aladdin catalog No. 1614.

Mauretania

The Blue Ribbon Ship of the Atlantic

to the Mediterranean

The Luxury Cruise—Next Winter

From New York February 10th, 1923

These two magical words, **Mauretania—Mediterranean,** suggest the supreme luxury of modern sea cruising—swiftly and comfortably across the Atlantic, leisurely along the shores of the most beautiful and interesting sea in the world—to the oldest and most fascinating of all lands.

The idea is inspiring and compelling. Its realization has been effected by the experienced Travel Department of the American Express Company in full cooperation with the Cunard Line—with all this means in ship management, service and cuisine. Prices $950 up according to stateroom. Reservations should be made at once.

In diverting *the Mauretania* from its regular ports for this Cruise, the Cunard Line departs from traditional policy to make a notable and unique epoch in Cruising history.

Inland excursions planned from all ports of call—Madeira—Gibraltar—Algiers—Monte Carlo—Italy, Rome, Naples—the Dardanelles—Constantinople—Greece, Athens, Eleusis, Marathon—Palestine, Haifa, Jerusalem, Bethlehem, Nazareth, Tiberias, Damascus—Egypt, Cairo, Memphis, and up the Nile to Luxor, Karnak, Thebes, Assuan and the First Cataract.

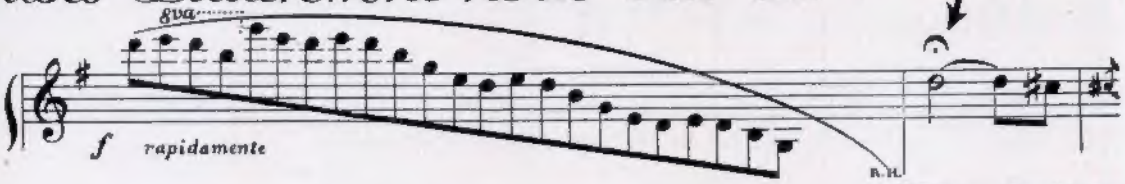
How long does Paderewski hold this D?



Copyright, 1922
The Apollo
Piano Co.

HAVE you played The Minuet? Or heard it played? You can tell *exactly* how Paderewski intended we should interpret his Minuet by hearing him play it for you on the Apollo Reproducing Piano. You can have him play it for you over and over again, just as he would play it *once* in concert—until you thoroughly grasp every detail of his interpretation.

Unlike the music of mere player pianos, the Apollo Reproducing Piano does actually give an exact reproduction of the original artist's playing without the slightest deviation in characteristic of touch, shading of tone or individuality of interpretation.

Paderewski, Hofmann, Gabrilowitsch, Godowski and scores of leading pianists may thus be heard in the home on the Apollo precisely as they are heard in concert.

The instrument which DOES IMMORTALIZE the playing of the great pianists

This photograph of the main business section of Salina, Kansas, was taken immediately after a heavy snowstorm. Notice how thoroughly the Avery "ROAD - RAZERS" are clearing the snow off the street.

Here is the Avery "ROAD - RAZER" cleaning the surface of the municipal skating pond. Just one of the many ways in which this wonderful "two-job" machine can be utilized.

Two Jobs, Both Well Done

Removing Snow—Maintaining Unpaved Roads and Streets

THINK of a machine you can keep busy all year 'round, shaving the roughest roads and streets smooth—doing more; faster and better work at lower cost than has ever been possible with any other method—then when snow fills your streets, removing it for you quickly, easily and at low cost. That's the Avery One-Man "Road-Razer"—the most successful machine ever designed for country road and unpaved street maintenance work.

Mr. L. P. Alber, Commissioner of Public Improvements, Great Bend, Kansas, writes: "Your representative dropped in here during our big snow last year and got the "Razer" out and went to work showing us how to clean snow off our streets. The machine did the best job of cleaning off snow from the streets that we ever saw done by any machine. We bought it and as soon as the snow went off, we put it right to work smoothing up the streets and it does an elegant job. Our man had no trouble at all in learning the operation of same. We are highly pleased with it."

Mr. Ed. Buchanan, Street Commissioner of Salina, Kansas, writes: "On Nov. 23, I wrote you in regard to how well we liked our Avery Road-Razer for working dirt streets. Now, we have found another use for it, cleaning snow off our streets. We find it a great machine for cleaning off the snow. It does it so nice and clean that the streets are dry in a short time. One man can clean off miles of streets in a day after a heavy snow at a very little expense. It's the best snow machine we ever saw."

Every one interested in public improvement should study the remarkable work of this machine. It has really created a sensation wherever it has been introduced. One man operates it—turns the machine in its tracks, or backs up at will—and raises or lowers the long, flexible, three-section blade to fit and shape any crown or surface of the road.

Sold on approval, subject to demonstration and strongly guaranteed.

Build your roads with Avery Road Tractors and then keep them smooth and clear with Avery "Road-Razers." Write today for prices and complete information.

NEVER BE WITHOUT SOUP IN YOUR PANTRY

Meaty, marrowy Ox Tail joints

delicious vegetables
nourishing barley

Just the aroma from Campbell's Ox Tail Soup as it simmers in the saucepan is a challenge to your appetite—it is so rich and savory. And the minute you taste the first spoonful, you realize what a treat is ahead of you. The sliced ox tail joints are the very tenderest and finest the market affords. Their rich tasty broth is blended with diced carrots and turnips, puree of luscious tomatoes, hearty strengthening barley, ox tail joints (not used in making the broth), a dash of French leeks and parsley fresh from our own farms. Real, substantial food —and how delicious!

Soup so good you'll want to sing
Dance and play and everything,
For it is made the Campbell's way
Which means the best, as you will say!

21 kinds **12 cents a can**

Campbells' Soups

LOOK FOR THE RED AND WHITE LABEL

Here is a game the kids acclaim
With vigor, vim and zest.
Their pep and force derived, of course,
From "Ox Tail" at its best.

—and thereby hangs a tale

Campbell's is Ox Tail Soup at its best. Not merely a deliciously satisfying food, but a recognized health-builder as well. It brings you, in a tasty dish, the native vigor of meaty, marrowy ox joints; the beneficial properties of fresh vegetables and herbs; the strength-building qualities of barley.

Campbell's Ox Tail Soup

A rich, nourishing stock, made from medium-sized ox tails, combined with diced Chantenay carrots and golden turnips, tomato puree, sliced ox tail joints, celery, parsley, barley, a little leek, and a touch of flavoring to bring out the natural savor of this delicious combination. Order Ox Tail today.

21 kinds **12 cents a can**

Campbells' Soups

Good pea soup—just taste it!

Pea soup is a favorite round the world. Just dip your spoon tonight into a savory, creamy plateful of Campbell's. You'll say you never tasted such a pea soup—so mellow, so delicious, so rich in quality and satisfaction.

Campbell's Pea Soup is made from dainty tender peas blended, according to Campbell's own recipe, with pure country milk and fresh creamery butter, delicately spiced. How you will like it!

How to prepare Cream of Pea

Simply by adding an equal quantity of milk or cream to Campbell's Pea Soup just before serving you have a velvety, smooth, heavy Cream of Pea which will be one of your prize dishes. Even more attractive served in bouillon cups topped with whipped cream.

SOUP MAKES THE WHOLE MEAL TASTE BETTER

The wish we wish is a great big dish
Of Campbell's and a spoon,
Then a mighty thump and a long, long jump
And we'll sail right over the moon.

One jump ahead!

It's health that keeps you there. When Campbell's Tomato Soup sends up its fragrant invitation and your appetite revives and spoonful after spoonful freshens and delights you,—then pleasure and health go hand in hand. Soup strengthens appetite and digestion—increases nourishment.

Campbell's Tomato Soup

is Nature's own tonic—the pure, stimulating juices and the rich "meat" of luscious Jersey tomatoes, strained free of skin, seeds and fibre to a velvet-smooth puree. There is the flavor and nutriment of fine butter, also, and the most delicate of spicing. The recipe is exclusively ours. But the sheer enjoyment is yours!

The CHALMERS SIX

Six-Cylinder Goodness At Its Best In New Series Chalmers $1295

Here is six-cylinder smoothness and snap and steadiness at its very best.

Every impulse of the motor beautifully and completely blended into the next—all six cylinders merging their power into an unbroken flow.

Clock-like precision in performance—the fruit of more than clock-like precision in shop practise.

A vigorous, virile car, overflowing with power-vitality, steadily, smoothly applied.

Flexible to a degree.

Amazingly swift in getting into action.

Rides as buoyantly as a boat.

The first Chalmers built entirely by the new and fine Chalmers organization which has been directing its affairs for more than a year past.

As fine in materials, in measurements, and in manufacturing processes—in grace and beauty of design, in fineness of finish—as money and high skill could make it.

Studied from any and every angle, one of the few really great six-cylinder values recent years have produced.

All Models Equipped With Disk Steel Wheels and Cord Tires

Chalmers Motor Car Company, Detroit, Michigan

Chalmers Motor Company of Canada, Limited, Windsor, Ontario

The CHALMERS SIX

It is not one single feature that causes the Chalmers Six to stand without serious competition in its field.

But in all that makes the six distinctive as a type, its superiorities are instantly apparent.

The Chalmers Six motor displays a smoothness of operation—a responsiveness to every driving requirement—that is a positive revelation to everyone who drives this car.

Every bit of the mechanism is carefully made to work in full harmony with the highly perfected motor and render long and satisfactory service.

Surmounting this wonderful chassis is a body of great beauty in line and finish, carefully designed to assure the greatest ease and comfort for driver and passengers.

No matter what car you have driven, it will be well worth your time to learn how much the Chalmers Six has done for fine motoring, and at what moderate cost.

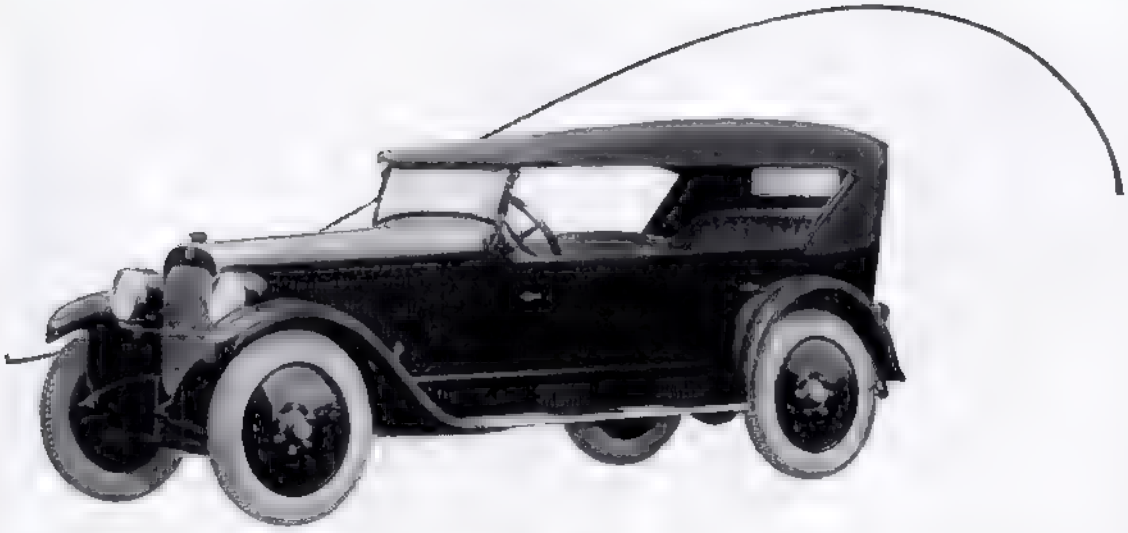
CHALMERS MOTOR CAR CO. Detroit Mich. U.S.A.



A New and Finer Kind of Six-Cylinder Performance

Until you see the New Series Chalmers Six, you can have no real conception of the wonderful value it is.

Until you drive it, you cannot know the great new advance it represents in fine six-cylinder performance.

All the splendid properties for which the six, as a type, is prized, are here developed to a nearer point of perfection.

The power-flow is even more smooth; the blending of cylinder impulses more complete; the acceleration more spirited; and the flexibility is pure delight.

Not only the famous Chalmers engine, but the entire car, has been the subject of a solid year of engineering scrutiny and refinement.

This is, in our opinion, the finest-performing six we have ever built—a car of enticing comfort and surpassing beauty.

Every mile you travel in it confirms again the remarkable value indicated by its size and appearance, and the details of its finish and equipment.

THE genius of quantity production—as applied to the automobile—has this for its greatest achievement:

It has made possible a car of unimpeachable good taste and sterling performance at impressively low cost.

The Chandler Company was a pioneer in this development. It brought out the first light six nine years ago and inaugurated a great forward movement.

Its ideals attain their ultimate in the new Chandler car.

Here a body of beauty is united to a chassis of might, and for small outlay the owner assures himself years of satisfactory service.

Every transportation need is met in the ten superb models.

COOK'S TRAVEL SERVICE

WHEN you see a big car gliding easily up one of those endless hills, it's almost certain that a New Stromberg Carburetor is under the hood.

The Stromberg is vital equipment of the motor car today. It gets more mileage out of a gallon of gas—increases power—cuts down gas bills, which means economy.

If your car is not equipped with a Stromberg, write us for literature. Give name, model and year of your machine.

Often Better Than Medicine

THAT the shower has valuable therapeutic properties as well as being the ideal way of bathing—in running water—is freely admitted among physicians.

Stand under the shower—turn it on full. In two minutes the skin is waked up, muscles have been gently massaged by scores of scintillating, cleansing sprays.

And at bed time, a gentle, soft-falling, warm shower induces almost immediate and restful sleep.

Of course to be adaptable to individual conditions the shower should be easily adjustable—both force and temperature. The SPEAKMAN Mixometer gives the bather control of the shower's temperature, while with the Anyforce Head, an exclusive SPEAKMAN advantage, the water's volume or force can be regulated instantly. This is very important when you consider that the shower's benefits are for men and women, and old as well as young. Also that water pressures vary in different parts of a city and even on the several floors of a building.

There are SPEAKMAN Showers—both Mixometer and two-valve types—for residences, hotels, clubs and institutions. Your plumber and architect know them—their quality. And let your plumber give you a SPEAKMAN Shower folder—or write us

SPEAKMAN SHOWERS

Crossing *the* Atlantic *in* 4½ Days

The World's Record Passage between Europe and this country was made by the MAURETANIA—*the holder of the Blue Ribbon* of the Atlantic—in 4 days, 10 hours and 41 minutes.

This truly grand ship is back in service, thoroughly overhauled and converted into an oil-burner. She and her gigantic sisters, the wonderful AQUITANIA and luxurious BERENGARIA are making history in carrying on the fastest weekly Passenger Service-De-Luxe, the world has ever known.

From NEW YORK every Tuesday to CHERBOURG and SOUTHAMPTON.

Other services to Queenstown and LIVERPOOL, to Londonderry and GLASGOW, to Plymouth, Cherbourg and HAMBURG—*a little less speedy but no less comfortable*—by the beautiful, roomy, homey, oil-burning new ships such as the SCYTHIA, LACONIA, SAMARIA, CAMERONIA, in cooperation with the famed and popular CARONIA and her twin-sister the CARMANIA.

Dodson Bird Houses

Secretary the wren eats
Joseph H. Dodson
President, American Audubon Association

Do away with costly insect pests—

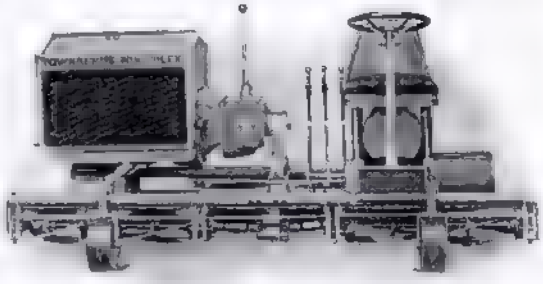
Why not write to Mr. Dodson? He will gladly tell you how to rid your grounds of costly insect pests by attracting the birds. Years of loving study have perfected Dodson Bird Houses. A regard for little details, even ventilation, determines whether birds will occupy a house. And amid the modern devastation of nature, the little birds need homes made for them. Hang one of these quaint houses from a limb, tack one to a tree, put one up on a post! They will attract the birds.

JOSEPH H. DODSON
702 Harrison Avenue Kankakee, Illinois

Wren house
is but one of many bird homes described in booklet, "Your Bird Friends and How to Win Them." Made of oak, with copper coping, with four compartments $0.00

FREE
Mr. Dodson's fascinating booklet, "Your Bird Friends and How to Win Them." Just write for it.

Townsend's Multiplex



The Greatest Grass-Cutter on Earth. Cuts 100 Acres a Day. Cuts a Swath 12 Feet, 114 Inches or 86 Inches Wide

Floats over the uneven ground as a ship rides the waves. One unit may be climbing a knoll, another skimming the level and another plunging a hollow.

Not an assembly of tractor and mowers, but a single, compact machine like an automobile, with 3, 4, or 5 cutting units. Driven by a 17 H. P. four cylinder, water cooled gasoline motor with Splitdorf Dixie Ne... Magneto, a wonderful radiator, sliding gear transmission, two speeds forward and reverse, etc.

Can also be drawn by horse, the motor being removed, or converted into a powerful tractor by detaching the cutting units. Can back up or turn a complete circle in double its width. Can stop in six inches—it has a powerful brake. The cutting units are controlled from the driver's seat.

Do we guarantee it? Write your own.

Send for catalogue illustrating all styles of TOWNSEND MOWERS.

A warning -bleeding gums

ARE your gums tender? Do they bleed when brushed? If so—watch out for Pyorrhea.

This disease of the gums, which afflicts four out of five people over forty, not only destroys the teeth, but often wrecks the health.

In Pyorrhea the gums become spongy, then recede; the teeth decay, loosen and fall out—or must be extracted to rid the system of the infecting Pyorrhea germs which breed in pockets about them. These germs lower the body's vitality and cause many diseases.

You can keep Pyorrhea away. Visit your dentist often for teeth and gum inspection, and use Forhan's For the Gums.

Forhan's For the Gums prevents Pyorrhea—or checks its progress—if used in time and used consistently. Ordinary dentifrices cannot do this. Forhan's keeps the gums firm and healthy—the teeth white and clean.

Start using it today. If your gums have receded, use Forhan's according to directions, and consult a dentist immediately for special treatment.

Sail on the "Prairie Schooner" That Blazed the Trail to a New Frontier

REVISE your old ideas about the Arctic in one of the finest narratives of adventure ever written. For in

The Friendly Arctic

By

VILHJALMUR STEFANSSON

Hubbard Gold Medalist of the National Geographic Society, Gold Medalist of the six other European and American Geographic Societies, President, Explorers Club of New York

America's foremost Arctic explorer holds you thrilled and absorbed as, led with the same spirit which sent our pioneers across the prairies, you penetrate the "Foodless, Frozen Ocean." Instead of "certain death" by starvation in the lifeless, icy waste of age-old myth, Stefansson discovers a friendly region of ample game where life would be ideal but for the summer heat and the mosquitos!

Footer of a Comet across Stefansson's Arctic

Mental Tonic for Home or Office

It is a mental tonic for the "go-getters" of the business and professional world and a great tool for all executives who have to "pep" assistants up to the point where they will not let indifference or inertia slow their step. "*Great and significant piece of pioneering.*"—*New York Times*

For "unique interest and importance of *The Friendly Arctic*, the outstanding geographic publication of 1921, describing ... Stefansson's ... added to known North America, the National Geographic Society has awarded Mr. Stefansson the Grand Patron Prize

... pages, 138 illustrations, 3 maps
Bound in cloth $6, postpaid

My Life With the Eskimo

In this forerunner of *The Friendly Arctic* Stefansson shares his adventures ... the Eskimo, living like a primitive people, building ... terrible storms, ... a polar bear ... seal for supper and ...

DODGE BROTHERS
BUSINESS COUPE

Dodge Brothers have built into this car every quality which you would naturally look for in a serviceable and attractive coupe.

The lines are clean cut and dignified. The steel body, electrically welded into a unit, is noiseless and exceptionally light. It is the first all-steel coupe body ever marketed. The enamel baked on the surface of the steel, retains its original lustre for years. The carrying compartments are roomy and convenient. The seat is upholstered in genuine leather. Exit and entrance are made easy by the unusual width of the doors.

In short, the fundamental purpose of the car is evident in every detail—to render practical, everyday service at a minimum cost.

The price is $980 f. o. b., Detroit

DODGE BROTHERS

DODGE BROTHERS
BUSINESS COUPE

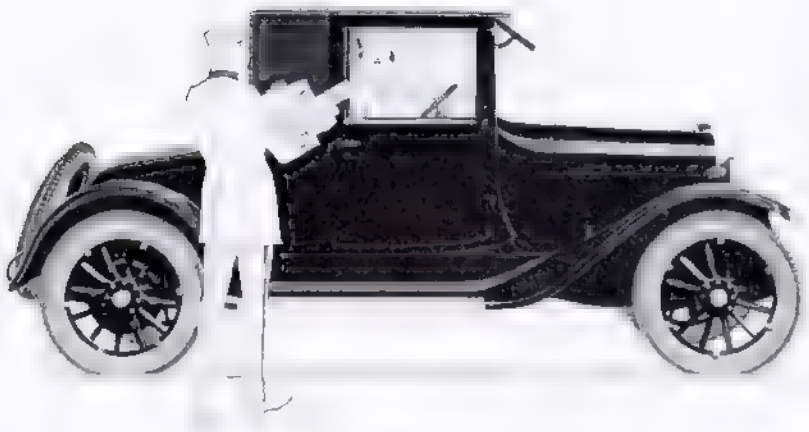
Owners experience an appreciable new sense of security in this car—the first steel-built closed car ever marketed.

Dodge Brothers pioneered boldly and successfully to give it the qualities of the Pullman coach, capable of withstanding an impact under which the ordinary body would probably crumble.

But steel construction does more than contribute to the car's safety and durability; it also permits the use of Dodge Brothers baked-on enamel finish. It minimizes rattles and eliminates the possibility of shrinkage. All parts are welded or machine-screwed securely and permanently into place. This new preciseness is usually noticed first in the windows, which are entirely free from sticking and rumbling.

Such vital features are universal in their appeal. The continued, persistent demand for the Business Coupe is not surprising.

The Price is $980 f. o. b. Detroit



Dodge Brothers
Business Sedan

Exceptional interest has been aroused by the practical arrangement of the interior.

The entire rear compartment furnishings—seat, seat cushions, back cushions, seat frame, foot rest, carpet and all—can be removed from the car in a few moments.

The front seat is then tilted forward, giving a gross clearance of twenty-two inches through the rear doors.

In this way, a space of sixty-four cubic feet in the rear compartment is made available for loading.

When the rear seat fixtures are back in place, the interior is complete and attractive in appearance. Its convertibility is not apparent to the eye.

Business men, farmers, salesmen, campers, tourists and everyone who has occasion, at times, to carry bulky articles or luggage, will readily appreciate the great utility of this construction.

The Price is $1195 f. o. b. Detroit

From Holland To You —

THE WORLD'S BEST BULBS

Every year from this toyland of painted roofs, wandering dikes, and sky-blue tiles we import bulbs of unequalled quality and of many varieties, bringing color and fragrance to flower-lovers all over America.

Because of our long experience and many visits with the best Holland horticulturists we are able to obtain for you their finest products at a reasonable cost.

Bulbs Mean Flowers in Your Home or Garden

A glance at our price list will show you that for a few cents each you can grow hyacinths, tulips and narcissi which would cost $1.00 a plant or more in a retail shop. Grown in the home they will brighten your rooms from Christmas to Easter.

The bulbs require very little care. Simply plant them in soil from your garden, or use soil from a florist's shop if you live in the city. Keep them in a cool, dark place and water them occasionally until they are well rooted. Then bring them out to the light at intervals of ten days so that you may have a succession of flowers. When the buds are ready to open, you may transplant the bulbs to jardinieres, fern dishes, or bowls if you wish

Why You Should Order Now

We import bulbs to order only and we must have word **not later than July 1st.** By ordering at once you get a special discount on a quality of bulbs not usually to be obtained in the United States at any price. Delivery will be made by the end of September or early in October.

Bulbs need not be paid for until after delivery

Send At Once For Beautiful Free Booklet

Attractively illustrated in color, showing a thousand varieties of bulbs and giving complete instructions for growing them successfully in either your house or garden. Or better still, order now from the accompanying list and we shall send the booklet at once and fill your order as soon as possible after the bulbs arrive from Holland.

Our reputation as one of the oldest and most reliable seed, shrub, and plant houses in America is a guarantee of fairness and satisfaction. Order your bulbs today.

North African Motor Tours

Morocco · Algeria · Tunisia

Hear the call of the desert drums

WATCH the caravans come in at twilight, the rhythmic tread of the camels, the settling down of the camp. Listen to the strains of wild music and the beat of the desert drums.

Wander through marvelous gardens of sultans and viziers to the silvery music of countless fountains. Breathe in the rose-scented air. Tread the shadowy streets of great oriental bazaars.

Enjoy the beauties of Moorish architecture in Arab cities that have been forbidden ground to Christians for centuries—which few travelers have seen.

Cross the snow-capped Atlas Mountains and visit oases in the ocean of Sahara sand. Stop at hot springs that work wonders of healing, at famous ruins of Roman and Carthaginian cities.

Visit these "Arabian Nights" countries while the peoples are little touched by Western ideas and customs—brave, hardy, picturesque barbarians.

Via the French Line from Bordeaux or Marseilles and thence by luxurious automobiles

THESE North African Tours of three and four weeks are made in automobiles accommodating parties of four to twelve people and as luxuriously comfortable as Pullman cars; or tourists may take their own cars. Every modern comfort is assured at the "Hotels Transatlantique", which are under the direct control of the French Line at all principal towns and points of interest. Rates include all transportation and hotel expenses from the time you board the steamer at Marseilles or Bordeaux till you return to France. These tours may also be arranged from New York to New York.

Delightful features of these tours are the leisurely journeying, the small and select nature of the parties and the fact that you can arrange the time table to suit your convenience.

Write for interesting descriptive literature and detailed information.

Hotels Statler

Buffalo – Cleveland – Detroit – St. Louis

A new Hotel Statler (1100 rooms, 1100 baths) is now building at Buffalo, [illegible] rooms will be ready for
[illegible] to be another HOTEL STATLER in the Park Square area of BOSTON
It will have 1100 rooms and 1100 baths [illegible] to be a worthy sister.

I'm a Statler headwaiter. When you're in one of my dining-rooms I'm your host as well as your employee, and you'll always find me trying my hardest to live up to my instructions. Maybe you have seen those instructions (published in some of our ads, and in The Statler Service Codes), so you know that they take a different view from the usual one of what a headwaiter's for and what he ought to do. I believe in them, for I think I know what you like; and I second Mr. Statler's promise to you of the kind of service you appreciate

Hotel Pennsylvania

Opp. Pennsylvania Terminal, New York, *The Largest Hotel in the World*

"Twenty years I've carried this watch"

ENGINEER Charles Monk of the Erie Railroad is proud of his Hamilton. Twenty year companions they've been, and the Hamilton has been a faithful, reliable comrade.

Even Engineer Monk wouldn't estimate the enormous number of trains he has brought in "on time." He does say that in the ordinary day's work he must consult his Hamilton dozens of times.

Dozens of times a day, multiplied by three hundred odd days a year and by twenty years—that would make a figure which in itself spells "service." Through it all, his Hamilton has given accurate time.

You may not be an engineer or a railroad man, but you have need for accurate time dozens of times a day. And besides the pride of ownership in a good, beautiful watch, there is the insistent demand of modern business upon every man's time, which makes an accurate watch an essential part of his equipment.

Get this "railroad accuracy." You can find in the Hamilton booklet, "The Timekeeper," the model and size that pleases you most. It shows ladies' beautiful wrist watches and thin models for men. All of them make worth-while and appreciated gifts. Write for a copy. It tells how to care for a fine watch

Hamilton Watches range in price from $40 to $200; movements alone, $22 (in Canada, $25) and up.

"HOUBIGANT, PARIS." Where is the woman who does not respond to the magic of this name upon a gift? It is not only an emblem of quality, but is also a charming compliment to the fastidiousness of her taste.

For, to-day, as in the century past, Houbigant perfumes are preferred by all those women who have accustomed choice of the world's finest things.

These perfumes are available in America, as in France, in many exquisite odeurs—Quelques Fleurs, Mon Boudoir, Un Peu d'Ambre, Le Parfum Idéal, Le Temps des Lilas, La Rose France, Violette Houbigant, Parfum Inconnu, Jasmin Floral, Mes Delices, D'Argeville, Premier Mai, Coeur de Jeannette, and Quelques Violettes. At smart shops everywhere, priced from four to twenty dollars. In a size convenient for the purse, one dollar.

Le Temps des Lilas

Parfumeur to Empress Eugénie 1857

Only perfumes of a truly incomparable quality could maintain throughout the century that unrivaled place which is Houbigant's. Today, as in the time of the *Empress Eugénie*, they are the choice of women distinguished not alone for greatness of name—or wit, or charm, or grace—but also for a faultless and exquisite taste. For this fastidious clientele Houbigant has created many other fine toiletries, all pervaded by the famous Houbigant scents. In poudres de talc, one may choose from Quelques Fleurs, Idéal, Mon Boudoir, Un Peu d'Ambre, La Rose France, Coeur de Jeannette, Quelques Violettes, and Fougère Royale. At smart American shops. One dollar everywhere.

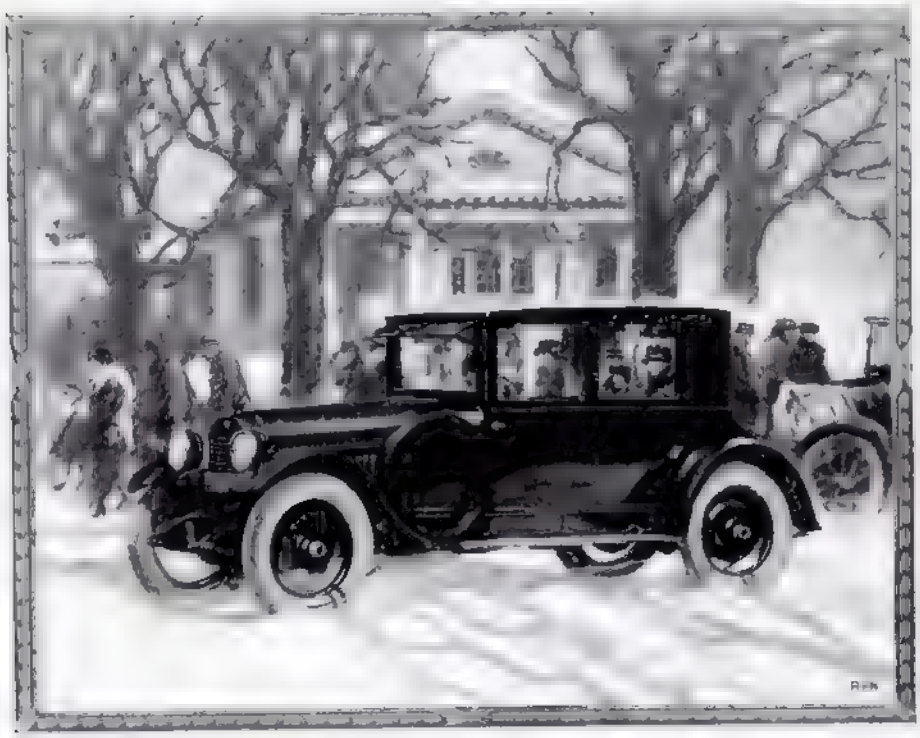
Hudson Coach $1625

Freight and tax extra

on the Famous Super-Six Chassis



Just What is its Value?

Important Thoughts for Closed Car Buyers

There are two types of closed cars that sell under $2000.

Consider them well before you buy.

One features its fancy body and fittings with clock, trunk, dome lights, vanity cases and cigar lighter. In open models such a car sells at about $1600.

The other type is the Hudson Coach, mounted on the famous Super-Six chassis. More than 120,000 Super-Sixes are in service. Official tests mark it one of the truly great automobiles. For seven years its sales have led all fine cars.

And with its new and improved Super-Six motor you get the best Hudson ever built. It has a smoothness unknown to earlier models. Its reliability and endurance excels even those Hudsons that have registered more than 100,000 miles of service.

And you will like the Coach. It has a sturdy simplicity. Essential comforts are provided.

Doors and windows stay snug fitting. Rumbling noises are entirely absent. The seats are low, comfortable and cozily arranged. There is ample space for luggage and tools in the locker at the rear.

Radiator shutters and motometer give summer driving efficiency without need for hood covers in winter.

You will be proud to own a Hudson Coach.

Speedster, $1525 7 Passenger Phaeton, $1575 The Coach, $1625 The Sedan, $2295

"Red Baby"

The Nation's Service Truck

IF you could get a long-range bird's-eye view of this vast country of ours, the landscape would lie before you like a patchwork quilt of fields. From ocean to ocean the millions of fertile farms lie side by side, eternally growing foodstuffs for human beings.

See the many denser centers of activity, with smoke plumes rising everywhere like tufts on the patchwork quilt. These are the cities, the crowded places where live Manufacture and Commerce and Traffic. These thrive only when Agriculture smiles, for Agriculture mothers the world. Our nation's life grows up out of the soil —let no man forget that.

Agriculture smiles her best when Service is at her command. Her millions upon millions of farm machines must be kept at work. Her power equipment must not fail. Her methods must keep pace with the times.

Now, if you will look again, very closely down on the scene, you will see a far-flung network of service establishments for Agriculture. These are the farm machine headquarters of McCormick-Deering dealers, men who have a broad conception of service in business and who carry it right to the homes of their customers. Thousands of these dealers have equipped themselves with International Speed Trucks like the one pictured on this page—trucks which, because of their flaming red color, speed, and snappy lines, are popularly called "Red Babies."

This army of "Red Baby" Service Trucks is carrying service to the most distant farms, upholding the Harvester Company's ninety-year reputation as the chief servant of Agriculture in the invention and building of time and labor-saving machines and power equipment. These trucks are ever on the road, hurrying at the farmer's beck and call, distributing efficient equipment, information, and useful aid, carrying into all communities the methods that increase production and wealth—a service unsurpassed in any field of activity.

The "Red Baby" of the McCormick-Deering dealer is working in the interest of every man, woman and child in the land. It is rightly named "The Nation's Service Truck."

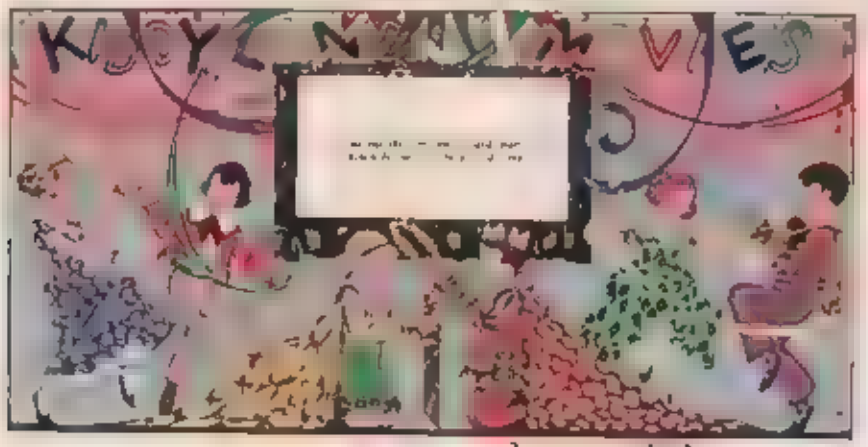
The Kiddyland Movie Cut-outs

By Th

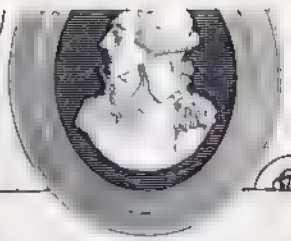
The Kiddyland Movie Cut-outs

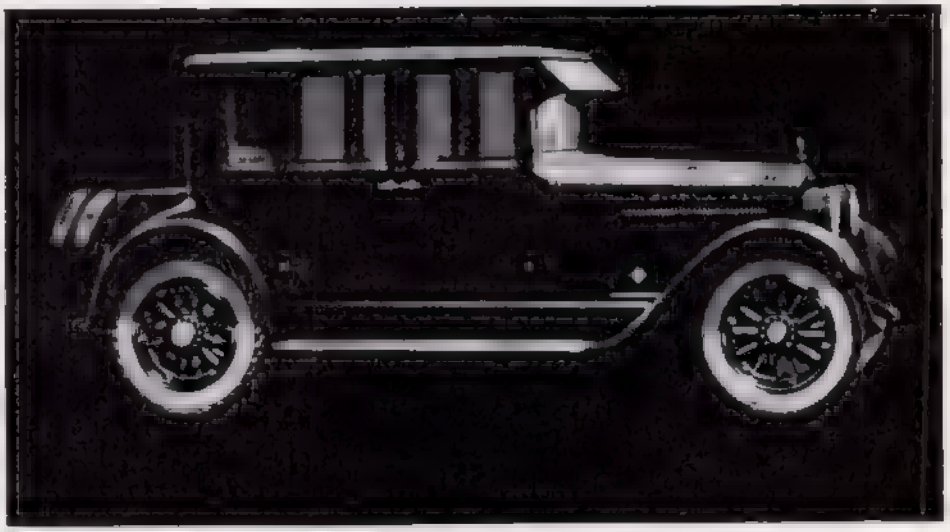


We do not know of one LaFayette owner who has failed to drive his car more than ten thousand miles the first year . . . What better evidence could there be of the charm of LaFayette performance?

LaFAYETTE MOTORS COMPANY at *Mars Hill* INDIANAPOLIS

LaFAYETTE





The Four-Door Coupe

The roster of LaFayette owners naturally includes many families whose requirements are for three or four fine motor cars.

And it is significant to note that during the past year a large number of such owners have standardized wholly on the LaFayette.

LaFayette Motors Company, *at Mars Hill*, Indianapolis

LAFAYETTE

Typical of the character of our owners everywhere are the people in your own community who own LaFayette motor cars

What more can we say about our car than this: it has found favor in the eyes of those who know and love fine things

LAFAYETTE

This Summer in a LaFayette

Fortunate indeed is he, who, with a summer's day and a sunny road before him, can explore green country-sides in a LaFayette.

The great car moves along quietly and serenely as the placid rivers that wind across the journey.

It spirits its passengers across hills almost as effortlessly as it coasts them down the slopes.

It loafs between friendly hedgerows or travels more swiftly than any other car we know.

Between morning and the sundown it can pass an incredible number of milestones without bringing weariness to those who travel with it.

And with each mile it winds beneath its wheels, it brings to those it carries, new enthusiasm and new trust.

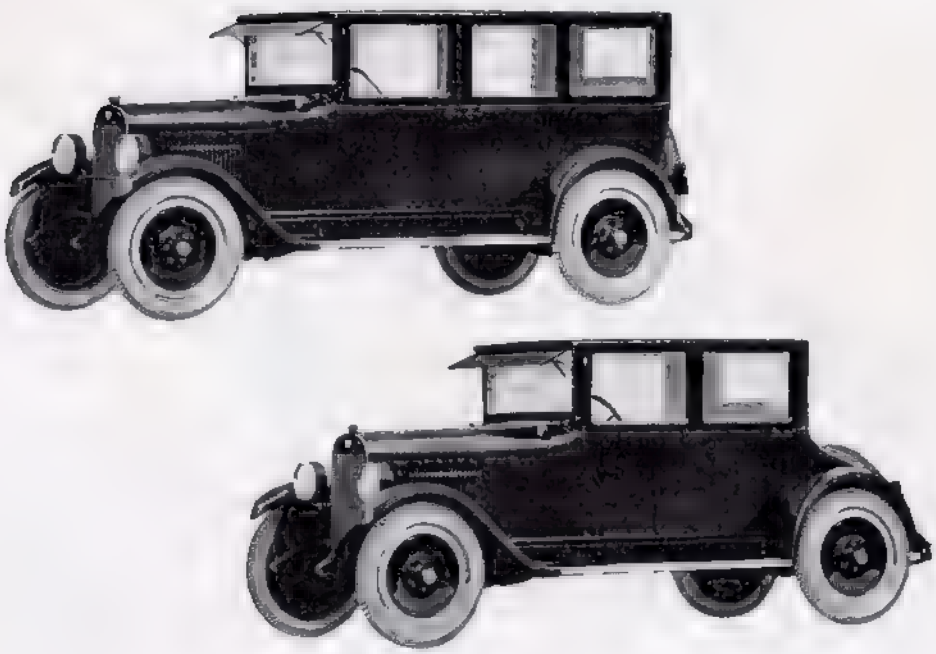
One thousand owners, many of whom have driven their cars 25,000 miles or more, declare there is but one car that can do these things in just this way.

One car and only one—

The hundred horsepower LaFayette.

LAFAYETTE MOTORS COMPANY at *Mars Hill* INDIANAPOLIS

LAFAYETTE



The friendly feeling which the public is displaying toward the good Maxwell is no doubt prompted, in part, by its great beauty. But the deeper, more significant phase is the profound admiration, shown everywhere, for the substantial qualities demonstrated by the reliable and notably fine performance of the good Maxwell.

Cord tires, non-skid front and rear; disc steel wheels, demountable at rim and at hub, drum type lamps; Alemite lubrication; motor driven electric horn; unusually long springs; deep, wide, roomy seats; real leather upholstery in open cars, broadcloth in closed cars; new type water-tight windshield. Prices F. O. B. Factory, revenue tax to be added: Touring Car, $885; Roadster, $885; Coupe, $1385; Sedan, $1485.

MAXWELL MOTOR CORPORATION, DETROIT, MICHIGAN

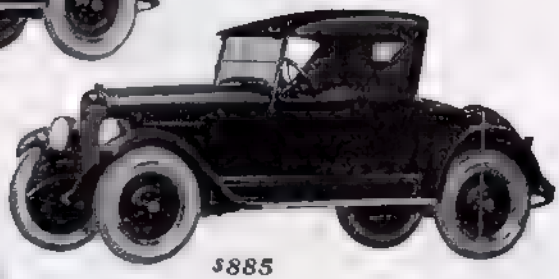
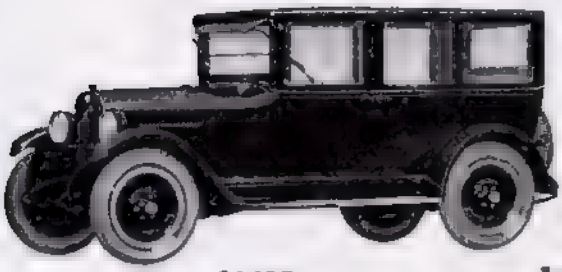
The Good

MAXWELL

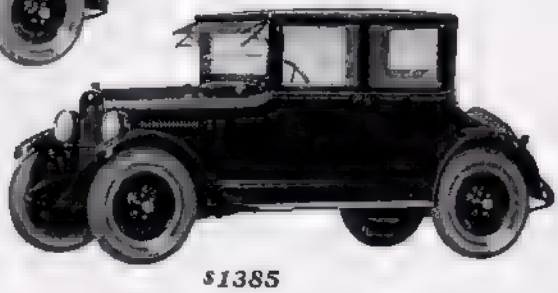
$885



$885



$1485



$1385

Already, the enthusiasm which first greeted the great beauty displayed by the New Series of the good Maxwell has deepened and ripened into permanent public favor.

For the owners of these fine cars, and through them the people at large, have discovered that underneath their handsome exterior is the goodness which assures power and performance, and an unusual ability to render reliable, saving service.

Cord tires, non-skid front and rear; disc steel wheels; drum type lamps; Alemite lubrication; motor-driven electric horn; unusually long springs; deep, wide, roomy seats, new type water-tight windshield. Prices F. O B. Detroit, revenue tax to be added

MAXWELL MOTOR CORPORATION, DETROIT, MICHIGAN
MAXWELL MOTOR COMPANY OF CANADA, LTD., WINDSOR, ONT.

The Good

MAXWELL

Those who drive it already know, and the general public is gradually learning, that the quality of materials in the good Maxwell, and the manufacturing processes employed, are far above those used even in the best of cars appealing to the same public.

A quick way to prove this is to compare the things which meet the eye —exterior finish, accessories and appointments—with the same items in cars which cost a great deal more.

Cord tires, non-skid front and rear; disc steel wheels demountable at rim and at hub; drum type head and parking lamps; windshield cleaner; rear-view mirror; Alemite lubrication; unusually long springs; broadcloth upholstery; clutch and brake action, steering and gear shifting, remarkably easy. Prices F. O. B. Detroit, Revenue Tax to be added. Touring, $885; Roadster, $885; Club Coupe, $985; Sedan, $1335; Four Passenger Coupe, $1235

MAXWELL MOTOR CORPORATION, DETROIT, MICH.
MAXWELL MOTOR CO. OF CANADA, LTD., WINDSOR

The Good

MAXWELL

Five-Passenger Sedan

The admiration for the extraordinary beauty and grace of the good Maxwell has deepened, everywhere, into sincere respect.

Every community now knows—through the medium of the tens of thousands of owners of the new series—that the good Maxwell is all that its great beauty promises.

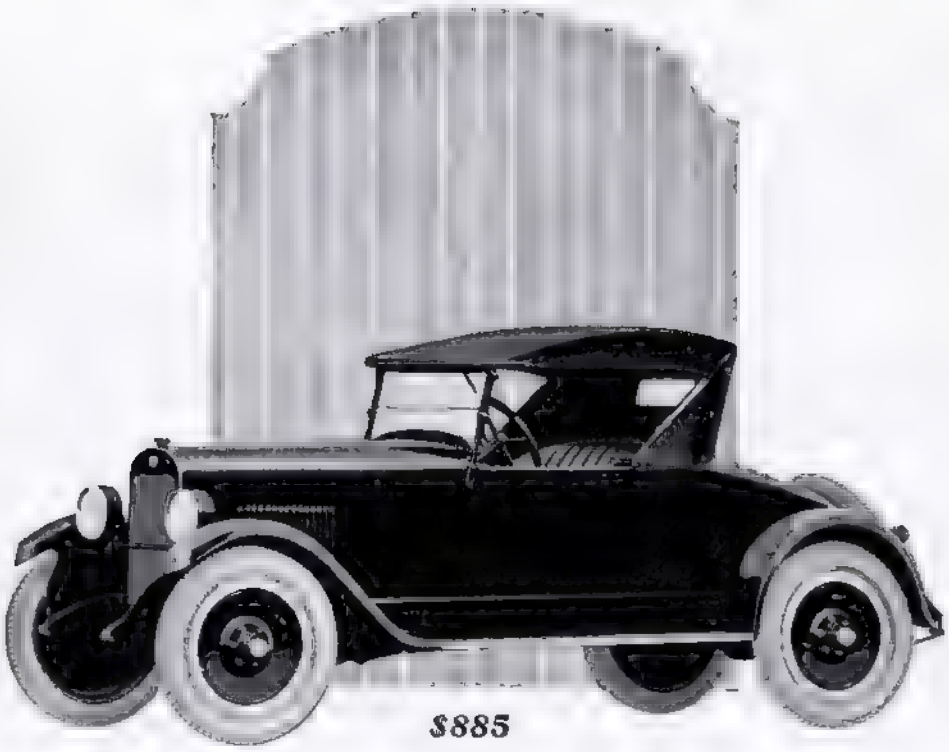
Not only in the thorough quality of its body-work and its fittings; but in the endurance, economy and comfort, the robust reliability and fine performance, which are unusual in the average car of its price.

Cord tires, non-skid front and rear; disc steel wheels, demountable at rim and at hub; drum type head and parking lamps; windshield cleaner; rear-view mirror; dome and instrument board lights; Alemite lubrication; motor-driven electric horn; unusually long springs; deep, wide, roomy seats; broadcloth upholstery; clutch and brake action, steering and gear shifting, remarkably easy

MAXWELL MOTOR CORPORATION, DETROIT, MICH.
MAXWELL MOTOR CO., OF CANADA, LTD., WINDSOR, ONT.

The Good

MAXWELL



$885

Splendid reliability, satisfying comfort, unusually fine performance, notable savings in operation—all are now definitely established as the outstanding attributes which the new organization is building into the good Maxwell.

Cord tires, non-skid front and rear; disc steel wheels, demountable at rim and at hub; drum type lamps; Alemite lubrication; motor-driven electric horn; unusually long springs; deep, wide, roomy seats; real leather upholstery in open cars, broadcloth in closed cars; open car side curtains open with doors; clutch and brake action, steering and gear shifting, remarkably easy; new type water-tight windshield. Prices F. O. B. Factory, revenue tax to be added: Touring Car, $885; Roadster, $885; Coupe, $1385; Sedan, $1485.

NERACAR

"MOTORING ON TWO WHEELS"

ACTION so smooth and smart it gives you a sense of flying. Control so easy and simple that you learn in five minutes.

Get into the outdoors in a spirit of play. Know the blood-tingle, the exhilaration, the vigor that comes with NERACAR riding.

Men and women, boys and girls, ride in any clothes. Broad mud-guards keep off dust. No bar to straddle—step in from side. Feet on ground at start and stop.

Low and light. Wonderfully steady and easy to handle because the weight, approximately 175 lbs., is centered close to the ground.

Simple, safe, and trouble-proof in anybody's hands. 5-speed friction drive, shifted by convenient lever, engaged and disengaged by a quarter turn of left grip no gears or clutch.

35 miles an hour. Takes hills smoothly. 85 to 100 miles to the gallon. This makes motoring cheaper than street cars.

Explore your country on a NERACAR—ramble along new paths and trails inaccessible with ordinary vehicles. Enjoy the woods and streams. Take this handy little car along on your vacation. Ride it or express it and have it waiting for you.

Write for descriptive folder.

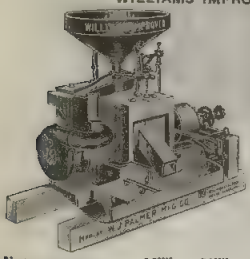
BURR GRINDING MILLS

These mills have especially designed ball-bearing to prevent heating. They are well lined with babbitt and fitted with compression grease cups. The mill stones or burrs used are of the pearl flint grit which is the best burr known for grinding grain for table use. The burrs are very hard and flinty, yet they are of a fine, tough, even texture, which will dress or sharpen to the best degree of evenness, thereby rendering them very much suited for fine, soft grinding.

WILLIAMS IMPROVED



With Blower.

Designed with special care, so as to leave as little meal as possible in the mill after grinding. This is obtained by two fans being attached to the runner stone. These fans draw a current of cool air between the bed and the runner stones while the mill is in operation, keeping the meal cool and cleanly blown out.

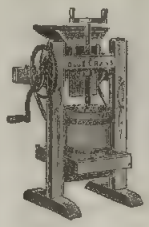
WOOD ROLL CIDER MILLS

—BLUE GRASS—

Frames are of hardwood, varnished and striped; tubs are of wood staves, natural finish, riveted to japanned iron bands; straw color hoppers. The rolls are of hardwood, fitted with high carbon steel cutters; steel press screw; gearing is heavy and easy running.



—BLUE GRASS—BANTAM

Height over all 40 in.; tub 12x10 in.; hopper 12x14 in.; press screw 1¼ in. in diameter; floor space 20x23 inches.

For grinding and pressing grapes for wine, and for all small fruits, this mill has ample capacity for general use.

Each

No. BG10B—Capacity ¼ to 1 barrel per day ✣$63 00

Shipped loose, set up; weight 119 lbs.

—BLUE GRASS—JUNIOR

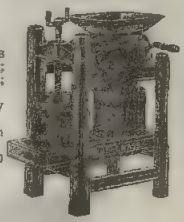
Height over all 40 in.; tubs 12x10½ in.; hopper 16x14¾ in.; press screw 1¼ in. in diameter; floor space 20x34 inches.

Designed especially for family use.

Each

No. BG1J—Capacity 2 to 4 barrels per day ✣$88 50

Shipped loose, set up; weight 172 lbs.



—BLUE GRASS—MEDIUM

Height over all 42 in.; tubs 12½x13½ in.; hopper 15½x19 in.; press screw 1½ in. in diameter; floor space 22x35 inches.

Each

No. BG2M—Capacity 3 to 6 barrels per day ✣$114 00

Shipped loose, set up; weight 253 lbs.

—BLUE GRASS—SENIOR

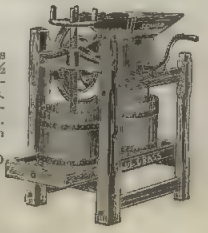
Height over all 45 in.; tubs 15x15½ in.; hopper 18½x21½ in.; press screw 2 in. in diameter; floor space 29x45 inches.

Designed for use where considerable capacity is required.

Each

No. BG3S—Capacity 6 to 10 barrels per day ✣$147 00

Shipped loose, set up; weight 367 lbs.



✣F. O. B. Ohio Factory Only.

CIDER MILLS

BELKNAP SPECIAL

Adapted for grapes and small apples—large apples must be cut or quartered. Hopper enclosed and grinding mill made heavier than other mills of this style. Painted red with japanned castings. Height over all 46 inches; tub 11x11 inches inside. hopper 7x9 inches at top, press screw 1¼x1¹¹⁄₁₆ inches, diameter of crank wheel 16 inches; uprights 5x1¼ inches at bottom, 3½x1¾ inches at top; floor space 20x24 inches.

Each

No. 08S—Capacity ½ to 1 barrel per day..... $48 00

Shipped loose; weight each 115 lbs.

CYCLONE

Frame nicely finished, tub natural wood stave, riveted to japanned iron band; height over all 46 inches; tub 11x11 inches inside; hopper 7½x9 inches at top; press screw 1½x26½ inches; diam. fly-wheel 16 inches; uprights 5½x1¾ inches at bottom, 4½x1¾ inches at top; floor space 20x28 inches.

Each

No. 10C—A first class single tub cider mill and wine press for family use; capacity 2 to 3 barrels per day $54 00

Shipped loose; weight each 136 lbs.

Frame varnished, natural wood finish with neat red stripes; tubs natural wood; castings japanned finish.

An excellent mill for family use. Substantially built of first quality material throughout and a high grade mill in every respect.

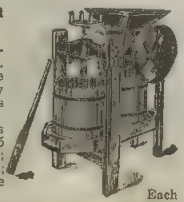
No. 18S—Belknap's Special Junior, Steel Roll; capacity 2 to 4 barrels per day; height over all 42 inches; tubs 10x10¾ inches; hopper 12x13½ inches; press screw 1½x18½ inches; diameter fly-wheel 18¼ inches; posts 36x2½x2¾ inches; floor space 34x20 inches; weight each 130 lbs..... Each $81 00

No. 28S—Belknap's Special Medium, Steel Roll. Capacity 3 to 6 barrels per day; height over all 48 inches; tubs 10x10½ inches; inside hopper 14x14 inches at top; press screw 1½x21 inches; diameter of fly-wheel 19 inches; post 40x3¾x2¾ inches; floor space 35x22 inches; weight each 260 lbs..... 108 00

Shipped loose.

BELKNAP SPECIAL SENIOR

Steel Rolls.



Hardwood frame, varnished natural wood finish with black stripes. Steel rolls and press screw; large hopper; gearing heavy and easy running; tubs natural wood staves riveted to japanned iron bands.

Height over all 48 inches; tubs 17x14¾ inches; hopper 17x15 inches; press screw 2 x22 inches; diameter fly-wheel 23 inches; posts 46x5x2¾ inches; floor space 45x30 inches.

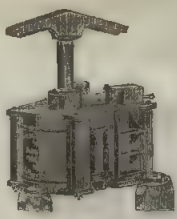
Each

No. 38S—Capacity 6 to 8 barrels per day... $144 00

Shipped loose; weight each 415 lbs.

CANE MILLS

—BLUE GRASS—Three Roll.



Held together by four main bolts, which make them more rigid than a mill with three bolts.

The cog gearing is cast separate from the rollers, and is made very heavy, with two clutches on each wheel, which fits into two corresponding ones in each roller.

Both top and bottom journals run in brass boxes, making the mill work smoothly and easily.

All steel shafts with turned bearings, rollers turned with serrated faces, enabling a regular and constant feed to be maintained.

The main rollers are flanged at top and bottom, preventing the cane from passing either up or down. Feed-guide furnished with each mill, made so that the full length of the roller can be used.

The gearing is encased preventing it from being clogged, and making it entirely safe to the operator.

Angle or incline yoke can be supplied as desired. With the angle yoke bolts are furnished to attach to sweep. Bows are furnished for the incline yoke.

The oiling is done by means of horizontal oil ducts for the lower journals, avoiding the mixing of oil with the juice.

DIRECTIONS FOR OPERATING CANE MILLS

In order to successfully operate a cane mill it must be rigidly secured in position, properly adjusted, oiled freely, bolts kept tight and fed regularly.

1. The mill must be level and rigid. To secure it in position, posts six feet long, set three feet in the ground, thoroughly braced, and the earth rammed very hard around them, or a heavy frame of timber properly joined together and staked to the ground, offers a good support. Whatever the means the mill must be level and rigid.

2. To secure a proper adjustment. Adjust the rolls parallel to each other, the feed-roll from one-quarter to one-half inch from the main roll; the other should slightly touch the main roll when empty; after trial, the proper adjustment can be made. Do not try to force the set-screws up when there is cane in the mill.

3. Oil regularly and freely. The vertical mills have oil tubes passing down through the rolls, and by using fluid lard oil freely on the upper journals the oil flows to the lower journals; see that these tubes are kept open, and the oil is applied regularly and freely. Never use mineral oils on a cane mill.

4. Feed evenly and constantly. Use the feed box, and in addition place a board about three feet long on a level with the bottom plate, to rest the cane on as it enters the mill. Feed butts foremost.

5. Keep all the bolts screwed up tight. Owing to the constant wrenching of the mill the stay bolts are liable to become loosened, and this throws the mill out of line, and the cogs begin to cut and the mill runs hard. One hour's use in this way is more destructive than a whole season's use if properly cared for.

TRICYCLES

—BLUE GRASS—

Tubular Ball-Bearing.

Frame made of 18 gauge seamless steel tubing. Wheels made up with bicycle spokes and fitted with 1 inch cushion rubber tires. Handle fitted with leather wrapped grips. Rear axle of ⅝ inch cold drawn steel; seat adjustable for height by a thumb screw adjustment. Seat, back rest and arm rests upholstered in maroon leatherette. LANCHAS, REMOLCADORES, Etc.

YEARS of wood boat construction and continual and varied experience in the output of Motor Launches for every part of the world, enables us to offer any type of motor-propelled vessel up to 80 ft. in length in wood, or we are prepared to submit tenders for wood vessels driven by steam or by semi-Diesel engines not of our construction.

Prices will always be quoted on receipt of enquiries.

A few types of vessels continually being turned out from our Yard are illustrated below and on the next page.

La pratique acquise au cours de nombreuses années, dans la construction de bateaux en bois ainsi que des expériences continuelles et variées dans la fabrication de canots automobiles destinés à tous les pays du monde nous permettent de fournir tous types de bateaux en bois à propulsion par moteur, jusqu'à une longueur de 24 m. Nous sommes également disposés à remettre des offres pour la fourniture de bateaux en bois, actionnés par machines à vapeur ou semi-Diesel, de fabrication autre que nos propres machines.

Nous remettrons toujours nos offres dès la réception des demandes.

Nous représentons ci-après et aux pages suivantes, quelques modèles de bateaux continuellement fabriqués dans nos chantiers.

Los muchos años que llevamos construyendo barcos de madera y la continua y variada experiencia lograda en la producción de Lanchas á motor para todas las partes del mundo nos habilitan para poder ofrecer cualquier tipo de barco accionado á motor hasta de 24 m. de largo en madera; estamos también dispuestos á someter propuestas para barcos de madera impulsados por máquinas á proa ó del tipo semi-Diesel; pero no de nuestra construcción.

Al recibo de consultas, cotizaremos siempre precios.

Algunos de los diversos tipos de barcos construidos en nuestros astilleros, los representamos en ésta y en las siguientes páginas.

SOLID SOCKET PEAVIES

Select Rock Maple Handle, Duck Bill Hook.

Solid sockets, made from best malleable iron, 2½ in. in diameter. They have all the strong points and are of latest improved patterns. Standard size peavies have hand hammered duck bill hooks made from ⅝×7/16 in. crucible steel and picks of 7/16 in. steel. Bolts are steel 1⅝×7/16 in. In the 2¾ in. peavies the hooks, picks, etc., are proportionately heavier.

TELEPHONES

"CHICAGO DE LUXE"

Chicago De Luxe bridging telephone represents a distinct advance in the art of manufacturing magneto telephone apparatus. It embodies all the latest and best features in telephone construction, is encased in the popular extra compact cabinet of improved design, finished in hand rubbed quarter sawed golden oak. It is handsome in appearance, durable, efficient and absolutely reliable. The wiring is simplified so that each circuit may be easily traced. The connections between the cabinet and door are made by soldering the tinned copper wire to specially designed hinges, insuring positive and permanent contacts. Bipolar lightning arrester is a part of the regular equipment of each telephone, and has proved so dependable that we guarantee our telephones against damage by lightning, providing they are properly installed in accordance with printed instructions enclosed in each telephone. Line binding posts are regularly mounted outside; when desired they will be mounted inside the cabinet.

Specifications: Bridging generator; long pattern bridging striker; short lever automatic switch; platinum contacts; genuine solid back long distance transmitter; adjustable transmitter arm; long distance induction coil; bipolar receiver and cord; two cells dry battery; bipolar lightning arrester; quarter sawed oak cabinet with real piano finish.

Style A telephones are regular bridging code signal, party line instruments

Style B telephones are equipped with low capacity "ring-through" condensers in secondary circuit. Will ring last telephone on line with receivers of every intermediate telephone removed.

Style C telephones are equipped with direct current generators to throw drop at central without ringing other telephones on same line. Other telephones cannot be signaled by this style instrument.

Style D telephones are equipped with "secret-ring" push buttons to ground generator. When installed on metallic circuit with proper equipment at Central will ring other telephones on same line by code signal without calling Central; or by using push button will call Central without ringing other bells on the line.

Style E telephones are equipped with "secret-ring" push buttons for producing either direct or alternating current (a combination of Styles A and C). Can be used on either ground or metallic circuit.

No.	Style *A	*B	*C	D	*E	Generator	Ringer
18	....	....	....	....	....	Five bar	1000 ohm
19	....	....	....	....	....	Five bar	1600 ohm
20	....	....	....	....	....	Five bar	2500 ohm

Prices on application

When ordering affix to the number the letter indicating style, etc.

*Not carried in stock; will ship from factory

TELEPHONES

CHICAGO DESK SETS

Style A Chicago desk set has standardized equipment; it has the same transmitter, receiver, induction coil, generator ringer and lightning arrester as the wall type instrument. The generator, ringer movement, induction coil and lightning arrester are mounted in a neat compact magneto box, quarter sawed golden oak finish, 8x5x4½ inches. This arrangement allows the use of a three conductor cable, which is more flexible and less liable to kink and wear than the four, five or seven conductor cables.

The desk stand is constructed of seamless tubing, finished in black by a new process which prevents the finish from flaking off. The head to which the transmitter is attached is permanently fastened to the interior shaft. The hook switch is mounted on the shaft and is very simple and positive in operation. Hard rubber insulations are used throughout. The receiver cord and cable are of best quality copper tinsel, covered with a heavy green moistureproof silk braid. The bipolar lightning arrester is a part of the regular equipment, and is guaranteed against damage by lightning.

No.	Generator	Ringer
75A	Five bar	1600 ohm
*76A	Five bar	2500 ohm

Prices on application

TELEPHONE EXTENSION BELLS

Can be used in connection with any standard make of telephone. The resistance of the extension bell should be the same as the resistance of telephone with which it is used; that is, a 1600 ohm bell should be used with a 1600 ohm telephone. Ringer enclosed in a quarter sawed oak case, golden oak finish.

No.	Resistance, Ohms

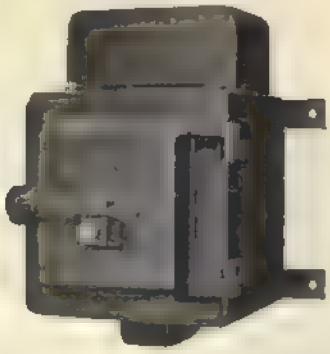
*MINE-A-PHONES



Mine telephone systems usually consist of several instruments connected to one pair of wires forming a party line. Local battery magneto telephones are used and signaling is done by code rings. Severe conditions encountered underground due to moisture, gases, acidulated water, etc., make it necessary to provide unusually well protected telephone instruments for this service. For use above ground, such as the engine-room, superintendent's office, etc., standard wall or desk type instruments can be used unless placed in exposed places. When the mine system requires more lines than one they should terminate in a switchboard located at some central point.

Mine-a-Phones are enclosed in black enameled cast iron cases doubly protected from moisture, acid fumes and gases by two iron doors. Outer door is fitted with a tubular rubber gasket extending around its inside bearing surface. When door is closed and latched the case is made air and watertight. Inner door equipped with a broad felt gasket to exclude the moisture. Gongs are 4 inches in diameter, give a clear loud signal and are protected by a cast iron hinged cover. Equipped with a five bar hand generator powerful enough to ring 40 telephones connected across the same line. All interior wiring and parts are heavily covered with insulating material to avoid short circuits. Two standard sized dry cells are mounted inside the case and are securely held in place by a spring retainer.

No.	Generator	Ringer	Weight Pounds
890-I.....	5 bar	1600 ohms	80

Prices on application

*SWITCHBOARDS

Write for special catalog on switch boards

Prices quoted on application

Illustration shows board equipped with 100 drops and jacks, 25 ringers and jacks, and 15 cord circuits.

When writing for quotations on switchboards, specify which board is preferred and indicate the number of lines which will be connected to the board when it is installed, and state whether the lines are party or individual lines, or, if both, the number of each. Also state whether or not a distributing board and lightning arrester is wanted, and, if so, for how many lines, and whether they are ground or metallic circuit.

*Not carried in stock; will ship from factory

TELEPHONE WIRE

Extra Double Galvanized B. B.

Used mostly by telephone and telegraph companies and in railway telegraph service. Stand a good mechanical test. The mile ohm is from 5500 to 5800.

E. A. WARNING SIGNALS

Warning Signals offer the widest selection of automobile warning signals, for in the many models will be found a horn adaptable to any style and size of car or truck.

Attractive design, strength of materials and reliable workmanship are the strongest features embodied in their construction, and every horn is carefully made and assembled under expert supervision. All parts are made interchangeable.

Are tested under conditions that will never be experienced while in service. The manufacturers absolutely guarantee materials, construction and workmanship.

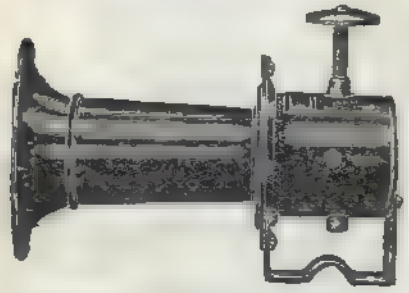
Furnished as regular equipment on a number of the standard automobiles and trucks.

Finish—"All Black" and are supplied in this manner unless otherwise specified.

Brackets—Equipped with brackets as illustrated.

Voltage—Wound for 6 volts, and supplied with wire and push button, ready for installation. Special voltage can be supplied at additional cost.

HAND OPERATED

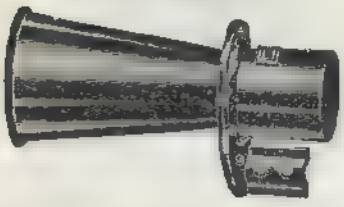


Noted for simplicity of design and construction. With slight pressure on plunger, a strong and commanding warning note is produced.

No. T6055—Length 9¼ in., diameter 5 in., w't each 3½ lbs. ..each $4.70

ONE IN A BOX

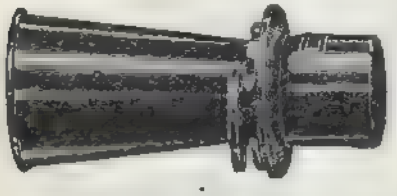
MOTOR DRIVEN



Under the Hood Type, the achievement of fifteen years' experience in the manufacture of the best warning signals that can be produced.

No. T6056—Length 10 in., diameter 5 in., w't each 4 lbs. ....each $8.00

ONE IN A BOX



Under the Hood Type. Extra large horn with a deep penetrating warning, easily heard for long distances.

No. T6058—Length 12 in., diameter 6 in., w't each 6¾ lbs. ..each $14.70

ONE IN A BOX

MOTOR DRIVEN

FOR FORDS

Built special to fit all Ford cars equipped with 6 volt batteries.

Finished in black, equipped with brackets as illustrated, ready for installation.

Not furnished with wiring. Wiring is already on Ford Cars.

No. T6057—Length 10 in., diameter 5 in., w't each 4 lbs. ...each $8.00

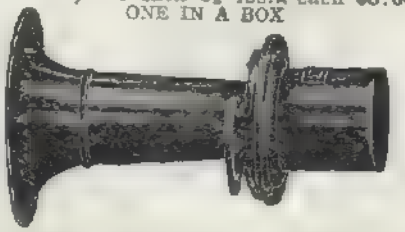
ONE IN A BOX

Torpedo model for attachment to outside of the car.

Extra large horn with a deep penetrating warning, easily heard for long distances.

No. F6059—Length 11 in., diameter 6 in., w't each 6¾ lbs.★ each $8.00

ONE IN A BOX



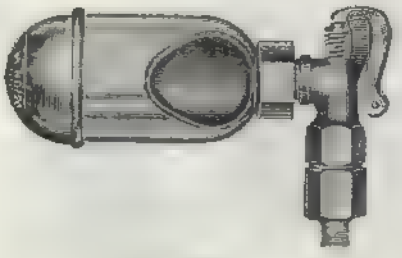
Large bell shaped model for attachment to outside of car.

Extra large horn with a deep penetrating warning, easily heard for long distances.

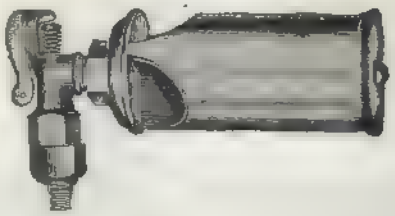
No. F6060—Length 12 in., diameter 6¾ in., w't each 6¾ lbs.★ each $8.00

ONE IN A BOX

BUELL EXPLOSION WHISTLES



No. 6070.



No. 6071.

A powerful, practical and perfect warning device, fits in priming cup opening, thereby getting the explosion direct instead of through the exhaust valves. It can be installed on practically all cars without any other parts. On engines not fitted with priming cups such as the Ford, a special spark plug with an opening on the side to accommodate the whistle is furnished.

No. 6070—Single tone, whistle complete, ready for installation, w't, each 1 lb. .....each $6.70

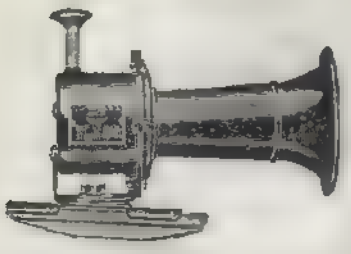
No. 6071—Chime tone, whistle complete, ready for installation, w't each 1 lb. .....each $9.30

No. 6072—Special Spark Plug for use on engines not having priming cups, w't each 10 oz., extra, each $1.30

ONE SET IN A BOX

★ Items Marked Thus ★ Are Shipped from Factory Only.

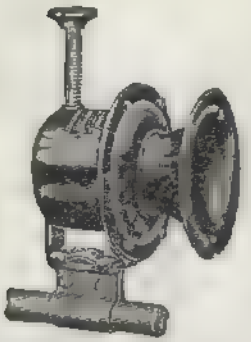
STEWART HAND-OPERATED WARNING SIGNALS



One push of plunger creates 192 distinct sound impulses—more than any other signal. This, together with its exclusive, large-sized vibratone steel diaphragm, accounts for the Stewart's wonderfully effective warning. No matter how installed, signal can always be pointed straight ahead.

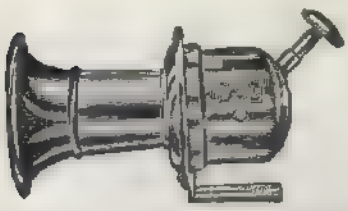
No. T6034—114—Double-supporting adjustable bracket and is self-lubricating. Finished in black enamel, w't each 5 lbs. .....each **$6.68**

ONE IN A BOX



No. T6038—115—Finished in black enamel with nickel plated bell, complete with brackets, w't each 4 lbs. .....each **$6.68**

ONE IN A BOX



This model is efficient in results. The push rod is set at a forty-five-degree angle, making possible a simplification of interior mechanism. One stroke of the plunger creates 84 sound impulses. It has a vibratone steel diaphragm.

No. T6036—151B—Black enamel finish, complete with bracket, w't each 3½ lbs. .....each **$4.68**

ONE IN A CASE

STEWART MOTOR-DRIVEN WARNING SIGNALS

A slight pressure on the large push button sends out a flood of commanding sound waves.

It is economical in current consumption. Brushes are large, rear bearing provided with ball thrust, shaft can never get out alignment, felt-packed oil well gives perfect lubrication.

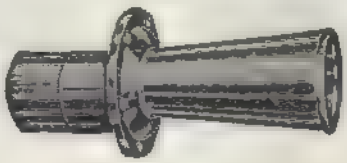
Has one-piece, seamless projector and back-cover. No solder, parts are riveted and bolted. Finished in hard-baked black enamel. Variety of brackets to fit any car. Outfit includes bracket, push button, terminals and five feet of double-strand electric cord, w't each 7 lbs.

No. F6039—136E—**For Underhood installation★** .....each **$11.34**

No. F6040—136C—**For Outside Installation★** .....each **$11.34**

ONE IN A BOX

Specify Make, Year and Model of Car When Ordering.



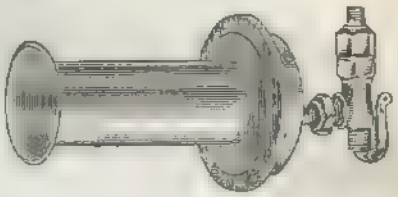
Motor is Stewart-built and embodies a new, improved design of magnetic circuit. Armature is large, gives greater power with less current, diaphragm is made of high grade tempered steel.

This new model is slightly smaller than the DeLuxe Stewart Motor-Driven Signal, No. T Model 136, being two and one-half in. shorter in length and having a diaphragm half a inch less in diameter.

No. F6041—163D—For Underhood installation, complete with bracket, push button, terminals and five feet of electric cord, w't each 3 lbs., each★ **$8.68**

ONE IN A BOX

BUELL TURBO HORNS



FOR ALL PASSENGER CARS AND MOTOR TRUCKS

The Buell Turbo Horn is made of aluminum and is a distinctive new type of warning signal utilizing the explosion pressure through priming-cup opening in cylinder head, using the same valve mechanism as the Buell Explosion Whistles.

The high pressure gas of the explosion is used to operate a small turbine which carries a cam engaging a diaphragm, as used in the motor-driven electric horn, the Buell Turbo Horn takes its mechanical power direct from the explosion of the cylinder instead of the devious circuit through engine, generator, battery and electric motor, each with its considerable loss of efficiency in transmission of power.

There is but one moving part in the Buell Horn, making it a signal with the maximum certainty of operation.

Comes complete with valves, steering wheel lever and enclosed wire control, 4½x7 in. over all.

(Less Spark Plug) When Spark Plug is wanted order our No. 6072-½ in.

No. 6073—⅜ in. pipe thread, w't each 2 lbs.....each **$11.70**

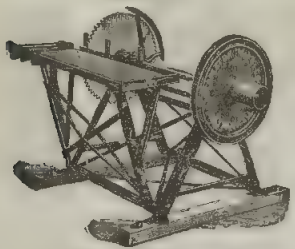
WOOD SAWING MACHINES

APPLETON



Steel Frame with Tilting Table.

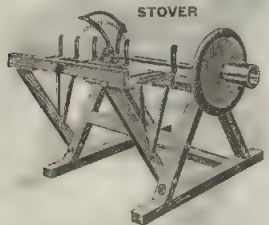
Frame is of angle steel, strongly bolted and firmly braced. The saw arbor is a piece of lathe turned steel 4 ft. 4 in. long and 1½ inches diameter. It is turned down to 1⅝ inches for the saw blade, and to 1⅞ inches for the balance wheel, pulley and boxes. Boxes are of ball and socket type, well babbitted, dust proof, non-heating and self-adjusting. The tilting table has a roller at one end to accomodate long poles. Interchangeable balance wheel and pulley. Frame is equipped with a saw guard.

Frame is arranged to receive the blade to the left of the operator, but if so ordered it can be arranged without extra charge to receive the blade to the right of the operator.

No. 1—Without blade; takes blades from 20 to 30 inches diameter; pulley 5x6 inches; speed 1000 to 1500 R. P. M.; power required to operate 2 H. P. gasoline engine or electric motor; distance between balance wheel and blade 3 ft. 6 inches ..... Each ✦$90 00

Shipping weight each 265 lbs.

STOVER



Wood Frame with Tilting Table.

Frame is well seasoned hardwood of ample size and weight to insure great strength, mortised, bolted and firmly braced. The saw arbor is a piece of lathe turned steel, 4 ft. 4 in. long and 1½ inches diameter. It is turned down to 1⅝ inches for the saw blade, and to 1⅞ inches for the balance wheel, pulley and boxes. Boxes are of the ball and socket type, well babbitted, dust proof, non-heating and self-adjusting. The tilting table has a roller at one end to accomodate long poles. Interchangeable balance wheel and pulley. Frame equipped with a saw guard.

Frame is arranged to receive the blade to the left of the operator, but if so ordered it can be arranged without extra charge to receive the blade to the right of the operator.

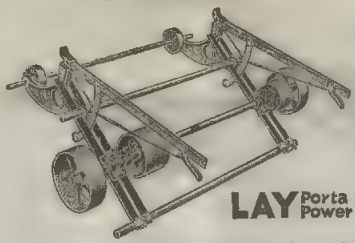
No. 2—Without blade; takes blades from 20 to 30 inches diameter; pulley 6x6 inches; speed 1000 to 1500 R. P. M.; power required to operate 2 H. P. gasoline engine or electric motor; distance between balance wheel and blade 3 ft. 6 inches ..... Each ✦$69 00

Shipping weight 874 lbs.

Note—For circular saw blades see Dept. 1.

✦F. O. B. Illinois Factory Only.

LAY PORTA POWER



A wonderful new farm implement which quickly transforms practically any make of automobile into a portable power plant.

It is universally adapted to operation in connection with practically any small size car. However, with the Ford car, in connection with which it is most commonly used, from six to seven Horse Power at the belt is about the maximum that should be developed.

With Lay Porta power attached to the car such machinery as the wood saw, grinding mill, hay press, pump, corn sheller, etc. can be successfully operated.

(Fig. 1)

After the car is backed into suitable position, the Lay Porta Power is pushed beneath the rear of car as shown in the accompanying illustration (Fig. 1), one foot resting on the base.

The hand clasps control the quadrant, are pressed in, and the handles pushed down. This jacks the car up and pulls it back until tires make contact with rollers. It is locked in this position (See Fig. 2).

(Fig. 2)

(Fig. 3)

Rear of car is now off the ground, the axle resting securely in the pockets on the end of each handle of the Lay Porta Power (See Fig. 3). Everything is firmly held in place, and the outfit now ready for belt application.

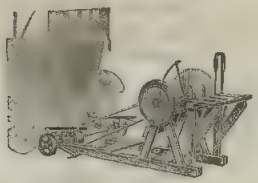
Each

No. LP100—Size pulleys 6x4 and 10x6 inches ..... ✦$79 50

Shipping weight each 180 lbs.

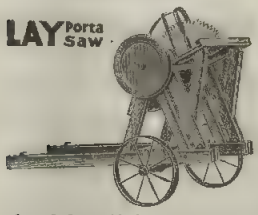
✦F. O. B. Indiana Factory Only.

LAY PORTA POWER ATTACHMENTS



The above illustration shows how attachments are used with the Lay Porta Power. The operation is extremely simple and requires but very little time to connect.

LAY PORTA SAWS



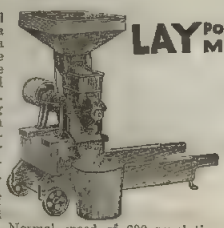
A well made and thoroughly inspected saw, furnished with 26 inch blade and 10 inch pulley.

Furnished complete with necessary belting.

	Each
No. PS10—Truck type, with wheels	✦$135 00
No. PS12—Stationary type, without wheels	✦ 105 75

Crated; shipping weight each 285 lbs.

LAY PORTA MILLS



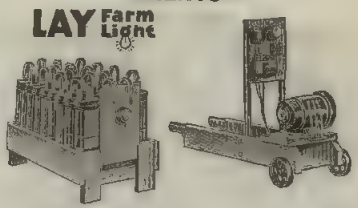
Especially designed to run with Lay Porta Power. The Porta truck means that the implement can be moved with ease, and is instantly attachable. Duplex type, having two sets of 6 inch burrs. Burrs designed with genuine shear cut construction giving greater capacity. Grain ground is uniform quality, hulls of oats chopped instead of remaining whole. Normal speed of 600 revolutions per minute. Furnished complete with necessary belting.

	Each
No. PM20—Capacity 20 to 25 bushels of ground grain per hour; 10 inch pulley	✦$90 00

Shipping weight each 275 lbs.

✦F. O. B. Indiana Factory Only.

LAY PORTA POWER ATTACHMENTS



Designed to be driven by Lay Porta Power, although it may be driven by an ordinary gasoline engine if desired.

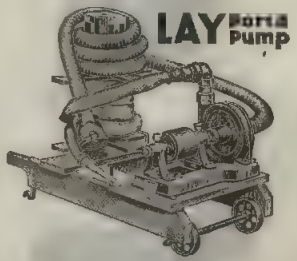
Lay Farm Light consists of a battery composed of sixteen cells of the highest type of storage batteries, made in glass jars, all mounted and assembled in a wooden battery box, together with a volt meter and a set of main terminals, connected to the generator unit.

The generator unit consists of the generator, a switchboard on which is mounted an automatic reverse current relay, an ammeter, fuse and instruction card, all assembled on the convenient Lay Truck so that it can be wheeled about.

Furnished complete with necessary belting. Each

No. FL5 -Designed to give ample current to light a large house, barns and operating various electrical devices. Batteries in a fully charged condition have a capacity of 3600 watt hours. This means that it would operate a 20 watt lamp 180 hours; 2 lamps 90 hours or 8 lamps for 20 hours; 12 inch pulley ✦$641 65

Shipping weight each 705 lbs.



Designed to be operated by Lay Porta Power. It may however be run by an ordinary gasoline engine.

Centrifugal type, for use in irrigating, fire protection and general water supply. Will elevate water in a pipe to a height of 60 feet, or will throw a stream of water from a hose over the top of any barn or farm building. Mounted on a two wheel truck so it can be wheeled around the farm or hitched to the rear of the car and hauled any distance. This is not a deep well pump, and is intended for use only where a large supply of water is available, and the suction or distance from pump to water does not exceed 16 to 18 feet.

Each outfit is equipped with a hose reel, which takes care of both suction and discharge hose. Hose not furnished with pump. Size hose used with this outfit, 2 inch suction, 1½ inch discharge, all connections are iron pipe thread. Always use foot valve or strainer on end of suction hose. Each

No. PP15—Capacity 75 to 80 gallon per minute. Furnished with belt ✦$146 25

Shipping weight 150 lbs.

✦F. O. B. Indiana Factory Only.

ONE IN A BOX

NEW COLONEL 1.62

No. 162C—Sinker, meets all the requirements of the U. S. Golf Assoc., medium size, w't 1.62 ozs., or 29½ pwt. .....per dozen **$13.00**

ONE IN A BOX

DUNLOP GOLF BALLS

Unexcelled for distance, accuracy and long life. The center is made of moulded rubber. It is not forced into spherical shape and hence has no tendency to become distorted. The center of gravity stays at the ball center and the ball holds its shape. These balls keep their paint and accuracy under the hardest service.

NEW DUNLOP 162

No. 162D—Sinker, meets all the requirements of the U. S. Golf Assoc., medium size, w't 1.62 ozs., or 29½ pwt. .....per dozen **$17 5**

U. S. GOLF BALLS

"They play well—they wear well." These golf balls are certified as complying with the limitations established by the United States Golf Association.

Standard and Official. Not only is the Royal 30-X the longest driving ball but it has a tough and durable cover and the paint is practically indestructible.

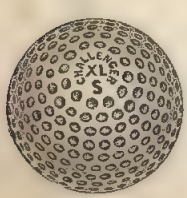
No. 30X—U. S. Royal, sinker, recessed marking, size 1.62 inches in diameter, w't 1.62 avoirdupois oz., per dozen $12.50

No. 20—U. S. Revere, sinker, recessed marking, size 1.62 inches in diameter, w't 1.62 avoirdupois oz., per dozen $11.40

No. 27—U. S. Floater, recessed marking, size 1.70 inches in diameter, w't 1.44 avoirdupois oz., per dozen $10.00

ALL ABOVE ARE ONE DOZEN IN A BOX

GOLF BALLS



CHALLANGER

Internationally reconized as one of the best yet produced scientifically constructed with the weight so distributed as to insure a long carry and easy control. An extremely durable ball. Furnished in Dimple markings.

No. 12—Sinker, made to conform to standard specifications, size 1.62 in. in diam., w't 1.75 avoirdupois oz., per dozen $13.20

REX

A durable and generally satisfactory ball for those not caring for the higher powered balls. Furnished in Dimple marking only.

No. 11—Sinker, made to conform to standard specifications, size 1.62 in. in diam., w't 1.75 avoirdupois oz., per dozen $11.00

X-RAY REFLECTORS

X-Ray Reflectors are the most powerful reflectors made. They are of a high grade glass, heavily plated with pure silver which is protected by a special green backing which will not peel, crack or blister. It is because of this powerful reflecting quality that they are standard for show window lighting all over the world.

JUPITER

For 100 watt Mazda Type "C" gas-filled lamp.

The JUPITER is a powerful concentrating reflector which will perfectly illuminate windows whose height equals about twice their depth. It has similar dimensions to the JOVE reflector and uses the same shade holder. Hence, when used together alternated they make a neat appearance in the window. They are made as small as possible to secure proper results.

Install in windows 10 to 15 ft. high and one-half to two-thirds as deep.

No. 610E—Width 10 in., depth 10¾ in., height including neck 7⅞ in., holder 3¼ in., form "A,"
each, reflector only $6.00

TWELVE IN A STANDARD PACKAGE
WEIGHT 35 LBS.

BEEHIVE

For 75 watt Mazda "C" lamp.

(Also may be used with 25, 40, 50 and 60 watt Mazda "B" lamps by using 2¼ in. form "O" holder).

A small distributing X-Ray reflector of pleasing lines, principally adapted for localized lighting, such as drop cord and bench lighting in shops, over counters and work tables, and for general illumination from comparatively low ceilings, as, for instance, bowling alleys, basements, store rooms and corridors.

No. 535E—Diam. 5⅜ in., 2¼ in. holder, form "H," height 5¼ in.,
each $2.00

TWENTY-FOUR IN A STANDARD PACKAGE. WT 18 LBS

BEEHIVE

For 100 watt Mazda "C" lamp.

A popular reflector for the 100 watt Mazda "C" lamp. It effectively conceals the lamp and gives a broad light distribution. A special system of spiral and vertical corrugations produces a practically even and well distributed light, eliminating all streaky effects.

No. 570E—Diam. 7⅛ in., 3¼ in. holder, form "A," height 6¼ in.,
each, reflector only $3.50

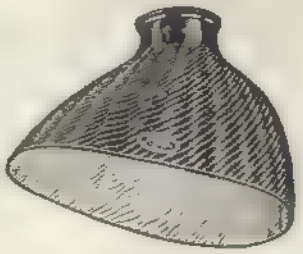
SIXTEEN IN A STANDARD PACKAGE
WEIGHT 32 LBS.

Our reputation founded on over sixty-seven years' business stands back of the OHB brand.

All goods branded OHB are guaranteed to be of highest quality material and workmanship and free from imperfections.

In selling OHB articles there is a profit for you and satisfaction to your customers.

JOVE



For 100 watt Mazda Type "C" gas-filled lamp.

The JOVE is a scientifically correct window lighting reflector with high temperature backing, designed especially for use with a 100 watt Mazda "C" lamp. This reflector and lamp gives the highest intensity of uniform store window illumination ever produced with 100 watts. Its shape completely hides the intensely bright filament and the special corrugations properly break up and distribute the light.

The JOVE has been designed for windows of average proportions, those whose height is one to one and one-half times their depth.

No. 600E—Width 10 in., depth from front to back 9 13/16 in., height including neck 7⅞ in., holder 3¼ in., form "A,"
each, reflector only $6.00

TWELVE IN A STANDARD PACKAGE
WEIGHT 35 LBS.

BEEHIVE

For 200 watt Mazda "C" lamp.

This reflector should be used for efficient, direct lighting of average, large working spaces. The spread of light from this reflector with a 200-watt Mazda "C" lamp will give good, general lighting in a space of 20 feet square at average hanging height.

No. 575E—Diam. 9⅜ in., 3¼ in. holder, form "A," height 8 in.,
each, reflector only $4.25

EIGHT IN A STANDARD PACKAGE
WEIGHT 14 LBS.

REFLECTORS

"MOONSTONE DORIC"

Nos. V200E to 1202E.
HOLDERS NOT FURNISHED.

Moonstone Doric Reflectors are designed to give the highest possible efficiency where used in connection with light source of great brilliancy producing the best results for maximum of diffusion—minimum of glare—distribution of the fixtures, eye comfort, color of light.

The light transmitted by Moonstone Doric Reflectors is totally different compared to opal, opalescent, ground glass or prismatic shades. The Moonstone Doric Reflectors are free from shadows or dark spots when lighted. The entire surface is diffusive and of marble whiteness, soft and pleasing. Since the introduction of high efficiency light source oculists say eyestrain has largely increased. The Moonstone Doric Reflector will relieve the eyes. No other globe can compare with Moonstone for effective street illumination. Maximum of distribution and no shadows. Pure white free from sharp uncertain light rays and shadows.

X-RAY REFLECTORS

SCOOP

For 75 watt Mazda Type "C" gas-filled lamp.

The SCOOP is a scientifically correct reflector, designed for use with the 75 watt Mazda "C" lamp. It is designed for small show windows, particularly those whose height is equal to the depth.

The reflector is small in size, requires little head-room and makes a very neat appearance. If very bright illumination is desired, install reflectors on 12-inch centers. For average conditions, reflectors on 18 to 24-inch centers give good results.

Install in windows 8 or 10 ft. high and 6 or 8 ft. deep.

No. 178E—Width 7 7/16 in., depth from front to back 6 1/16 in., height including neck 6 5/16 in., holder 2¼ in., form "O."
each, reflector only $4.00

TWENTY-FOUR IN A STANDARD PACKAGE. W'T 30 LBS.

POKE BONNET

For 25, 40, 50 and 60 watt Mazda Type "B" lamps.

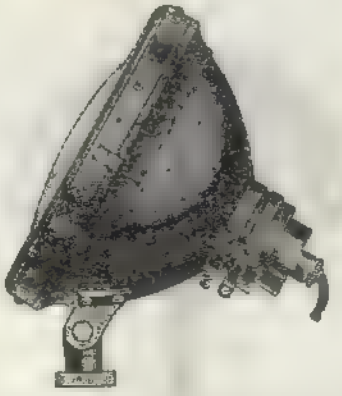
Install for low deep windows. A 6 in. window drape, moulding or sign will hide it.

No. 750E—Depth 7⅞ in., length 14 in., complete with adjustable fork, 18 inches of re-inforced cord, plug, twin sockets and reflector, no lamps, each $12.00

X-RAY REFLECTORS

Prices on Application

FLOOD LIGHT



For use with the 200 or 250 watt G-30 Mazda "C" flood lighting lamp.

Projector being small is particularly adapted for use on the sides of buildings, brackets, and other places difficult of access.

It has been widely and successfully used for protection lighting and for facilitating night operations in large spaces, both inside and outside.

The unit is weather-proof, perfectly ventilated, and not affected by heat, cold, rain, snow or ice.

No. P51XE—Finish gray, diam. 11⅛ in., depth over all 9⅝ in., swivel and tilting base supplied with unit for bolting to supporting surface, size of base 2x4 in., with two ½ in. holes 2⅝ in. on centers, **without lamp,** each $30.00

ONE IN A STANDARD PACKAGE WEIGHT 10 LBS.

STREET LAMP FIXTURES

HIBBARD, SPENCER, BARTLETT & CO.

THE NEW HERCULES SPARK PLUGS

Strictly a Quality Product

[OVER]

HERCULES *Spark Plugs*

MOGUL TYPE

THE new HERCULES MOGUL type of spark plug represents a tremendous advance from an engineering standpoint, and sets a new mark of efficiency in spark plug construction. This type is absolutely adapted to tractor, marine or stationary engine work as well as for the truck and passenger car. Dealer profit margin is ample

The HERCULES is not new on the market, but is one of the "old line" standards with a reputation for maximum dependability and durability under every condition of service.

⅞-inch S. A. E.

A heavy duty model recommended for Cadillac, Chalmers, Dodge, Hudson (prior to 1921), Hupmobile, Lexington, Packard Studebaker and others. Also for trucks or tractors using ⅞" thread. Absolutely dependable under the most extreme of operating conditions.

No. 5316. Per box of 10, $12.00

Ford —½-inch Standard

This plug will be found particularly serviceable on Ford car, truck or tractor, both porcelain breakage and fouling having been practically eliminated. Base of plug is baffled to hold back oil and prevent compression pound gasket insulator. Also recommended for Overland, old Studebaker and other motors using ½" standard thread

No. 5315. Per box of 10, $12.00

½-inch Extension

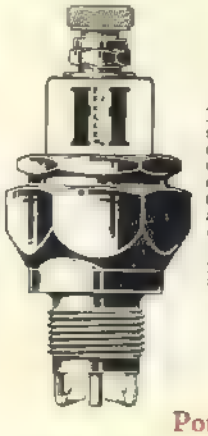
For Reo and many types of tractor. The slight extension will give added power and efficiency in Ford car. Particularly recommended for [illegible] tractor

No. 5314. Per box of 10, $12.00

Buick ⅞-inch Extension

This type is a short, sturdy model especially designed to fit the Buick motor. Also adapted for use in such cars as the Dodge, Winton, Packard and trucks, cars or tractors where a slight, increased cylinder [illegible] is desirable or necessary.

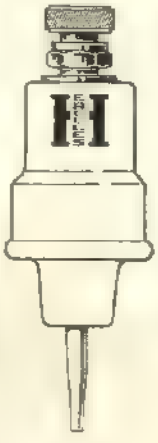
No. 5317.
Per box of 10, $12.00



Metric

Built to standard metric specifications and especially designed to take care of Essex, Hudson, old Packard, Pierce and many of foreign built cars. May also be used in motorcycle calling for metric thread. The most efficient plug built for high speed and high compression motors.

No. 5313
Per box of 10, $12.00



⅝-inch Long

This plug carries a long shank or shell to take care of deep gasket pockets, and is especially desirable in such cars as the Chalmers, Packard, Oldsmobile 6, Peerless, Stearns, Willys-Knight and others. Also efficient for trucks, tractors or marine service.

No. 5319 Per box of 10, $12.00

Porcelains

Insulators are of maximum size with extra heavy shoulder lathe turned to perfect accuracy with [illegible] gauge. Special design of gland and gasket seat protect insulator from heat and absolutely eliminate compression leakage or breaks due to compression pound, even under most extreme conditions. Highest tensile and dielectric strength known in any insulator Heat and break proof. One size interchangeable in all models.

No. 5318. Per box of 10, $6.00

SPECIAL FEATURES

The HERCULES MOGUL is greatly reduced in size and weight but retains maximum strength and durability. Shoulder of porcelain is greatly enlarged and soft copper gasket provided with improved type of spring gland seat, permitting flexibility against expansion and contraction. Absolutely leak proof compression seat—impossible to crush or tear compression gasket by tightening gland or lock nut—base of plug baffled or choked bore in accordance with latest airplane practice to hold back oil and carbon, keeping base of plug entirely clean. Compression can not pound against insulator in base of plug. Electrodes swedged to knife edge, which concentrates spark to blue flame, burning away soot or carbon. The most highly efficient plug for universal service on the market.

Shipping weight approximately three pounds per package of ten.

KRAEUTER PLIERS

DISPLAY BOARDS

Each display is mounted on a green Mission finish wood panel fitted with strong wooden easel. Each article is securely attached, yet can be readily taken from the board. The number, size and suggested retail price are shown on every item. Boards are 16x12 inches.

TALKING MACHINES

MANAPHONES

The Manaphone is designed to meet the demands of the most discriminative purchasers; a talking machine whose superior tone quality will instantly appeal to the ears of the most critical listeners possessing educated musical tastes.

It is manufactured by the same factory and the same skilled artisans who for 68 years have been makers of world famous Clough & Warren pianos. It was designed by experts having a knowledge of the finest principles of acoustics, resulting in a machine which, for beauty and fidelity of tone production is rivaled only by nature itself.

The Manophone is a finished article, an ornament to the most richly furnished homes. It is built by master workmen, educated to turn out only a first-class product. Plays all makes of records (without an extra attachment), with a pleasing interpretation heretofore unequaled.

REFLECTORS

"MOONSTONE DORIC"

Nos. V200E to 1202E.
HOLDERS NOT FURNISHED.

Moonstone Doric Reflectors are designed to give the highest possible efficiency where used in connection with light source of great brilliancy producing the best results for maximum of diffusion—minimum of glare—distribution of the fixtures, eye comfort, color of light.

The light transmitted by Moonstone Doric Reflectors is totally different compared to opal, opalescent, ground glass or prismatic shades. The Moonstone Doric Reflectors are free from shadows or dark spots when lighted. The entire surface is diffusive and of marble whiteness, soft and pleasing. Since the introduction of high efficiency light source oculists say eyestrain has largely increased. The Moonstone Doric Reflector will relieve the eyes. No other globe can compare with Moonstone for effective street illumination. Maximum of distribution and no shadows. Pure white free from sharp uncertain light rays and shadows.

No. 1213E

No. 1200E—Diam. 5 in., depth 3¼ in., fitter 2¼ in., for 25 watt lamps, per dozen $10.20

ONE AND ONE-HALF DOZEN IN A BARREL

Prices on Application

X-RAY REFLECTORS

X-Ray Reflectors are the most powerful reflectors made. They are of a high grade glass, heavily plated with pure silver which is protected by a special green backing which will not peel, crack or blister. It is because of this powerful reflecting quality that they are standard for show window lighting all over the world.

JUPITER

For 100 watt Mazda Type "C" gas-filled lamp.

The JUPITER is a powerful concentrating reflector which will perfectly illuminate windows whose height equals about twice their depth. It has similar dimensions to the JOVE reflector and uses the same shade holder. Hence, when used together alternated they make a neat appearance in the window. They are made as small as possible to secure proper results.

Install in windows 10 to 15 ft. high and one-half to two-thirds as deep.

No. 610E—Width 10 in., depth 10½ in., height including neck 7⅞ in., holder 8¼ in., form "A," each, reflector only $6.00

TWELVE IN A STANDARD PACKAGE
WEIGHT 35 LBS.

BEEHIVE

For 75 watt Mazda "C" lamp.

(Also may be used with 25, 40, 50 and 60 watt Mazda "B" lamps by using 2¼ in. form "O" holder).

A small distributing X-Ray reflector of pleasing lines, principally adapted for localized lighting, such as drop cord and bench lighting in shops, over counters and work tables, and for general illumination from comparatively low ceilings, as, for instance, bowling alleys, basements, store rooms and corridors.

No. 535E—Diam. 5⅝ in., 2¼ in. holder, form "H," height 5¼ in., each $2.00

TWENTY-FOUR IN A STANDARD PACKAGE. WT 18 LBS.

BEEHIVE

For 100 watt Mazda "C" lamp.

A popular reflector for the 100 watt Mazda "C" lamp. It effectively conceals the lamp and gives a broad light distribution. A special system of spiral and vertical corrugations produces a practically even and well distributed light, eliminating all streaky effects.

No. 570E—Diam. 7⅛ in., 3¼ in. holder, form "A," height 6¼ in., each, reflector only $3.50

SIXTEEN IN A STANDARD PACKAGE
WEIGHT 32 LBS.

Our reputation founded on over sixty-seven years' business stands back of the HHB brand.

All goods branded HHB are guaranteed to be of highest quality material and workmanship and free from imperfections.

In selling HHB articles there is a profit for you and satisfaction to your customers.

JOVE

For 100 watt Mazda Type "C" gas-filled lamp.

The JOVE is a scientifically correct window lighting reflector with high temperature backing, designed especially for use with a 100 watt Mazda "C" lamp. This reflector and lamp gives the highest intensity of uniform store window illumination ever produced with 100 watts. Its shape completely hides the intensely bright filament and the special corrugations properly break up and distribute the light.

The JOVE has been designed for windows of average proportions, those whose height is one to one and one-half times their depth.

No. 600E—Width 10 in., depth from front to back 9 1⅞₆ in., height including neck 7⅞ in., holder 3¼ in., form "A," each, reflector only $6.00

TWELVE IN A STANDARD PACKAGE
WEIGHT 35 LBS.

BEEHIVE

For 200 watt Mazda "C" lamp.

This reflector should be used for efficient, direct lighting of average, large working spaces. The spread of light from this reflector with a 200-watt Mazda "C" lamp will give good, general lighting in a space of 20 feet square at average hanging height.

No. 575E—Diam. 9⅜ in., 3¼ in. holder, form "A," height 8 in., each, reflector only $4.25

EIGHT IN A STANDARD PACKAGE
WEIGHT 14 LBS.

MOSSBERG SPECIAL WRENCHES FOR FORD CARS

ONE SET IN A CABINET

MOSSBERG SPECIAL TOOLS FOR FORD CARS

CONNECTING ROD WRENCHES

After removing the pan underneath the engine of a FORD, the three front connecting rods are fairly easy to adjust. The fourth is back from the opening (working from under the car as you must) a special wrench is necessary to adjust this No. 4 connecting rod.

No. 6482—623—Hardened steel, satin-nickel finish, w't each 1 lb. .....each $0.60

WRENCHES

TRIPLE END SOCKET

For Fords.

The large socket on the double-end gives high powered leverage to start or tighten cylinder head nuts. The single-end socket "twirls" these nuts rapidly after they are loosened. The small socket on the double-end is tapered to fit nuts on rear axle housing; no other wrench will carry these nuts.

No. 6541—630—Steel, satin-nickel finish, w't each 1 lb., each $0.90

REVERSE AND BRAKE PEDAL TENSION

No. 6542—645—Special steel, satin-nickel finish, w't each 12 oz. .....each $0.70

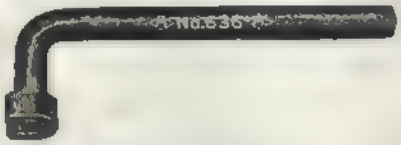
SPARK PLUG

Wrench to fit spark plugs on Ford cars. Satin-nickel finish. Duplicate of Ford No. 2335.

No. 6476—635—Length 10 in., w't per doz. 6 lbs., per dozen $13.60

HALF DOZEN IN A CARTON

FLY WHEEL CAP SCREW WRENCH



The man who has ever adjusted the cap screws on the fly wheel of a Ford car will appreciate the new wrench designed just for this work. The idea of the construction is that it is especially sturdy and strong, and yet clearance of all obstruction is given.

A look at the wrench tells the story better than words.

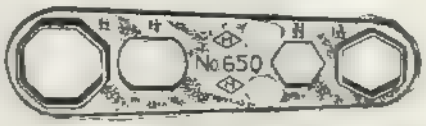
Thoroughly hardened and guaranteed.

Made of steel, $^{23}/_{32}$ in. socket, length 9¼ in., satin-nickel finish, especially designed for fly wheel cap screw body bolts and spring hanger nuts.

No. 6543—636—W't each 1 lb. .....each $1.50

HALF DOZEN IN A CARTON

HUB CAP WRENCH



No. 6499—650—Stamped from steel, satin-nickel finish, w't per doz., 5 lbs. .....each $0.25

ONE DOZEN IN A CARTON

REVERSIBLE RATCHET SOCKET WRENCH FOR CONNECTING RODS

Perhaps the most awkward adjustment on a Ford is that of the No. 4 connecting rod.

The use of the new reversible ratchet wrench shaped especially to reach up and over the edge of the pan and on the nuts of the connecting rods, means that you will not have to remove the wrench after you once fit it to the nuts. This surely means speed and time saved.

No. 6483—624—11¼ in. long, hardened, socket opening, $^{41}/_{64}$ in., for use on other $^{7}/_{16}$ in. screws, w't each 1¼ lbs. .....each $3.40

LOOSE

PRIEST'S HORSE CLIPPING MACHINES

HAND POWER

These machines are constructed throughout of the highest grade materials; are reliable, noiseless and durable. Have Priest's flexible shaft, made up of a series of universal steel joints, impossible to kink. All parts are made to gauge from perfectly tempered steel and are interchangeable.

Beltless

A balanced arm beltless machine, with cut gears and steel frame. Main gear drive is encased and runs in oil. Complete with cutting handle and one extra set of 3-inch cutters.

NO.	Weight Each	EACH
40	100 lb.	$50.00

Belt Driven

A balanced arm, belt driven machine; 28-in. ball-bearing balance wheel and ball-bearing gear head. Heavy frame, well balanced, noiseless and easy running. Complete with 4½-foot flexible shaft, cutting handle and one extra set of cutters.

NO.	Weight Each	EACH
10	145 lb.	$60.00

MACHINE POWER

Constructed in the most approved style, of highest grade materials; have cut gears; are strong, durable, light-running and noiseless. The balanced arm takes the weight of the shaft from the hand and arm of the operator. Freedom of movement and a large range is obtained with a short shaft. One-half horsepower required for clipping; 1¼ horsepower for grooming.

Single Clipper

For one operator; not recommended for use with grooming attachment, as there is no provision for reversing the brush, but can be used by holding the brush upside down. Complete with extra set of 3-inch cutters, countershaft and all overhead work. No motor, driving pulley, flat belting or grooming attachment.

NO.	Weight Each	EACH
78	175 lb.	$140.00

Double Clipper

For two operators. Made extra heavy, with long bearings and self-oiling boxes. Complete with two extra sets of 3-inch cutters, countershaft and all overhead work for two shafts. No motor, driving pulleys or flat belting. Grooming attachment extra.

RESIDENCE TYPE LOCAL BATTERY TELEPHONES

No. 21 telephone is offered to meet the demand for a small, neat telephone for residence use where the batteries can be placed in some out of the way place, equipped with standard parts as furnished with larger telephones, each of highest efficiency and dependable in every respect. Oak Cabinet is of neat design and attractive finish. This instrument will operate in conjunction with other standard telephones and can be furnished in any combination of generator and ringer.

No. F214E—Bridging, 3-bar generator, 500 ohm ringer★ ..each $30.00

No. F219E—Bridging, 5-bar generator, 1600 ohm ringer, each★ $32.25

No. F2110E—Bridging, 5-bar generator, 2500 ohm ringer, each★ $33.00

SHIPPING WEIGHT PACKED, ABOUT 22 LBS.

COMBINATION TELEPHONE AND SWITCH BOARD

Cabinet is of similar design and size to the REVERE compact style Telephone, but the battery space is equipped with drops and jacks of the express type, and a hand microphone for operator's set. This combination instrument makes an exceptionally practical and economical outfit for handling a number of lines for rural districts.

Can be made with any number of drops up to fifteen.

Shipping w't approximately 60 lbs.

No. F85E—5 line, combination telephone and switchboard, each★ .....$.....

SWITCHBOARDS EQUIPMENT

The drops are of the unit or individual type, which permits any number being installed up to the full capacity of the board, thus no unnecessary amount of money need be tied up in equipment to take care of future requirements. Additional drops can be easily installed, one or more at a time. The construction of this type is very simple, there being few parts with each of ample size and strength to assure long life and freedom from break downs or trouble. They are arranged for use with both grounded and metallic lines.

The regular equipment of these boards consists of complete operator's, set either with a breast-plate transmitter or suspended type with supporting arm, operator's watch-case receiver with head-band, connecting cord, operator's plug, cord and jack, induction coil, a powerful hand generator, hand and power generator switching key, a buzzer in the generator circuit, and complete night bell circuit with switching key.

Boards are furnished with cable, also with necessary batteries for operator's equipment and night bell circuit if so specified on order.

Cabinets are made of quarter-sawed oak, substantially built and attractively finished—furnished for one or more operator's positions.

CABINET

Express switchboards are made up in various styles and sizes of cabinets.

We recommend the purchase of boards with sufficient capacity to cover possible future growth.

No. F11E—Fifty line unit, with the unit type of drop and jack, also individual cord circuits, it is possible to install in one of these cabnets any equipment to suit individual needs, w't 275 lbs.★ .....each $.....

SWITCHBOARDS

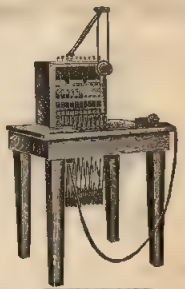

TABLE BOARD

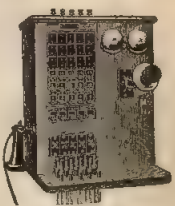
Exceedingly popular for private exchange work, such as for hotels, hospitals, public buildings, etc. They are also adaptable for toll line work. The same type of apparatus are used in these as in the larger floor type switchboards, together with the convenience of a desk. These cabinets can be furnished with any special wiring required, or with any apparatus needed to meet particular local conditions.

No. F70E—W't 125 lbs.★ ..each $....



COMBINATION

No. F77E—In a wall type switchboard with a capacity for 30 lines the No. 77 cabinet is built along practical lines—this is equipped with same style drops and jacks as the floor type boards, although single lever keys are used in the cord circuits, simplifying the equipment. Standard telephone apparatus installed in the same cabinet furnishes the operator's equipment. This board is provided with clear-out drops, night bell circuit and is in every way well adapted for the handling of a small exchange where the number of lines will not eventually exceed thirty★ .....each $.....

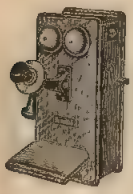
TELEPHONES

REV-O-NOC COMPACT MAGNETO TYPE



No. F7308E REV-O-NOC—Bridging, 3-bar generator, 500 ohm ringer, each★ $30.00

No. F7516E REV-O-NOC—Bridging, 5-bar generator, 1600 ohm ringer, each★ $32.00

No. F7520E REV-O-NOC—Bridging, 5-bar generator, 2500 ohm ringer, each★ $32.50

PACKED ONE IN A BOX. SHIPPING WEIGHT ABOUT 15 LBS.

This wall telephone is made with enclosed gongs, a new arrangement of parts permitting a smaller and neater cabinet. 3 in. gongs are mounted inside of the cabinet. Slotted plates on each side of the cabinet permit the ringing of the bells being distinctly audible.

Series telephones are no longer recommended. When it is only a short distance, or for town service, not over five telephones to the line we recommend the No. 7308E.

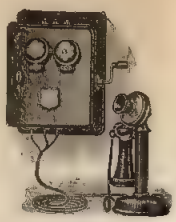
Five bar bridging telephones are for use on country lines, with over five telephones on the same circuit. In ordering instruments for a system of this kind the capacity of generator and ringer should be the same as the other telephones on the same circuit.

Cabinets of REV-O-NOC Telephones are made of quarter-sawed oak, highly polished and finished, and each instrument is equipped with powerful generator, adjustable ringer movement, bi-polar receiver, lightning arrester, long distance transmitter mounted on adjustable arm.

Batteries are not included, but space is left in the bottom of cabinet.

Telephones equipped with condensers 75c extra net.

REV-O-NOC MAGNETO DESK SETS



No. F113E REV-O-NOC—Bridging 3-bar generator, 500 ohm ringer, each★ $34.50

No. F114E REV-O-NOC—Bridging, 4-bar generator, 1600 ohm ringer, each★ $36.00

No. F115 REV-O-NOC—Bridging, 5-bar generator, 1600 ohm ringer, each★ $34.70

PACKED ONE IN A BOX. SHIPPING WEIGHT ABOUT 20 LBS.

Telephone is metal, black enameled, very strong and serviceable. In these two piece telephones the generator, ringer movement and terminal block are mounted in one cabinet 6¾ in. wide, 9¾ in. high, 7 in. thick, quarter-sawed oak highly polished and finished. The induction coil is mounted in base of telephone.

Batteries and lightning arrester are not included.

H.S.B. & CO. REV-O-NOC

We Stand Behind Our Brand.

PORTABLE TELEPHONES

Also used as a testing set in locating trouble.

No. F423E—4-bar generator, 1600 ohm ringer, watch case receiver, in oak case with steel front and back plates 8x10½x7¾ in. collapsible handle, batteries not included but space provided for them, w't 12 lbs., each .....$.....

MINE TELEPHONES

These instruments are for mines, mills, police and railway systems, and any exposed use, and are enclosed in cast iron box 15½ in. high, 12¾ in. wide, 10⅜ in. deep. Working parts protected by iron shield. Door has rubber gasket. Box can be locked with padlock when not in use.

Telephones are equipped with transmitter, rubber shell receiver. Space is provided for two dry batteries. Batteries and arrester are not included.

Telephones of different capacity ringer and generator can be supplied. Prices on application.

No. F995E—5-bar generator, 1600 ohm ringer★ .....each $.....

PACKED ONE IN A BOX. SHIPPING WEIGHT ABOUT 70 LBS.

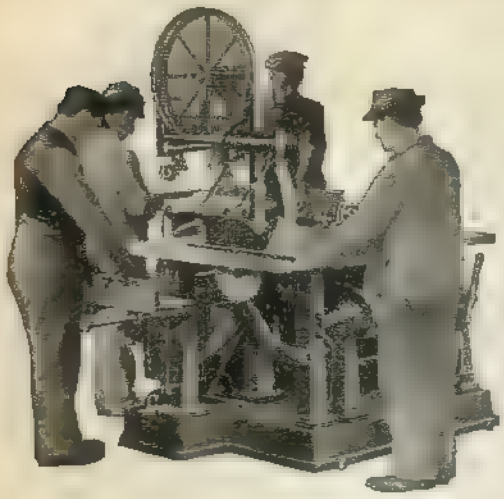
Special Note We are prepared to furnish, upon request a special catalog showing large illustrations and detail descriptions of the above line of wood working machines, and a great many other machines which space will not permit us to show here. Parties wanting quotations should state what particular machines are being considered, and net prices will then be quoted. This secures to the buyer the lowest net price in effect at time of purchase.

CRESCENT UNIVERSAL WOOD WORKERS



Not a combination machine, but a combination of machines composed of five units proper, viz., a band saw, a jointer, a shaper, a saw table, and borer. Each unit having the conveniences of an individual machine. By use of special attachments the machine is adaptable as a re-saw, hand feed molder, tennoner, panel raiser, pole rounder, disk grinder, knife grinder, plain grinder and hollow chisel mortiser. Each machine arranged to give an easy and natural position to operator, and material being worked is handled as conveniently as with separate machines. All driven by one main belt from line shaft, and each machine is started and stopped independently with its own lever. One or all of the machines may be used at the same time, but it is not necessary to run all machines in order to use one. Machines are all heavily constructed along the general lines of the individual machines, and mounted on a heavy single cast base which insures alignment and eliminates vibration. Heavy swivel casters under frame raise entire machine with set screws which act as jacks, making it portable; when set screws are released the machine rests securely on its base.

We would be pleased to furnish special catalog illustrating and describing this combination of machines in a very comprehensive manner, together with detailed information regarding full line of equipment for wood working shops and planing mills.

DIMENSIONS OF REGULAR MACHINES

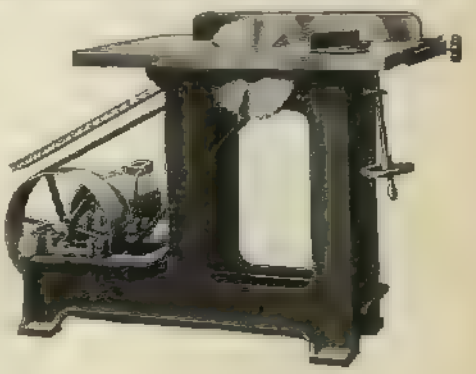
NO. 1 CRESCENT SAW TABLES

The frame is cast in one piece, insuring a rigid machine free from vibration. The countershaft and shifter are mounted on rear of bed, making the machine self contained and ready for business wherever set. The countershaft has adjustable bearings to tighten belt whenever necessary, and this admits the use of an endless belt, a very desirable feature. The ripping fence will tilt to any angle to 45 degrees for bevel sawing. It opens 19 inches from the saw, and a scale is provided showing width to be ripped. The cut-off fence adjusts for any angle. The table is of cast iron, 30x38. It is hinged at back and has wooden throat piece to suit for grooving. The mandrel is made of steel, having collar and pulley shrunk on. The bearings are 1¼ inches in diameter 4 inches long. The "stub" of the mandrel is 1 inch diameter, will take a groove head 2 inches wide between tight collar and nut. Saws up to 14 inches may be used. A 12-inch saw will saw through a piece 2½ inches thick.

Dimensions—	
Size of table (iron)	30x38 inches
Size of mandrel hole for saw	1 inch
Size of tight and loose pulleys	10x5 inches
Speed of countershaft	650 revolutions
Speed of saw	3000 revolutions
Size of pulley	3½x4½ inches
Floor space, over all	38x58 inches
Power required	3 to 4 horsepower
Shipping weight	750 pounds
Each	$275 00

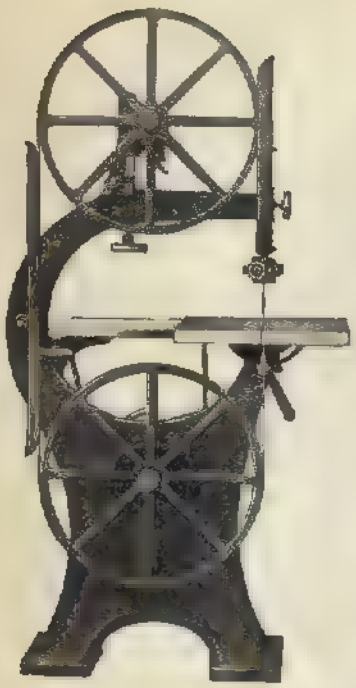


Regular equipment: With each machine is furnished one 12-inch saw, one endless leather belt from countershaft to mandrel, one ripping-fence, one cut-off fence and one mandrel wrench.

Write for special catalog showing complete line of Crescent Woodworking Machinery, upon which we will be pleased to quote you prices at any time. Crated. First class freight.

F. O. B. Leetonia, Ohio. First class freight.

CRESCENT BAND SAWS



The following general description applies to all sizes of Crescent Band Saws, except the 20-inch. Owing to its smaller size this machine is somewhat different in construction, having a special upper bearing arrangement; in other respects it is practically the same as the larger machines.

Main Frames are cast in one piece, cored out hollow rectangular section; foot portion arched, allowing machine to set firmly on even floors. **The Upper Bearing** arrangement, the vital part of a band saw, because the upper wheel plus the tension of the saw hangs upon it, is described in detail below. The wheel may be raised or lowered and inclined backward or forward while the saw is in motion. The tilting wrench is within easy reach of operator from front of machine. Spring holds bearing in proper position, preventing back-lash in case saw should break. Upright standard upon which head slide is bolted to arm portion of frame on machined surfaces, and provided with steel gib adjustable for wear, all easily removable for repairs. Upright standard stands edgewise to the strain. Upper wheel not fastened in the ordinary way on stationary pin, like a loose pulley, but is hung on long shaft which revolves in long split babbitted journal and is readily adjustable for wear. Lower shaft runs in long bearing bolted rigidly to frame, and cannot get out of alignment.

We have a large special catalog showing in detail the above band saws and a complete line of woodworking and planing mill machinery which we would be pleased to furnish upon request.

DIMENSIONS OF 20, 26, 32 AND 36-INCH SAWS

	20-Inch	26-Inch	32-Inch	36-Inch
Size of wheels	20x1¾ in	26x1¾ in	32x1¾ in	36x2 in

⅞	21	5	5 36	18
1	21	4½	6 70	16
1¼	21	4	8 05	18

Note Prices as given do not include joining, setting or filing. Narrow band saws with beveled backs advance list 50 per cent for first gauge and 10 per cent for each additional gauge. For band saws with knife edge add 10 cents per foot to list. We make a specialty of band saws in coils, any length desired.

BRAZING BAND SAW BLADES

¼ to ½ inch wide ..... Per braze $0 40
⅝ to ¾ inch wide ..... Per braze .50

CRESCENT JOINTERS

Solid one-piece frame; wide, arched base, which insures rigidity and stability. Bearings are given special care; the lower part is cast solid with frame, insuring permanent alignment; bushed with high-speed babbitt; provided with liners to adjust for wear; large oil chamber and capillary felt, practically self oiling. Tables have wide flanges and are heavily ribbed; rear table has offset along front side for rabbeting; has rear table equal in length to front table. Inclines on which the tables rest are provided with adjustable clip to take up all wear; tables may be withdrawn from head without distributing their adjustment, making cutters readily accessible. Regularly made with square head, solid lips, but may be furnished with square head and steel lips, or with safety head with either solid or steel lips.

Regular Equipment: Each machine is furnished with one pair of knives, one countershaft having self oiling loose pulley, one fence, one pressure spring, one wrench, and one jointer guard. By the use of special cutters this jointer may be used for beading, grooving, making light molding and similar work.

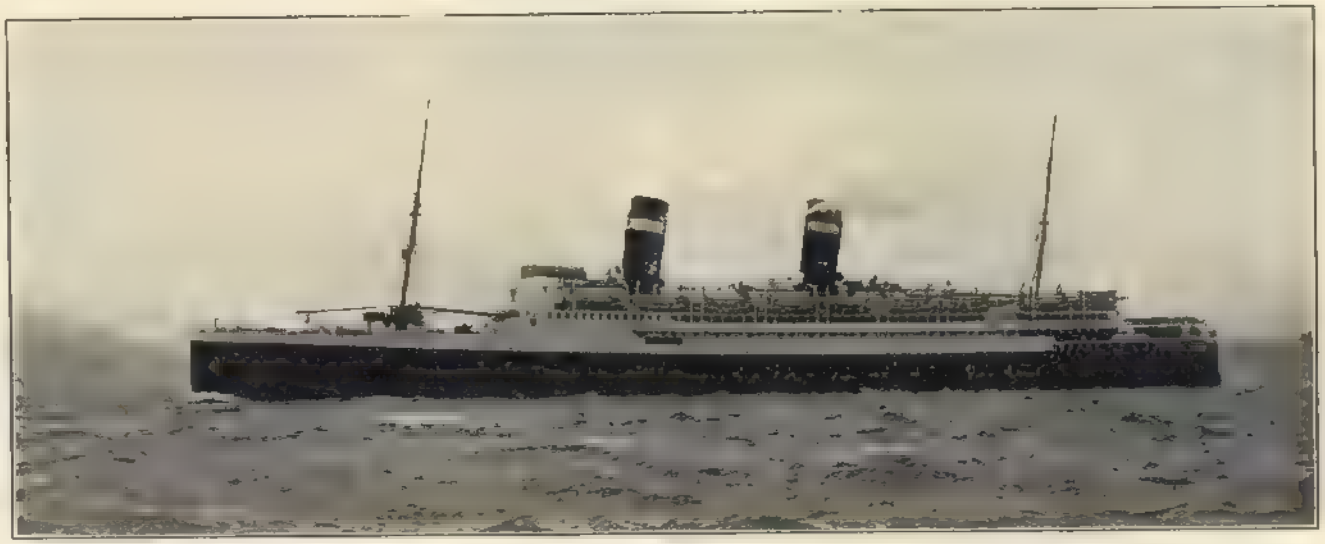
WILLIAM BEARDMORE & Co., LTD.

NAVAL CONSTRUCTION WORKS,

DALMUIR.



The above is a photograph of S.S. *Alsatian*, built for the Allan Line Steam Ship Co., Limited, Liverpool.

She is 18,500 tons gross; horse-power 20,000, and speed 19½ knots. She was engaged on Patrol Duty and Atlantic Convoy Duty during the Great War. She has been re-conditioned by Messrs. William Beardmore & Co., Ltd. (the Builders), and is now known as the "Empress of France."

The Works at Dalmuir are capable of turning out all classes of Merchant Steamers from the largest Atlantic Liner to High Speed Passenger Carrying Steamers for Channel Service in any part of the world, as well as all classes of Special Cargo Steamers. They are also prepared to arrange for the supply of all classes of Barges and Vessels of Light Draught of any description.

They are also prepared to undertake the building of any Special Vessel to meet any Special requirements for any Special trade or work.

Designs, specifications and prices can be supplied from the Naval Construction Works, Dalmuir, Scotland, on application.

La gravure ci-dessus représente le steamer "Alsatian," construit pour compte de la "Allan Line Steam Ship Co., Ltd," de Liverpool.

Tonnage brut 18,500 tonnes; Puissance 20,000 chevaux, et vitesse 19½ noeuds. Ce navire a fait le service de patrouille et de transport sur l'Atlantique pendant la grande guerre. Depuis, il a été réequipé par la maison Wm. Beardmore & Co., Ltd. (les constructeurs), et est connu actuellement sous le nom de "Empress of France."

Les chantiers navals de Dalmuir peuvent construire des navires de commerce de toutes classes depuis le plus grand transatlantique jusqu'au plus rapide paquebot pour la traversée de la Manche, y compris des bateaux pour la navigation dans toutes les parties du monde, aussi bien que des navires marchands de tous genres. Ils sont disposés à entreprendre également la construction de toute espèce de barges et de bateaux à faible tirant d'eau, de toutes catégories

La maison peut aussi se charger de construire tous bâtiments répondant à des conditions spéciales, pour tout usage ou commerce spécial.

Les plans, spécifications et prix peuvent être fournis sur demande par les Chantiers de Construction Navale de Dalmuir, Ecosse

La fotografía arriba representa el vapor "Alsatian," construido para la Linea de Vapores de la Compañia "Allan Line Steam Ship Co., Ltd," de Liverpool

Este Vapor es de 18,500 toncladas (tonelaje bruto); 20,000 caballos de fuerza y un andar de 19½ nudos por hora Durante la gran guerra él fué destinado al servicio de patrullas y convoyes en el Atlántico. Ultimamente fué renovado por la Casa William Beardmore & Co., Ltd (los constructores), y actualmente es conocido bajo el nombre de "Empress of France

Los talleres navales de Dalmuir pueden construir toda clase de Vapores Mercantes, desde el transatlantico mas grande hasta el vapor de pasajeros mas veloz para el servicio del Canal de la Mancha y para cualesquier parte del mundo. Construyen también toda clase de vapores especiales para carga. También se encargarán del suministro de todas clases de lanchones y buques de poco calado de toda descripción

La Casa está también preparada para tomar á su cargo la construcción de cualesquier buque especial, para responder á cualquier servicio que se le designe, ya sea para el comercio ú otros trabajos, segun sean las necesidades

Dichas especificaciones y precios, pueden ser suministrados, sobre pedido por los talleres de Construcción Naval de Dalmuir en Escocia

WILLIAM BEARDMORE & Co., LTD.

NAVAL CONSTRUCTION WORKS,

DALMUIR.

The Naval Construction Works of Messrs Wm. Beardmore & Co., Ltd., are situated on the North Bank of the Clyde, about 9 miles from Glasgow

The total area of the yard is about 100 acres, with a river frontage of over one mile. A Fitting-out Basin of 7½ acres in extent with a low water depth of 32 feet enables ships of the largest size to be brought alongside a Cantilever Crane capable of placing weights up to 200 tons on board a ship of 90 feet Beam.

On the east side of this basin are the Constructional Departments, comprising Platers' Sheds, Smithy, Mechanics' Shop, Loft Joiners' Shop, etc., and the Building Berths. These are nine in number, covering an area of 14 acres and capable of taking ships up to 1,000 feet in length and 100 feet in width. One of these Berths is fitted with a Gantry 750 feet long, 105 feet wide, and 150 feet high, equipped with travelling Cranes of 20, 15 and 5 tons lift for the rapid assembling of the various constructional members of the ship

On the west side of the Fitting-out Basin large shops with a floor area of 5½ acres are situated. These are excellently equipped with the most modern Machinery for the construction of Engines and Boilers of the largest size On this side, too, are four covered Building Berths with overhead Cranes, suitable for smaller vessels of the Cross Channel type up to 300 feet long. There is also a patent Slipway, capable of dealing with small ships up to 1 000 tons when these require repair or overhaul.

Large shops in the west yard, which were used for the production of Gun Mountings, etc, during the War, are now diverted to the construction of Locomotives of the latest type.

Les chantiers navals de la Maison Wm Beardmore & Co Ltd., sont situés sur la rive Nord de la Clyde, à environ 14 km. de Glasgow

La superficie totale des chantiers est d'environ 40,46 hectares avec une longueur de plus d'un mille (1,609 km), au bord de la rivière. Une cale d'armement d'environ 3,03 hectares de superficie d'une profondeur de 9,70 m à marée basse permet aux navires du plus grand tirant d'eau d'être amenés à côté d'une grue géante capable de déposer des poids atteignant 200 tonnes à bord de bateaux de 27 m. de largeur.

Du côté est de ce bassin, se trouvent les ateliers de construction, comprenant les halles d'ouvriers en fer de chaudronnerie de forge, les ateliers de mécanique et d'ébénisterie, etc., ainsi que les chantiers de montage. Ces derniers sont au nombre de 9 et couvrent ensemble une superficie de 5,06 hectares et peuvent recevoir des navires de 305 m de longueur et de 30 m de large. Un de ces chantiers est pourvu d'une charpente couverte de 228 m de longueur et 32 m de largeur et 45 m. de hauteur muni de ponts roulants de 20, 15 et 5 tonnes de charge, pour l'assemblage rapide des diverses parties du navire.

Du côté ouest de la cale d'armement sont situés d'importants ateliers d'une superficie totale de 2,23 hectares. Ces ateliers sont pourvus de l'outillage le plus moderne pour la construction de machines et de chaudières les plus grandes dimensions. Du même côté se trouvent également quatre chantiers de montage couverts, avec ponts roulants convenant pour le montage de navires plus petits du type "Traversée de la manche" ne dépassant pas 91 m de longueur. Il existe aussi une cale de lancement pour les bateaux de petit tonnage, ne dépassant pas 1,000 tonnes, qui doivent être réparés ou remis en état.

Les grands ateliers du chantier ouest qui pendant la guerre ont servi à la construction d'affûts et fourgons de canons, etc, servent actuellement d'ateliers de construction de locomotives des derniers modèles

Los astilleros de Construcción Naval de la casa Wm Beardmore & Co, Ltd, están situados sobre el río Clyde en la parte Norte, como á 14 km. de Glasgow.

La superficie ó área total que ocupan los talleres, es como de 40,46 hectáreas, con un frente hacia el río de más de una milla (1,609 km.) de extensión. Una dársena para la armadura, de 3,03 hectáreas de superficie, con una profundidad, en baja mareé de 9,70 m., permite á buques de las más grandes dimensiones, atracar á una grua de contrapeso Cantilever capáz de colocar pesos, hasta de 200 toneladas, á bordo de un buque de 27 m. de manga

Al lado este de esta dársena se encuentran los departamentos de construcción, comprendiendo los talleres de forja, los de mecánica, la sala de herreros talleres de carpintería etc y los astilleros. Estos últimos son 9, cubriendo un área de 5,06 hectáreas y capaces de recibir, para su construcción, buques hasta de 305 m. de eslora y 30 m de manga Un de estos astilleros está provisto con un techo de 228 m de largo, 32 m de ancho y 45 m de alto, provisto con gruas movibles para levantar 20, 15 y 5 toneladas de peso para el manejo rápido de las piezas que forman parte en la construcción de un buque

Al lado oeste de la dársena para el ajuste final de las embarcaciones se encuentran situados grandes talleres, con una superficie de piso de 2,23 hectáreas Estos talleres estan todos exactamente equipados con las maquinarias mas modernas para la construcción de maquinas y calderas de las mas grandes dimensiones. Sobre este mismo lado, también, se encuentran cuatro astilleros de construcción, techados, con gruas en la parte superior, a propósito para la construcción de pequeños buques, de los del tipo que se usa para la travesia del Canal de la Mancha, hasta de 91 m de eslora Ademas hay tambien un carenero de patente capáz de recibir buques pequeños hasta de 1,000 toneladas cuando éstos necesite ser reparados o recorridos

Los grandes talleres que se encuentran al oeste del astillero, y que durante la guerra se usaron para la construcción de montajes de cañónes, etc., están ahora destinados á la construcción de locomotoras del tipo más moderno.

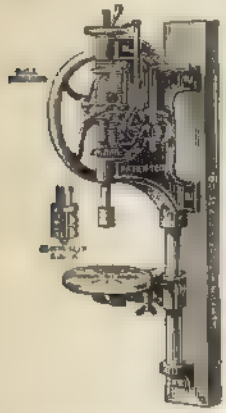
Each	$286 00	$301 00

Note Furnished complete with countershaft

Crated. Second class freight.

CHAMPION POST DRILLS

The No. 200 series Champion Post Drills illustrated all have Combination Automatic Self-Feed and Double Compound Lever-Feed, which delivers a maximum pressure direct to point of drill. Feeds are independent of each other, and both are instantaneous return; lever feed makes these machines especially adapted to wood boring all metal bearing, light and quiet running; spindles bored same as Champion Never Slip Drill Chuck, to take ½ or 41/64 shank drills, and have countersunk set screw.

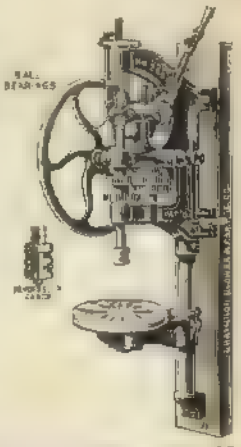


Combination automatic self-feed and double compound lever-feed; feeds are independent, both instantaneous return; ball bearing; drills up to 1¼-inch hole; drills to center of 16-inch circle; up-and-down run 4 inches; slotted table; 1¼-inch spindle, takes ½-inch straight shank drill bits. **Fitted to take ⅝ or 41/64-inch straight shank drill bits, when so ordered.** Weight 180 pounds.

No. 200—Champion Hand Power Post Drills Each $45 00

No. 200 Champion Hand and Power Post Drills; tight and loose pulley, 6x2 ins., 250 RPM Each $50 00

Combination automatic self-feed and double compound lever-feed drill; feeds are independent, both quick return; **two speeds,** changed by sliding gears; ball bearing, slotted table; drills up to 1½-inch hole; drills to center 18-inch circle; up-and-down run 5½ inches; 1¼-inch spindle, takes ½-inch straight shank drill bits. **Fitted to take ⅝ or 41/64-inch straight shank drills, when so ordered.** Weight 240 pounds.



No. 200½—Champion Hand Power Post Drills $54 00

No. 200 ½ Champion Hand and Power Post Drills; tight and loose pulley, 11x2½ ins.; 100 RPM 62 00

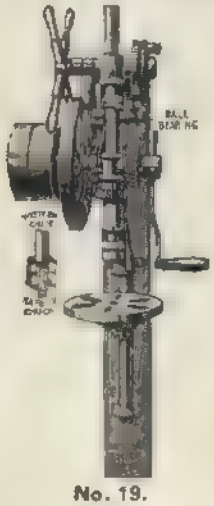
CANEDY-OTTO POST DRILLS

No. 16.

Hand lever feed, and horizontal gear driven positive self-feed; fast, slow or medium feeds, changed instantly; quick return; gears are cut; ball bearing, slotted table; drills up to 1¼-inch hole, drills to center of 24-inch circle; up-and-down run 6¼ inches, takes ½-inch straight shank drill bits. **Fitted to take 41/64-inch straight shank drill bits, when so ordered.**

No. 16—Western Chief Hand Power Post Drills; wgt. 340 lbs Each $61.00

No. 16—Western Chief Hand and Power Post Drills; tight and loose pulley, 10¾x2½ ins.; 180 RPM.; wgt. 360 lbs ..... Each 67 50



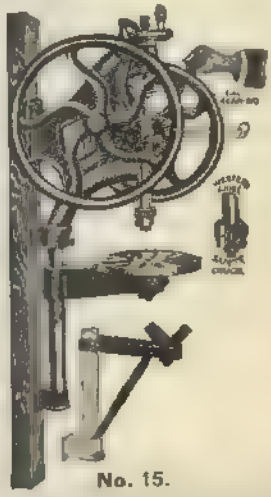
No. 19.

Combined hand and self-feed drill; feeds are independent of each other; ball bearing; drills up to 1¼-inch hole; drills to center of 16½-inch circle; up-and-down run 5½ inches; slotted table; takes ½-inch straight shank drill bits. **Fitted to take 41/64-inch straight shank drill bits, when so ordered.**

No. 19—Western Chief Hand Power Post Drills; wgt. 130 lbs ..... Each $24 55

No. 19—Western Chief Hand and Power Post Drills; tight and loose pulley, 8x2 ins.; 200 RPM.; wgt. 140 lbs ..... Each 28 60

Crated. Second class freight.



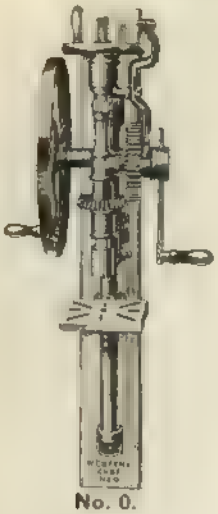
No. 15.

Automatic self-feed; changeable speed; back geared; spur gears are cut; ball bearings; drills up to 1½-inch hole; drills to center of 19-inch circle; up-and-down run 4 inches; slotted table; takes ½-inch straight shank drill bits. **Fitted to take 41/64-inch straight shank drill bits when so ordered.**

No. 15—Western Chief Hand Power Post Drills; wgt. 180 lbs..... Each $27 45

No. 15 Western Chief Hand and Power Post Drills, tight and loose pulley 8x2½ ins., 200 RPM.; wgt. 190 lbs... Each 31 45

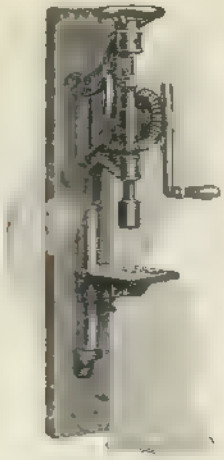
CANEDY-OTTO POST DRILLS



No. 0.

Self-feed, light post drill; steel mandrel, shafts and feed screw; fast and slow speed; drills up to ¾-inch hole, drills to center of 12-inch circle; up-and-down run 2¾ inches, takes ¼-inch straight shank drill bits. Weight 75 pounds.

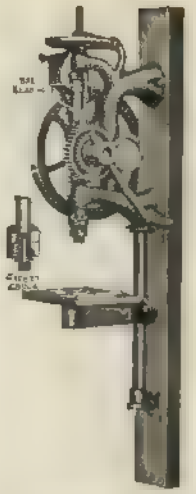
No. 0—Western Chief Hand Power Post Drills... Each $10 35



No. 0½.

Hand feed single geared post drill, drills from 0 to ¾-inch to center of 12-inch circle up-and-down run of spindle 2¾ inches; up-and-down run of table 9½ inches takes ½-inch straight shank drill bits. Weight 50 pounds.

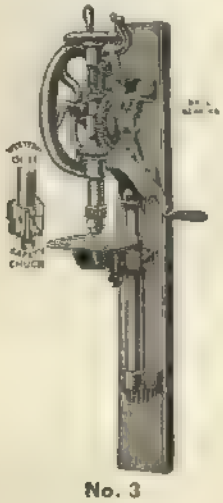
No. 0½—Western Chief Hand Power Post Drills Each $7 40



No. 1 Quick Return.

Automatic self-feed and quick return; three speeds; drills to center of 15-inch circle; drills up to 1½ inches; up-and-down run of spindle 2¾ inches; slotted, rotating, swinging table; takes ½-inch straight shank drill bits. **Fitted to take 41/64-inch straight drill bits, when so ordered.**

No. 1—Quick Return Western Chief Hand Power Post Drill; wgt. crated 142 lbs..... Each $20 95



No. 3

Particularly adapted for battery service stations; automatic self feed; drills 0 to 1-inch to center of 14½-inch circle, up-and-down run of spindle 3½ inches; up-and-down run of table 15½ inches; dotted table; takes ½-inch straight shank drill bits. **Fitted to take 41/64-inch shank bits when so ordered.**

No. 3—Canedy-Otto Hand Power Post Drill; weight 93 pounds..... Each $12 50

No. 3—Canedy-Otto Hand and Power Post Drill; tight and loose pulley, 8x2½ in.; 250 R. P. M., weight 103 pounds. . ..... Each $16 45

No. L. B. B.

Two speed, lever feed, ball bearing post drill; drills 0 to 1¼ inch to center of 14¾-inch circle; up-and-down run of spindle 4 inches; up-and-down run of table 11 inches; takes ½-inch straight shank drill bits.

No. L. B. B.—Canedy-Otto Hand Power Post Drill; weight 93 pounds ..... Each $13.45

No. L. B. B.—Canedy-Otto Hand and Power Post Drill; tight and loose pulley, 8x2 inches; weight 103 pounds ..... Each $17.45

INCANDESCENT LAMPS

KENTUCKY

Tungsten, Mill Type, Straight Side, Drawn Wire Filament.

Guaranteed to have average burning life 1000 hours.

Made to withstand jars, jolts and vibration. The whole filament is spring supported by a piece of steel wire to absorb shock. Used successfully in mills, shops, factories and foundries where there is extreme vibration or sudden jolts; also in portable extension cords for rough handling such as in garages, inspection work, budding construction, etc.

INCANDESCENT LAMP CONTRACTS

PURCHASER'S AND CONSUMER'S CONTRACTS

FORM "E" CONTRACTS

Form "E" contracts are for large consumers, such as street railways, central stations, mills, coal mines, hotels, factories, etc. The following discounts are allowed to purchasers under Form "E" contracts with us for a quantity of any style Gem or Mazda lamps, aggregating net value exclusive of freight charges.

Freight charges on standard packages of lamps shipped on Form "E" contracts will be prepaid to all points east of the Mississippi River and in the state of Missouri. On shipments to other points, additional charges will be made for delivery as per schedule.

On less than standard packages of lamps shipped on Form "E" contracts, the broken package price will be charged and lamps will be F. O. B. point of shipment.

	Stan. Pkgs.	Broken Pkgs.
Contracts for less than	$150 00	
Contracts for more than	150 00	
" "	300 00 & over	Discounts on application.
" "	600 00 & over	
" "	1,200 00	
" "	2,500 00	
" "	5,000 00	
" "	10,000 00	

2% 10 days, 30 days net.

"Standard package discounts for lamps in the Form "E" schedule can be given only on orders for standard packages, quantities or multiples thereof. It is allowable, however, to combine in one standard package all sizes of lamps having the same standard package quantity. It is also allowable for lamps having the same standard package quantities to combine different voltages and finish of bulb."

Contract prices may be allowed on lamps purchased, billed and delivered within 30 days prior to date of contract, lamps so delivered being included in contract and proper credit allowed.

Lamps which are ordered forward before the expiration of any contract, to be delivered and invoiced within 30 days after the expiration of the contract, may be included in such contract, but lamps so ordered, which are not to be delivered and invoiced within 30 days after the expiration of contract, shall not be included in such contract.

Special Note—Under the terms of these Form "E" contracts, if a purchaser buys more than the amount of his contract, and sufficient to bring his purchases up to the next higher amount, he will be rebated to equal the price of that contract just as soon as his payments cover that amount. SHOULD HE FAIL TO PURCHASE the amount of his contract, he will be charged to equal the price of the next lower contract. For this reason a contract should be made with every purchaser of lamps in order that he may receive the benefit and give him an incentive to increase his sales. He has everything to gain and nothing to lose. Be careful not to overrate a customer's contract in the beginning—if in doubt, put the contract on a low basis.

No contract for carbon lamps can be made and purchases of them cannot be included in contracts for Mazda or Gem lamps.

FORM CE CONTRACTS

Purchaser contract for central stations only who do not desire to sign a CA contract.

This form of contract is similar to the Form E contract with the exception that it permits the central station to distribute lamps supplied under this contract **to consumers of their current.** Central stations should not be taken on any other form of purchaser's contract. The same discounts apply as in connection with those mentioned under the heading of Form E contracts.

INCANDESCENT LAMPS

KENTUCKY

CARBON FILAMENT

Recommended where Mazda lamps cannot be used economically. There are circumstances in which it is best to use the carbon lamps, viz: where the lamp is apt to be broken frequently, as in portable lamp guards, and in mines where picks, etc., of the miners are apt to strike against it and also where cost of current is apt to be very low. The "Kentucky" lamp will meet any requirements that a carbon lamp can be called on to meet.

KENTUCKY

Tungsten, Mill Type, Straight Side, Drawn Wire Filament.

Guaranteed to have average burning life 1000 hours.

Made to withstand jars, jolts and vibration. The whole filament is spring supported by a piece of steel wire to absorb shock. Used successfully in mills, shops, factories and foundries where there is extreme vibration or sudden jolts; also in portable extension cords for rough handling such as in garages, inspection work, budding construction, etc.

Mill type

LAMPS FOR USE WITH COUNTRY HOME LIGHTING OUTFITS

28 to 32 Volts

These lamps are generally used on the circuits of country home lighting outfits, having 16 cells of acid (lead storage) battery or 24 cells of alkaline battery in connection with a generator. The capacity of these home lighting outfits is usually expressed in the number of 20 watt lamps which it will light without overloading batteries or generator.

Type	Watts	Each: Clear	Each: Frosted	Standard Package Quantity	Approximate Lumens	Bulb	Maximum Length Over All, Inches
B	5	$0.40	.45	100	44	S-14	4¼
	10	.40	.45	120	92	S-17	4⅜
	20	.40	.45	120	195	S-17	4⅞
	40	.40	.45	100	406	S-19	5¼

LAMPS FOR STANDARD LIGHTING SERVICE

110 to 125 Volts

These lamps constitute more than 75 per cent of the usual lamp demand for such service as residence, store and office lighting. The higher wattage sizes are used for various industrial and store lighting purposes.

Regular Type Mazda Lamps

Type	Watts	Each: Clear	Each: Frosted	Standard Package Quantity	Approximate Lumens	Bulb	Maximum Length Over All, Inches
B	10	$0.40	.45	100	75	S-17	4⅜

B	25	$0.45	.50	100	210	*S-19	5¼
	50	.45	.50	100	436	P-19	4¼

Lamps of voltages of 100 to 109 and 126 to 130, inclusive, are not regularly carried in stock, but may be obtained at the same list prices.

220 to 250 Volts

These lamps are higher in price and less efficient than 110 to 125 volt lamps of same wattage and should not be used where it is possible to change the service from 220 to 250 volts to 110 to 125 volts.

Regular Type Mazda Lamps

Type	Watts	Each: Clear	Each: Frosted	Standard Package Quantity	Approximate Lumens	Bulb	Maximum Length Over All, Inches
B	25	$0.45	.50	100	191	S-19	5¼

MOSSBERG WRENCH AND SOCKET SETS

WRENCH SET

This set is the most complete wrench set ever offered the public. It has handles for every kind of a different approach, and to fit all square or hexagon nuts that will be found on a car. A necessity to every garage or machine shop.

Set consists of—
1 only Mossberg Ratchet Socket Handle No. 350.
1 only Mossberg No. 330 "T" Handle.
1 only Mossberg No. 320 Offset Socket Wrench Handle.
1 only Extension Bar No. 351, 10 in. long.
1 only Sterling No. 100 finest Nickeled Pliers.
1 only S. A. E. Double-End Wrench Set, full finish, five wrenches, ten openings.
1 only Universal Joint.
3 only Special Spark Plug Sockets sizes $^{13}/_{32}$ in., $^{7}/_{16}$ in., and $1^{5}/_{32}$ in.
1 only Double-End Offset Screw Driver.
1 only Cotter Pin Extractor No. 1, molted.
23 sizes thoroughly hardened and Parker Rust Proof Hexagon Sockets.
11 sizes thoroughly hardened and Parker Rust Proof Square Sockets.

No. 6507—14—Set complete, w't 18 lbs., per set $19.20

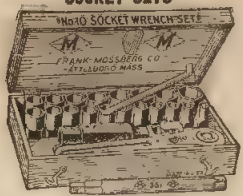
ONE SET IN A WOODEN BOX

SOCKET SET

No. 6513—13—Wrench set consists of the following—
1—Ratchet Socket Wrench Handle.
1—Extension Bar.
1—Special Spark Plug Wrench.
15—Hexagonal Pressed Steel Sockets.
Weight complete 5 lbs. .....per set $6.50

PACKED IN A STRONG WOODEN BOX WITH A DEFINITE PLACE TO HOLD EACH PIECE

SOCKET SETS



TRACTOR, AUTOBOAT, AEROPLANE AND AUTOMOBILE SET

An efficient owner's set, for use in gas engine repair and garage equipment.

This set is rated at five "man power" in point of helpful service.

Set consists of—
1 only Mossberg Ratchet Handle No. 350.
1 only Extension Bar 9½ in. long, No. 351.
1 only Universal Joint No. 336.
1 only Double-End Offset Screw Driver.
21 only rust-proof, properly hardened, Hexagon, Pressed Steel Sockets.
2 only special Hexagon Spark Plug Sockets.
No. 402, 4 in. long, $^{25}/_{32}$ in. opening.
No. 422, 4 in. long, $1^{5}/_{32}$ in. opening.
Fitting Standard Spark Plugs.
No. 6514—10—Set complete, w't 10 lbs. ....each $11.40

ONE SET IN A FINELY CONSTRUCTED BOX

This set is designed primarily for the autoist who makes his own adjustments and repairs, also for gas engine repair, garages, millwrights, blacksmiths. A complete and useful set.

Set consists of—
1 No. 6531—350—10 in. Reversible Ratchet Handle
1 No. 6521—351—9½ in. Extension Bar
1 No. 6520—336 Universal Joint
1 —101—Double End Offset Screw Driver
1 Each of the following sizes of No. 6478 Hexagon Sockets—$^{15}/_{32}$, $^{1}/_{2}$, $^{17}/_{32}$, $^{19}/_{32}$, $^{5}/_{8}$, $^{21}/_{32}$, $1^{1}/_{16}$, $^{23}/_{32}$, $^{25}/_{32}$, $1^{3}/_{16}$, $^{27}/_{32}$, $^{7}/_{8}$, $^{29}/_{32}$, $^{15}/_{16}$, 1, $1^{1}/_{32}$, $1^{1}/_{16}$, $1^{1}/_{32}$, $1^{3}/_{32}$ in.

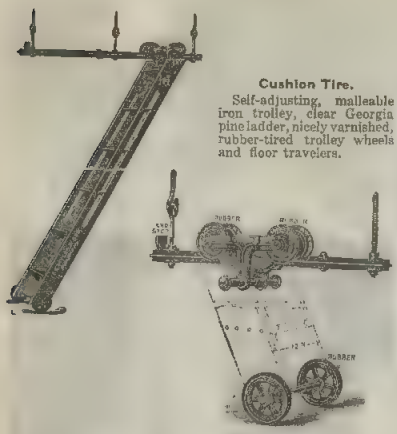
HALF DOZEN IN A CARTON

STORE LADDERS

MYERS'



Cushion Tire.

Self-adjusting, malleable iron trolley, clear Georgia pine ladder, nicely varnished, rubber-tired trolley wheels and floor travelers.

The track is double angle steel rail, which is very neat and strong and is suspended from ceiling by means of lag screws, either jointed or rigid, or by flanged plates and wood screws. By this means the track is placed close to the ceiling and can be leveled on an uneven ceiling without the least trouble and without any blocking or bridging.

The trolley is self-adjusting, is made of malleable iron, fitted with turned steel bearings, and 3 inch anti-rattler wheels, turned and bored on a lathe and fitted with special rubber tires.

The ladder is constructed of the best clear Georgia pine, nicely finished, filled and varnished. It has open panel sides 5 inches wide, with 5 inch steps, each step being supported at each end with a special malleable dowel-tee, which makes the strongest construction possible. The width of ladder is 12 inches.

The floor-travelers are 5 inches in diameter, composed of metal sides with rubber cushioned tires, clamped in such a position as to be impossible to come loose or work off. They are laced on a steel axle which revolves with one of the wheels, the other running loose. In this manner the ladder will adjust itself to the floor.

In ordering, observe the following instructions:

1st.—Give exact perpendicular height from floor to ceiling.

2nd.—Give entire length of track required.

Each

No. IML—Ladder and hanger, complete without track; wt. each 60 pounds..... ✚$54 00

Per Foot

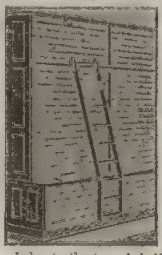
STORE LADDERS

MILBRADT'S

The Milbradt step ladders are the strongest, neatest and easiest running ladders on the market. They are made to order, any shape and length necessary to fit shelving, of good oak lumber, in the best possible workmanlike manner, finished in first class style. They are made in various styles to suit all kinds of shelving.



Bent Shelf Ladders.

Runs on steel track; has rubber rollers attached near the lower end that run against the edge of base shelf; nickel plated malleable iron trimmings.

The track should be fastened to a shelf that is about 3 feet from the top.

In ordering, observe the following instructions:

1st.—Give the exact height from floor to top of ledge.

2nd.—Give the exact width or projection of base shelf.

3rd.—Give the exact perpendicular height from the top of ledge to the top of shelf to which track is to be fastened.

4th.—Give entire length of each run of track and number of uprights for each run.

5th.—Give dimensions of uprights, also distance of uprights from center to center.

6th.—State if uprights are straight faced or turned spindle.

Ladders and track crated.

MILBRADT'S

Trolley Ladder.

Has a suitable fixture with wheels at the top that run on a track, fastened to the ceiling. It also has attached at the bottom cushion tired wheels that run on the floor. This ladder is very strongly built and is especially adapted for hardware stores or any place of business where heavy goods are handled.

In ordering, observe the following instructions:

1st.—Give exact perpendicular height from floor to ceiling.

2nd.—Give entire length of track required.

STORE LADDERS

MILBRADT'S

Bent Ladder.

Is intended for shelving that is not very strong, as most of the weight rests on the floor. This ladder runs on a hardwood track fastened to shelving near the top to guide it and has attached at the bottom cushion tired wheels that run on the floor, but no track is used on the floor.

The track should be fastened to a shelf that is about 3 feet down from the top.

In ordering, observe the following instructions:

1st.—Give the exact height from floor to top of ledge.
2nd.—Give the exact width or projection of base shelf.
3rd.—Give the exact perpendicular height from the top of ledge to the top of shelf to which track is to be fastened.
4th.—Give entire length of each run of track and number of uprights for each run.

BICYCLE

Bent Floor Track Ladders.

The track for these ladders is placed on the floor entirely independent of the base shelf, and for this reason this style is preferred by many buyers to any other, particularly where the base shelf is narrow. Otherwise this ladder is the same as the bent base shelf. The track for the floor is so small that there can be no objection to it whatever.

Both the oak and pine are finished in the natural wood colors.

In ordering, observe the same instructions as on No. 25 ladder shown on preceding page.

CHICAGO—BICYCLE

The track is open, permitting the use of large wheels, two of which are fitted to top and bottom of each ladder. A special device prevents tipping of the ladder and it cannot possibly get off the track. When so ordered they are made to turn corners or follow any crooked or curved track. Japanned mountings; rubber tired wheels.

They are made of yellow Georgia pine, with plain sides; and oak with ornamental open work sides, finished in the natural wood colors.

For standard ladders up to 14 ft. in length, 3½ in. sides, 4 in. steps; length of steps 12 inches.

In ordering, observe the following instructions:

1st.—Give exact perpendicular height from floor to ceiling.
2nd.—Give entire length of track required.

BICYCLE

The track of the Bicycle ladder is built at the bottom, either on the base shelf or the floor, so that the entire weight of the ladder and operator is supported from below.

Light turned pole at the upper end of the ladder is used for a guide. Stout hook holds the pole in place. Has an extra wide shelf at the top for convenience of handling goods.

Has a double track; a half round steel rail for the wheels to run on at the bottom. The steel rail is 5/16 of an inch in height and 3/5 of an inch in width, the pole is little over an inch in diameter; sides 3½ inches wide; steps 4 inches wide; length of steps 12 inches.

In ordering, observe the following instructions:

1st.—Give exact distance from floor to ledge.
2nd.—Give exact width of ledge.
3rd.—Give exact perpendicular height from ledge to top of shelf to which ladder is to be fastened.
4th.—Give entire length of each run of track and number of uprights for each run.

STORE LADDERS

RICHARDS BALL-BEARING

Ladders are made of oak or pine, selected and kiln dried. Steps are let into the sides and held by screws passing through the sides of ladder, made perfectly rigid with steelbraces.

Ladder sides are 3½ inches wide and steps 4 inches wide on ladders up to 14 ft.; over 14 ft., sides are 4 inches wide and steps 5 inches wide.

Steps are 14 ins. long between ladder sides. Track is attached to the uprights of shelving, edge of shelves or to cornice as shown above.

Straight Ladders.

Straight ladders can be set close to shelving when not in use, as the upper fixture has a self-adjusting vertical slide, which also conforms to unevenness in floor. Furnished with ball-bearing fibre or rubber tired wheels for bottom of ladder.

In ordering, observe the following instructions:

1st.—Give exact perpendicular height from floor to top of shelf to which track is to be fastened.

2nd.—Give entire length of each run of track and number of uprights for each run.

3rd.—Give dimensions of uprights, also distance of uprights from center to center.

4th. State if uprights are straight faced or turned spindle.

5th.—State if fibre or rubber tired wheels are preferred.

STORE LADDERS

RICHARDS BALL-BEARING

Upper wheels ball-bearing, runs on wood lined track. Fixtures made entirely of steel, aluminum finish; fitted with case hardened, ball bearing bottom rollers, fibre or rubber tired. For standard ladders up to 14 feet in length; width of sides 3½ in.; width of step 4 in.; length of steps 12 in.

In ordering, observe the following instructions:

1st.—Give exact perpendicular height from floor to ceiling.

2nd.—Give entire length of track required.

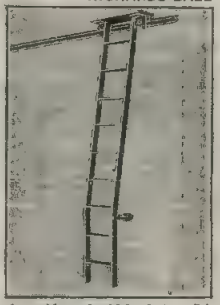
3rd. State if fibre or rubber-tired wheels are preferred.

Ladder and Fixtures Complete; Any length. Each

No. 209—Oak; wt. per foot 3½ lbs.	✚$67 50
No. 209P—Pine; wt. per foot 3½ lbs.	✚ 61 20
	Per Set
Fixtures, without ladders, weight per set 15 lbs.	✚$36 75
	Per Foot
Track, with brackets, weight per foot 2½ lbs.	✚$0 90

Shipped wrapped with castings protected by cleats.

RICHARDS BALL BEARING



The top fixtures made of steel, have finest case hardened ball bearings. The weight is carried entirely by the upper fixtures, the lower rollers acting as a guide against the edge of the ledge. The track consisting of steel angle and grooved wooden runway, is attached to the uprights of shelving, the edge of shelves or cornice. Fixtures aluminum finish. Ladders furnished in oak or pine.

For standard ladders up to 14 feet in length, width of ladder sides, 3½ inches, width of steps 4 inches; ladders over 14 feet long have sides 4 inches wide and width of steps 5 inches. Steps are 12 inches long between ladder sides.

In ordering, observe the following instructions:

1st.—Give exact distance from floor to ledge.

2nd.—Give exact width of ledge.

3rd.—Give exact perpendicular height from ledge to top of shelf to which ladder is to be fastened.

4th.—Give entire length of each run of track and number of uprights for each run.

5th. Give dimensions of uprights, also distance of upright from center to center.

6th.—State if uprights are straight faced or turned spindle.

Ladder and Fixtures, Complete, Any Length. Each

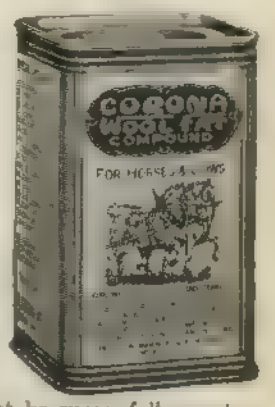
CORONA WOOL FAT

Recommended for cure of sore shoulders, collar galls, sore necks, grease heel, quarter cracks, thrush, corns, hard and contracted feet

Approximately 60 per cent of the horse's hoof is water; water will not mix with or absorb grease or oil, therefore, the remedies that must be carried into a hoof, so largely composed of water, to heal, soften and cure it, must be carried by a vehicle that will penetrate to every part and mix with that hoof what will be absorbed by that hoof.



Grease or oil (vaseline) cannot be successfully used as such a vehicle, because they will not mix with water. Corona Wool Fat will mix with water, hence, it will mix with or be absorbed by the hoof, and as it softens it will carry the medication required to cure and make healthy that hoof.

Corona Wool Fat; 10 oz cans. . . . . Dozen $ 8 00
Corona Wool Fat; 26 oz. cans. . . . . Dozen 16.00

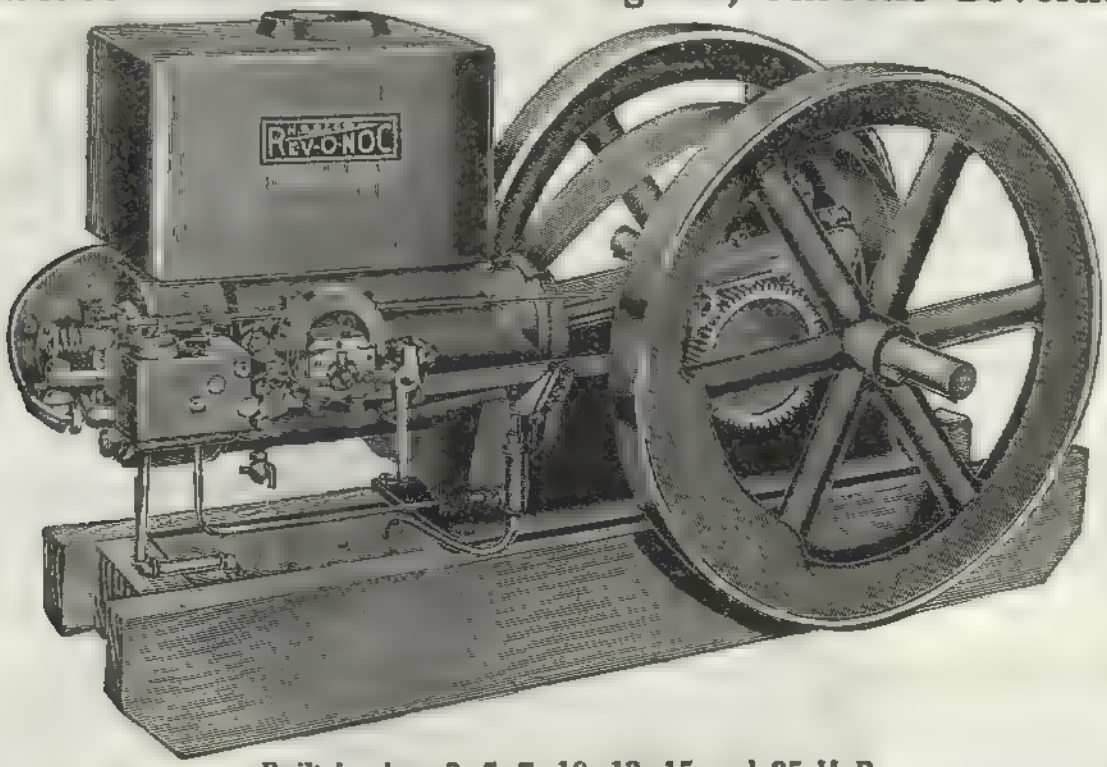
REV-O-NOC Faultless Kerosene Engines, Throttle Governed



Built in sizes 3, 5, 7, 10, 12, 15 and 25 H.-P.

The above illustration shows the Improved REV-O-NOC Throttle Governed Kerosene Engine as regularly equipped. Oscillating Type Magneto included, mounted on wood skids, complete ready to run. Many prefer this style of mounting to any other. It is really a semi-portable method and where it is desired to move the engine occasionally a team can be hitched to it, the skids acting as runners. The skids are well made of heavy timber cross braced and nicely painted. It is lighter in weight and a little cheaper in price than the full Iron Sub-Base style shown on next page, which can be furnished at a small additional charge shown in price list.

REV-O-NOC KEROSENE ENGINE "Type K," Throttle Governed

This is not a common gasoline engine with an attachment for using kerosene, but is designed especially for kerosene, and we guarantee it will operate successfully on kerosene, distillate and other similar fuels. It differs from the gasoline engine in the way the fuel is fed into the cylinder, the shape of the head, the valves and governing mechanism, and while it will run perfectly on gasoline, the object of it is to take advantage of the cheaper fuel which at present amounts to a saving of more than 100 per cent.

KEROSENE vs. GASOLINE

Engine manufacturers have always known that kerosene contained as much energy as gasoline, and a good many makeshifts and attachments for using it in engines have been put on the market. Some work when conditions are just right and the operator can stand over them and constantly make adjustments, but usually it will be found that the trouble involved more than offsets the saving. The trouble is, most engine manufacturers try to use kerosene in their regular engine, originally designed and built for gasoline. They use a more or less complicated attachment and attempt by heating the oil or air or both to convert kerosene into gasoline, or rather, an unsatisfactory substitute that can be used in their hit-and-miss engines. At best, they are only makeshifts. The principle is all wrong. Gasoline cannot be made from kerosene any more than butter can be made from lard. If it could, the oil people would do it themselves, and the difference in price would not exist. After trying out these different attachments and inventing a few of our own, we came to the conclusion that if kerosene was used at all for power, it would have to be in a machine made especially for it. So we started from another angle and studied the peculiarities of kerosene as we found it, instead of trying to change it into gasoline, or a substitute that our gasoline engine could use. We built

A REAL KEROSENE ENGINE

One that could use kerosene and thrive on it. We finally succeeded in overcoming all the difficulties, and offer to you our "Type K" Kerosene Engine. Take it, use it, give it every test you would any engine, and if it does not do all we claim for it and that you think it ought to, you are at liberty to ship it back. The REV-O-NOC Line of Gasoline Engines has been manufactured and sold continuously since 1906; they have always enjoyed the reputation of being one of the best engines on the market, and while we may be putting it a little too strong, for which we ask you to pardon us, we believe the REV-O-NOC Throttle-Governed Kerosene Engine is the best engine on the market today. Anyway, you are both judge and jury, and all we ask is that you compare it with any other engine, no matter whose, and if you don't agree with us the engine is ours, and you are out very little except your trouble, and the experience will be well worth that. REV-O-NOC Kerosene Engines will operate on common coil oil or distillate, run just as well and use no more of it than other engines do of high priced gasoline. Can't you well afford to pay a little more in first cost?

DON'T BUY A HIT-AND-MISS ENGINE

And expect it to work satisfactorily on kerosene. A gasoline engine with a kerosene attachment is cheaper to buy, but it will never give you satisfaction. True, it can be made to run at times fairly well, but we know, and believe you will agree, that an engine that cannot be depended on to do its work whenever you want it is not a good buy, no matter how low the price. This is not prejudice nor an effort on our part to make you believe something that is not true, for we build both kinds. It is a fact that any competent engineer will bear us out in. We have spent a lot of time and money experimenting and proving this, and offer these facts to help you decide on the right type of engine to buy.

THROTTLE GOVERNED vs. HIT AND MISS

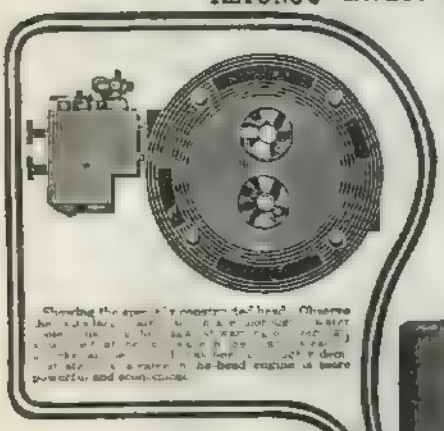
Most gasoline engines are governed on the hit-and-miss principle that is, they always take a full charge and explode it as energy is required, and the intervals between power strokes depends on the load the engine is carrying. If it is a full load it would fire every time, but on a half load the governor acts and prevents another charge being taken into the cylinder and fired until all the energy from the previous charge is used and the speed begins to be reduced, then the governor acts again and allows another charge to be taken. This principle has been found to be perfectly satisfactory for gasoline and all REV-O-NOC Gasoline Engines are so constructed with the governor in the fly wheel. But in the kerosene engine the requirements are different

HIGH SPEED GOVERNOR

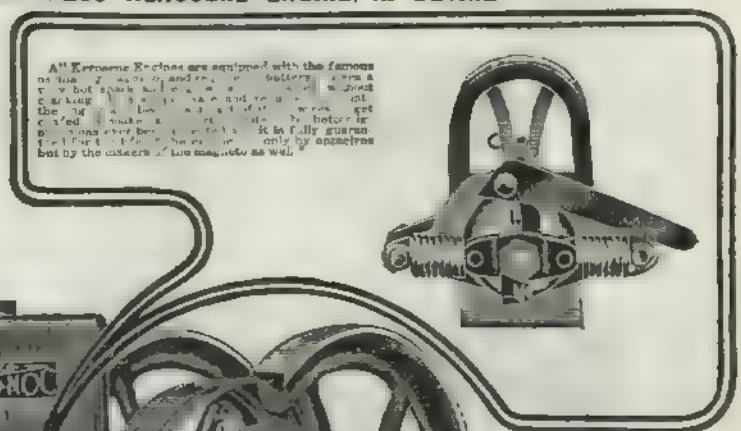
The ball in the fly wheel type does not act quickly enough, so we designed a special high speed fly ball governor (see illustration) the same as those used on most steam engines. This bolts to the engine bed and is driven from the large engine gear. It governs the engine speed perfectly and makes it a beautiful, smooth-running engine that will give years of satisfactory service.

Prices on Application

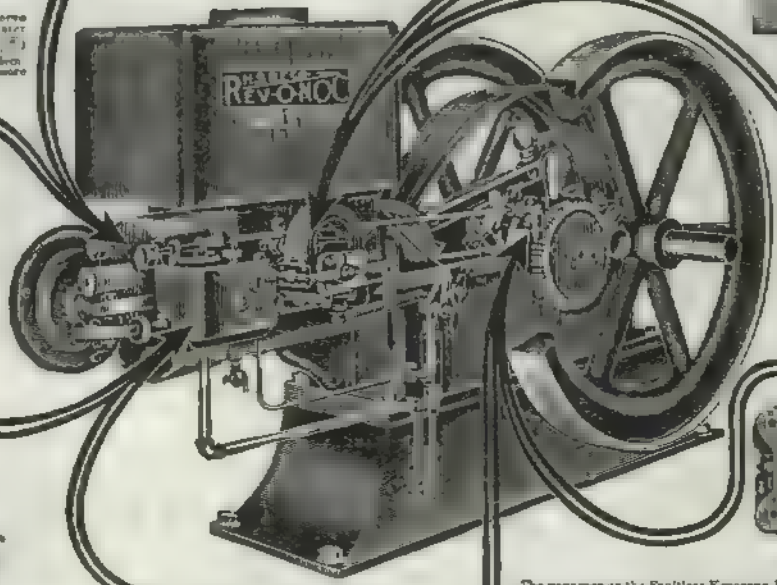
REVONOC LATEST IMPROVED FAULTLESS KEROSENE ENGINE, IN DETAIL



Showing the cross-section of head. Observe how the valves are set in the head directly over the piston. This is a valve-in-head engine as well as a side-valve engine. Note the deep powerful and economical.

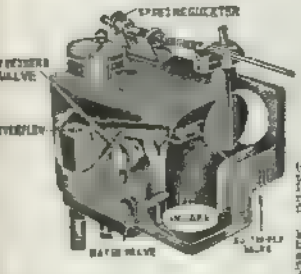


All Kerosene Engines are equipped with the famous [illegible] battery [illegible] but spark [illegible] and [illegible] the [illegible] get started [illegible] better in [illegible] It is fully guaranteed for [illegible] only by ourselves but by the makers of the magneto as well.



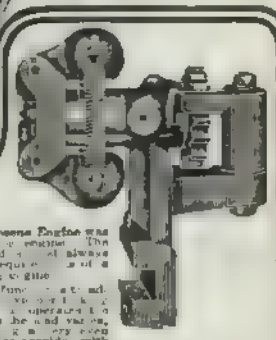
SHOWING THE IRON SUB-BASE MOUNTING RECOMMENDED FOR STATIONARY USE

OPERATES PERFECTLY ON KEROSENE OR DISTILLATE



The fuel reservoir opened up showing the chamber (at rear of it) under negative automatically pumped from the main fuel tank underneath the engine. A constant level is maintained at all times when engine is running, [illegible] being carried back through overflow [illegible]

The butterfly valve in the intake is shown. The [illegible] is in front of the butterfly [illegible] A small amount of [illegible] to prevent carbon from forming in the combustion chamber, and keep down the high temperature.



The governor on the Faultless Kerosene Engine was [illegible] for the Kerosene engine. The [illegible] an old and [illegible] and always [illegible] a governor are the [illegible]

This governor works [illegible] and is [illegible] but very [illegible] and is the only [illegible] opens or closes this valve [illegible] speed changing device [illegible] speed even while engine is running.

Showing Special Features Wherein It Differs from Ordinary Hit-and-Miss Engine with Kerosene Burning Attachment.

No Kerosene Engine with the governor [illegible] fly wheel will run [illegible] as well on kerosene as one with a high speed fly ball governor.

No Kerosene Engine depending on an attachment for heating the fuel or air can possibly run as well on kerosene as one controlled by a butterfly valve in the intake.

No Kerosene Engine will work well with a [illegible] system. The Oscillating Type magneto used on all [illegible] throttling governed kerosene engines is absolutely reliable, requires no battery, and will start engine without cranking.

No Kerosene Engine will work properly and economically unless the head is specially constructed. It requires high compression and extra large valves.

SAVES ITS COST IN ONE YEAR

For example, suppose you have a seven-horse kerosene engine and your work would require five gallons to run it ten hours. At the present price of gasoline here (20c per gallon), the cost would be $1.00. Now, doing the same work, a [illegible] Kerosene Engine would not use any more gallons and the price is 7 cents per gallon for ten hours. A saving of 65 cents, or enough to pay for the total cost of the engine in less than 275 days—not a year's steady running. Is any [illegible] necessary? Remember, the [illegible] Kerosene Engine will give you just as good service in every way as any gasoline engine made. It has no more complications, we do not heat the kerosene or treat it in any way, simply use it the same as any other engine uses gasoline. These are hard cold facts we are ready and willing to prove.

WE GUARANTEE ALL [illegible] ENGINES TO DEVELOP 15 PER CENT MORE THAN THEIR RATED HORSE POWER

Prices on Application

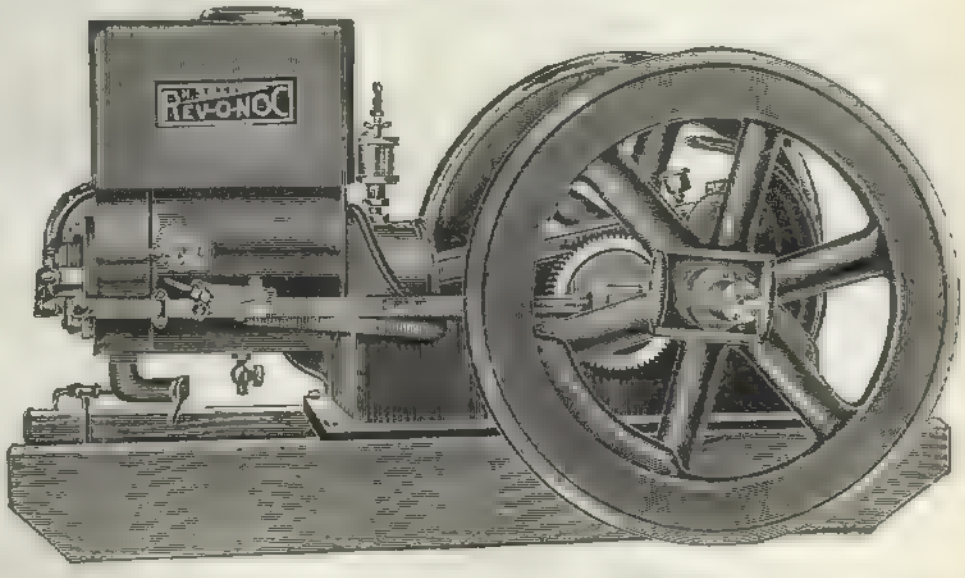
REV-O-NOC Gasoline Engines

Hit-and-Miss Governed

Magneto or Battery Ignition

Self-Contained Hopper Cooled

Portable Semi-Portable and Stationary



Built in Sizes 1¼, 2, 3, 5 7, 10, 12 and 15 H.-P.

The illustration above shows the REV-O-NOC Engine in the cooler and style of mounting regularly furnished. They are of the four-cycle, water cooled, hopper jacket, semi-portable type, self-contained, make and break ignition, large bore, long stroke, slow speed—built for heavy duty and long life

Special Features

Are Simplicity, Few Parts, Extra Large Bearings, Liberal Rating, Easy to Start and Keep Running, and Interchangeable Parts.

REGULAR EQUIPMENT The REV-O-NOC Engine comes to you complete; ready when given fuel, water and oil, to start and run. It is equipped with batteries, spark coil, wrenches and book of instructions; fitted with standard size plain pulley as shown in table of specifications. Mounted on wood skids as shown in illustration.

EXTRA EQUIPMENT Hand and horse portable mounting, wood saw outfits, iron sub-base, instead of wood skids, built-in oscilating magneto in place of batteries, friction clutch pulleys instead of plain, furnished at prices shown in table

GUARANTEE We guarantee REV-O-NOC Engines to be made of the very best material and workmanship, free from flaws or imperfections of any kind. Any part showing defect within a period of five years will be replaced free of charge. That they will develop 15 per cent more than their rated horse power and be as economical in fuel consumption with gas, gasoline or kerosene as any engine made, no matter whose. That it will reach you safely. That it is complete in every way and when given fuel, water and oil will start and run satisfactorily. This applies to both the gasoline and throttling governed kerosene engines.

CARBURETOR Is of our special design suction feed from fuel tank located in base of engine. It is simple, fool-proof and absolutely reliable; has an air shutter for easy starting and will not leak gasoline even if valve is left open. It is so constructed that the fuel is mixed automatically with the proper amount of air to produce a perfect explosion

FLY-WHEELS

While it may seem that fly-wheels are not of much consequence, they are really quite an important part of an engine. It is a favorite place for manufacturers who wish to cheapen their engine to cut out weight. It would be almost impossible to get a fly-wheel too heavy. Its function is to store up energy and to carry the engine over the idle stroke. This is a dimension the careful buyer will look into carefully in selecting an engine.

The REV-O-NOC fly-wheels are large carefully machined, perfectly balanced, of large dimensions and ample weight

CYLINDER HEAD AND VALVES

The head of the REV-O-NOC bolts to the back end of the cylinder, and like the cylinder, is water cooled in all sizes except the 1¼ and 2 H.-P. In these small sizes there is not enough heat generated to require it.

REV-O-NOC Valves are of extra large dimensions, allowing the incoming charge to completely fill the cylinder and the exhaust to be expelled freely without back pressure. The heads are made of cast iron riveted to steel stems, and are ground into their seats in a special machine that does it perfectly

THE GOVERNOR

The governor of the REV-O-NOC is very simple, positive in action, and will regulate the speed of the engine to a nicety whether the engine is running light or on full load. It consists of two weights straddling the fly wheel hub and hinged to a collar fastened to the hub. This is an old and thoroughly tried type of governor and never gives any trouble. There is also provision for changing the speed of the engine while running

THE IGNITOR

REV-O-NOC Engines are regularly equipped with the make-and-break system of ignition, so called by reason of the way it works. It consists of one stationary insulated electrode and one movable one, called the hammer, both fitted with special points. When the proper time to fire the charge occurs the hammer is tripped and both points of the electrodes brought in contact. This closes the electric circuit for an instant and as they fly apart a good hot spark is generated.

It is a very simple, reliable system, easy to understand and rarely ever causes trouble.

NO PACKED JOINTS

The special features of our igniter are: The ease with which it can be taken out and cleaned—simply by unscrewing two cap screws. It has a ground taper joint and fits into the engine same as a stopper into a bottle, and requires no packing whatever.

Spark is controlled by the governor same as the valves and is only made when needed.

THE "SIMPLEX" PETROL, BENZOLE OR PARAFFIN RAIL INSPECTION CARS.

Les wagons d'inspection de voie, à essence, benzol, ou pétrole "SIMPLEX."

Vagones-Motores á gasolina, benzol ó parafina "SIMPLEX" para la inspección de Vias.

Rail Cars and Coaches built for any gauge and to suit local conditions.

Our Standard designs include Cars of from 10 H.P. to 40 H.P., with Seating Capacities from 4 to 30 Passengers.

Nos modèles "Standard" comprennent des wagons moteurs de 10 à 40 H.P., pour transporter de 4 à 30 voyageurs assis

Devis et description sur demande

Prenant en considération le prix d'achat, la consommation de combustible, l'économie et le fait qu'un mécanicien expérimenté n'est pas nécessaire, les wagons à moteurs à combustion interne "Simplex" sont les plus économiques

Construimos coches y vagones-motores para cualquier ancho de via y para adaptarse á las condiciones locales

Nuestros modelos "Standard" comprenden coches motores desde 10 H.P. hasta 40 H.P. con asientos para desde 4 á 30 pasajeros

Presupuestos y especificaciones á solicitud

Teniendo en cuenta el primer costo, el consumo total, la economia y el hecho de que no se requiere un super-mecánico, el vagon-motor "Simplex" de combustión interna es el más económico

THE "SIMPLEX" PETROL, BENZOLE, OR PARAFFIN TRAMWAY CARS.

SA

"Simplex" Internal Combustion Engined Tramway Cars have been thoroughly proved and found absolutely efficient. For over 12 years all our energies have been devoted to building Rail Cars, Tramway Cars, and Locomotives.

We build for all gauges and of various seating capacities to suit local conditions.

The "Simplex" Cars are economical and so easy to handle and control that native labour can be safely employed.

We shall be pleased to send details of standard types, or to quote for cars to special requirements.

PB

Les Tramways à Essence, Benzol ou Pétrole "Simplex."

Les tramways "Simplex" avec moteurs à combustion interne ont été mis à l'epreuve et reconnus absolument efficaces

Depuis plus de 12 ans, nous avons consacré toutes nos énergies à la construction de voitures de chemin de fer, tramways et locomotives.

Nous construisons pour toutes largeurs de voies et pour installations d'assise variée, pour convenir aux conditions locales.

Les tramways "Simplex" sont économiques et si faciles à conduire que la main d'œuvre indigène peut facilement être employée.

Nous serons heureux d'envoyer les détails de modèles courants et de coter des prix pour tramways, selon les besoins spéciaux.

Tranvías "Simplex" á Gasolina, Benzol ó Parafina.

Los tranvías "Simplex" de motor á combustión interna han sido concienzudamente probados y han dado resultados eficacísimos. Por más de 12 años todas nuestras energías y esfuerzos se han encaminado á la construcción de coches de ferrocarril, tranvías y locomotoras.

Los construimos para todos los anchos de vía, para cualquier número de pasajeros y apropiados para las diferentes regiones y condiciones locales.

Los tranvías "Simplex" son económicos y tan fáciles de manejar y gobernar que por lo cual se pueden con seguridad, la mano de obra indígena

Nos será grato remitir detalles de los modelos corrientes y cotizar precios para requerimientos especiales.

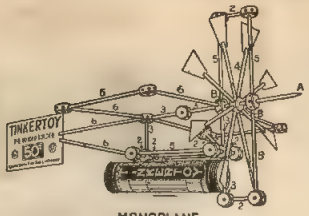
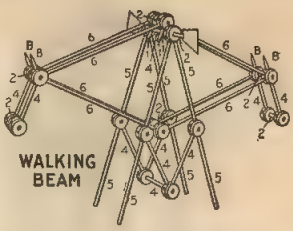
TINKER TOY





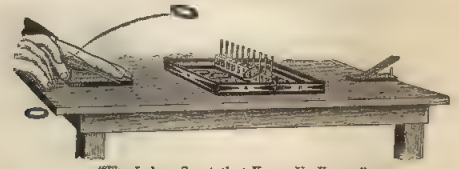
Set consists of 73 Smooth, Round Rods and Spools of Unvarnished Hardwood, W't Per Doz. Sets 14 Lbs.

No. 1—W't per doz. sets 14 lbs. .....per dozen sets $7.80

The 65 cent toy that holds all world's records for sales during the past year. Clean and white, without paint or varnish, they can be taken apart and put together to form **a thousand different marvelous motion figures.** A new toy for every day in the year, all for the cost of one. Complete and easy instructions packed with each toy. Tinker Toy Book "B," consisting of wonderful new models made with two sets and more, is furnished free through dealers to two-set purchasers or present owners of **Tinker Toys** on the purchase of a second set. **Tinker Toys** are packed in unique tubular boxes, ready for purchasers to stamp, address and mail at one-pound rates. No wrapping required.

No seasons with **Tinker Toy.** Every day is Christmas.

JUMPY TINKER



"The Indoor Sport that Keeps Us Young."

A live, active, snappy game that all the family will play. It consists of two courts divided by a picket fence, two catapults or spring boards, five rings to be projected from a distance to encircle the pickets. Unique variations in the system of scoring makes the play exceedingly interesting.

No. 26—W't per doz. 7 lbs .....per dozen $4.20

ONE SET IN A STRONG BOX, WITH A FOUR COLOR LABEL SHOWING THE GAME IN ACTION

SHIPPING FACILITIES

With our immense stock and very modern facilities for shipments we are enabled to fill orders with unequaled promptness. On some of the roads we have special through cars which enable us to reach distant points 24 hours ahead of shipments made in the regular way.

TINKER TOYS

TOM TINKER

There is a period in a baby's life between the rattle and a real doll that has not, up to this time been fully met by those engaged in the business of making play, but now comes Tom Tinker the Ball Man, whom you will agree is just the one to brighten this important period. He consents to being thrown or dragged around and treated ever so roughly without a murmur of complaint. He has no sharp corners to bruise or injure little hands, just nice, smooth, wooden balls strung on four strong cords, which extend to a handle ball about a foot above his head. His many colors are made from harmless dyes that do not lick off. A most lovable companion for any child. Of course Tom can be dressed up in any style.

No. 25—W't per doz. 4½ lbs. .....per dozen *$7.80*

ENCLOSED IN A VERY ATTRACTIVE BOX. PACKED ONE DOZEN IN A FIBRE CASE

BELLE TINKER

Fortunate in her given name, Miss Belle Tinker lives up to its highest meaning. All little boys and girls are just as fond of her as they can be, not alone because she is Tom's twin sister, but on account of her charming personality, beauty of form and face and her lovely disposition. Never out of sorts, always gracious and ever ready to amuse and entertain; her colorings are all her own and will not shed and as she is made of wood no harm can possibly come to her.

No. 30—W't per doz. 4½ lbs. .....per dozen *$7.20*

ONE IN A BOX, ONE DOZEN IN A CARTON

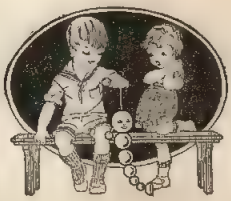
RATTLEBOX TINKER

Simple pull toy for a young walking baby. Noisy enough to interest but not disturb. The possible sales for this item are large. Inexpensive.

No. 37—W't per doz. 7 lbs. .....per dozen *$6.00*

ONE IN A BOX; ONE DOZEN IN A CASE

SIREN TINKER



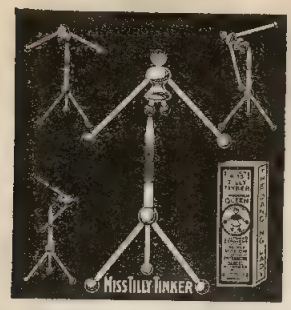
Based on the childhood love for beads on a string but enlarged to balls of interesting size, graduating from large to small and forming a fascinating "Siren" doll. The balls slide backward and forward and take their normal position instantly as wanted. A genuine novelty, waterproof colors. Body size 8½ in.

No. 38—W't per doz. 4½ lbs. .....per dozen *$7.20*

ONE IN A BOX, ONE DOZEN IN A CASE

Our Very Best is the Very Best.

MISS TILLIE TINKER

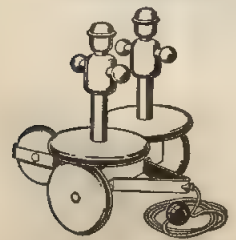


Miss Tilly Tinker is destined to become one of the world's favorites in public life. No lady made of wood has ever been able to perform the wonderful feats accomplished by this fascinating beauty. She dances untiringly upon her toe at the top of a slender pole. She whirls and bows, forward, sideways and backward, cuts figure eights, and leans over so far, that at times it seems as if she would surely fall, but always rights herself with perfect safety. Miss Tilly's beauty, color and motion will win her way into the hearts and homes of every family in the land, and bring delight to childhood.

No. 27—Height 17½ in., w't per doz. 15 lbs., per dozen *$9.00*

ONE IN A BOX; ONE DOZEN IN A CASE

WHIRLEY TINKER

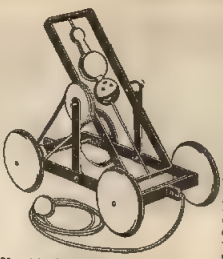


Color and action never fail to hold the child interest. The simple act of pulling this toy by the string sets two little men dancing merrily like tireless dervishes, round and round, fast or slow in never ending spins to the astonishment of all juvenile onlookers and the great delight of the operator. Whirly Tinker naturally compels attention. Made of hard wood, highly colored and polished, with rust-proof metal trimmings.

No. 33—W't per doz. 16 lbs. .....per dozen *$15.00*

ONE IN A BOX; ONE DOZEN IN A CARTON

TUMBLE TINKER



This little acrobat does a feature diving act in a revolving trapeze. He works fast, is very amusing and will continue as long as the carriage is drawn, unless of course, one wishes to let him rest, in which event the belt on the pulley is slipped aside, when he simply rides along, quietly awaiting his call for the next performance. Made of metal and hardwood, highly colored and polished. A decidedly attractive plaything for both boys and girls.

No. 34—W't per doz. 16 lbs. .....per dozen *$15.00*

ONE IN A BOX; ONE DOZEN IN A CARTON

TURTLE TINKER

The best balanced and easiest rolling pull toy ever invented. Rides on either side and turns turtle when taking corners. Cannot drag, it always rides right side up. Solid wood body ball, head and wheels, frame of metal, all nicely finished.

No. 39—Size 8 in., w't per doz. 11 lbs. ..per dozen *$12.00*

FOLLO-ME TINKER

Here is a rolling toy, that is always rolling; in fact, it can't possibly do anything else, for all sides are on wheels and no matter how roughly treated or thrown about it is sure to land right side up. Follo-Me-Tinker provides rest and comfort for nurse and mother, as well as continuous amusement and entertainment for the child. Made of hardwood, beautifully finished in attractive colors; cord and ball included.

No. 32—Size 3x3x15 in., w't per doz. 13 lbs., per dozen *$12.00*

ONE DOZEN IN A CARTON

SPECIAL TOOLS FOR FORD CARS

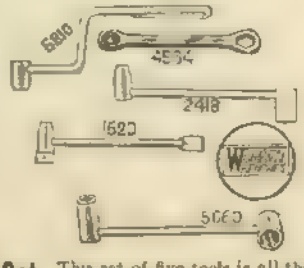
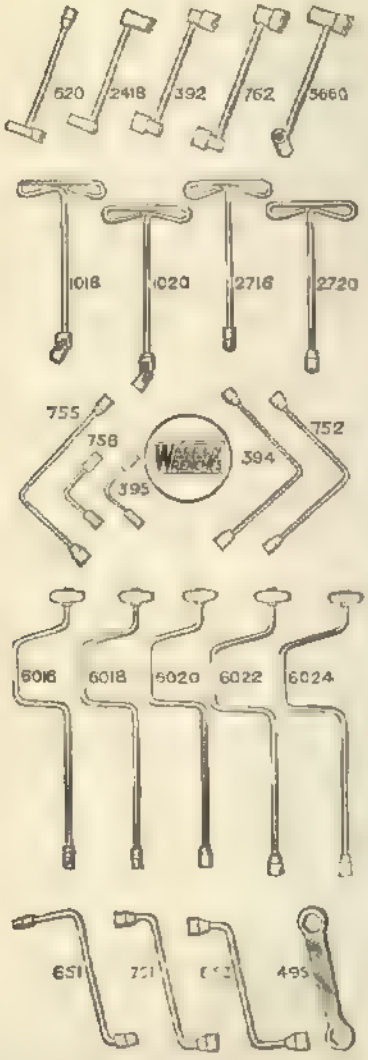
FOR FORD CAR



57 Set This set of five tools is all that is needed by the average Ford owner for repairing, and are fully illustrated and described on accompanying pages. **Each 4.55**

WALDEN - WORCESTER WRENCHES

No. 23 Garage Service Set



A selection of wrenches adapted for general service work on any motor car.

The No. 23 Set replaces our No. 30 Set which has been sold for several years. After careful study of garage service stations in all parts of the country this new selection is offered to the trade. In this new line-up only the most popular sizes of speed wrenches are included. Particular attention has been paid to the selection of L type and double-end offset wrenches which have been found most useful for general garage service work.

Two of the Tee Flex or universal joint wrenches so handy in reaching inaccessible nuts, bolts and cap screws complete the usefulness of this set.

PACKED IN PLAIN WOODEN CASE
20 1-2 x 7 x 6

Each different wrench is fully illustrated and described elsewhere in this catalog. Garage owners will instantly recognize the utility of this assortment.

These 23 wrenches, some with two or three socket sizes, make possible 38 different combinations.

Offset wrenches	1
L-wrenches	10
Speed wrenches	5
Tee-handle wrenches	2
Tee-flex wrenches	2

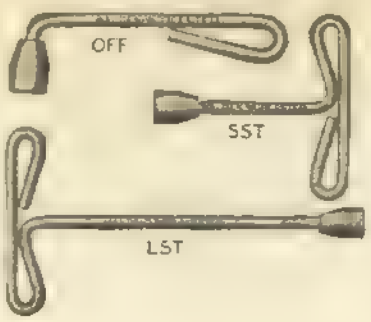
Walden-Worcester Tee and Offset Handle Socket Wrenches



Wire handle construction and machine turned sockets make it possible to produce an equally well made and serviceable tool at much less cost than usual drop forged wrenches. Sockets are steel, machine turned from solid bar and broached accurately to size. Wire handles are proper size and class of material to guarantee service. Sockets are so fastened to the wire they will not turn or loosen.

SAFETY LAMPS FOR MINES.

Approved by British, French, American, and other Governments.

SIMPLE, STRONG, & EFFECTIVE.

Burns cheap, easily procurable Oil, Benzene, Petrol or Naphtha. Gives good light at low cost, economical in upkeep and cannot be tampered with. Will withstand great velocities of explosive mixture.

Fitted with strong spring-acting lock to be opened by either a permanent magnet or electro magnet, or may be fitted with lead locking arrangement. Very simple and easy of manipulation.

Benzene lamps fitted with very effective arrangement for changing cotton wool in vessel.

Strongly built for rough usage, and when extinguished can be safely and certainly relighted underground in our special explosion-proof relighting machines which prevent explosions such as may happen with other lamps having internal igniters.

No igniter tapes or amorces bands to buy.

Our system of relighting lamps underground in Hailwood's special explosion-proof machine does away with the necessity for matches and the risks of fire in the lamphouse when cleaning and refilling lamps and handling of matchboxes.

The simplest, safest, and cheapest system known.

LAMPES DE SÛRETÉ POUR MINEURS

Absolument sûres, solides et simples. Brevetées, Demandées etc
Construction simple, robuste et efficaces.
Emploient les Huiles de bon marché et faciles à se procurer " Benzole, Pétrole ou Naphte.
La lumière est excellente et peu couteuse ; l'entretien de ces Lampes est très économique, elles ne se dérangent jamais
[illegible] admirablement bien aux mélanges explosifs, quelle que soit la rapidité de leur vitesse.
[illegible]
Les Lampes à Benzole sont munies d'un dispositif très commode pour changer le Coton dans les Réservoirs.
Toutes ces Lampes sont d'une construction très robuste, et si par hasard elles s'éteignent on peut les rallumer avec toute sureté dans les Mines au moyen de nos Appareils d'Allumage, lesquels empêchent les explosions, qui malheureusement arrivent trop souvent quand on se sert de lampes avec allumeurs intérieurs.
En employant nos Appareils on n'a pas besoin de bandes d'amorces, ce qui réalise un grande économie
Notre système de rallumage de lampes dans les souterrains, au moyen de notre appareil spécial "Hailwood" à l'épreuve des explosions, evite l'emploi des allumettes et les risques d'incendie dans les lampisteries lors du nettoyage et remplissage des lampes et la manipulation [illegible]
[illegible] le plus simple, le plus sûr et le meilleur marché

LÁMPARAS DE SEGURIDAD PARA MINAS

HAILWOOD'S FAMOUS COMBUSTION TUBE OIL SAFETY LAMP.

Approved by British, French, American and other Governments.

Electrically Ignited and Magnetically unlocked.

Simple, strong, extremely safe, and of light weight.

Will stand considerable rough usage, and may be tilted without being extinguished, and is not readily smoked up.

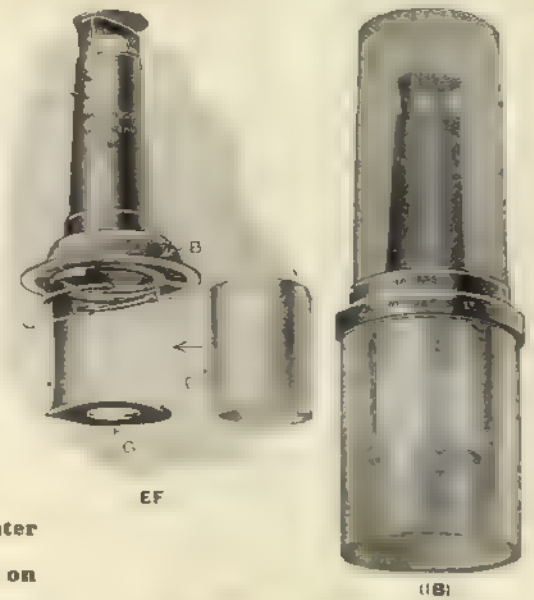
Gives a beautifully clear white soft light of from 2 to 3 times greater candle-power than any other flame safety lamp on the market.

100,000 of these lamps put into use since its first appearance on the market only a few years ago.

Fitted with an extra-strong magnetic lock and with special oil-filling valve for rapidly replenishing with oil.

This lamp possesses the highest degree of safety and gives the greatest illumination, and is arranged for ease and convenience in handling.

We make all kinds of Miners' Safety Lamps to burn oil or benzene, and acetylene lamps for mines and quarries, and spare parts for all makes of Lamps.



EF

(IB)

LAMPE DE SÛRLTÉ À HUILE, AVEC TUBE DE COMBUSTION, DE LA CÉLÈBRE MARQUE "HAILWOOD."

Approuvées par les Gouvernements Britannique, Français, Américain, etc
Allumage électrique ; Ouverture magnétique
Simple, forte, sûre et légère
Cette Lampe ne craint point l'usage même assez rude ; on peut l'incliner sans l'éteindre et elle ne s'encrasse pas facilement
Sa Lumière est blanche et très agréable à la vue, et sa puissance en bougies est de 2 ou 3 fois supérieure à celle de n'importe quelle autre lampe à flamme
100 000 de ces Lampes sont en usage depuis leur invention, il n'y a que peu d'années
Elles sont munies d'un dispositif de fermeture magnétique bien fort et d'une soupape spéciale pour les garnir rapidement d'huile
Cette Lampe possède le plus haut degré de sûreté et donne la meilleure lumière possible en même temps on peut la manier avec la plus grande facilité sous tous égards.
Nous fabriquons toute sorte de Lampes de Sûreté pour Mineurs, sont à Huile ou à benzine et également des Lampes à Acétylène pour Mines et Carrières, ainsi que des pièces de rechange pour lampes de toutes marques

LÁMPARA DE SEGURIDAD DE ACEITE, CON TUBO DE COMBUSTION, DE LA FAMOSA MARCA "HAILWOOD"

Aprobada por los Gobiernos Inglés, Francés, Americano y Otros
Con Ignición por Electricidad y Dispositivo de Abertura Magnético.
Simple, Resistente, Extremadamente Segura y Ligera
Resistirá una manipulación dura considerable, pudiendo inclinarse sin que se apague, y no se ahuma fácilmente.
Proporciona una luz hermosa, clara y fija, siendo su potencia en bujías, de 2 á 3 veces mayor que cualquier otra lámpara de seguridad á llama en el mercado.
100,000 de estas Lámparas están en servicio desde su aparición en el mercado, hace unos pocos años solamente
Equipadas de Cierre magnético extra-fuerte y provistas de válvula especial de alimentación de aceite, para rellenarla rápidamente de este combustible
Esta Lámpara posee el mayor grado de seguridad y proporciona iluminación brillantísima. Construida para su fácil y conveniente manejo
Construimos toda clase de Lámparas de Seguridad para mineros, para emplear como combustible aceite ó bencina y Lámparas de acetileno para minas y canteras; así como piezas de repuesto para toda clase de Lámparas de cualquier construcción

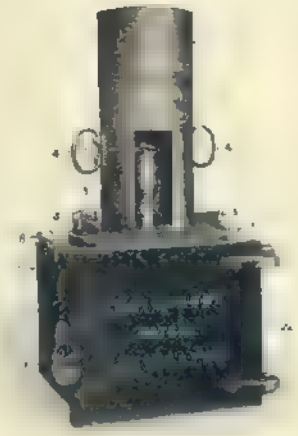
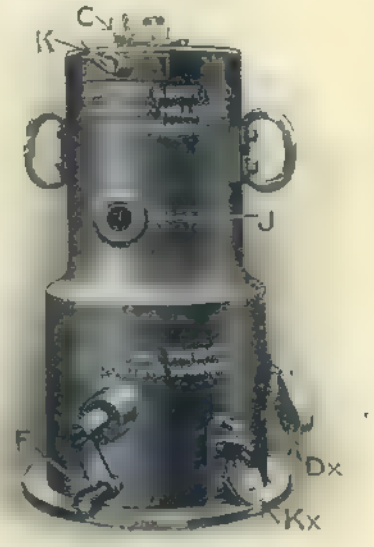
Hailwood's Patent Underground Relighting Machine for Miners' Oil and Benzene Lamps.



AC)



NY)

Ensures safe relighting of lamps in the mine as lamp must be completely enclosed in the special flame-proof chamber before current can be generated and lamp be ignited.

Exceedingly strong, simple, compact, and absolutely safe.

Impossible to ignite a dangerously defective lamp in the machine whilst in an explosive atmosphere and so prevents explosions such as may happen with lamps having internal igniters, also saves cost of igniter tapes or amorces bands.

All joints revolvable or threaded and not likely to get out of order.

Fitted with accumulators or powerful magneto dynamo which will last years without any addition except for an occasional drop of oil.

This system does away with all the trouble and cost of amorces strips for internal igniter lamps and avoids risk of burning down of lamproom during manipulation.

We also supply our special underground relighting machines with electrical accumulators and induction coil which give a good strong spark.

The simplest, safest, and cheapest system known.

APPAREIL DE RALLUMAGE DANS LES MINES DES LAMPES DE MINEURS À HUILE ET À BENZOLE. SYSTÈME "HAILWOOD" BREVETÉ

APARATO DE ALUMBRADO EN SUBTERRANEOS (PRIVILEGIO DE HAILWOOD), PARA RE-ENCENDER LAMPARAS DE MINEROS A BENCINA Y ACEITE

Magneto Dynamo Machine for lighting miners' safety lamps in lamphouse.
Simple, strong, and upkeep costs practically nil.
Lamps lit in a moment when called for by men instead of being lit by torch hours before, and lamps are therefore given out perfectly clean.
Saves cost of igniter match ribbons or amorces bands.
These machines are also made fitted with accumulators and induction coil in place of the magneto and give a good strong spark.
Simple, and strongly constructed.

(PE)

Powerful magnetic unlocking machines for quickly and easily unlocking lamps in lamphouse.
Exceedingly rapid, and strongly built.
Lamp oilfilling machines; the quickest on the market.
Refills lamp without removing burner; extremely simple and rapid.

Iron lampstands or racks with enamelled iron number plates. Compact, neat and clean.

(TI)

Rapid Lamp cleaning Machines for quick handling and cleaning of Lamps; may be fitted with either steam engine or electric motor.
Will clean over 100 lamps per hour and reduces cleaners' wages to a minimum.
Compact, strong, and simple, with brush spindles driven by friction ensuring silent and smooth running.

Hallwood's Patent Gauze Brushes with renewable end and reversible body.
Simplest and cheapest on the market.
All kinds of lamp cleaning and other brushes made.

Actual Makers of high quality heat resisting glasses for miners' safety lamps and laboratory glassware.
All kinds and sizes of glasses or globes supplied on receipt of dimensions.

USE ONLY GENUINE COLEMAN MANTLES

To get the greatest amount of light and service out of Coleman Lamps, Lanterns and Lighting Plants, you should use only Genuine Coleman Mantles, because—

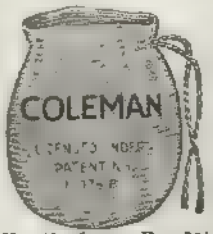
1 They work perfectly with the proper size gas tip and air intake in producing 300 candle power of pure-white light—always restful to the eyes.

2 Coleman Mantles are the proper size to insure more efficient and brilliant light than is possible with ordinary mantles.

3 Coleman Mantles are full size and non-shrinkable

4 They are properly reinforced at the bottom where the gas pressure is greatest, therefore cannot split at the seam or fall away.

5 They are made by a special process—especially for use on Coleman Quick Lite Lamps Lanterns and Lighting Plants.



Use only the mantles which have the name Coleman on them.

Coleman mantles are now put up one dozen in a pasteboard carton and one gross (12 cartons) in handsome and attractive counter display box.

No. 41—Junior Rag 2½ inches long for Quick-Lite Lamps and Lanterns and all other gasoline lamps using two or more junior size mantles .....per dozen *$1.50*

THE NEW COLEMAN QUICK-LITE SUPPLY CASE

A "PEACH" OF A DISPLAY—A CONSTANT REMINDER—A SELF-SELLING MERCHANDISER. ALL IN ONE.

A display case that will work for you. An assortment of "oftenest needed" repair parts.

Brightly colored card in cover lists all parts, contains illustrations, numbers, prices and will be of immeasurable help.

Your stock is before you and will always be a constant reminder to avoid shorts.

The metal box is free. 26 gauge metal-finished in olive green

Walls of compartments are all spot-welded together. Case measures 13¾ in. long by 7⅜ in. wide by 2⅝ in. deep.

If parts are retailed at their regular individual list prices the contents of each case will sell out at a profit of $15.00 which makes this proposition attractive without even considering the display value of the case at work on the counter.

No. R1000—Quick Lite Supply Case. Containing parts as listed with metal counter display case, each $30.00

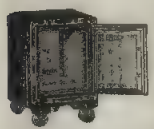
FIRE PROOF SAFES

COLUMBIAN SAFE AND LOCK CO.

The only one piece flanged front and back air chamber Safe in the market. The back and front is a solid one piece, formed by flanging a square steel plate on a powerful machine—the front is then died out, forming the door frame—the door is thus made from the part that has been cut out in making the frame. After this process the front and backs are electrically welded to a solid one piece of sheet steel, which forms the top, bottom and sides, eliminating rivets, etc., which makes as nearly a solid construction as is possible to make, after the filling and inside construction is put in.

An important feature, found in no other make, is an air chamber all around the inside, top, bottom, back and sides of the Safe. This air chamber is made of a double cabinet, one contained in the other, so there is a space of $\frac{3}{8}$ of an inch all around. This is done to eliminate a common complaint to which all Fire Proof Safes are subject—that is, dampness, which causes the Safe to sweat, during which process this sweat will go toward the inside, causing the cabinet work to warp. This air chamber makes the Safe doubly strong and secure in case of fire, forming a vacuum, so to speak.

We Guarantee the Columbian Safes to be dry, and the locks and bolts to work smoothly, that the doors will fit—not too loose, not too tight, and that the contents will be protected from fire in any emergency for which a fire-proof safe is intended.



Single outside door fitted with combination locks unless key locks are specially ordered.

Customer's name painted on safes free of charge.

FIRE PROOF SAFES

COLUMBIAN SAFE AND LOCK CO.

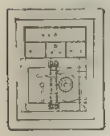
With Burglar Chests.

Same general construction as safes shown on preceding pages with the exception of being fitted with burglar chests.

The chests are of five-ply steel, the door is hung on crane hinges, closed with lever eccentric pressure. Door and frame is made a tenon and groove style, asbestos packed. The bolt work is double acting, made of 1-inch cold rolled round calendar steel, and securely locked with an unpickable combination lock. The dial and handle are so made that they cannot be driven in or out.



With Single Outside and Inside Door.

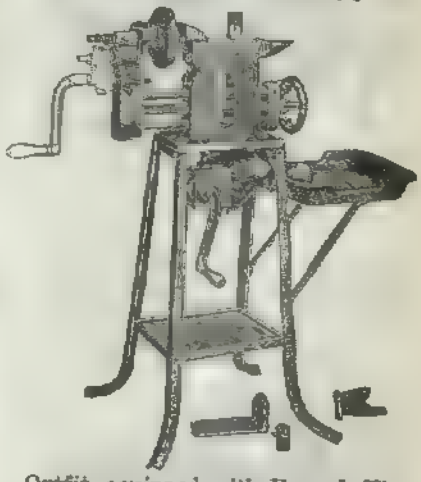
CHAMPION IMPROVED COMBINATION BLACKSMITH OUTFITS



Outfit, equipped with Forged, Vise, Anvil, Pipe Vise, Drill Press and Emery Grinder, strictly a high grade combination tool built for service.

Gears are all cut. Forge pan 12x14 inches, large enough to take a plowshare. Pan cut away so that a plowshare can be put into it. The Blower-head attached is a real cut-gear, high speed outfit that runs silent, is speeded high enough to produce a white pressure heat so that welding can be done on any work.

Emery wheel is screwed on stud between vise jaws attached to high speed gear on this gear box, two substantial bearings—one on each side of vise jaws—support this wheel, making it a rigid, practical, durable grinder.

Screw accurately cut and two heavy shafts support vise so that jaws meet perfectly without lost motion.

Pipe vise operates without any change whatever. No parts are removed or lost and this machine takes pipe up to two inches.

Legs are angle steel, well riveted to top plate and tool tray, two steel rods support forge pan.

Height over all	40 in.
Height to top of Forge Hearth	26 in.
Width of Vise Jaws	4 in.
Extreme opening of Vise Jaws	4½ in.
Capacity of Pipe Vise	2 in.
Capacity of Drill Press	½ in.
Greatest distance from Spindle to Table	11 in.
Spindle bored to take	½ in.
Face of Anvil	8x5½ in.
Size of Hardie	¾ in.
Size of Forge Hearth	12x14 in.
Depth of Forge Hearth	2½ in.
Speeds obtained by gearing	1 to 1, 1 to 4 and 1 to 14
Size of Emery Wheel	6x1 in.
Floor Space	19x32 in.
Weight Crated	185 lbs.

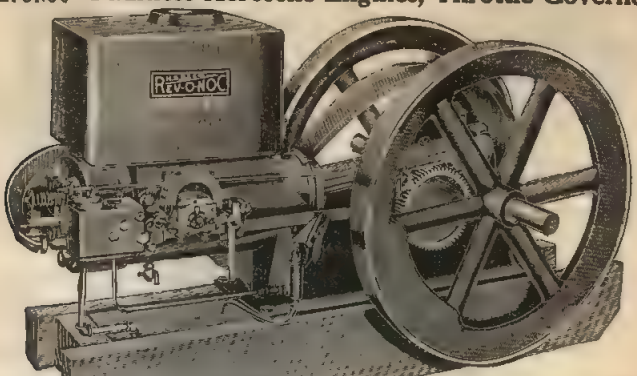
REV-O-NOC Faultless Kerosene Engines, Throttle Governed



Built in sizes 3, 5, 7, 10, 12, 15 and 25 H.-P.

The above illustration shows the Improved REV-O-NOC Throttle Governed Kerosene Engine as regularly equipped. Oscillating Type Magneto included, mounted on wood skids complete with [illegible]. Many prefer this style of mounting to any other. It is really a semi-portable method and where it is desired to move the engine from place to place a team can be hitched to it, the skids acting as runners. The skids are well made of heavy timber cross braced and nicely painted. It is lighter in weight and a little cheaper in price than the full iron sub-base style shown on next page, which can be furnished at a small additional charge shown in price list.

REV-O-NOC KEROSENE ENGINE "Type K," Throttle Governed

This is not a common gasoline engine with an attachment for using kerosene, but is designed especially for kerosene, and we guarantee it will operate successfully on kerosene, distillate and other similar fuels. It differs from the gasoline engine in the way the fuel is fed into the cylinder, the shape of the head, the valves and governing mechanism, and while it will run perfectly on gasoline, the object of it is to take advantage of the cheaper fuel which at present amounts to a saving of more than 100 per cent

KEROSENE vs. GASOLINE

Engine manufacturers have always known that kerosene contained as much energy as gasoline, and a good many makeshifts and attachments for using it in engines have been put on the market. Some work when conditions are just right and the operator can stand over them and constantly make adjustments, but usually it will be found that the trouble involved more than offsets the saving. The trouble is, most engine manufacturers try to use kerosene in their regular engine, originally designed and built for gasoline. They use a more or less complicated attachment and attempt by heating the oil or air or both to convert kerosene into gasoline, or rather, as unsatisfactory substitute that can be used in their hit-and-miss engines. At best, they are only makeshifts. The principle is all wrong. Gasoline can not be made from kerosene any more than butter can be made from lard. If it could, the oil people would do it themselves, and the difference in price would not exist. After trying out these different attachments and inventing a few of our own, we came to the conclusion that if kerosene was used at all for power, it would have to be in a machine made especially for it. So we started from another angle and studied the peculiarities of kerosene as we found it, instead of trying to change it into gasoline, or a substitute that our gasoline engine could use. We built

A REAL KEROSENE ENGINE

One that could use kerosene and thrive on it. We actually succeeded in overcoming all the difficulties, and the REV-O-NOC Type K" kerosene Engine is the most powerful, easy starting, and economical engine and fuel user that you think you ever saw. The REV-O-NOC Throttle Governed Kerosene Engine has been [illegible] and continuously since 1906, they have always enjoyed the reputation of being one of the best engines on the market, and while we may be putting it a little too strong, for which we ask you to pardon us, we believe the REV-O-NOC Throttle-Governed Kerosene Engine is the best engine on the market today. Anyway, you are both judge and jury, and all we ask is that you compare it with any other engine, no matter whose, and if you don't agree with us the engine is ours, and you are out very little except your trouble, and the experience will be well worth that. REV-O-NOC Kerosene Engines will operate on common coil oil or distillate, run just as well and use no more of it than other engines do of high priced gasoline. Can't you well afford to pay a little more in first cost?

DON'T BUY A HIT-AND-MISS ENGINE

And expect it to work satisfactorily on kerosene. A gasoline engine with a kerosene attachment is cheaper to buy, but it will never give you satisfaction. True, it can be made to run at times fairly well, but we know, and believe you will agree, that an engine that cannot be depended on to do its work whenever you want it is not a good buy, no matter how low the price. This is not prejudice nor an effort on our part to make you believe something that is not true, for we build both kinds. It is a fact that any competent engineer will bear us out in. We have spent a lot of time and money experimenting and proving this, and offer these facts to help you decide on the right type of engine to buy.

THROTTLE GOVERNED vs. HIT AND MISS

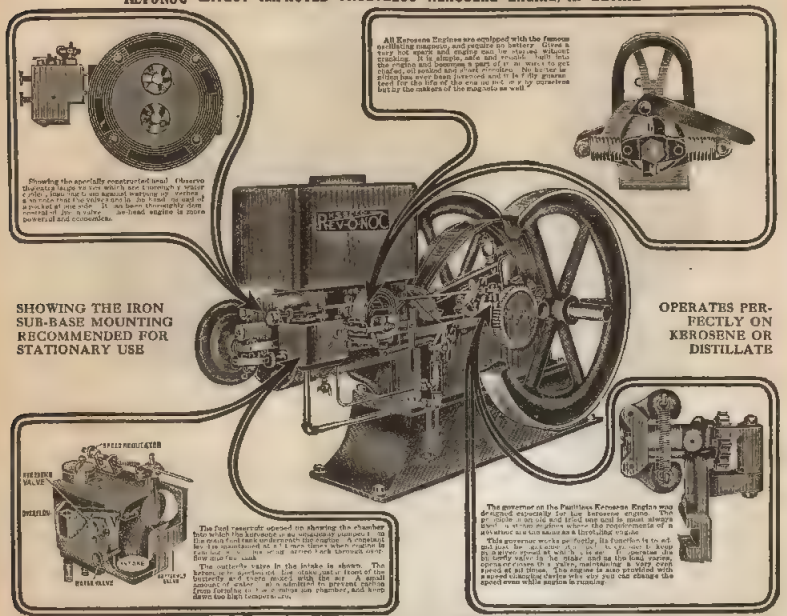
Most gasoline engines are governed on the hit-and-miss principle; that is, they always take a full charge and explode it as energy is required, and the intervals between power strokes depends on the load the engine is carrying. If it is a full load it would fire every time, but on a half load the governor acts and prevents another charge being taken into the cylinder and fired until all the energy from the previous charge is used and the speed begins to be reduced, then the governor acts again and allows another charge to be taken. This principle has been found to be perfectly satisfactory for gasoline and all REV-O-NOC Gasoline Engines are so constructed with the governor in the fly wheel. But in the kerosene engine the requirements are different.

HIGH SPEED GOVERNOR

The ball in the fly wheel type does not act quickly enough, so we designed a special high speed fly wheel governor, [illegible] the same as those used on most steam engines. This bolts to the engine bed and is driven from the large engine gear. It governs the engine speed perfectly and makes it a beautiful, smooth-running engine that will give years of satisfactory service.

Prices on Application

REVONOC LATEST IMPROVED FAULTLESS KEROSENE ENGINE, IN DETAIL



Showing Special Features Wherein It Differs from Ordinary Hit-and-Miss Engine with Kerosene Burning Attachment.

No Kerosene Engine with the governor in the fly wheel will run as smoothly or work as well on kerosene, as one with a high speed fly ball governor.

No Kerosene Engine depending on an attachment for heating the fuel or air can possibly run as well on kerosene as one controlled by a butterfly valve in the intake.

No Kerosene Engine will work well with a poor ignition system. The Oscillating Type magneto used on all REVONOC throttling-governed kerosene engines is absolutely reliable, requires no battery, and will start engine without cranking.

No Kerosene Engine will work properly and economically unless the head is specially constructed. It requires high compression and extra large valves.

SAVES ITS COST IN ONE YEAR

For example, suppose you have a seven-horse gasoline engine and your work would require five gallons to run it ten hours. At the present price of gasoline here (20c per gallon), the cost would be $1.00. Now, doing the same work, a REVONOC Kerosene Engine would not use any more gallons and the price is 7 cents, or 35 cents for ten hours. A saving of 65 cents, or enough to pay for the total cost of the engine in less than 225 days—not a year's steady running. Is any more argument necessary? Remember, the REVONOC Kerosene Engine will give you just as good service in every way as any gasoline engine made. It has no more complications; we do not heat the kerosene or treat it in any way; simply use it the same as any other engine uses gasoline. These are hard cold facts we are ready and willing to prove.

WE GUARANTEE ALL REVONOC ENGINES TO DEVELOP 15 PER CENT MORE THAN THEIR RATED HORSE POWER

Prices on Application

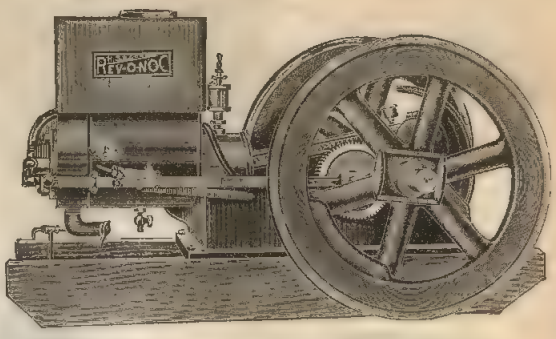
REVONOC Gasoline Engines

Hit-and-Miss Governed

Magneto or Battery Ignition

Self-Contained Hopper Cooled

Portable Semi-Portable and Stationary



Built in Sizes 1¼, 2, 3, 5 7, 10, 12 and 15 H.-P.

The illustration above shows the REVONOC Engine in the cooler and style of mounting regularly furnished. They are of the four-cycle, water cooled, hopper jacket, semi-portable type, self-contained, make and break ignition, large bore, long stroke, slow speed built for heavy duty and long life

Special Features

Are Simplicity, Few Parts, Extra Large Bearings, Liberal Rating, Easy to Start and Keep Running, and Interchangeable Parts.

REGULAR EQUIPMENT The REVONOC Engine comes to you complete, ready when given fuel water and oil to start and run. It is equipped with batteries, spark coil, wrenches and book of instructions, fitted with standard size plain pulley as shown in table of specifications. Mounted on wood skids as shown in illustration.

EXTRA EQUIPMENT Hand and horse portable mounting, wood saw outfits, iron sub-base, instead of wood skids, built-in oscillating magneto in place of batteries, friction clutch pulleys instead of plain furnished at prices shown in table

GUARANTEE We guarantee REVONOC Engines to be made of the very best material and workmanship free from flaws or imperfections of any kind. Any part showing defect within a period of five years will be replaced free of charge. That they will develop 15 per cent more than their rated horse power and be as economical in fuel consumption with gas, gasoline or kerosene as any engine made no matter whose. That it will reach you safely. That it is complete in every way and when given fuel, water and oil will start and run satisfactorily. This applies to both the gasoline and throttling governed kerosene engines

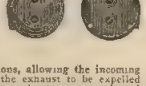
CARBURETOR Is of our special design suction feed from fuel tank located in base of engine. It is simple, fool proof and absolutely reliable, has an air shutter for easy starting and will not waste gasoline even if valve is left open. It is so constructed that the fuel is mixed automatically with the proper amount of air to produce a perfect explosion

FLY-WHEELS

While it may seem that fly-wheels are not of much consequence, they are really quite an important part of an engine. It is a favorite place for manufacturers who wish to cheapen their engine to cut out weight. It would be almost impossible to get a fly-wheel too heavy. Its function is to store up energy and to carry the engine over the idle stroke. This is a dimension the careful buyer will look into carefully in selecting an engine. The REVONOC fly wheels are large carefully machined, perfectly balanced, of large dimensions and ample weight.

CYLINDER HEAD AND VALVES

The head of the REVONOC bolts to the back end of the cylinder, and like the cylinder, is water cooled in all sizes except the 1¼ and 2 H. P. In these small sizes there is not enough heat generated to require it.



REVONOC Valves are of extra large dimensions, allowing the incoming charge to completely fill the cylinder and the exhaust to be expelled freely without back pressure. The heads are made of cast iron riveted to steel stems, and are ground into their seats in a special machine that does it perfectly.

THE GOVERNOR

The governor of the REVONOC is very simple, positive in action and will regulate the speed of the engine to a nicety whether the engine is running light or on full load. It consists of two weights straddling the fly wheel hub and hinged to a collar fastened to the hub. This is an old and thoroughly tried type of governor and never gives any trouble. There is also provision for changing the speed of the engine while running.

THE IGNITOR

REVONOC Engines are regularly equipped with the make-and-break system of ignition so called by reason of the way it works. It consists of one stationary insulated electrode and one movable one, called the hammer, both fitted with special points. When the proper time to fire the charge occurs the hammer is tripped and both points of the electrodes brought in contact. This closes the electric circuit for an instant and as they fly apart a good hot spark is generated.

It is a very simple reliable system, easy to understand and rarely ever causes trouble

NO PACKED JOINTS

The special features of our igniter are: The rod with which it can be taken out and cleaned simply by unscrewing two cap screws. It has a ground taper joint and fits into the engine same as a stopper into a bottle, and requires no packing whatever.

Spark is controlled by the governor same as the valves and is only made when needed.

CRANK SHAFT

Crank shafts in the REVOLUTION Engines are of ample size, of full length, the pulley is keyed directly to the shaft instead of being bolted to the fly-wheel. This makes it possible for you to use any pulley that will fit the shaft.

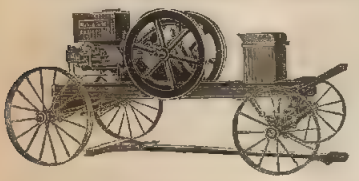
Cranks are forged from a solid piece of special high carbon steel, turned and ground absolutely true.

The size of the crank is an excellent criterion of the quality of an engine. It is to the engine what legs are to a horse. Don't buy any engine without knowing the diameter of the crank shaft.

PISTON, RINGS AND CONNECTING ROD

Both piston and rings are made of the best close grained iron, accurately machined and finished in special machines. Piston is the extra long trunk type ground to fit cylinder perfectly. Connecting rod is of the "I" beam section made of material that positively will not crystalize. It is fitted with bronze bearings as piston and special bearing metal at crank end, with provision for taking up wear at both places. Piston pin is steel ground and hardened. Rings are made them locked in a special machine, returned and ground, insuring a perfectly gas-tight piston.

REVOLUTION ALL STEEL HORSE PORTABLE



It is the Standard REVOLUTION Engine, mounted on all steel truck, especially designed for the purpose, with extra wide wheels and good strong tongue. Large tool and battery box under seat.

Engine is bolted direct to heavy steel cross beams. No wood underneath engine.

Engine is carefully balanced and will run with very little vibration.

A mighty convenient all around power.

REVOLUTION ALL STEEL PORTABLE SAW-RIG
In sizes 5, 7, 10, 12 and 15 H.-P.

Furnished complete ready to start and go to sawing. Equipment consists of our Standard Engine removed from skids and mounted on an extra heavy all steel truck.

With an all steel tilting Saw-Table. Equipped with saw guard balance wheel.

Saw (set and sharpened), extra heavy belt, belt tightener, batteries and all other usual equipment.

No better or more complete Saw-Rig was ever offered. Saw attachment can be removed and engine and truck used as a regular Horse Portable outfit.

OSCILLATING MAGNETO

All REVOLUTION Gasoline Engines except the 1½ H. P. can be furnished equipped with a Built-In Oscillating Type Magneto instead of the regular battery equipment at additional charge (shown in price list). This does away with a battery entirely and is the most reliable form of ignition known. It is bolted securely to the engine and becomes a part of it, always gives a big fat spark and engine can be started with it without cranking. It soon pays for itself not only in convenience but in the saving of batteries alone.

FRICTION CLUTCH PULLEYS

Oftentimes a Friction Clutch Pulley on an engine is a great convenience, particularly when the engine has to be started with its full load, which necessitates throwing off the belt until the engine is started and then putting it on after it is running. By means of a Friction Clutch you can, by throwing out the clutch, start the engine without the pulley turning and after the engine is started throw in the clutch and start the load.

Our Clutches are heavy and strong, without springs or other complications. We can furnish almost any size Clutch. They are extra equipment on both the gasoline and kerosene engines. For regular sizes and prices see price list.

REVOLUTION HAND PORTABLE

In sizes 1¼, 2, 3 and 5 H.-P.

This makes a very handy portable power.

It is often very convenient to be able to move an engine from one location to another easily. Many find it profitable to have one of these small portable engines to do the pumping, churning, washing and other light work, and a larger engine to take care of the heavy work.

Truck is substantially made, easy running. It makes a very convenient way for the dealer to show a sample engine, put it up where it can be easily examined, conveniently started, and shown in operation.

The engine retains it regular skid mounting, and by simply taking it off the truck it can be converted into a stationary engine.

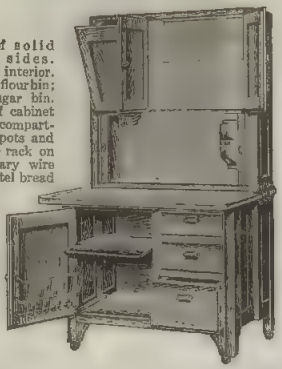
WE GUARANTEE ALL REVOLUTION ENGINES TO DEVELOP 15 PER CENT MORE THAN THEIR RATED HORSE POWER

KITCHEN CABINETS

ROLL FRONT



Front made of solid oak, hardwood sides. White enameled interior. Removable metal flour bin; sanitary glass sugar bin. The lower part of cabinet has a very roomy compartment for pans, pots and kettles, with wire rack on the door. Sanitary wire sliding shelf; metel bread and cake drawers, and drawer for cutlery.

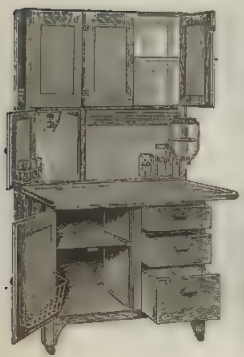
Height 69 ins.; width 41 inches; depth 27 inches.

Each

No. 17WE –With nickeloid sliding top; (without spice set) $69 75

No. 17PT—With porcelain sliding top and six glass jars for spices, tea and coffee..... 80 25

One in a crate. K. D ; shipping weight each 165 lbs.



ROLL CURTAIN FRONT

Cupboard top, white enameled inside; metal tilting flour bin, with sifter; china closet; glass sugar jar and six glass jars for spices, tea and coffee.

Base has a full sliding top and a roomy compartment for pans, pots, etc., with rack on door; one metal bread and cake drawer two roomy drawers for cutlery, linens, etc.

Clear grained solid oak, high gloss spar varnish finish; height 71 inches; width 41 inches; depth 27 ins.

Each

No. 6WE—With sliding nickeloid top $69 75

No. 6PT—With sliding porcelain top 81 75

Crated; shipping weight each 165 lbs.

KITCHEN CABINETS

Cupboard top; white enameled inside; all oak, box base construction; wire pan rack, sliding wire shelf cutting board; metal bread box; handy filing hooks, extract bottle rack, tea, coffee and spice set; glass front flour bin, which lowers to worktable for easy filling.

Height over all 69 inches; width 41 inches; depth 24 inches; work table 24x 41 inches.

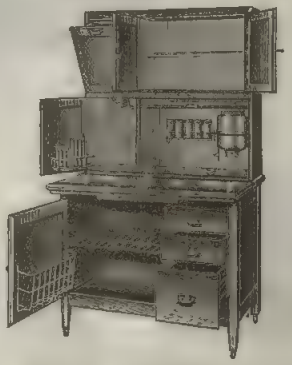
Each

No. 19WE—With nickeloid sliding top..... $72 75

No. 19PT—With sliding porcelain top..... 89 25

Crated; shipping weight 168 lbs.

—BLUE GRASS— ROLL CURTAIN FRONT



Solid oak, dull rubbed finish; reinforced sanitary leg base.

Cupboard top is white enameled inside and equipped with metal tilting flour bin; glass sugar bin; glass tea and coffee jars; and five glass spice jars. A disappearing wood curtain front covers sugar bin and spice jars.

Base has sliding table top; kneading board, metal cake or bread drawer; two smaller drawers, and large utensil department with wire sliding shelf and wire pan rack on inside of door.

Height 70 in.; width 38 in.; table top 40x25 inches.

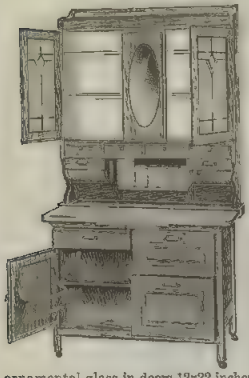
Each

No. BG1WE –With sliding aluminum top..... $100 50

No. BG1WE-PT—With sliding porcelain top..... 111 00

Shipped base and top separate in two bundles, burlapped; shipping weight each 250 lbs.

KITCHEN CABINETS
—BLUE GRASS—



Adjustable plank top, made of alternating strips of black walnut and white maple, water proof, base 42x27 inches.

Large cupboard with sliding shelf; pan holder on door, sliding kneading board; all metal bread box with soliding cover; sliding roller bearing flour bin 55 pounds capacity; cutlery drawer; steel casters; nickel plated hardware.

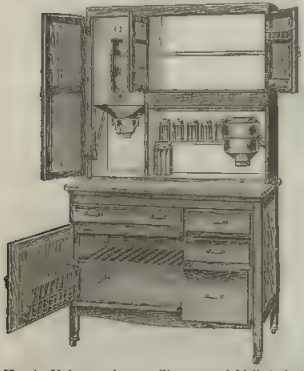
Top contains large white enameled china closet space with three shelves; scoop bottom sugar and meal bins; four small drawers; set of six crystal glass canisters. Plate rail; heavy French plate mirror; color leaded ornamental glass in doors 12x22 inches.

No. BG60—Height over all 78 inches ..... Each $173 25

Shipped base and top separate in two crates; weight each 250 lbs.

ROLL CURTAIN FRONT

Porceliron Sliding Top Is Stain and Acid Proof and Will Not Crack or Chip with Extreme Heat or Cold.



Top—Rounded corners; beautiful art glass doors; interior white enameled; tilting removable flour bin, capacity 50 lbs.; rapid sifter; disappearing front curtain, rolling upward; handy drawer underneath flour bin; large china closet; sanitary glass swinging sugar bin; six piece set of glass jars, for spices, tea and coffee. Handy-Helps on doors—Change and Milk ticket trays, extract rack, bill hook, receipt book and holder, and valuable charts of kitchen information, such as time for baking and boiling, table of proportion, etc.

Base—Full sliding table top, porcelron; sliding false bottom—places bulky things in easy reach; sanitary wire sliding shelf; wire lid rack on door; large hardwood meat board; large utensil cupboard, deep divided cutlery drawer, spacious drawer for linen, bread and cake drawer of ample size, automatic opening and closing lid, sanitary leg base, ball-bearing casters. Each

No. BG20WE Clear grained solid oak, high gloss Spar varnish finish; porcelain sliding table top; height 69 in.; size table top 40x26 in..; kneading board 17x20 ins$130 50

Base and top crated separately; shipping weight each 284 lbs.

KITCHEN CABINETS

—BLUE GRASS—ALL STEEL

White Enameled.

A strictly sanitary, convenient and handsome cabinet. The entire body is of heavy sheet steel with all joints electrically welded, enameled a snow white.

The enamel is applied similar to that on white-enameled steel beds. A number of coats are applied by an air brush and each coat baked on. The result is, a surface that will not chip or peel off. Can be easily cleaned.

The structural frame is of heavy angle steel, cut and formed on special machines; securely welded into proper shape, causing every drawer and door to fit perfectly.

The base is fitted with tin lined bread or cake box, one large linen drawer, one towel drawer, one partitioned cutlery drawer, large utensil compartment with removable shelf, and pan rack on inside of door. A white maple bread board is also furnished.

The top contains a tilting flour bin with flour sifter, glass sugar container, seven crystal glass spice jars and a crystal glass measuring cup.

Height over all 70 inches; width 40 inches; top 40½x26 inches; extending to 37 inches when drawn out.

Each

No. BG2S—With sliding porcelain top.....$172 50

Base and top crated separately; shipping weight each complete 320 lbs.

KITCHEN CABINETS

Each

No. 9 - Hardwood, golden oak gloss finish; wood top 41x25 inches; two flour bins with 2-ply veneered bottoms, two upper drawers; sanded poplar kneading board . . $24 00

Crated; shipping weight each 85 lbs

Each

No. 10 — Hardwood, golden oak finish; base 21x45 inches; height over all 60 inches; two flour bins with 2-ply veneered bottoms; two upper drawers; sanded poplar kneading board; cabinet is finished inside and fitted with shelf; plain glass in doors. $40 50

Crated; shipping weight each 150 lbs.

Front made of solid oak, hardwood sides. Golden oak finish. Two large drawers with veneered bottoms, for flour and meal; two drawers for cutlery; sanded poplar kneading board 16x24 in.; cabinet finished inside and fitted with shelf; art glass in doors.

Each

No. 11—Height 67 in.; width 42 in.; depth 26 in. . . $49 05

Crated; shipping weight each 170 lbs.

KITCHEN CABINETS

Front made of solid oak, hardwood sides. Golden oak finish. Flour bin with veneered bottom, one large drawer for cutlery; two small drawers; kneading board in convenient place. Base of cabinet has a roomy compartment for pans, pots and kettles with a rack on the door. Cabinet finished inside and fitted with shelf; plain glass in doors. Stationary poplar top.

Each

No. 12—Height 64 inches; width 40 inches; depth 25 inches $49 50

One in a crate, K D; shipping weight 150 lbs.

—TRADE STIMULATOR—

Front made of solid oak hardwood sides. Has a heavy nickeloid sliding top; metal tilting flour bin; swinging glass sugar bin. The lower part of the cabinet has a very roomy compartment for pans, pots and kettles, with a pan rack on the door. Has three roomy drawers for cutlery, linens, etc.

Each

No. 16WE—With nickeloid sliding table top; height 89 in.; width 41 in.; depth 27 in $58 50

One in a crate, K. D.; shipping weight each 145 lbs.

LIONEL ELECTRIC TRAINS

The finest line of electric trains made, perfect reproductions of the large electric passenger and freight trains, made of heavy steel throughout, baked enameled, nickel plate trim; engines with electric head light and bell; powerful motors; all numbers excepting T3306, T3307 and T3308 equipped with heavy steel turning double trucks; complete with rheostat for regulating current.

"O" GAUGE PASSENGER TRAINS

Length 20 ins., circle track 30 ins. in diameter

T3204—Length of complete train 20 ins., consisting of one 7 in. locomotive, two 7 in. Pullman cars, 8 sections OC curved track, 4 pieces straight track, making circle 30 ins. in diameter and one controlling rheostat each in box. Each..... 7.25

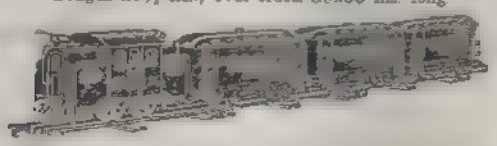
Length 23 ins.; oval track 30x39 ins. long

T3267—Length of complete train 23 ins.; consisting of one 7 in. locomotive, one 7½ in. Pullman car, one 7½ in. mail car, one controlling rheostat, 8 sections OC curved track, and 4 OS straight track, making an oval 39x30 ins.; each in box. Each..... 9.50

Length 31½ ins.; oval track 30x49 ins. long

T3209—Length of complete train 31½ ins.; consisting of one 8 in. reversing locomotive, one 7½ in. mail car, two 7½ in. Pullman cars, one controlling rheostat, 8 sections of OC curved track and 6 sections of OS straight track, making an oval 49x30 ins.; each in box. Each..... 11.50

Length 37½ ins.; oval track 30x60 ins. long



T3271—Length 37½ ins.; consists of one 10 in. reversing locomotive, two 8¾ in. Pullman cars, one 8¾ in. observation car, 8 sections OC curved, 6 sections OS straight track, making oval 30x60 ins.; one controlling rheostat; fitted with ornamental glass windows, interior seats, removable roof, while the locomotive is equipped with a controller which starts, stops and reverses it; the most complete and elaborate train made to operate on an "O" track; each in box. Each..... 15.50

STANDARD GAUGE PASSENGER TRAINS

Length 34 ins.; oval track 42x63 ins. long

T3276—Complete length of train 34 ins.; consisting of one 11 inch reversing locomotive, one 11 in. Pullman car, and one 11 in. observation car, and outfit includes 8 curved and 2 straight sections of track, making an oval 63x42 ins.; each in box. Each..... 15.50

Length 48 ins.; oval track 42x69 ins. long

T3278—Complete length of train 48 ins.; consists of one 12 inch reversing locomotive, two 11 inch Pullman cars, and one 11 in. observation car; 8 curved and 4 straight sections of track making a circle 3½ ft. in circumference or an oval 42 ins. wide by 69 ins. long; each in box. Each..... 20.00

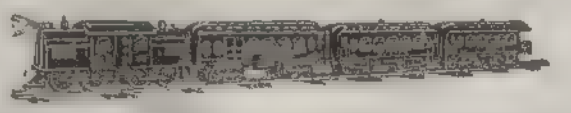
Length 60 ins.; oval track 42x87 ins. long

T3282—Complete length of train 60 ins.; consisting of one 15 inch reversing locomotive; one 11 inch combination Pullman and baggage car, one 11 inch Mail car, one 11 inch Pullman, and one 11 inch observation car, finished in rich orange color lettered in gold, [illegible] curved track, one section CC curved track with electric [illegible] 2 switches in box. Each..... 27.00

Length 52 ins.; oval track 42x60 ins. long

T3281—Complete length of train 52 ins.; consisting of one 15½ inch reversible locomotive, and two 16 in. day coaches; complete with 8 sections curved and 4 sections straight track making circle 3½ feet in diameter, or oval 3½x5 feet long. The longest and handsomest engine and cars made and big value at the price. Each..... 29.00

Length 65 ins.; oval track 42x97 ins. electric lighted throughout.



T3283—Length of train 65 ins.; consisting of one 15½ inch reversing locomotive, one 16½ in. combination Pullman and Baggage car, one 16½ in. Pullman, and one 16½ in. observation car; 8 sections curved and 8 sections straight track making an oval 42 ins. wide by 97 ins. long; complete with electric head light and set of interior lights for all cars; complete in box. Each..... 38.50

STANDARD GAUGE FREIGHT TRAINS

Length 31 ins.; circle track 42 ins. in diameter.

T3274—Length of train 31 ins.; consists of one 11 in. locomotive, one 9¾ in. gondola car, one 9¾ in. caboose, and 8 sections of curved track, making a circle 42 ins. in diameter; each in box. Each..... 12.75

Length 63½ ins.; oval track 42x69 ins. long.

T3277—Length of train 63½ inches, consists of one 12 in. reversing locomotive, one 9½ in. gondola car, one 9½ in. cattle car, one 9½ in. box car, one 9½ in. ballast car and one 9¾ in. caboose; 8 sections curved and 4 sections straight track making a circle 42 ins. in diameter or an oval 42x69 ins. long; each in box. Each..... 20.50

Length 84 ins.; oval track 42x125 ins.; engine electric lighted.

T3284—Complete length of train 84 ins.; consists of 15½ in. reversing locomotive, and one each 11 in. flat car, 11 in. gondola car, 11 in. cattle car, 11 in. box car, 11 in. oil car, 11 in. ballast car and 9¾ in. caboose, 10 straight and 8 curved sections of track, making an oval 42x125 ins. A handsome train, the locomotive having 2 sets of 2½ in. driving wheels connected in pairs, and will not leave the track even on the sharpest curves; each in box. Each..... 38.50

LIONEL "O" GAUGE ELECTRIC FREIGHT TRAINS

LIONEL

Length 21 ins.; circle track 30 ins. in diameter

T3268—Length of complete train 23 ins., consisting of one 6 in. locomotive, two 7½ in. gondola cars and 8 sections of curved OC track, making circle 30 ins. in diameter; each in box. Each 5.00

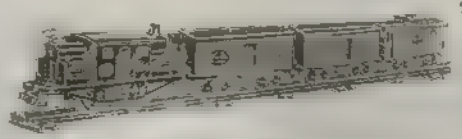
Length 20 ins.; oval track 30x39 ins. in diameter

T3265—Length of train 20 ins., consisting of one 6 in. locomotive, one 6 in. box car, one 6 in. caboose, one controlling rheostat and 8 sections OC curved track and two sections OS straight track, making oval 30x39 ins. in diameter, runs in one direction only. each in box. Each..... 6.00

Length 23 ins., oval track 30x39 ins. in diameter

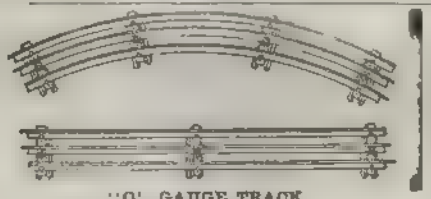
T3208—Length of train 23 ins. consists of one 7 in. locomotive, one 7½ in. box car, one 7½ in. caboose, 8 sections OC curved and 2 sections OS straight track, making an oval 39x30 ins., and one controlling rheostat, [illegible]; each in box. Each 9.50

Length 31½ ins. oval track 30x48 ins. in diameter



T3270—Length of train 31½ ins.; consists of one 7½ in. locomotive, two 7½ in. box cars and one 7½ in. caboose; one controlling rheostat; 8 sections OC curved and 6 sections OS straight track making oval 30 ins. wide and 48 ins. long; each in box. Each..... 11.50

EXTRA TRACK EQUIPMENT FOR ELECTRIC TRAINS



"O" GAUGE TRACK

T3301—OS, straight track, 10¼ in. long. Per section..... .15
T3302—OC, curved track, 10¼ in. long. Per section..... .15

STANDARD GAUGE

T3316—S, straight track, 14 in. long. Per section..... .25
T3317—SC, curved track, 16 in. long. Per section..... .25

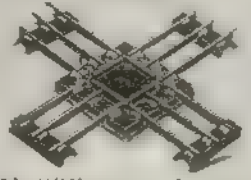
SWITCHES AND CROSSOVERS

WITHOUT ELECTRIC LIGHTS

T3305—"O" gauge, (right and left hand), the lever which moves the rails also operates the locking mechanism; signal lanterns have red and green glass; height 11½ in., width 5½ in., height 3 in.; connects with track in same manner as straight or curved sections; each in box, right and left. Per pair 2.85

T3310—Standard gauge, length 16½ ins., width 8 ins., height 4½ ins.; right and left. Per pair..3.75

CROSSOVERS



T3304—"O" gauge; for use in making [illegible] switches for making figure "8" and figure "8" loops; measures 10¼ in. square; cross rails mounted on solid base with box. Each .65

T3318—Standard gauge, as T3304, 12 ins. square, each in box. Each ..... .95

T3303—"O" gauge, 45 degree crossing, permitting the making of more sharp loops and occupying less space in layouts than crossing T304 above, each in box. Each 93

WITH ELECTRIC LIGHTS

T3306—"O" gauge, same construction as T3305 above, but equipped with electric signal, having an electric bulb which can easily be removed; lights show red and green signals; each in box right and left. Per pair 3.75

ALL ABOVE, ONE DOZEN IN A BOX

WAVING IRONS

Most desirable item for marcelling the hair. Makes the double wave.

No. 23—Manhatten, made of 5/16 in. steel wire, double holder of cold rolled sheet steel, fully nickel plated and polished. Full length 9 in. .....per dozen $3.50

ONE DOZEN IN A BOX

HAIR DRYING AND STRAIGHTENING COMBS

Something needed by every lady who shampoos her hair. These combs are heated the same as an ordinary curling iron, over gas, alcohol stove or heating in boiling water. Dries the hair quickly by simply combing in ordinary way. Excellent for combing and dressing "bobbed" hair. Also extensively used by the colored folks in taking out the kinks and curls by anointing the head with vaseline or other heavy oils and drawing comb through hair as in drying after being heated as above. Will retain heat for a long time. Teeth are specially finished to enter hair easily.

No. 4—Made of the highest grade brass, length 8¼ in., tooth area 3¼x1⅛ in., nickel plated wire handle is attached so it will not turn, per dozen $9.00

No. 5—Made of the highest grade brass, length 8¾ in., tooth area 3⅜x1 1/16 in., nickel plated wire handle is attached so it will not turn, per dozen $10.50

No. 6—Made of the highest grade brass, length 9⅜ in., tooth area 4⅜x1⅜ in., nickel plated wire handle is attached so it will not turn, per dozen $14.00

ALL ABOVE HALF DOZEN IN A BOX

HAIR DRYING AND PINCHING IRONS

Will remove kinks and straighten curly and wavy hair. The jaws are heated in boiling water or as a regular curling iron, over a gas or alcohol flame, and are pinched over small strands of hair, which are then drawn through, thereby taking out the kinks and curls.

No. 8—Fully nickel plated on copper, nicely engraved shear, joint handles, full length 6⅞ in., diam. of ball end jaws 1 in., w't per doz. 5½ lbs., per dozen $7.00

ONE DOZEN IN A BOX

This new design fills a long felt want for a practical and artistic pinching and pressing iron.

No. 88—"Peerless" total length 9 in., jaw diam. 1⅛ in., **new design** with duplex, interlocking, machine faced circle joint; **extra heavy and wide, heat retaining jaws** and shear handles. Jaws shoulder and joint **fully nickel plated on copper;** handles enameled **bright red.** The color combination is very attractive and desirable. Weight per doz. 12 lbs., per dozen $13.50

ONE DOZEN IN A BOX

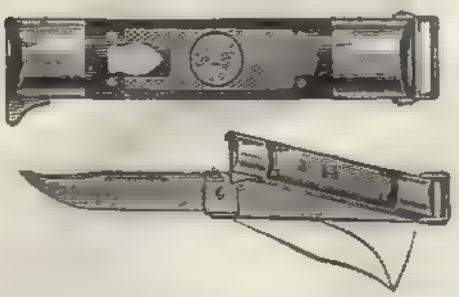
HAIR STRAIGHTENERS

To meet the constantly growing demand for a strictly high grade hair straightener, we present the new "Queen Lill" which is considered the peer of any yet devised for the purpose. Its mechanical perfection, correct lines, superior heat retaining qualities, and attractive appearance, makes it a most perfect and desirable toilet accessory. To the colored race, this will be an indispensable article in dressing the hair to the prevailing style.

No. 99—"Queen Lill", fully nickel plated on copper, size of jaws 4¼x1 1/16 in., nickel plated ferrules, hardwood handles, full length of straightener 9½ in., w't per doz. 9 lbs .....per dozen $13.50

ONE DOZEN IN A BOX

HUNTING KNIVES



A slight pressure on the shield opens the knife, swings blade out into cutting position, closes case or handle and you have a rigid knife that is ready for business.

No torn thumb nails or sore fingers, no projections to catch or tear clothing.

Adaptable for every outdoor use. For hunting, fishing, camping, etc., it has no superior. Blades can be easily changed. Unconditionally warranted.

No. 961—Neft safety knife, made of the highest grade crucible steel, scientifically tempered and ground to a keen and lasting edge, length of blade 4½ in., length of knife when closed 5¾ in., scored hard rubber handle, large nickel silver bolsters with guard and toggle to attach to rope or key chain, small metal wrench for interchanging blades .....per dozen **$60.00**

HALF DOZEN IN A BOX

MARBLE TROUT KNIVES

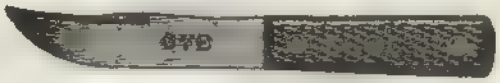
Latest addition to Marble Line. Designed expressly for dressing speckled trout and other fish.

Always open, entirely sanitary, quickly cleaned. While designed expressly for dressing speckled trout, may be used for a variety of purposes for which any small pocket knife could be used. The little finger is inserted about one-half its length in ring while the three remaining fingers and thumb are placed just back of blade against curve of shank.

No. 79—Forged from one piece of finest cutlery steel, handle terminates in a ring 1 in. in diam., full length 5⅞ in., blade 2 in., w't each 1 oz., complete with metal bound leather sheath .....per dozen **$12.60**

ONE DOZEN IN A BOX

HUNTING KNIVES



Made from a special grade steel similar to that of the very best razor steel. Not the regular butcher knife steel. Hand forged, swaged and polished. Ground to a very sharp razor edge. Second ebony handle. Fastened to blade with three large head brass rivets. The blade extends through the entire length of the handle.

No. 745—5 in. blade, full length 9¼ in., **without sheath** w't per doz. 3 lbs. .....per dozen **$13.50**
For Leather Sheath for No 745 hunting knife, see No. 955 sheath illustrated on this page.

HALF DOZEN IN A BOX

No. 7803—Extra finish, finest quality, scored ebony handle, metal bolster, 6 in. polished and swaged blade, **without sheath** .....per dozen **$12.00**
For Leather Sheath for No. 7803 hunting knife, see No. 955 sheath illustrated on this page.

IMPROVED CUTLERY SHOW CASES

Prices on Application.

FLOOR DISPLAY CASES

Our FLOOR DISPLAY CASES FOR CUTLERY are thoroughly hand made from natural oak and are of NATURAL OAK FINISH, highly hand polished.

The top is ¼ in. bevel French plate glass laid in plush on green felt cushions, selected double strength glass front and ends and glass sliding dust-proof doors in the back that move on ball bearings and steel track.

The inside has 10 in. and 14 in. paneled oak shelves, the front edges of which are fitted with an oak lip extending ¼ in. above the shelf proper to prevent the goods from being pushed off the shelves, these shelves are supported by adjustable nickel plated brackets, cloth lined paneled bottom.

One of the latest improvements in these cases are the steel strength mitered joints, which means that the mitered joints in our cases are reinforced with steel, making the weakest part the strongest—this is a most important point to be considered.

Made either knockdown or set up and of standard measurements, 42 in. high, and 26 in. wide outside dimensions.

Strong springs, long running; finished in bright colors; modeled after the latest standard cars

SPORT CAR

T3134—Red enameled stamped metal body; 1¾ in. yellow wheels; good springs; runs straight and right and left; length 8 in., 2½ in. width, 2¾ in high; 1 dozen in box. Dozen 1.25

SEDAN

T3137—Finished in bright yellow nicely striped; with chauffeur good spring, length 8 ins., 1¾ ins. wide, 2¾ in. high; 1 dozen in box. Dozen 1.95

RACING AUTOMOBILE

T3135—Assorted colors, speedway racing car, red yellow wheels and radiator, strong spring, with driver; length 8 ins., 2½ ins wide, 3 ins high; each in box. Dozen 2.10

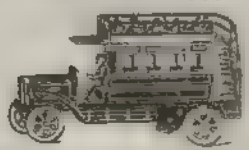
ROADSTER

T3126—Touring Car; nicely enameled and striped, with driver; length 7¾ ins.; 1 dozen in box. Dozen 2.25

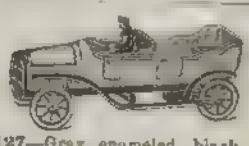
AUTO TRUCK

T3116—Auto truck, green enamel body and hood, black gear, gray wheels; with driver; long running spring; length 7½ ins., width 2½ ins., 3½ ins. high; 1 dozen in box. Dozen 2.25

SIGHT SEEING BUS



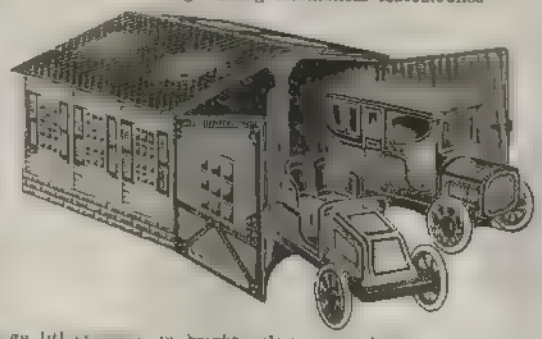
T3023—Metropolitan sight seeing bus, finished in red, white and black enamel, gray wheels, with winding stair and seats on top; length 7¼ in., width 2½ ins., height 4 ins; each in carton. Dozen 3.65



T3127—Gray enameled, black and yellow stripings; blue wheels, with chauffeur, runs straight and in circle; good spring; length 7¼ ins., 3¼ ins. wide, 2½ ins high; ¼ dozen in carton. Dozen 4.00

LITHOGRAPHED DECORATED METAL GARAGE

With two long-running mechanical Automobiles



Garage lithographed in bright colors, with [illegible] two hinged doors [illegible] painted windows and sky [illegible] are closed 5½x6½x4½ ins. high; two clockwork spring mechanical autos, [illegible] limousine, attractively painted in [illegible] colors; adjustable to run [illegible] in circle, roadster 3x7x3 ins., limousine 3x5 [illegible] complete in carton

T3150—Auto garage with autos [illegible] 7.50 Each. .. .70

SEDAN

T3138—Assorted 2 kinds, runabout and sedan; bright colors, nicely striped; imitation rubber tires with chauffeur; runs straight, length 7½ in., 3 in. wide, 2½ in. high; 1-3 dozen assorted in box. Dozen 4.00

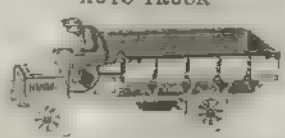
SEDAN

T3139—Late model; violet and purple finished body and hood; nicely striped; imitation rubber tired blue wheels; with driver; runs straight and in circle; length 7½ ins., width 3¼ ins., 4 ins. high; each in carton. Dozen 4.50

TOURING CAR

T3128—Bright red enameled, yellow striped; imitation gray rubber tired wheels, with chauffeur; adjustable front axle for straight or circular running; good strong long running spring; length 9¼ ins.; each in box. Dozen 8.25

AUTO TRUCK



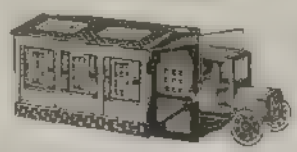
T3119—Auto truck for heavy hauling, gray enameled, black striped; imitation rubber tired wheels, painted hinges for dropping sides; reinforced chasses; strong spring; runs straight and in circle; length 9¼ ins., width 3 ins., 4 ins. high; each in carton. Each ..... .72

LIMOUSINE

T3144—Blue and black enameled limousine, nicely striped, hinged doors; adjustable glass windshield, head lights with glass and reflectors; chauffeur; imitation rubber tires; runs straight with shift lever for running in circle; shift brake lever; length 11 in., 5 in wide, 6 in. high; each in box. Each 1.00

MISCELLANEOUS MECHANICAL TOYS

AUTO GARAGE



T3145—All [illegible] lithographed in bright colors, with painted windows on sides and ends; two hinged doors with latch to keep them closed; four painted sky lights on roof; with clockwork spring Sedan 3x5½ in., 3¼ ins. high, which runs straight or in circle; garage 4¾x6½ ins., 4 ins. high; ⅓ dozen in carton. Dozen 4.40

FIRE HOUSE GARAGE

T3149—Same as T3148, but fire engine garage, with mechanical fire engine and ladder truck; each 6 ins. long; size garage 6¼x8¼ ins. 6 in. high; 1/3 dozen in carton. Dozen 9.50

TOURING CAR

T3129—Enameled bright red, black trim; with chauffeur; glass side lamps, wind shield; gray imitation rubber tires; front axle adjustable for circular running; extra strong spring; length 12½ ins., 5¼ ins. wide, 6½ in high; each in box. Dozen ..... 12.50 Each 1.10

TOURING CAR

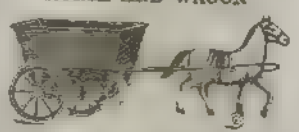
With automatic stop

T3130—Touring car; gray enameled, yellow striped; brown upholstered; imitation rubber tired yellow wheels; with chauffeur; long running guaranteed spring; shift lever for stopping and starting; length 11 ins., width 4½ ins., 6¼ ins. high; each in carton. Dozen ..... 13.50 Each 1.25

SEDAN

T3140—Blue enameled and striped body, black chassis top and fenders, heavy imitation rubber tire wheels; glass wind shield; lamps; luggage carrier with trunk; chauffeur, hinged doors, spring steering gear adjustment for running to right or left in circle; strong spring size 4x13 ins., 9½ ins. high, each in box. Each 1.65

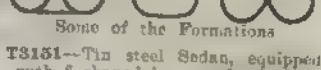
HORSE AND WAGON



T-3084—[illegible] yellow wheels, black gray [illegible] long running spring [illegible] circle, size [illegible] ins., 3¼ ins. high, 1 dozen in box. Dozen 1.25

SELF STEERING AUTOS

Different Shaped Lugs

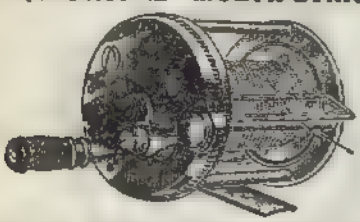


Some of the Formations

T3151—Tin steel Sedan, equipped with 6 shaped lugs, each of which when placed in position on car causes it to run in different formations; will run straight, circle oval, oval with double circle, triangle and figure 8; size 3¼x7½ in., 4¼ ins. high, with brake; each in carton. Dozen 6.75

FISHING REELS

QUADRUPLE MULTIPLYING



SOUTH BEND, ANTI-BACK LASH

A guarantee for one year with each reel. This reel is the only one of its kind made which has a brake that works automatically with the proper force as the line slackens at the end of the cast.

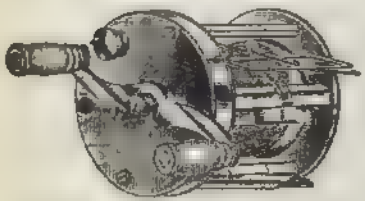
The spool and gear journals are of special steel, accurately turned ground. lapped and burnished to mirror like surface, turning in solid phosphor bronze bushings.

The gearing is of special hunting tooth tram, the gear of which is cut from hard drawn brass, the pinion from special tool steel.

Can be used with or without back lash as desired.

No. 399—100 yds., 1⅝ in. pillar, 2 in. in diameter, jeweled bearings, hand polished, solid German silver, balanced white bone handle with back sliding click .....each $16.60

ONE IN A BOX



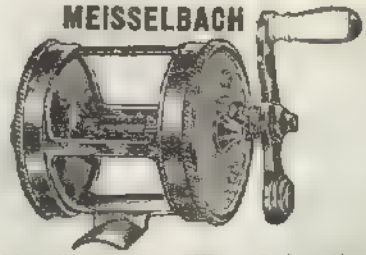
SOUTH BEND, ANTI-BACK LASH

Level winding, plain, light in weight, strong and rigid in construction, frame and all component parts of satin finish Liberty silver, agate jeweled spool caps of screw-off pattern, adjustable spring tension grip, equipped with click, white ivoroid double grips. Envelope with directions containing a watch charm screw driver and one extra pawl, with each reel.

No. 499—Capacity 100 yds., measured by standard 16 or 20 lb. test silk line .....each $33.30

ONE IN A BOX

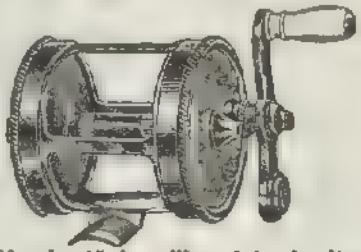
MEISSELBACH



80 yds., 1⅝ in. pillar, 2 in. diam., quadruple multiplying, nickel plated, w't 6½ oz.

No. 3580—Tri-part .....each $7.20
No. 3680—Freespool .....each 9.40

ONE IN A BOX

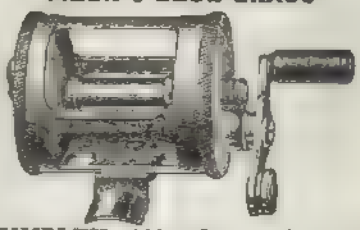


80 yds. 1⅝ in. pillar, 2 in. in diam., quadruple multiplying, tubular frame, made off solid piece of tubing, with flat cross bars, no screws or rivets to work loose, steel pivots and gears, solid steel shaft, rear sliding click, highly nickeled finish with German silver spool, w't 7¾ oz.

No. 3780—Take-a-part, each $8.80
No. 3980—Free-spool Take-a-part, each $10.60

ONE IN A BOX

MEEK'S BLUE GRASS



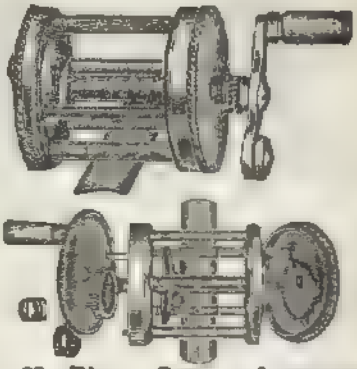
SIMPLEX, 100 yds., 1⅝ in. spool, triple multiplying, with thumb rest, easily taken apart by unscrewing cap on back end and thumb nut on front end, back sliding click off oil tempered steel, brass and German silver, all brass parts finely nickel plated, w't 7 oz.

No. 34 Reel is the Free Spool Model for easy casting. The Free Spool Mechanism is the Clutch Principle and Automatic in its Action. The Act of Casting Automatically Disconnects the Gearing from the Spool. The Gearing is Automatically Reconnected to the Spool by the Act of Winding in the Line.

No. 33—Each $22.00
No. 34—Free-spool .....each 23.50

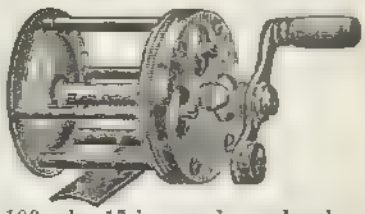
ONE IN A BOX

MEEK'S BLUE GRASS



No. 25—Blue Grass Improved, 85 yds., quadruple multiplying, German silver, "take-apart," of new designs, outside diam. 1 15/16 in., diam. of spool 1⅜ in., length of spool 1¼ in. .....each $26.40

ONE IN A BOX

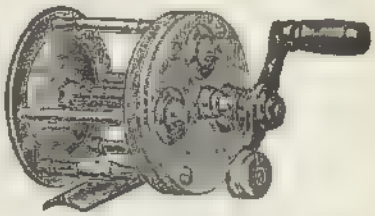


100 yds., 1⅝ in. spool, quadruple multiplying, special hand cut gears, tempered tool steel pivots and studs, balanced ivory handle, front sliding click and drag, screw-off oil caps, German silver, perfect workmanship and adjustment, w't 8 oz.

No. 3—Eeach $29.30
No. 3J—Jeweled bearings, each $36.66

ONE IN A BOX

GENUINE MEEK



80 yds. No. 4 braided silk line. Diameter end plate, 2 inches. Length spool 1¼ inches. Diameter of spool head, 1¼ inches.

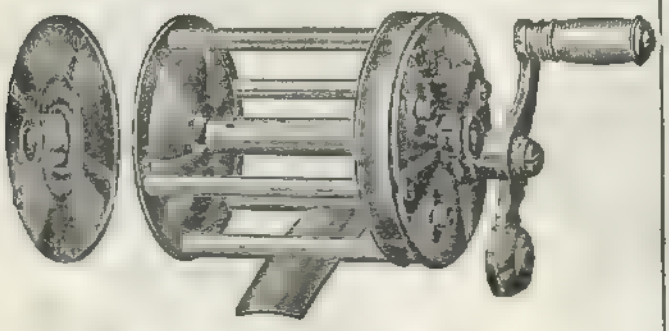
No. 3M—German silver reel, balance handle forward, click or click and drag, screw-off caps, each $44.00

No. 3MJ—Same as No. 3M except made with jeweled pivot bearings, each $52.50

FISHING REELS

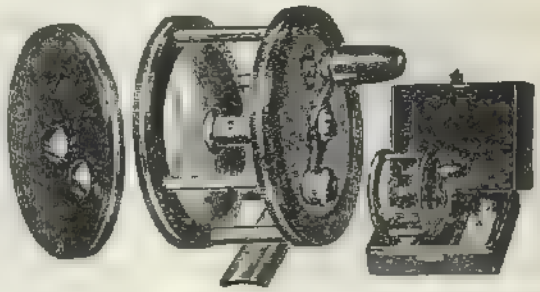
No. 1573—Pflueger—Supreme Level Winding, free Spool and Anti-Back-Lash Casting Reel Quadruple.
Easy to oil the bearings without removing any of the parts.
Generated Spiral Tooth Gears
Bronze Bushed for Bearings
Steel Pivots, Highly Polished
Adjustable Front Sliding Drag
Pyralin Amber Fluted Handle
Silverine finish, capacity 60 to 100 yards, according to size line used. Size 1⅞ in. Pillar, 2¾ in. disc.
With one Screw Driver.
Each $36.70

ONE IN A CHAMOIS BAG



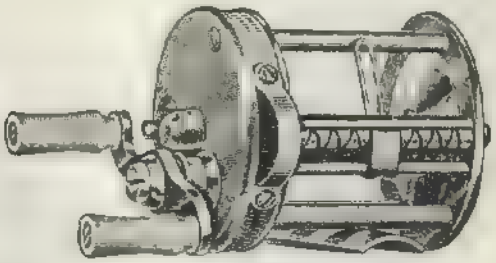
No. 1823—Pflueger—Worth:
German Silver and treated to prevent tarnish.
Generated Spiral Tooth Gears.
Bronze Bushed for Bearings.
Adjustable Front Sliding Phosphor Bronze Goose Neck Click.
Adjustable Front Sliding Drag.
Front and Back Fancy Adjustable Oil Cups with Scarlet Genuine Agate Jewels.
Patented Adjustable Spring Tension Cups.
Steel Pinion.
Steel Pivots, Highly Polished.
Single Handle Crank, Balanced.
Pyralin Ivory Handle.
1⅝ inch Pillar, 2 inch Disc, capacity 60 yards.
Each $14.60

ONE IN A FANCY BOX



No. F1133—Plueger Golden-West, Single Action:
Hard Rubber Discs, Interleaved with Aluminum
Bushed for Bearings
Lined Shedding Adjustable Back Sliding Differentiating Click
Line Shedding Oil Cup on Back Plate
Steel Pivots
Flush Crank, Balanced
Hard Rubber Handle
Satin German Silver, treated to prevent tarnish. Capacity 60 yards, size ⅝ in. Pillar, 2¼ in. Disc.
With "Pflueger-Marvel" oil can enclosed★ . .each $16.50

ONE IN A FANCY BOX



HEDDON'S LEVEL WINDING

A Level Winding Reel that is up to the recognized high standard of Heddon quality in every respect. New and patented features such as the Steady Bar (patent applied for), an improved, exceedingly strong, and silent gear train; a stabilized line carriage, and a perfect screw housing guarantee its correct functioning and satisfactory service.

Full quadruple multiplying, with exactly the correct ratio of speed between the spool and line carriage to produce that criss-cross or "kite winding" of the line which so effectually presents back-lashing Spiral gears, of a special hard drawn phosphor bronze are so novelly arranged that they are much stronger than are ordinarily used, and also make it possible to avoid the objectionable construction of placing the spool off the center of the reel. Smaller in size, lighter in weight, it nevertheless has a spool capacity of 100 yards of 15 pound test line. Smooth velvet finish that is practically indestructible. Equipped with Heddon designed double handle. Heddon's oiling system, completely oiling the reel without taking it down.

No. F3-35LW—Made of the best, tested, hard drawn, watch nickel; stud, shaft, pivots and pinion made of Stubbs drill rod, hardened, oil tempered, ground and polished to size★ $35.00

WINONA

For Bait Casting

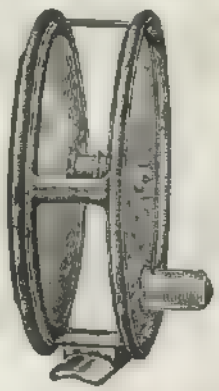
Light and yet very strong, will not bend or get out of true. Water, oil and heat proof, will never lose its glossy black finish. Hub made extra large, so that control of the Reel requires only a light touch. Ivoroid Handles of new design fit fingers perfectly. Click and drag on every reel.

Spool made of Redmanol moulded in one piece, a synthetic amber, strong and will never deteriorate, diam. 5 in., capacity 100 yards of 15-pound silk line, shaft of tool steel, white ivoroid handle, metal parts plated and polished, handles fish up to 30 lbs., w't each 6 oz.

No. 108—With line guard, each $11.60

No. 105—Without line guard, each $9.10

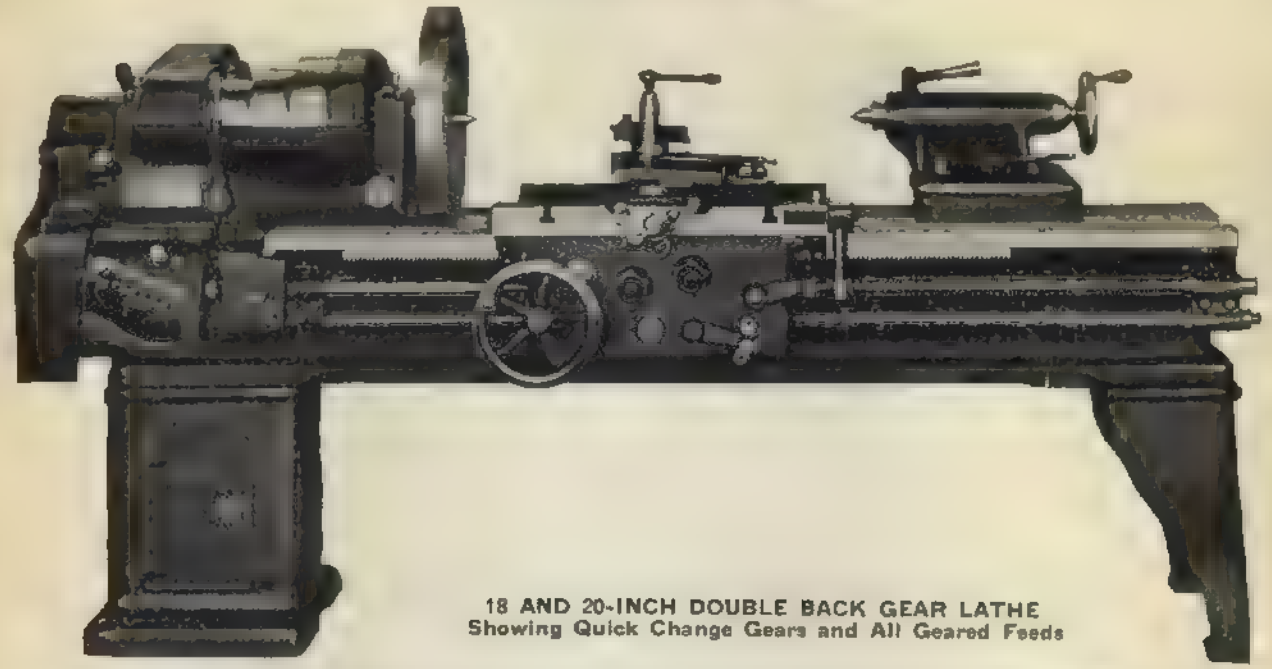
ONE IN A BOX



No. 3290—Meisselbach's Rainbow Reel Takapart with click. Capacity 60 yds., size 2 1/2 in., diameter 3/4 in. wide, exceptionally light, yet strong, made of alloy, more powerful for its size than any reel ever made. Frame and spool is furnished in dull black finish, with German silver trimmings. Ivoryoid handle, w't each 3 1/2 oz. $6.65

ONE DOZEN IN A BOX

MONARCH LATHES



18 AND 20-INCH DOUBLE BACK GEAR LATHE
Showing Quick Change Gears and All Geared Feeds

Head stock of solid full-webbed type, perfectly aligned; quick change gear box is simple in design and made of finest materials; thread and feed range sufficiently broad to cover all requirements, steel gears with fine pitch, coarse pitch, bronze bushed idler gears, made of high grade steel throughout. Head stock spindle made of 50-point carbon steel, large phosphor bronze spindle bearings, wide apart. Bed bolted with heavy webs and large box girders, massive tool stock. Compound rest can be set at all angles, bronze gears locked in position by means of cam operated spring plunger, double back gears are of positive gear drive. Compound rest is grooved to roughout, is very wide and has large bearing surfaces, and swivels. Cross feed dead screw is finely graduated. Tool block is one section and is adjustable to right or left. Carriage is "T" slotted front to rear, has 27-inch bearings on ways, cross bridge 7¼ inches wide, is double gibbed, provided with feed reverse and drop forged steel gears. Centralized reservoir supplies oil to all bearings, rack pinion disengages when screw cutting, back of carriage drilled and tapped to receive taper attachment if so ordered.

Centers are Morse taper No. 4.

Cross feed screw graduated to thousandths

All gears protected with gear guards

EQUIPMENT

Standard Equipment includes double friction countershaft, chasing dial, chasing stop, face plate, dog plate, center rest and necessary wrenches.

Furnished with any of the following attachments:

Semi-quick change gears
Instantaneous quick change gears.
Taper attachment
Cabinet legs
Draw-in chuck and all sizes of collets
Chuck plate flanges threaded to fit spindles
Thread chasing dial
Thread chasing stop
Automatic feed stop for feed rod
Reversing attachment
Turrets on carriage or shears.
Steel bed pan with oil well and oil proof reservoir
Raising blocks to increase swing.
Direct connected variable speed motor drive
Direct connected constant speed A. C. or D. C. motor drive through all geared headstock
Single pulley drive through all geared headstock.

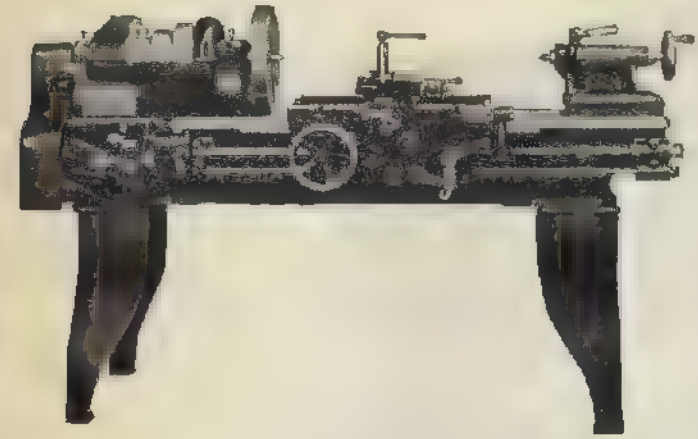
Prices quoted on application.

Threads actually cut on semi-quick change gear lathe—same as quick change gear lathe

Threads actually cut on quick change gear lathe—3, 3¼, 3½, 4, 4½, 5, 5½, 5¾, 6, 6½, 7, 8, 9, 10, 11, 11½, 12, 13, 14, 16, 18, 20, 22, 23, 24, 26, 28, 32, 36, 40, 44, 46. Feeds cover a range from 15 to 230

MONARCH LATHES

14-INCH DOUBLE BACK GEAR LATHE WITH QUICK CHANGE GEARS



Quick change gear box is simple in design and made of finest materials; thread and feed range are sufficient broad to cover all requirements; gears are wide faced; coarse pitch, bronze, bushed and run on vanadium steel shafts; spindle is 50-point carbon crucible steel; phosphor bronze bearings, bed is wide and deep with heavy walls and large box girders; massive tailstock; compound rest can be set at all angles; back gears locked in and out of position by spring plunger; double back gears are of positive gear type; compound rest is gibbed throughout, is wide and has large bearing surface, dial, swivel and cross feed dial are accurately graduated; steel tool post, milled from bar; back of carriage is drilled and tapped to receive taper attachment.

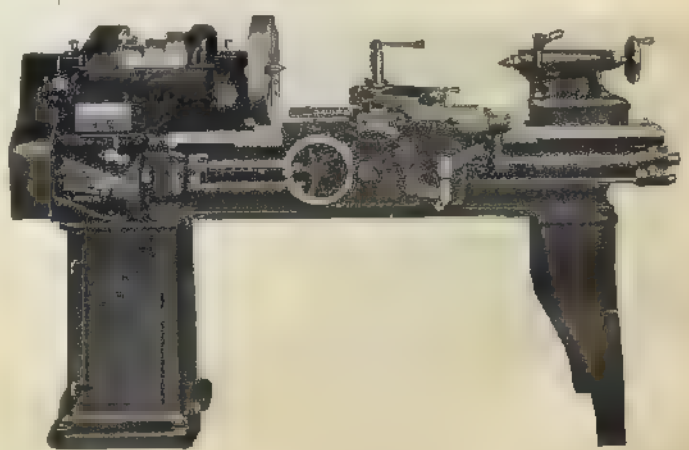
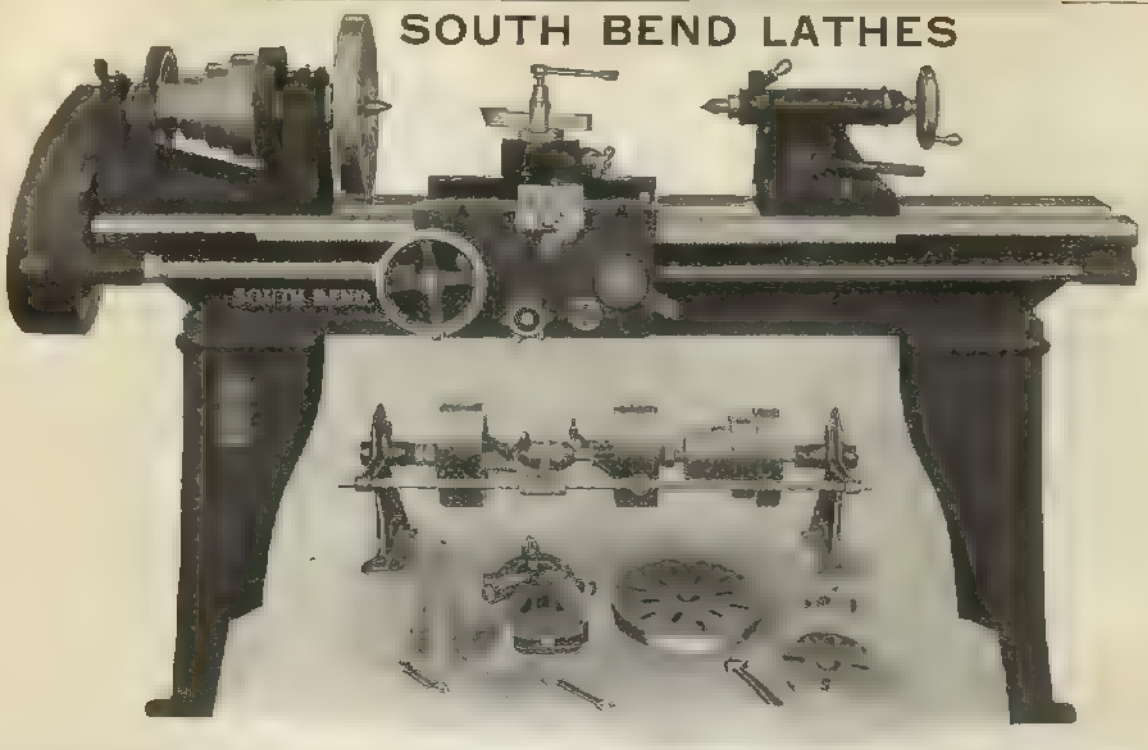
16-INCH DOUBLE BACK GEAR LATHE WITH QUICK CHANGE GEARS

Similar in workmanship and construction to 14-inch size described above. Always furnished with plain leg under headstock unless cabinet leg is ordered.



SOUTH BEND LATHES



Nos. 25 and 27 lathes are light, but well constructed; adapted for use in garages and for speed lathes for light work in machine and repair shops; beds are extra wide, are deep and heavy, and thoroughly braced; have forged steel spindles running in bronze boxes; reverse on end of heads within easy reach of operator; tail stocks have set-over for turning tapers, carriage can be locked for using cross feed; indexed to cut standard threads from 4 to 40, including 11½ pipe thread.

No. 34 is a popular size lathe for garages, blacksmith and small machine shops; has power cross-feed and automatic longitudinal feed to carriage, four step cone; indexed to cut standard threads from 4 to 40 including 11½ pipe thread, and by compounding gears many other threads may be cut.

Nos. 40 and 45 are heavy and reliable lathes, designed to take severe cuts with high speed steel; have power cross-feed and automatic longitudinal feed; four-step cones for 2 inch belt; forged carbon steel spindle in heavy bronze box; indexed 4 to 40.

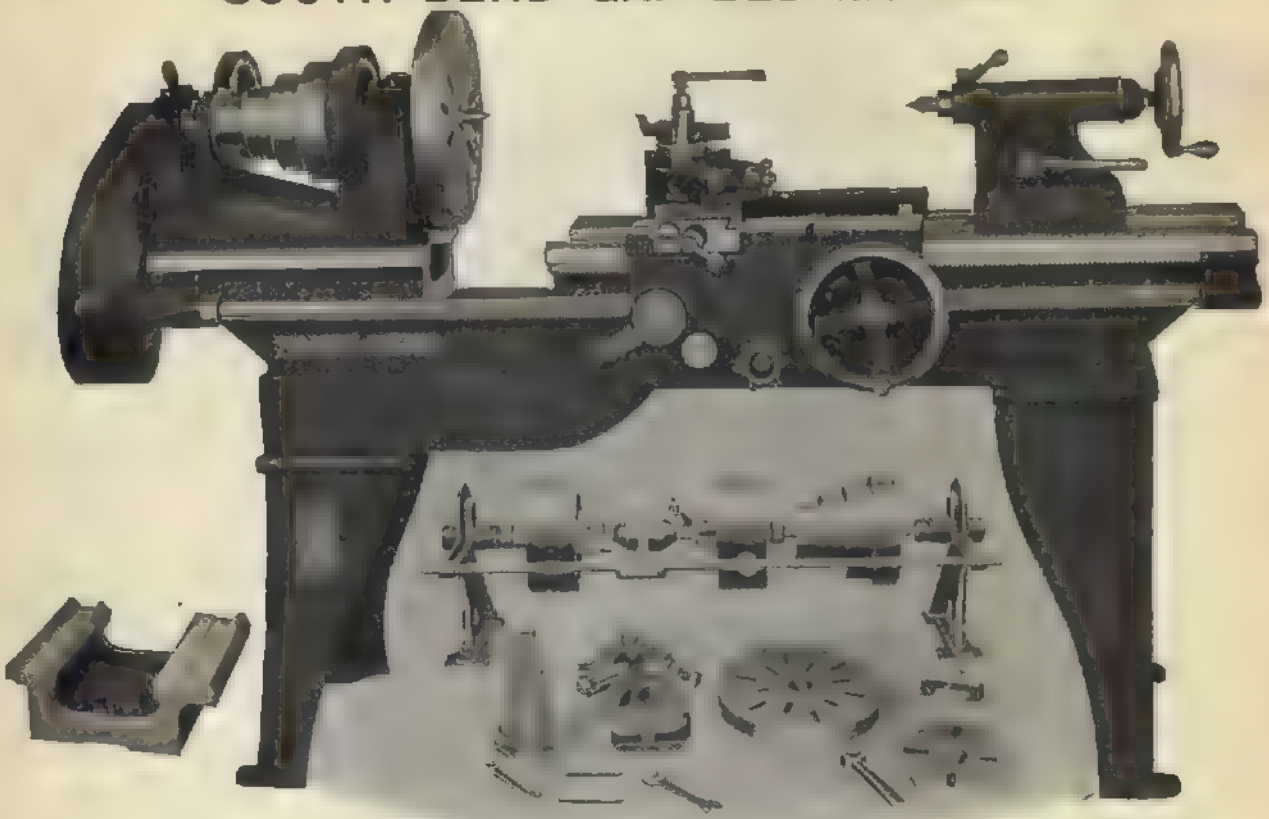
F. O. B. South Bend, Ind. First class freight

SOUTH BEND GAP BED LATHES



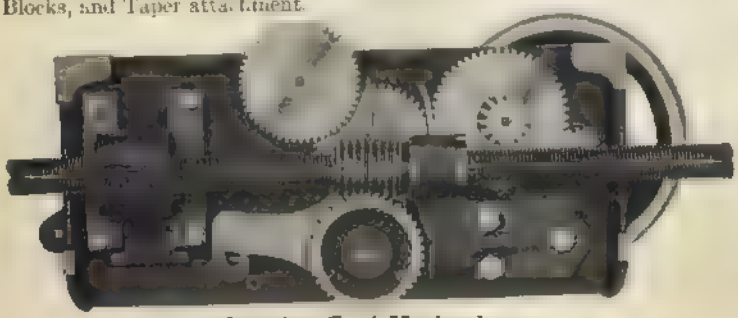
Sizes.—We can furnish the 11-inch 12-inch, 13-inch, 14-inch, 15-inch, 16-inch and 18-inch South Bend Lathes with gap bed when desired. For description and dimension of gap bed lathes see that of straight bed lathes, as the only difference between straight bed lathes and gap bed lathes is the bridge, and gap construction of bed, which requires more strength

Bridge is used to close up the gap so that the lathe may be used as a straight bed for ordinary work. When work of large diameter is to be machined, bridge may be removed from bed in a few moments, as it is accurately machined, scraped and fitted to gap, located by means of dowel pins and held in position by four substantial bolts. Bridge must be fitted in lathe at factory.

Equipment shown in illustration is included in price of lathe and consists of large and small face plates, graduated compound rest, two steel centers, center rest, change gears, adjustable stop for screw cutting, a set of feed gears, gear guards, necessary wrenches, double friction countershaft, and bridge. **Price of Gap and Bridge is extra over Straight Bed Lathes. Prices quoted on application**

No. of Gap Lathe	Swing Over Bed	Swing Over Gap	Width of Gap	Length of Beds	Extra Weight of Gap Beds
127	11¼ in.	15 in.	5 in.	3, 4, 5 ft.	80 lbs.
134	13¼ in.	19 in.	7 in.	5, 6, 7, 8 ft.	100 lbs.
137	15¼ in.	21 in.	8 in.	5, 6, 7, 8, 10 ft.	125 lbs.
140	16¼ in.	24 in.	9⅜ in.	6, 7, 8, 10, 12 ft.	140 lbs.
145	18¼ in.	25 in.	10 in.	6, 7, 8, 10, 12 ft.	170 lbs.

Extras. The gap bed lathe may be supplied at extra cost with Milling and Key-Way Cutting attachment, Raising Blocks, and Taper attachment.



Showing Feed Mechanism.

FEED MECHANISM

Showing positive mechanism of power cross feed and the automatic longitudinal feed.

Note that lead screw is splined. This lead screw passes through a worm which is also splined, driving this worm by means of a key. By this arrangement the power is transmitted to the apron of the carriage with full efficiency.

The thread of the lead screw is not used for the feed, but is reserved for cutting threads only. The splined worm drives both cross feed and automatic longitudinal feed.

Another improvement in this apron is that the power cross feed and the automatic longitudinal feed cannot both drop in at once.

THE TURNERVILLE TROLLEY

T3111 Sheet steel throughout; operated by spring, but no winding required, operated by pulling lever in house, driving car across bridge and back again; finished in bright enamels; length 60 ins., width 3¾ in., height 4¼ ins.; each in box. Each.....78

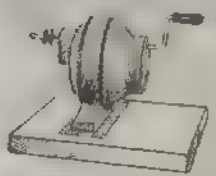
T3113—Same as T3111, but with railway station additional; each in box Each.....1.10

BOY SCOUT SPECIAL

T3112—Boy Scout Special, consisting of locomotive, tender and coach, with 80 inches track, mounted on boards in 3 sections, one 20 in., two 30 in. long with pin couplers for putting together; station, power plant, tunnel and bridge; finished in bright red, handsomely striped; length 80 ins., width 5½ ins., 6 in. high; each complete in carton. Each...1.85

MECHANICAL DYNAMOS AND ATTACHMENTS

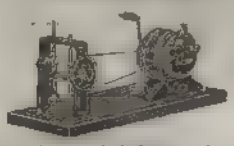
DYNAMOBILES



T3196 — Generates high power and speed; rate het principle construction; enameled metal frame, with pulley and on and off lever; on metal base 2½x3½ in., 2½ in. high; each in box. Dozen.....2.25

T3197—Same as T3196, larger; base 2¾x4½ ins.; 3¼ ins. high, each in box Dozen 8.75

COMBINATION SET

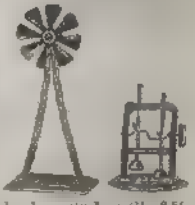


T3198—Assorted 2 kinds: dynamobile with trip hammer and sledge attachments; nicely finished and mounted on stained wood base 2¾x7 ins., 2⅝ ins. high; ⅓ dozen assorted in box. Dozen 3.95

T3199—Same as T3198, larger; base 4¾x10½ ins., 4¼ ins. high; 1/3 dozen assorted in box Dozen 6.50

ATTACHMENTS

T4196—Assorted 6 kinds, circular saws, grind stones, trip hammers, shafting, etc.; metal base, 2⅛x3½x1⅛ ins. high; bright colors, 1 dozen assorted in box. Doz. .88



T4197—Assorted 2 kinds, stamp mill and wind mill tower, with pulley drive wheels; mill 3¼x3¼x4 in high, wind mill 2⅝x3½x7½ ins. high; ½ dozen asst. in box Dozen 1.15

T4198—Assorted 4 kinds, grind stone, circular saw, buck saw, and stamp mill; all with jointed arm mechanisms; pulley drive wheel metal base, bright colors; average size 3½x4½x4½ ins. high; ½ dozen assorted in box. Doz 3.90

T4199 Assorted 2 kinds, lithographed metal mill with revolving water wheel, and trip hammer, with pulley drive wheels, size 4½x7x5 in. high; 1-3 doz asst in box Dozen 4.00

T4200 — Windmill; embossed cut out base, faceted; ladder to tower; crimped roof with flag, pulley drive wheel; nicely finished in colors; size 5x5x10 ins. high, each in box. Doz. 7.20

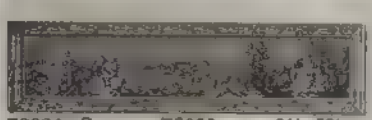
MAGIC LANTERN SLIDES

All pictures finished in bright colors, edges of slides paper bound assorted to the dozen

Individual Pictures

T3921—4 pictures to slide; size 1⅛x4¼ ins.; 1 dozen in box. Dozen 15

T3923—Same as T3921; size 2x7 ins.; 1 dozen in box Dozen 40



Continuous Pictures

T3922—Continuous picture; size 1⅝x6 ins.; 1 dozen in box. Dozen 25

T3924—Same as T3922 size 2¼x7⅝ ins.; 1 dozen in box. Dozen. 72

MOTION PICTURE MACHINES

Up to the minute, and embody new features not found in other machines, well built, handsomely finished, powerful lenses, and produce good, clear pictures.

COMBINATION FILM AND MAGIC LANTERN, OIL BURNING

T3908 — Russia steel body and smoke stack double telescope lens, automatic film tracker; side crank; special lens tube for obtaining proper focus on screen, polished reflector, metal fount with glass chimney, can also be used as a magic lantern, base 3½x5¾ ins.; 10½ in. high; each in box, complete with 3 films and 3 slides. Ea. 1.72

COMBINATION FILM AND MAGIC LANTERNS

ELECTRIC

T3909 -Russia steel black enameled housing, hinged rear door; adjustable focus lens tube; double lens; adjustable film holder; automatic film tracker, side crank; complete with lamp socket, 6 ft. cord, connecting plug, 2 films and 3 lantern slides; size base 4x7½ ins., total height 11 ins.; each in box. Each 3.00

T3910— Black enameled Russia steel housing; hinged rear door; adjustable focus lens tube, with condensing lens adjustable film holder, automatic film tracker; flicker shutter; side crank; complete with lamp socket, 6 ft. film, plug, adjustable lamp attachment, 3 films and 6 lantern slides; size base 4x9 ins; total height 15 ins.; each in box. Each 4.25

GREENRIVER SHOEING VISE AND BOLT HEADER

The calking dies furnished with this vise are made of tool steel and have a full number of grooves for large and small calks; both sharp and straight calks may be formed without changing dies; dies may be held so grooves run either from front to back or from left to right, the vise drops open when not in use, and is in no way interfered with by the bolt header; treadle conveniently located at side. **Bolt Heading Dies** — These are dropped in place or removed instantly without trouble; they are firmly set by driving a taper key which is always in place, jaws are made for following sizes of bolts ¼, 5/16, ⅜, 7/16, ½, 9/16 and ¾ inch; equipped with an anvil adjustable for any length of bolts under 24 inch.

No. 628—Greenriver Shoeing Vise and Bolt Header; complete for shoeing and bolt heading; wgt. 150 lbs . . . . . Each $32 00

No. 629—Greenriver Shoeing Vise; without bolt heading attachment; weight 150 pounds. . . . . Each $29.00

BLACKSMITHS MANDRELS

Plain Pattern

Plain Pattern Mandrels—These are cast smooth and round, and are well adapted for forming rings, bands and similar work.

Cheney Pattern Mandrels—Made with slot which is very convenient for holding end of iron in bending rings and for handling work with tongs, strengthened with ties inside the slot

No. 1 —32 in. high; dia. top 1 in., dia. base 8 in.; wgt. about 60 lbs.
No. 1½—40 in. high; dia. top 1 in.; dia. base 10 in.; wgt. about 100 lbs.
No. 2 —48 in. high; dia. top 1 in.; dia. base 12 in.; wgt. about 125 lbs.
No. 3 —52 in. high; dia. top 1 in.; dia. base 14 in.; wgt. about 150 lbs.
No. 4 —54 in. high; dia. top 2 in.; dia. base 16 in.; wgt. about 220 lbs.

NOTE: Above weights are approximate for Cheney Pattern, weights of Plain Pattern average about 10 per cent less

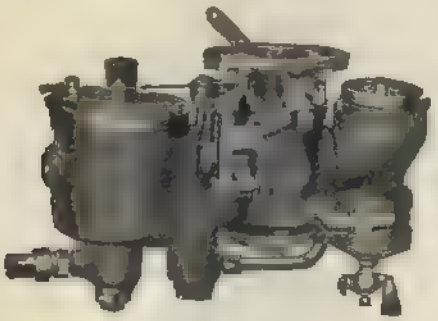
RAYFIELD CARBURETORS

The superiority of the **Rayfield** Carburetor over all other makes has been proven so often that it is generally referred to as the last word in carburetion.

The **Rayfield** has faithfully served the motoring public for over ten years. It has gained the respect and confidence of dealers and garage owners throughout the country.

They enjoy handling the **Rayfield** not only on account of its superiority and the superior satisfaction it renders to the automobile owner, but more especially because of the unlimited sales possibilities. That's what makes a model of car there is a **Rayfield** of the proper type. Every car must have a carburetor, consequently every car owner is a **Rayfield** Prospect. Your sales will be greater in number in your profits will be increased by handling the **Rayfield** Line.

There are four types, known as Models G, L, M and U. Each type is made in various sizes for use on the different sizes of motors.



Model "G"

Models "G", "L" and "M" are made in various sizes according to the size of the throttle opening. Model "G" is made in sizes varying from 1 inch to 2 inches, Model "M" in 1, 1¼ and 1½ inch sizes and Model "L" in 1 inch and 1¼ inch sizes only. These models are also made for installation on either the right hand, or left hand side of the motor. Models "G" and "L" for left hand installation are known as "GL" and "LL"; right hand types being called merely "G" and "L"; similarly, right hand Model "M" is known as "MR" and left hand as "M".

STANDARD RAYFIELD CARBURETORS

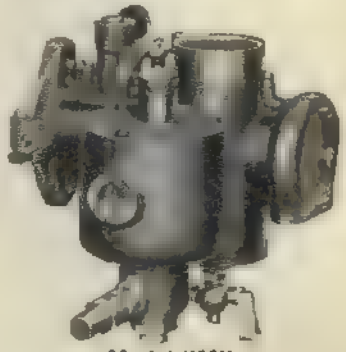
By a variation in the sizes of certain fundamental parts such as nozzles, metering pins, or air constants, the three **Rayfield** Models ("G", "L" and "M") are convertible to the requirements of many different motors, thereby putting the dealer or garage owner in a position to make a majority of installations with a minimum investment in carburetors. The different sizes of carburetors and parts together with specification numbers and prices are listed below:

Model "G" is a top out-let carburetor and is installed on motors equipped with an outside manifold; it is water-jacketed, which provides for a circulation of water around the mixing chamber. This arrangement aids in a better atomization of the fuel, and greatly increases the performance and economy of the motor.

The Model "L" is identical with the "G" but is without the water-jacket. It is designed for installation on Thermo-Syphon, or air cooled motors.

The Model "M" embodies essentially the same principles as Models "G" and "L", although differing somewhat in arrangement. It is a side out-let carburetor for use on motors having the manifold cast integral with the motor block.

Model "U" is the so called plain tube type with multiple jet nozzle and accelerating well with separate idling nozzle. The multiple nozzle is so designed as to provide for a perfect mixture at all speeds of the motor. At present, it is made in only one model, which is known as the "U" and is for installation on the Ford Car.



Model "M"

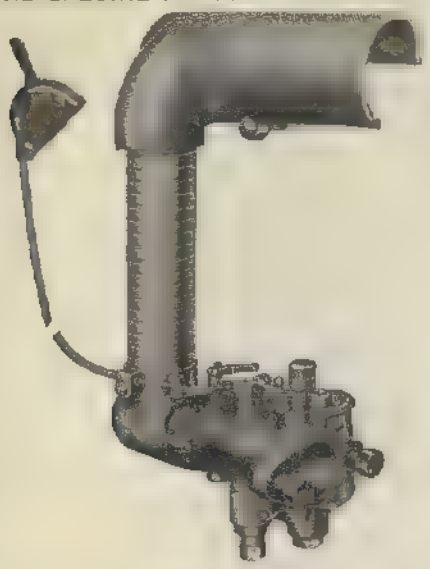
RAYFIELD CARBURETORS

FORD SPECIAL RAYFIELD CARBURETOR



Model "UF"

A new Rayfield product of the plain tube type; has no loose fittings to adjust or readjust, has but two adjustments—one for low and one for intermediate speeds; brings forth all the economy, power and speed it is possible to procure from a Ford motor; involves the thermostatic hot air control principle, making it absolutely impossible to overheat motor in summer; other points of merit are the ease of starting, quicker pickup, increased power and uniformity of performances attached in five minutes

Model "UF" Ford Special Rayfield Carburetor
(Complete with all attachments.) Weight 6 pounds.. ....Each $18 00

SUNOCO
MOTOR LUBRICANTS
ACCURATE AND EFFICIENT

Sunoco Motor Oil is a product of many years' research by the Sun Company of Philadelphia, one of the oldest and largest refiners of lubricating oils in the world. One of the Sun Company's refineries, located at Marcus Hook, Pa., is the largest refinery in the world devoted exclusively to the manufacture of lubricants.

In offering Sunoco Motor Oil to the automotive trade throughout our territory, Marshall-Wells Company have no hesitation in claiming the use of Sunoco Motor Oil to be the last word in accurate and efficient lubrication. Our investigation of Sunoco was made not only in our chemical laboratories, but in our mechanical laboratories as well, for it is evident that the proof of superiority lies in its mechanical operation in all models of motors. After an exhaustive investigation, covering nearly two years, in which all well known oils were tested, Sunoco was adopted solely on its merits.

Sunoco Motor Oil is a wholly distilled, non-compounded product, free from paraffin, tarry matter and other non-lubricating properties. Practically all other motor oils are mixtures of light oils and heavy, tarry residual cylinder stock.

Sunoco is **pure** because it is distilled.

Sunoco is **uniform** because it is the product of refiners who control the production from the moment it comes from the ground in the crude state until it reaches the dealer. Marshall-Wells Company are constantly checking Sunoco in the laboratories at Duluth to assure this uniformity.

Sunoco shows marked **reduction in friction and drag upon bearings** due to its uniform structure. Sunoco leaves in the cylinders no tarry deposits to interfere with the free action of the piston, one of the chief causes of over-heated motors.

Being free from tarry, gummy cylinder stock, Sunoco burns clean, leaving no tarry residue to collect road dust and contamination, forming the all-too-familiar hard, flinty **carbon**. Sunoco, being wholly distilled, leaves a dry, flaky carbon similar to lamp black, which is readily removed with a soft cloth.

Through the application of the "Sunoco Guide", the proper **Piston Ring Seal** is secured. Due to the elimination of cylinder stock in the process of manufacture, it is possible to use much heavier types of Sunoco than in the use of compounded motor oils. This insures greater heat-resistance, greater compression and power, reduction of crank case dilution and greater economy in both fuel and oil.

Through the elimination of paraffin, Sunoco possesses **cold tests** unsurpassed. When compounded oils are frozen solid, Sunoco will still flow freely. This insures ease in starting the motor, economy in ignition and overcomes the extra-ordinary motor depreciation suffered in cold weather.

Sunoco Absorbs Water! Through this exclusive principle, the natural condensation in motors is rendered harmless, scored cylinders are avoided, all frictional surfaces are protected and free circulation of oils assured at all times; water, the product of condensation, freezing in crank cases and pumps is the primary cause of burned out bearings, cracked crank cases and crank shafts and excessive motor depreciation in cold winter climates.

Sunoco Greases are 100 per cent lubrication.

Sunoco Greases, which include Sunoco Transmission Lubricant, Transmission Grease, and Motor Cup Grease, are made from the same selected stocks as Sunoco Motor Oils. A patented process insures their stability under all conditions. They are absolutely free from alkali, lime, animal fats, rosin and similar substances and will never oxidize. They contain no moisture to dry out and ruin their lubricating value. They contain nothing but the highest quality lubricants.

Sunoco Greases are not affected by high or low temperatures. They give the best of service even at temperatures considerably below zero. This eliminates difficulty in changing gears in the coldest weather, as well as the possibility of gears cutting a channel in the grease, which then ceases to flow and to lubricate. Sunoco Greases have exceptionally high lubricating values and in the warmest climates also maintain the proper working body.

THE SUNOCO GUIDE

The following Guide covers Passenger Cars, Commercial Cars, Tractors, Motorcycles and Marine Engines. It indicates the proper types of Sunoco Motor Oils for the engine, in both summer and winter, and for the transmission and differential. The letters in the Guide refer to the types of Sunoco Motor Oils and Greases, as follows:

L—Light	**XXH**—XX Heavy	*—Engine Oil, used for transmission lubrication	
M—Medium	**S**—Special	)—Motor Cup Grease used for transmission and differential	
H—Heavy	**TL**—Transmission Lubricant		
XH—Xtra Heavy	**TG**—Transmission Grease		

The differentiating point between summer and winter is an average temperature of 30 degrees F. above zero

SUNOCO MOTOR OIL

SELLING SCHEDULE

When dealer shall have taken out the named quantities or more he is entitled to rebate, as follows:

250 Gallon Sunoco Motor Oil, rebate	$0.01 per Gallon
500 Gallon Sunoco Motor Oil, rebate	.02 per Gallon
1000 Gallon Sunoco Motor Oil, rebate	.03 per Gallon
1750 Gallon Sunoco Motor Oil, rebate	.04 per Gallon
3000 Gallon Sunoco Motor Oil, rebate	.05 per Gallon

When any of above Oils and Greases are delivered in bulk, less Barrel, Packages or Cases, an aggregate of 50 gallons of Oil or 400 pounds of Grease is equivalent to one barrel and will apply accordingly on the above Quantity Discount

C LIST PRICES

Applying to Wisconsin, Michigan, Minnesota, North Dakota and South Dakota

When any of the above Oils are delivered in Bulks, a Differential of 4 cents per Gallon will be allowed from Wood Barrel prices. When Motor Oils and Greases are delivered they are subject to a delivery charge according to zone

SELF-MEASURING PUMP TANKS

	Each
No. P3991A—Sunoco Self Measuring Pump Tanks, F. O. B. Duluth or Minneapolis	$45.00
No. P3991B—Portable Wheel Base for above; F. O. B Duluth or Minneapolis	9 00

GUIDE TO EFFICIENT LUBRICATION

PASSENGER, COMMERCIAL CARS AND TRACTORS

General Recommendations—It is important that the oil be fed into the Motor, Transmission and Differential so that the level prescribed by the manufacturers will be maintained. To do this oil leaks the efficiency of the lubrication, both in matter of forming the proper film, and in providing sufficient volume to properly perform the important function of cooling.

After the first 500 miles running of a new Automobile, or first 10 hours of a new Tractor, all oil should be drained from the Motor, Transmission and Differential and the cases thoroughly washed out with about two quarts of fresh oil (amount varying according to size of case). Then after draining off all the washing oil, fill the case to exactly the proper level prescribed by the manufacturer with the grade of Zenoil Lubricants recommended below. This operation should be repeated every 1000 miles in the Motor and every 5000 miles in the Transmission and Differential.

Oil should be fed to the Motor every 100 miles and to the Transmission and Differential every 500 miles.

Steering Column—Where case is oil-tight, use Zenoil No. 18; Otherwise use No. 43.

Steering Connections; Use Zenoil No. 43.

Water Pump Bearings, Grease Cups on Motor—Use Zenoil No. 43.

Chains, Open, use Zenoil No. 18; Enclosed, use Zenoil No. 10.

Grease Cups except on Motor—Use Zenoil No. 43

Magnetos and Commutators—Use Zenoil No. 61.

Timing Gears—Where separate lubrication is possible by separate, unconnected tight case use Zenoi l No. 18 If case is leaky use Zenoil No. 41.

Wheels—Use Zenoil No. 43. Universal Joints, use Zenoil No. 43.

General Lubrication of Parts by Hand Oil Can, such as Spring Bolts, Brake Rods, Clutch and Brake Pedals, etc. Summer, Use Zenoil No. 14; Winter, use 75% Zenoil No. 14, and 25% Kerosene

The numbers opposite each name indicate the most efficient grade of Zenoil Lubricants, as follows:

No. 2—Light Body	No. 14—Transmission Oil.
No. 3—Medium Body	No. 18—Worm Gear Oil
No. 6—Heavy Body.	No. 35—Steam Cylinder Oil.
No. 7—Special Heavy.	No. 43—Medium Plain Grease.
No. 8—Medium Extra Heavy Body.	No. 61—Gun Oil
No. 10—Extra Heavy Body.	

* indicates Oil Supplied from Motor.

Torrington,

THE TORRINGTON Electric Cleaner answers every demand—fulfills every requirement of a discriminating housewife. It does its work quickly and thoroughly. It is light and easy to operate, wonderfully economical in current consumption, and with its attachments, provides every facility for thorough home cleanliness.

The motor is used solely to produce powerful suction that reaches deep into the rug for imbedded dirt. The big brush operating naturally like a carpet sweeper, gets all the surface litter, lint, and ravelings.

And it does it without injury to the rug.

Made of highly polished nickeled steel. 25 feet of portable cord. Switch conveniently located in the handle. Endorsed by Good Housekeeping, Fire Underwriters, and every other appliance testing laboratory.

Torrington's unusually powerful suction renders these cleaning tools really efficient in 40 household uses:

1 Covered hose—8 ft. long for using attachments.
2 Extension handle—for reaching high places.
3 Brush—for cleaning clothing, walls, etc.
4 Blower—for connecting hose to exhaust of cleaner.
5 Tool—for cleaning radiators, books, etc., and for blowing
6 Nozzle—for cleaning draperies, upholstery, etc.
7 Nipple—for connecting hose and attachments.
12 Connector—for connecting hose with cleaner.

Each $55.00
Attachments. Per Set . . 9.75

GILLETTE SAFETY RAZORS AND BLADES

STANDARD RAZOR

Genuine leather case, purple lined

No. 460. Triple silver plated razor, leather case and blade boxes to match case .....each, **$5.00**

No. 460G. Same as above, with gold plated razor and gold plated blade boxes .....each, **$6.00**

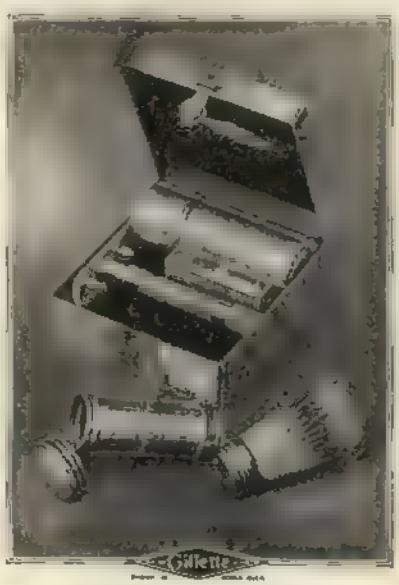
Above sets contain 24 shaving edges, 12 double edged Gillette blades

STANDARD RAZOR

Metal case, purple lined

No. 460B. Triple silver plated razor, nickel plated case and blade boxes to match case .....each, **$5.50**

Above sets contain 24 shaving edges; 12 double edged Gillette blades; in metal box plated to match case



COMBINATION SET

Metal case, purple lined

No. 461B. Triple silver plated razor, collapsible shaving brush and stick Gillette shaving soap in nickel plated holders, nickel plated blade box.....each, **$7.50**

Above sets contain 24 shaving edges; 12 double edged Gillette blades

BULLDOG

Genuine leather case, purple lined; heavy, stocky handle.

Preferred by many old and new Gillette users.

Triple silver plated razor and blade boxes to match case.....each, **$5.00**

Bulldog "G" gold plated razor and gold plated blade boxes..each, **$6.00**

Above sets contain 24 shaving edges; 12 double edged Gillette blades

INCANDESCENT LAMPS

"HYLO," MAZDA TURN DOWN

Has two filaments, one carbon and one drawn wire Mazda filament. The current can be switched from one filament to the other by pulling a string passing through the skirt, giving either a very bright light or a dim light. Saves 85% current when low.

Not included in contracts.

Nos.	9-2510	9-4010
Watts	25	40
Volts	110	110
Candle Power	20 to 1	32 to 1
Each	$2 18	2 18

100 in a standard package; wt. about 25 lbs.

DIM-A-LITES

Save Current—Approved by Underwriters.

Will hold any lamp up to and including 40 watts. Enables the lamp to be turned from its full candle power down to ⅛ and out—"just like gas". Suitable for bed-rooms, halls, bath rooms, nurseries, sick-rooms, etc.

In the Dim-a-lite is a small resistance that cuts down the voltage and at the same time the C. P. and wattage as follows:
1st.—"Full". Lamp consumes rated wattage and gives full C. P. of light.
2nd.—"Half". Lamp consumes about 70% of rated wattage and gives about 50% of rated C. P. of light.
3rd.—"Dim". Lamp consumes about 28% of rated wattage and gives about 25% of rated C. P. of light.
4th.—"Night". Lamp consumes about 20% of rated wattage and gives about ⅛ of rated C. P. of light.
5th.—"Out". Current is turned off.
All numbers give the best results with 25 to 40 watt lamps.

Dull brass finish; interchangeable. Screws into any medium screw socket. Pull chain style. Useful everywhere.

Nos.	23	23L	235-220
Volts	110	32	220
	$1 40	1 50	1 80
Each	3 15	3 39	3 39

One dozen on a handsome display card; weight per dozen 3 lbs.

Dull brass finish; with 2¼ inch shade holder; interchangeable. Screws into any medium screw socket. Pull cord type.

Each
$1 50
No. 34—110 volts 3 39
One in a cardboard box; weight each ¼ lb.

Dull brass finish. This type is intended to be installed on present fixtures in place of key or chain sockets now attached. All degrees of light obtained by pull chain. Especially recommended for for reading lamps, portables, etc.

Each
$1 75
No. 32—110 volts 3 93
One in a cardboard box; weight each ¾ lb.

DIM-A-LITES

Dull brass finish, 2¼ inch shade holder. Intended to be installed on present fixtures in place of key or chain sockets now attached. All degrees of light obtained by pull chain.

Each
$1 75
No. 31 110 volts 3 93
One in a cardboard box; weight each ¾ lb.

Especially intended for the hotel, hospital, nursery or home.

Dull brass finish; portable type. Furnished complete with 8 ft. of cord, attachment, plug bracket and shade as shown in illustration (exclusive of bulb.)

The holder is universal and can be hung on bed, crib, chair, bureau, etc. It is felt-covered at point of contract to prevent scratching. The hinge joint allows a wide range of adjustment—the reflector may be turned directly at the object or pointed toward the ceiling, giving a reflected indirect light.

Each
$5 00
No. 44—110 volts 11 25
One in a cardboard box; weight each complete 1¼ lb.

ELECTRIC LIGHT REGULATORS

ANYLITE

Approved by Underwriters.

Dull brass finish; designed for devices consuming not more than 40 watts of current; any degree of light is obtained by pull chain; fits any standard electric light screw socket, brass chain pull. Works equally as well upon either direct or alternating current. When the globe burns out the regulator is as good as ever and can be used continuously on successive lamps.

Each
No. S—110 volts $1 40 2 25
One in a carton; weight each ¾ lb.

SKEDOODLE PLUGS

Fits standard socket and takes any kind of lamp from 20 to 60 watts. Operates on any voltage from 100 to 250. Flashes at regular intervals and can be easily adjusted to change periods.

For window signs, store fronts and electric advertising displays of all kinds.

Each
No. IV—Length 2¾ in.; diameter 1⅛ inches $1 00 3 48
100 in a cardboard box; wt. per 100, 12 lbs.

ONE IN A BOX

SELF-SETTING IRON PLANES

SMOOTH BOTTOM

The cutter irons are made from special high grade steel, are thin and easily kept in order.
The malleable Frog and Steel Cap reduce greatly the liability of breakage.
Handle and knob are made of highly finished, thoroughly seasoned rosewood. They are securely fastened to plane with steel rods that have brass screw heads. Trimmings are nickel plated and japanned, giving the planes a very fine finish throughout.
The principal features of this line of new Planes are the self-setting cutting iron, the rigidity with which this is held in place by the plane cap, thus preventing any chatter in Plane, the fine adjustments that can be made with cutter for all kinds of work and the few parts used in its construction, which make it almost entirley free from any costs for repairs.
The Planes are set for fine work when they leave the factory.

SELF-SETTING WOOD PLANES

Wood planes are preferred by many because of being lighter in weight than the iron planes.

Wood Planes are made of specially selected beechwood, thoroughly seasoned and dried.

The iron frog with adjustable throat will lengthen greatly the life of these wood planes, as this frog and throat can be moved up to permit the bottom of the plane to be trued up when worn.

The cutter iron can also be adjusted sidewise by loosening the small screw that holds the binder plate to cutter.

Keep cutter iron sharp and properly adjusted, and you will have a plane that is easy to push and will give the greatest satisfaction. In sharpening, care should be taken to keep the cutting edge straight and square with the edge of the cutter iron. Cutting iron can be adjusted sidewise by loosening the set screw that holds binder plate to top of cutting iron.

SMOOTH

SELF-SETTING IRON PLANES

CORRUGATED BOTTOM

Corrugated bottom planes are preferred by many users, because of there being less friction from the bottom, runs a little lighter. They have the self setting cutter iron made from special high grade steel.

The malleable Frog and Steel Cap reduce greatly the liability of breakage.

The Handle and Knob are made of highly finished, thoroughly seasoned rosewood. These are securely fastened to plane with steel rods that have brass screw heads. Trimmings are nickel plated and japanned. Plane is finely finished throughout

The self-cutting feature lies in the construction of the plane iron. If taken out to be honed or sharpened, goes back in same position as before removal. The plane cannot chatter because the cutter iron is held rigid at the point by the cap; at the same time the cap screw used for tightening the cap is pressing against the binder plate on top of the cutter iron. This pressure against the binder plate holds the cutter firm its entire length.

SMOOTH

HALF DOZEN IN A BOX

ROBINSON

Drop forged, from high grade steel, natural finish, polished jaws.

There are two grooves on the movable jaw where it moves through the frame which adds considerably to the strength and firmness of this wrench. Jaws are also thinner than other wrenches which permits their use in places heretofore inaccessible. The opening in jaws are also wider.

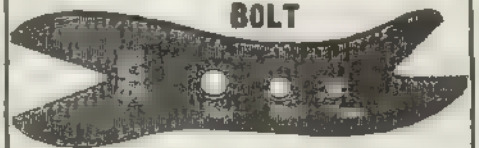
Per dozen	$6.40	8.40

HALF DOZEN IN A BOX

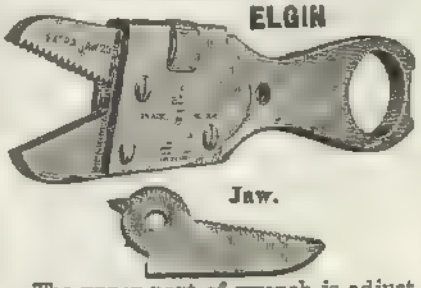
BOLT



No. 23 —6 in., black, solid, cast steel of superior quality, oil tempered, re-threads, bolts 5-16, ⅜ and ½ in., for round iron ¼ ⅞ in., w't per doz. 3¾ lbs. ....per dozen $6.00

ONE DOZEN IN A BOX

ELGIN



Jaw.

The upper part of wrench is adjustable and is held open by a spring. It can be closed by the thumb nut until both jaws meet, giving the tool a wide range of work. The extra jaws are very easily adjusted and they renew the wrench indefinitely.

No. 202—7 in., for ⅜ to ⅝ in. pipe and ¼ to ⅝ in. round iron, wrought steel, hardened jaws, nickel plated and polished, w't per doz. 7½ lbs., per dozen $24.00

Extra Toothed Jaws 6.00

ONE DOZEN IN A BOX

ORUSO WRENCH SETS

These are strong serviceable wrenches at a very attractive price.

No. 125 — Consists of five standard double end white nickel finish wrenches, made from heavy stamped steel case, hardened steel case hardened, sizes range 7/16 and ½, 9/16 and 19/32, ⅝ and 11/16, ¾ and ⅞, 15/16 and 1 in., w't per set 1¼ lbs., per set $0.85

ONE SET IN A BOX

BIT BRACE SOCKET WRENCHES

Made of malleable, hardened so as to give the greatest strength. Nicely finished, japanned body, polished head and shank. Each size is accurately drifted to United States standard nut size. A shoulder prevents the nut working far up into the wrench and the open shank prevents clogging with dirt, also enabling the user to handle dirt, also enabling use of wrench in places where brace would not go.

Square opening for U. S. standard nuts, cap screws and set screws.

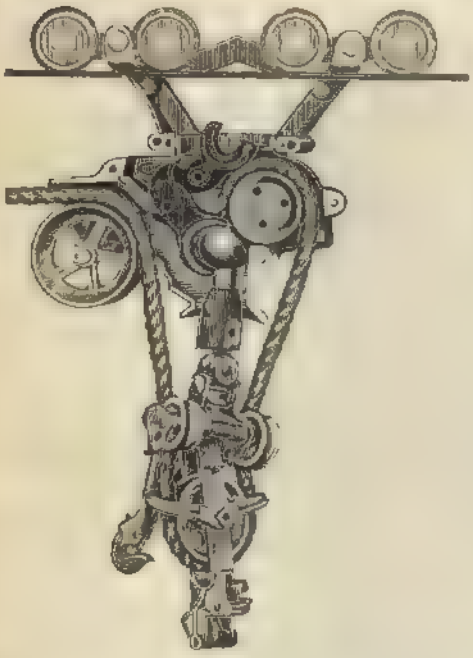
ADVANCE HAY CARRIERS



This sectional view of the No. 1 Advance Sling Carrier illustrates the simplicity and strength, together with the ease of operation, which are very marked features of this carrier. The extra long carriage, having four trucks and eight wheels, gives long bearing on the track and distributes the weight of the load, thereby reducing the strain on the track and making the moving of the load an easy operation. Heavy steel arms and cross piece are one-piece casting, making them very rigid; while the angle at which the arms are set and the flexibility of the individual trucks upon which the wheels are mounted eliminates practically all vibration—saving much wear and reducing the danger of breakage. Swivel frame allows load to be placed in any desired position before being tripped, and saves much handling with fork. The draft rope pulls registering head directly into mouth of carrier where it is engaged by dogs on either side, this suspends the entire load direct from the carrier and relieves rope of all strain; there are no rope grips used, as they chafe and wear the rope at all times and cause great damage to the rope where they grip to hold load while the carrier is being moved. The locking device for stop lock is positive in action, and releases automatically only after the registering head has been made secure in the carrier mechanism. These features are very important, and are exclusive with the Advance Carrier. When roped triple draft (as shown in illustration) the heaviest sling loads are handled by the No. 1 Advance Carrier with great ease.

TO ROPE ADVANCE CARRIERS AND PULLEYS

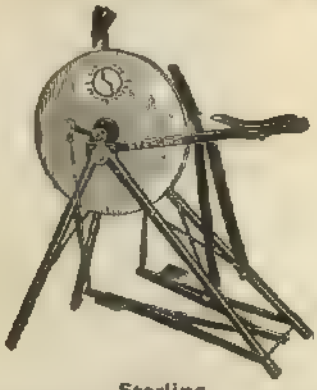
The above illustration shows how the Advance Carrier can be roped either double or triple draft with the equipment furnished with each carrier and no extra parts required in either case.

Fig. A—Shows triple draft arrangement commonly used. Here the trip, F16, is placed in the pulley in place of Rope Swivel, F27, and to which end of the draft rope is attached.

Fig. B—Shows carrier and pulleys roped triple draft also, only in a different manner. Here the swivel, F27, is placed in the pulley to which end of the draft rope is attached. The lower part of F18 is removed that F17 may be clamped on the rope any place between the carrier and pulleys. This arrangement is very practical in certain cases, as it saves hoisting the load to the peak of the barn to carry into the mow if the building is so constructed that it will otherwise permit. While the load is thus suspended it may be put into a swinging motion before pulling the trip rope and thus save labor spreading the hay.

Fig. C—Shows double draft arrangement. Here F17 is used in the pulley as a register head and Swivel, F27 placed in the carrier, which are also made so it can be attached as indicated, and to which end of draft rope is fastened.

CLEVELAND MOUNTED GRINDSTONES



Sterling

Ball bearing; tubular steel frame; rods and bolts threaded, no center pins to loosen; large comfortable seat and clothes protector; mounted with genuine Berea stone, 19 to 22 inches diameter, 1¾ to 2¼ inches thick, weighing 50 to 60 pounds, enameled a rich vermillion. Each

No. 100 Sterling Mounted Grindstone; wgt 100 lbs.....$ 13.00

NORKA

Norka

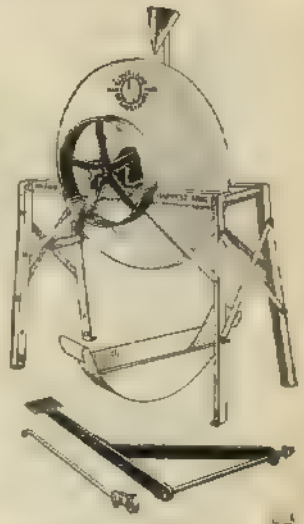
Heavy and heavy tubular steel frame, strongly braced and held at the top by two heavy steel clamps; clamps also contain anti-friction roller bearings on which axle turns; axle is steel and a special bushing is used to hold stone securely to axle; adjustable seat; genuine Berea stone 19 to 22 inches in diameter by 1¾ to 2 inches thick weight about 80 pounds Each $12.00

Norka Mounted Grindstone;

Crated. Third class freight

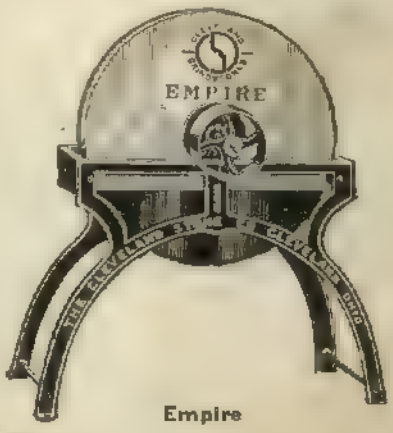
HARVEST KING

Frame of heavy angle steel 1¼x1¼x⅛ inch, strongly braced; equipped with 24x3 inch grindstone for a ⅝ inch shaft; 12x2⅜ inch pulley and heavy steel roller bearings, hand crank and drip cup; finished green and black.



No. 800—Harvest King Grindstone; complete with pulley, hand crank and drip cup..Each $15 00

No. 801—Harvest King Grindstone; complete with pulley, hand crank, drip cup, trough, treadle and pitman and bearing.....Each $18 00



Empire

Possesses strength to withstand the strenuous service of every day use, light weight and easily handled; frame and trough of cast iron, does not rust out and will last a lifetime; detachable steel shaft, 6 inch pulley and hardened steel annular ball bearings; equipped with genuine Berea stone 24 inches in diameter and 2 to 3½ inches thick.

No. 500—Empire Power Grindstone; weight about 225 pounds.....Each $24 00

POWER GRINDSTONE SHAFTS

No. 1 Power Grindstone Shaft; ⅝-inch shaft, 12 inches long, pulley 7 inches diameter 2-inch face flange 4½ inches diam.; boxings 1¾ inches wide, will take stones 24 inches diameter, 4 inches thick; weight 9 pounds . Each $3 50

No. 2—Power Grindstone Shaft; 1⅛-inch shaft, 18 inches long; pulley 8½ inches diameter, 2-inch face; flanges 6 inches diameter; boxings 3 inches wide; will take stones 36 inches diameter, 4 inches thick; weight 20 pounds .....Each 6 00

Crated. Third class freight

ADVANCE HAY CARRIERS

No. 1 ADVANCE HAY SLING CARRIER

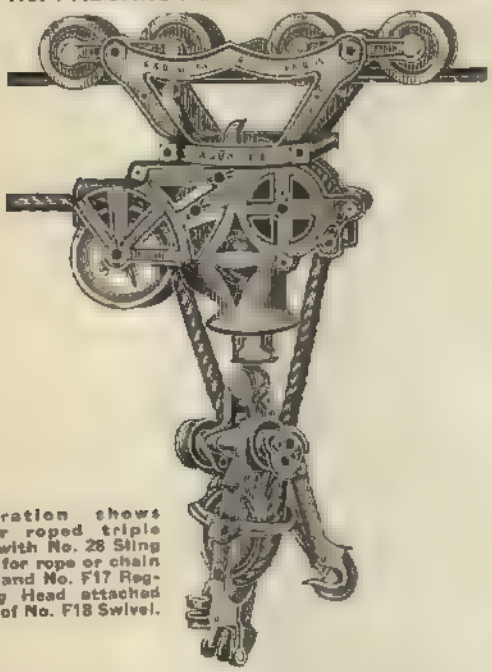


Illustration shows carrier roped triple hoist, with No. 28 Sling Pulley for rope or chain slings, and No. F17 Registering Head attached by use of No. F18 Swivel.

Swivel frame of best malleable iron; eight wheels, turned steel axles, mounted on adjustable trucks and [illegible] extra long to distribute load on track; especially designed for heavy sling work, will operate on any style steel track (when provided with proper stop lock) without use of extra parts—by placing the washers on either side of wheel arm in bifurcated frame the track wheels may be set to fit any size track from 2 to 2¾ inches wide. Has parallel pulleys, and may be roped either double or triple draft without additional parts. Draft rope takes registering head directly into mouth of carrier, where it is engaged by a positive locking device, automatically releasing carrier from stop lock, and suspending entire load direct from carrier, thus relieving draft rope from all strain; no grips to chafe or wear rope; hinge joint and swivel permits of taking load through small doors without danger of injury to equipment.

Unless otherwise ordered, No. 1 Advance Carriers are equipped complete as follows: One set No. 28 Sling Pulleys for end trip rope or chain slings, with No. 27 Swivel Rope Connection; one No. F17 Registering Head, with No. F18 Swivel; one No. 14 Stop Lock, fits Advance, Ney or Law track; and one No. 78 Safety Stop. Weight complete, 58 pounds.

No. 1—Advance Hay Sling Carriers; complete as described and illustrated above.....Each $18.40

No. 1—Advance Hay Sling Carriers; as above except with No. 20 Sling Pulley.....Each 18.00

Second class freight.

Showing in detail the adjustable feature of No. 1 Advance Hay Carrier, which permits of its use upon any width of track.

STOP LOCKS

Below is illustrated the proper Stop Lock for use with the No. 1 Advance Carrier together with the various makes of track upon which this carrier will operate.

Each
No. 14 Stop Lock [illegible] $0.65
For No. 1 Track—2 inch.
Advance, Ney, Law.

Each
No. 14L Stop Lock $0.65
For No. 6 Track 2½ inch.
Myers.

No. 18 Stop Lock $0.65
For No. 2 Track 2 inch
Porter Louden.

No. 14K Stop Lock $0.65
For No. 7 Track 2½ inch.
Janesville.

No. 15 Stop Lock [illegible] $0.65
For No 3 Track 2 inch.
Star

No. 14K Stop Lock $0.65
For No 8 Track 2½ inch.
Milwaukee

No. 14K Stop Lock $0.65
For No 4 Track 2¼ inch.
W. & B. or Diamond.

No. 14S Stop Lock $0.65
For No. 9 Track 2 inch.
Boyd or T Rail.

No. 14J Stop Lock $0.65
For No. 5 Track—2 inch
Strickler (Janesville)

No. 15 Stop Lock $0.60
For No. 10 Track 2 inch.
Star

Note—When ordering the No. 1 Advance Carrier for use on tracks other than No. 1 Advance be sure to specify number of Stop Lock wanted as above, otherwise No. 14 Stop Lock will be sent with carrier.

STOP LOCKS FOR No. 2 CARRIER ONLY

Below is illustrated the proper Stop Lock for use with the No. 2 Advance Carrier only.

Each
No 14W Stop Lock $0.65
For No. 1 Track 2 inch.
Advance Ney, Law.

Each
No. 14WS Stop Lock $0.65
For No. 9 Track 2 inch.
Boyd or T Rail.

Note.—Either of the above carriers may be used with rope, chain, center trip or slat slings, or fork; if rope or chain slings are to be used specify Sling Pulley No. 28; if center trip or slat slings specify Sling Pulley No. 20, if forks specify Fork Pulley No. 75; if slings and fork are to be used alternately specify Fork Clevis No. 41 in addition, which permits of use of fork with either No. 28 or No. 29 Sling Pulleys. This applies to all Advance Hay Carriers.

Use a pure Manila rope and not over 1⅛ inch in size, and there will be no difficulty in returning the carrier to stop lock or the pulleys to the load.

ADVANCE HAY CARRIERS

NO. 2 ADVANCE HAY SLING CARRIER

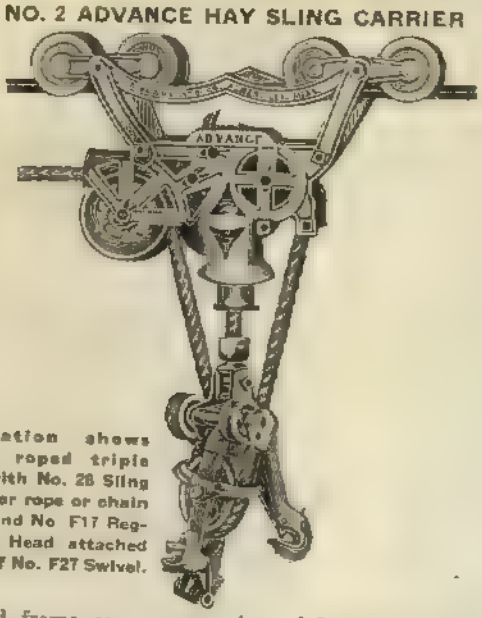

Illustration shows carrier roped triple hoist, with No. 28 Sling Pulley for rope or chain slings, and No. F17 Registering Head attached by use of No. F27 Swivel.

Solid frame one way carrier, of best malleable iron; intended for barns where hay is taken in through end door; eight wheels, turned steel axles, mounted on long trucks, operates only on No. 1 and No. 9 tracks, takes No. 14W Stop Lock for No. 1 track and No. 14Ws Stop Lock for No. 9 track. Has parallel pulleys and may be roped either double or triple draft without additional parts. Above illustration shows No. 2 Carrier roped triple draft by attaching rope to sling pulley with No. F27 Swivel and placing No. F17 Registering Head at any desired position in draft rope, in that way making it unnecessary to have extra distance to peak of barn where door room permits (see Fig. B and note on page 358). Draft rope takes registering head directly into mouth of carrier where it is engaged by a positive locking device, automatically releasing carrier from stop locks, and suspending entire load direct from carrier, thus relieving draft rope from all strain; no grips to chafe or wear rope; large joint and swivel permits of taking load through small doors without danger of injury to equipment.

Unless otherwise ordered, No. 2 Advance Carriers are equipped complete as follows: One set No. 28 Sling Pulleys, for end trip rope or chain slings, with No. 27 Swivel Rope Connection; one No. F17 Registering Head, with No. F18 Swivel; one No. 14W Stop Lock (fits Advance New or Law tracks), and one No. 75 Safety Stop. Weight complete, 54 pounds.

No. 2—Advance Hay Sling Carriers; complete as described and illustrated above. Each $16.50

No. 2 Advance Hay Sling Carriers; as above, except with No. 29 Sling Pulley. Each 16.00

Second class freight.

SAFETY STOPS

Furnished with all Advance Carriers; to be placed on under side of track about 6 inches from end to prevent carrier from leaving track. Malleable iron.

No. 78 Safety Stops
Each $0.45

ROPE SWIVEL

Furnished with all sling pulleys; used for attaching rope to pulleys or to carrier.

No. 27—Rope Swivels
weight 1½ lbs. Each $0.65

REGISTERING HEADS

When ordering registering heads always specify ox rod bar as well as by name as some makes use several different sizes of bars.

Registering Heads. Any of above patterns, average weight about 1 pound. Each $0.75

FORK PULLEY

Malleable iron frame, riveted at bottom and bolted at top; large swivel eye; 4-inch iron sheave, on 1¼-inch bearing. May be used with any make hay carrier when equipped with the proper registering head (see above). For Advance Carriers Nos. 1, 2, 3, 4 and 5 use No. F17 Registering Head, attached by use of No. 27 Swivel when roped triple draft, and No. F17 or RH26 Registering Head when roped double draft; for Advance Carrier No. 10 use No. RH55 Registering Head. **Please specify whether with or without registering head when ordering.**

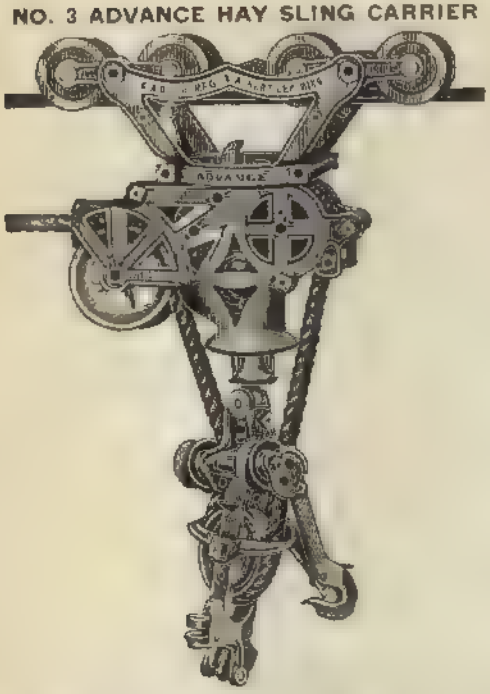
No. 75—Fork Pulleys; without registering head; weight 5 lbs. Each $1.50

No. 75 Fork Pulleys; with registering head; weight 5½ pounds. Each 2.25

No. 75.

ADVANCE HAY CARRIERS

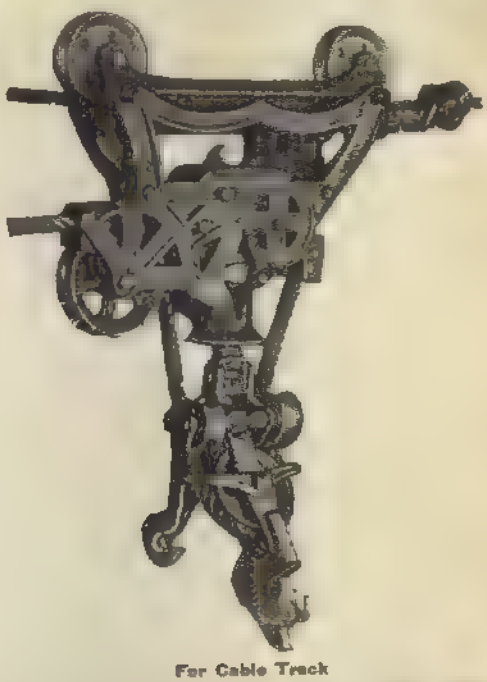
NO. 3 ADVANCE HAY SLING CARRIER



Swivel frame, same as No. 1 Advance Carrier shown on preceding page, except wheels are not adjustable for the various widths of track; it operates on 2-inch tracks Nos. 1, 2, 3 or 4, and requires same stop lock for either of these tracks as is used with No. 1 Carrier. Weight complete 38 pounds.

No. 3—Advance Hay Carrier, with No. 28 Sling pulley . . . Each $17 20
No. 3—Advance Hay Carriers, with No. 20 Sling Pulley . . . Each 16 70

NO. 4 ADVANCE HAY SLING CARRIERS

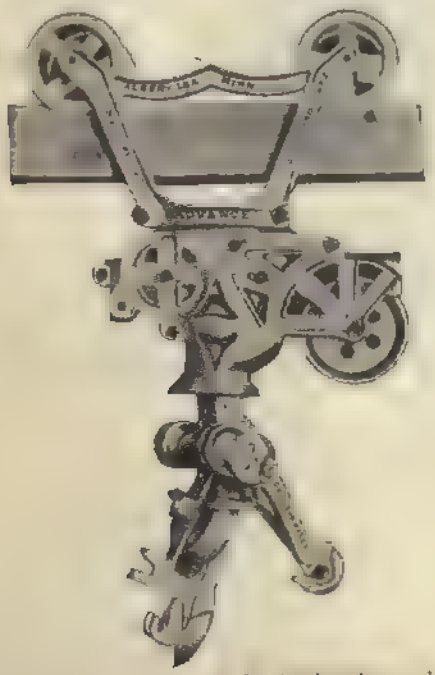


For Cable Track

Solid frame one way carrier, same as No. 2 Advance, except being fitted for ¾-inch cable track, and equipment includes No. 72 Stop Lock for use with cable. In operation, regular equipment and all of its fasteners it is identically same as the No. 2 Advance Carrier. Weight complete 34 pounds.

No. 4—Advance Hay Carriers, with No. 28 Sling Pulley . . . Each $15 50
No. 4—Advance Hay Carriers, with No. 20 Sling Pulley . . . Each 15 80
No. 4—Advance Hay Carriers; with No. 75 Fork Pulley . . . Each 14 60

NO. 5 ADVANCE HAY SLING CARRIER



No. 5—Advance Hay Carriers; with No. 28 Sling Pulley . . . Each $17 10
No. 5—Advance Hay Carriers, with No. 20 Sling Pulley . . . Each 16 70

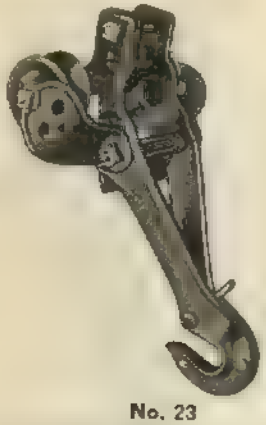
NO. 6 ADVANCE HAY SLING CARRIER

For Curved Track

Same as No. 1 Advance Carrier shown on preceding page, except provided with spring cotter to lock swivel and hold it in line with track.

No. 6—Advance Hay Carriers, with No. 28 Sling Pulley . . . Each $18 40
No. 6—Advance Hay Carriers; with No. 20 Sling Pulley . . . Each 18 00

HAYING TOOLS



No. 23

Main section used with No. 24 to make complete pulley No. 28, and with No. 25 to make complete pulley No. 29

No. 23—Main Section Advance Compression Sling Pulley; weight 6½ pounds.....Each $2.15

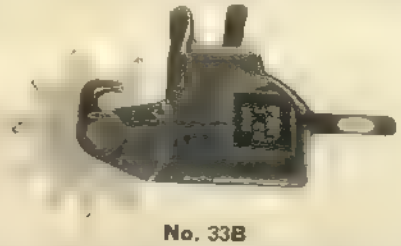
No. 29

No. 25

No. 29 Advance Compression Sling Pulley is the No. 23 main section used with No. 25 section, for center trip or slat slings. By using proper registering head listed elsewhere, the No. 29 pulley may be used with any make of sling or fork carrier.

No. 29—Advance Compression Sling Pulley; complete less registering head; weight 11 pounds. .Each $3.85

No. 25—Section Advance Compression Sling Pulley; used for center trip slings; weight 4½ pounds.....Each 1.70



No. 33B

Avoids trouble and expense of broken Sling Lock hooks, hook, when tripped, will whirl into it stop, without the sudden jolt or knock against the frame, which causes these hooks to break; now furnished in place of No. 33, also with our pulleys No. 28

No. 33B—Sling Locks; weight 2¼ pounds.....Each $1.25

No. 28

No. 24

No. 28 Advance Compression Sling Pulley is the No. 23 main section used with No. 24 section; for end trip rope or chain slings, and will handle either two or three rope sling. By using proper registering head (listed elsewhere) the No. 28 pulley may be used with any make of sling or fork carrier.

No. 28—Advance Compression Sling Pulley; complete less registering head; weight 12½ pounds. Each $4.30

No. 24—Section Advance Compression Sling Pulley; used for end trip slings; weight 6 pounds. .Each 2.55

FORK CLEVIS ATTACHMENT

No. 41

Method of Attaching

Fork Clevis used in connection with No. 28 Sling Pulleys for quick fork hitch; with this attachment forks and slings may be used alternately without change of pulleys.

No. 41—Fork Clevises; weight 3 pounds.....Each $1.00

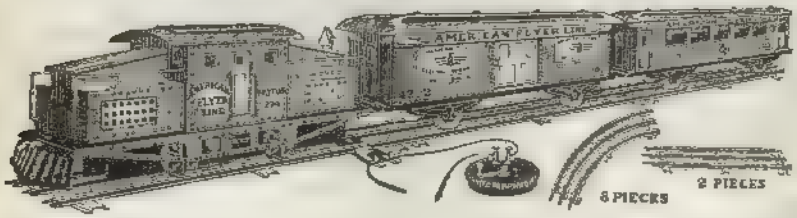
Advance Compression Sling Pulleys and Attachments illustrated and listed on this page are made in sections and the sections and parts are interchangeable. By using the various sections any of these pulleys may be arranged to serve as a trip for use with center or end trip, rope or chain slings (either two or three rope), for harpoon, drag, harpoon or grapple forks, and they will take any standard style or make of registering heads for use on the different carriers now on the market. This does away with the necessity of buying complete pulleys for use with the different slings and forks as only the sections need be purchased; and all are readily and easily changed.

Made in America
American Flyer
The Train with the Guarantee Registered U.S. Patent Office

ELECTRIC TRAINS

Made by the same careful workmen that have made our mechanical trains so famously popular. Engines are modeled from the latest type New York Central electric locomotives and are by far the best miniature electric locomotives on the market.

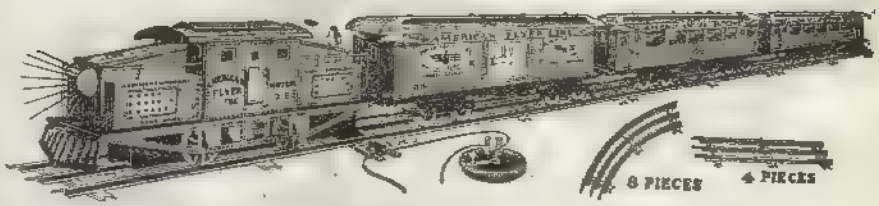
These trains can be run on 3 or 4 dry cells, or by connecting up a transformer to your electric light socket, if, it is, 110-volt, 60 cycle alternating current. Be sure to read the instructions very closely before trying to operate these trains.

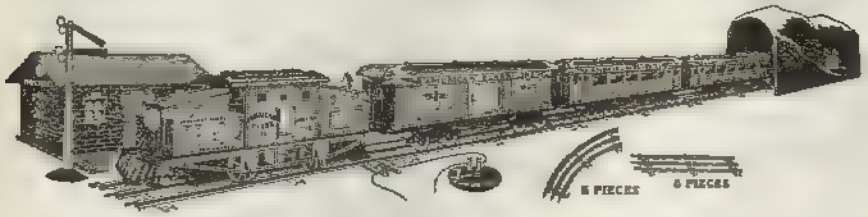


No. 1201—Length of train 24½ in. Electric locomotive, baggage car with sliding door, passenger car of largest type single truck. One improved rheostat.

Eight pieces curved and two pieces straight track, including one terminal section, w't per set 4½ lbs., per dozen sets $101.00

No. 1217—Length of train 31 in. Electric locomotive with large protected headlight, baggage car with sliding doors, two passenger cars. Cars have double trucks. Eight sections of curved and four of straight track, including one terminal section. Length of track 125 in. One improved rheostat, w't per set 6 lbs. .....per dozen sets $129 50

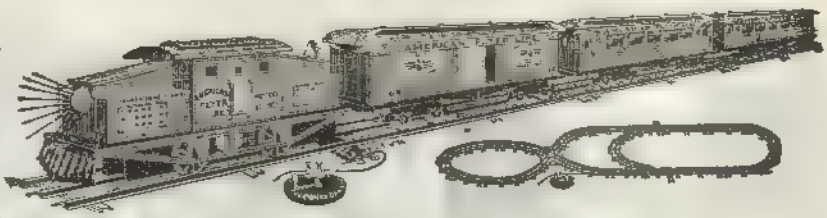




This is our most complete outfit.

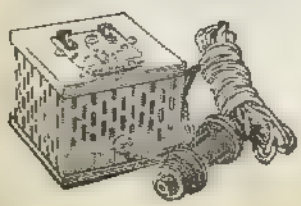
No. 122—Length over all 31 in. Electric locomotive with large protected headlight, baggage car with sliding doors, two passenger coaches, (double truck cars). Eight sections curved and six of straight track. Length of track 145 in. One terminal section, station, double arm semaphore, tunnel and improved rheostat, w't per set 8 lbs., per dozen sets $158.00

No. 1227—Length overall 31 in., consists of a locomotive with protected headlight, a large size baggage car with sliding doors, two large passenger cars. All the cars are equipped with swivel double trucks and disappearing couplers. 1 pair of switches, 1 crossover, 16 pieces of curved and two pieces of straight track, length of track 245 in., w't each 8 lbs., per dozen sets $196 00



ALL ABOVE ONE SET IN A STRONG LITHOGRAPHED BOX

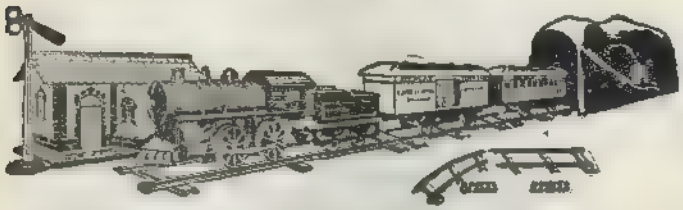
TRANSFORMERS



No. 1250—Type B, capacity 100 watts. For use of alternating current only, 110 volt, 60 cycle, primary. Secondary voltage, 4, 6, 8, 10 and 12 volt. Equipped with Fahnestock patented connection clips, 6 ft. of black cord with separable plug. Transformer is positively air cooled. Does not have any pitch to melt and burn children or ruin carpets. This transformer has twice the capacity necessary to operate American Flyer trains. Suitable for operating most any type of electrical toy. per dozen $66.00

The engines are of latest design made of highest quality cast iron and are beautifully decorated.
The cars are made of heavy sheet metal, beautifully lithographed in various colors. The cars are made up of baggage, passenger, various freight cars and caboose.
The tracks are made of heavy tin. Each section of track is 10½ inches long.

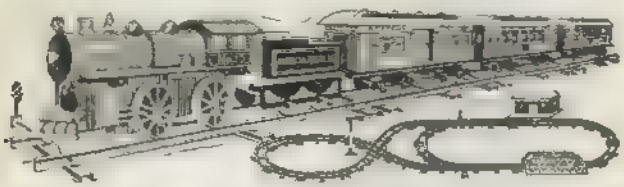
AMERICAN FLYER



The clock-works of the "American Flyer" engines are equipped with steel pinion and patented winding devices and are the strongest mechanical toy on the market. Each one carries a six months' guarantee.

This is a real set to start a big railroad system with.

No. 19—**Length over all 26½ in. Engine No. 18, speed** governed, piston rods and brake, tender, baggage car with sliding doors and passenger car. Single arm semaphore, station and tunnel. Eight pieces of curved and four pieces straight track make oval of 125 in., w't per set 7½ lbs. .....per dozen sets $72.00



This is the Twentieth Century Limited of minature trains.

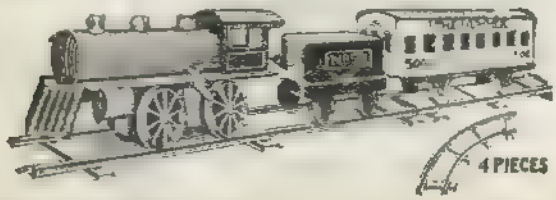
No. 21—Length over all 35 in. Large engine No. 15, speed governed, piston rods and brake and automatic brake stop, large tender, baggage car with sliding doors, two passenger cars. Cars have double trucks. Sixteen pieces of curved and fourteen pieces straight track, including automatic brake stop section, two switches and one cross over, station, single arm semaphore and construction bridge, w't per set 8 lbs.,
per dozen sets $116.00

ALL ABOVE ONE SET IN A STRONG LITHOGRAPHED BOX.

HUMMER TRAINS

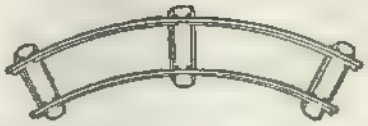
Built to meet the demand for popular priced American trains. Constructed by the same skilled workmen who make the "American Flyer" Trains.

Engines are formed from heavy sheet steel, black enameled and latest designs. Clockworks have strong steel spring which pulls "The Hummer" at a great speed.

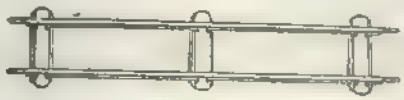


No. 53—Length over all 15 in., locomotive, tender and one car. Four pieces of curved track, each 15 in. long, w't per outfit 1½ lbs. .....per dozen $18.80

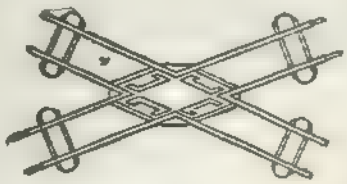
AMERICAN FLYER TRACK



No. MC—Curved track units with pins on one end only. Eight pieces make a circle, length 10½ in.,
per dozen sections $1.45

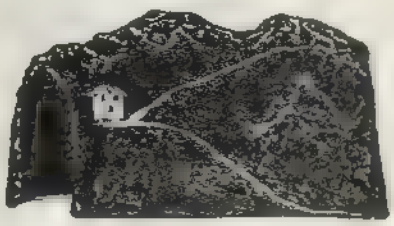


No. MS—Straight track units with pins on one end only, length 10½ in. .....per dozen sections $1.45



No. MX—Crossover .....per dozen sections $7.00

TUNNELS



Beautifully decorated with house of red on the side.

No. 82—Length 10 in., heigh 7 in., w't per dozen 6 lbs.,
each $12.00

PASSENGER STATION

No. 90—Made of heavy sheet metal, beautifully colored in red, white, gray and black. Length 6 in., height 3½ in., w't per dozen 4½ lbs. .....per dozen $7.00

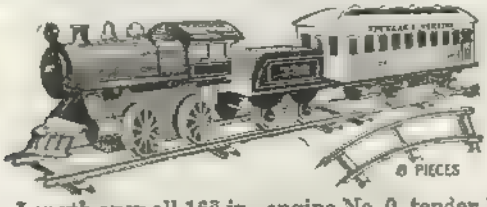
"Made in America" "American Flyer" The Train with the Guarantee Registered U.S. Patent Office

The engines are of latest design made of highest quality cast iron and are beautifully decorated.

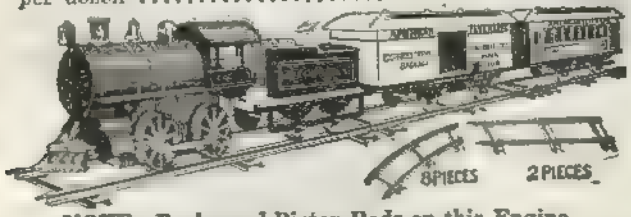
The clock-works of the "American Flyer" engines are equipped with steel pinion and patented winding devices and are the strongest mechanical toys on the market. Each one carries a six months' guarantee.

The cars are made of heavy sheet metal, beautifully lithographed in various colors. The cars are made up of baggage, passenger, various freight cars and caboose.

The tracks are made of heavy tin. Each section of track is 10¼ inches long.

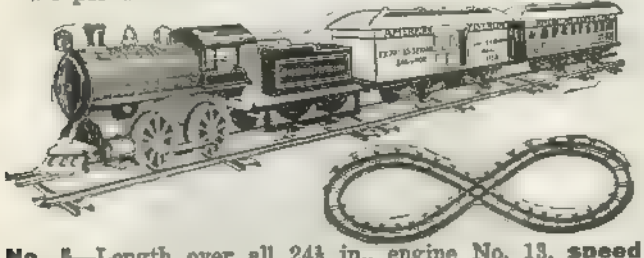


No. 0—Length over all 16¾ in., engine No. 0, tender No. 328, passenger car No. 1107, eight sections of track forming circle 82 inches in circumference, w't per outfit 3 lbs., per dozen $32.00

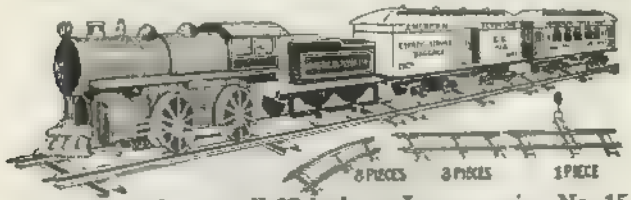


NOTE—Brake and Piston Rods on this Engine

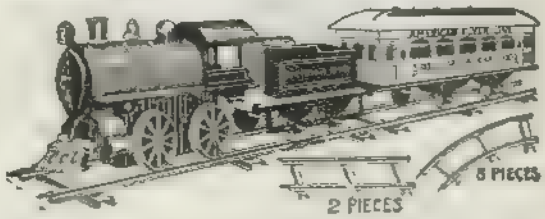
No. 2—Length over all 24½ in. Engine No. 2, **speed governed** with piston rod and brake, large tender No. 120, baggage car No. 1108, with sliding door, passenger car No. 1107, eight pieces of curved and two pieces of straight track form oval 103 inches in circumference, w't per outfit 4 lbs. .....per dozen $41.30



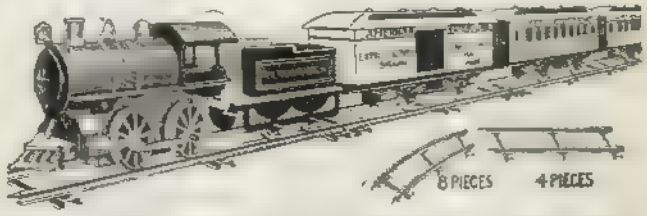
No. 5—Length over all 24½ in., engine No. 13, **speed governed,** piston rods and brake, tender No. 120, baggage car No. 1108A, with sliding door, passenger car No. 1107, fourteen pieces of curved track and crossover, forming figure eight, circumference 165 inches, w't per outfit 4½ lbs. .....per dozen $55.00



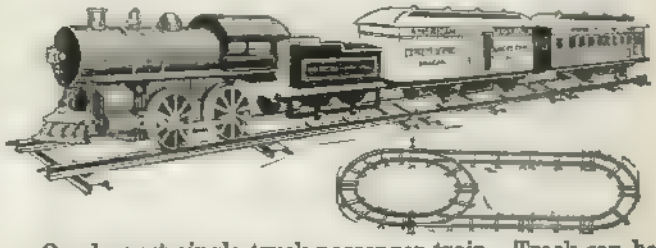
No. 15—Length over all 27 inches. Large engine No. 15, **Speed governed,** piston rods, brake and automatic brake stop, large tender No. 120, large size baggage car with sliding door No. 1105, large size passenger car No. 1106 with double trucks and disappearing couplers. Eight pieces of curved track and four pieces of straight track, including automatic brake rod stop, circumference 124 inches, w't per outfit 5 lbs...per dozen $67.70



No. 1—Length over all 18½ in., **speed governed,** Engine No. 1, tender No. 120, largest single truck car No. 1103, eight pieces of curved track and two pieces of straight track form oval 103 in. in circumference, w't per outfit 3½ lbs. .....per dozen $37.00



No. 3—Length over all 31 in., engine No. 3, **speed governed,** piston rods and brake, large tender No. 120, baggage car No. 1108, with sliding door, and two No. 1107 passenger cars. Eight pieces of curved and four pieces of straight track form oval 123 in. in circumference, w't per outfit 4½ lbs. .....per dozen $48.50



Our largest single truck passenger train. Track can be made either in an oval or square.

No. 13—Length over all 25 inches, engine No. 13, **speed governed,** piston rods and brake, tender No. 120, baggage car with sliding door No. 1108A, passenger car No. 1107. Ten pieces of curved, two pieces of straight track and two switches form oval and circle. Track length 162 inches, w't per outfit 5 lbs., per dozen $62.70

If you "go to sleep at the switch" operating this train there will be a wreck.

Train can be switched from large oval to small oval by opening or closing both switches.

EACH OUTFIT PACKED IN INDIVIDUAL CARTON BEAUTIFULLY LABELED.

LIONEL ELECTRIC TOYS

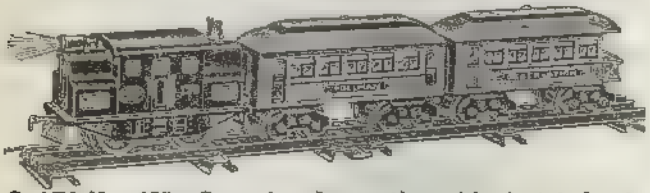
In construction, finish and general appearance Lionel Electric Toys are of the highest quality. All locomotive bodies are of sheet steel, not cast iron. They are enameled and ornamented in gold with hand rails, bells, headlights and other fittings of nickled steel. Every Lionel Electric Motor has an electric headlight except No. 159 outfit.

The motor is the most vital part of any electric train outfit. Lionel motors are built for service. All cars are hand enameled, not lithographed. They are decorated in gold, have removable roofs, seats in the interior, and imitation glass in windows and transoms. Being made of heavy gauge metal they are very durable and serviceable. Wheels are nickeled steel. Trucks are flexible, which enables cars to stay on track at high speed.

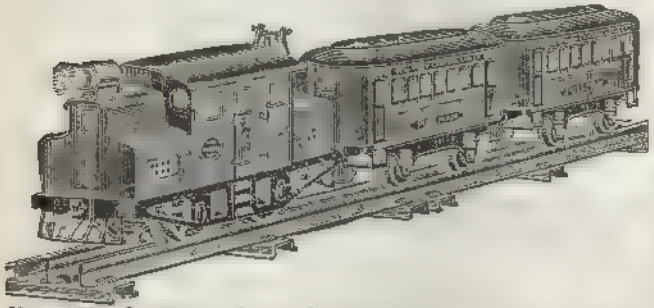
Track is very rigidly constructed . Track ties are very strong. Insulated third rail makes short circuit impossible. A Lionel Multivolt Transformer used in conjunction with Lionel Train Outfits will result in the utmost satisfaction to the user.

TRAINS

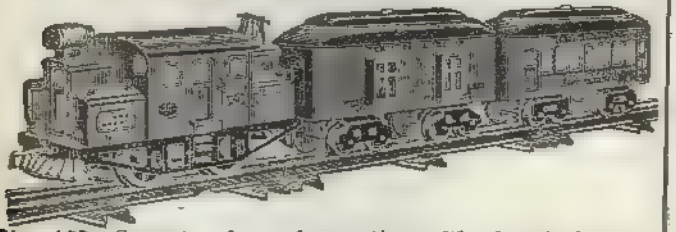
No. 159—Consists of one locomotive with dummy headlight, two gondola cars and circle of O track 1⅜ in. wide, circle of track is 30 in. in diameter, train is 20 in. long, complete with full directions for operating, w't complete 5½ lbs. .....each $9.50



Outfit No. 155—Comprises locomotive with electric headlight, one double truck Pullman Car, one double truck Observation Car, eight sections of OC curved track and four sections of OS straight track, making an oval 49×30 inches. Outfit includes one speed controlling rheostat. Length of complete train 21½ inches. Weight of complete outfit packed in box 6½ lbs., each $14.50



No. 160—Consists of one locomotive with electric headlight, two Pullman cars, eight sections OC curved track and two sections OS straight track, making an oval 39×30 in., and one controlling rheostat. Length of complete train 20 in., w't complete 5½ lbs. .....each $12.00



No. 162—Consists of one locomotive with electric headlight, one double truck Pullman car, one double truck mail car, one controlling rheostat, eight sections OC curved track and four sections of OS straight track, making an oval 49×30 in. Length of complete train 24 in., w't complete 6¾ lbs. .....each $19.90

ALL ABOVE ONE SET IN A LITHOGRAPHED STRONG BOX

MULTIVOLT TRANSFORMERS

FOR ALTERING CURRENT

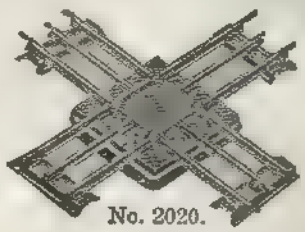
Type B—While primarily intended for operating Lionel or any other make of electrical toys, can be used to good advantage for operating various other electrical apparatus requiring the voltages within their range, such as induction coils, annunciators, bells, burglar alarms, wireless and medical apparatus and a large number of other uses. Multivolt transformers will be found more economical than dry batteries. Type B will operate any size electric train of any make with great efficiency and at low cost, size 2¾×4⅝×3⅜ in., w't each 3½ lbs. .....each $7.20

ONE IN A BOX

WHAT IS MEANT BY TOY TRANSFORMER

A toy transformer is an apparatus for reducing the 110 volt house lighting **alternating current** to the few volts necessary for operating electric toys or various other appliances. They are made of electrical sheets with various coils of magnet wire wound over them. These coils are placed in a handsomely black enameled steel case and are surrounded with a sealing wax, which makes them impervious to heat, moisture, etc. The top of the case contains various binding posts and a controlling rheostat which enables the user to either obtain permanent or variable voltages by moving the switch from one point to another. A brass index plate shows the proper posts to use. A flexible lamp cord 7 ft. long is directly connected with the transformer. The standard plug on the end of the lamp cord fits in any lamp socket. For instance, if your house lighting circuit is 110 volts **alternating current** and you require 6 volts to operate a train set or other small electrical apparatus, this voltage can be obtained by connecting the binding posts indicated on the index plate. You turn on the current and whiz, zip goes the train.

CROSSINGS



No. 2020.

No. 2020—Crossing, for use in conjunction with switches, enabling the formation of figure 8 and figure 8 loop. Size 10 in. square. Cross rails are mounted on a solid base perfect insulation which prevents short circuit, w't each lbs. .....each $1.45

THIRD RAIL TRACK

No. 20SOS—Straight track 10¾ in. long, 1⅜ in. wide, 0 gauge, w't per section ¼ lb. .....per section $0.30

No. 20COC—Curved track, for use with straight track, 11⅛ in. long, 1⅜ in. wide, 0 gauge, w't per section ¾ lb., per section $0.30

ONE IN A STRONG BOX

DANGER SIGNALS

No. 206—Beautifully decorated, green, white, blue and black, made of heavy pressed steel, height 7 in., w't per doz. 3 lbs.....per doz. **$4.00**

SEMAPHORES

No. 207—Single arm, beautifully decorated, red, white, and green, made of heavy pressed steel, height 7⅛ in., w't per doz. 3 lbs...per doz. **$4.00**

No. 208—Double arm, beautifully decorated, red, white, and yellow, made of heavy pressed steel, height 10¾ in., w't per doz. 3 lbs., per dozen **$7.00**

TELEGRAPH POLES

No. 209—Single arm, made of drawn steel tubing, beautifully enameled, height 6¾ in., w't per doz. 3 lbs., per doz. **$4.00**

ALL ABOVE, ONE DOZEN IN A BOX

ARCH LIGHTS

No. 2009—Complete with wire, track connections and 10 volt frosted bulb, made of heavy cast iron and cast brass, beautifully enameled in green, height 11 in., w't per doz. 12 lbs., per doz. **$30.00**

AMERICAN FLYER ELECTRIC TRACK

No. ES—Straight track, made of heavy rolled tin plate, length 10½ in., w't per doz. sections 1⅝ lbs., per dozen sections **$2.00**

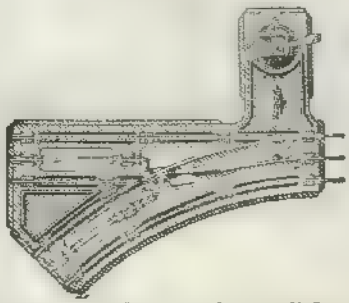
No. EC—Curved electric track made of heavy rolled tin plate, length 10¼ in., w't per doz. sections 1⅝ lbs., per dozen sections **$2.00**

CROSSOVERS

No. EX—Electric crossovers made of heavy pressed tin plate, length 10¼ in., w't per doz. 2½ lbs., per dozen **$12.50**

ALL ABOVE, ONE DOZEN IN A BOX

SWITCHES



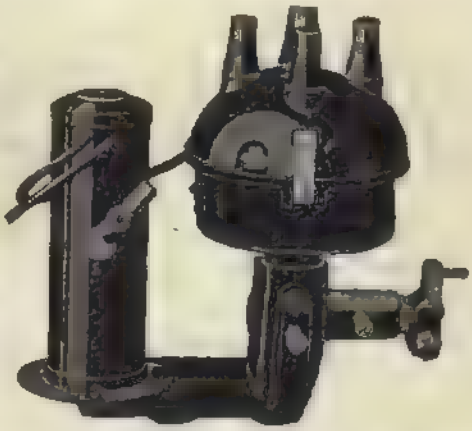
No. EF—Electric switches, entire switch made without solder, all parts are die clamped on a strong pressed steel base giving perfect electric contact all the time, whether switch is open or closed, length 10¼ in., w't per doz. pr. 1⅛ lbs. .....per dozen pair **$30.00**

ONE PAIR IN A BOX

ATWATER KENT SCIENTIFIC IGNITION
Type K-3 for the Tractor

"A simple foolproof ignition system that requires no skilled maintenance in the field—no expert to repair it."

The Simple Atwater Kent contactless distributor—no rubbing surfaces or brushes



Atwater Kent Ignition System Type K-3 for Tractors
(shown without cover)
Simple waterproof coil—no moving parts

Ignition Switch
Starting button furnishes extra hot spark for starting

Note simplicity of automatic spark advance mechanism

Furnishes the big, hot, dynamic spark required by tractor motors at all speeds from cranking to maximum.

The same big spark when cranking (no matter how slowly) as at full speed is an inherent characteristic of the system and is not obtained by adding impulse devices, vibrators or other complicated mechanism. The spark heat does not vary with the motor speed as with the magneto.

The spark is retarded when cranking, eliminating back-firing and its attending danger—yet it is automatically advanced for maximum power and economy according to the speed of the engine.

Current consumption is negligible. Current flows only during instant of spark. Six dry cells in series will give one season's unfailing operation. The system uses less current than your door bell or the tail lamp of your auto.

Impossible to exhaust cells by leaving switch "on," as interrupter contacts are always open except for the brief instant of spark—no current is used except when the motor is actually in operation.

Extreme light weight of all moving parts, together with low bearing pressures, eliminates trouble from vibration and insures long life and maximum reliability without interruption.

Contact Maker Type K-3

Every detail of the Atwater Kent Tractor Ignition outfit is the result of careful scientific development. Only the best in manufacturing methods, material, men and machinery enter into its production.

Mounted on a base of standard magneto dimensions, the system can be easily installed on any existing tractor model.

Ten tractor manufacturers have adopted it as standard equipment. Several of these have already used it for two or more seasons.

Complete Type K-3 Unisparker with Coil on Magneto Replacement Mounting. No switch.

2 cyl. Specify 90° or 180°	$32.00
4 cyl.	32.00
6 cyl.	34.00

THE CHAMPION SPARK PLUG MERCHANDISER

Front View.

THE NEW AND MODERN WAY OF MERCANDISING CHAMPION SPARK PLUGS

Case with car index Chart attached, enables any clerk to select instantly the proper size and type of spark plug that is requested for any passenger car, commercial car, tractor, motorcycle, motor boat and farm and stationary engines. Adapted for use on your counter, show case or shelf; it occupies but little space compared to the complete assortment that it carries. Finely finish, an ornament to any store or counter—made of metal each compartment will hold an original package of spark plugs. By lifting protecting cover it takes but a moment to take a record of your stock on hand Conveniently arranged for quick sales. Each assortment consists of 100 Spark Plugs and 50 Cores, representing the leading types that are in constant demand.

One dozen in a cardboard box.

MINERS' CARBIDE LAMPS

JUSTRITE

With Matchless Reflector.

Drawn from seamless brass.

A new principle in water feed—a valve enclosed in a ¼ inch tube, so constructed that it increases or decreases the supply of water, enabling the user to burn the flame at any size desired.

The hook is riveted and soldered; fits all caps.

The clasp is made of spring brass, holds lamp secure to cap; will fit all standard cap shields.

The burner tip is made of imported lava, with 4 air holes, which prevents carbonizing. Will not clog and does not require agitation in order to obtain water as needed.

JUSTRITE—Lever Feed, With Sparker.

Valve is operated by a lever sliding back and forth over notches, and held firmly in place by a small spring. The sparkler on reflector completely eliminates the use of matches.

Height 4¼ inches; diameter reflector 2½ inches; 13½ candle power. Furnished with one No. J77 carbide container.

Per Dozen

No. 85—Lamp only; polished . . . $31 50

One in a cardboard box; weight each 6 ozs.

JUSTRITE—Polygon Feed, With Sparker.

Valve Control—Lighter Attachment.

The sparker or igniter on reflector completely eliminates the use of matches.

Height 4¼ inches; diameter reflector 2⅝ inches; 15½ candle power.

Per Dozen

No. 707—Lamp only; polished brass . . . $27 75

One in a cardboard box; weight each 8 ozs.

JUSTRITE—Liberty Feed, With Sparker.

Drawn from seamless brass; polygon. Valve is square threaded and soldered on the valve stem. It is set rigid and cannot get out of alignment, therefore it is a positive water shut off and will not leak. The sharp corners of the button breaks, also rips away the caked carbide, always insuring a sturdy free water flow. Diameter of reflector 3 ins.

Per Dozen

No. 767 Lamp only, polished brass $30 00
No. 769 Lamp only; nickel plated 33 75

One in a cardboard box; weight each 8 ozs.

VICTOR—Regulating Value Water Feed, Detachable Reflector and Brace With Sparker.

The water feed is a dependable regulating valve which can be adjustable to permit the water to flow freely. Reflector is polished brass, with wire edge that fits snug to the reflector brace; fastened to lamp with a knurled nut. Height 3¾ inches; detachable reflector 2¾ inches in diameter; 16 candle power. Polished brass.

Lamp Only.

No. . . . 660

Per Dozen . . . $27 75

One in a cardboard box; weight each 4½ ozs.

MINERS' CARBIDE LAMPS

GUYS DROPPER

Drawn from seamless brass. Has 2½ inch deep brass polished reflector intended for miners working in wet places or where the roof is low. Fitted with Guys patented water dropper and valve cleaner. Height 4 ins.; diameter of reflector 2½ inches.

No. 28SL
Per Dozen $27 00
One in a cardboard box; weight each 6 ozs.

HUNTERS' HEAD LAMPS

JUSTRITE

For Carbide.

Head light made of brass, nickel plated, held firmly to cap shield by hook and clasp; strong lens 2½ in diameter, ⅛ inch thick, set in hinged frame, fastened with spring; equipped with a ¾ foot imported fish tail lava tip and self-lighting attachment. Nickel silver reflector projects a strong light 100 feet.

Generator—consists of two parts, water tank and carbide container, made of No. 20 gauge lead-coated steel; non corrosive and non-rusting lock seamed and soldered 4½ inches high, 4½ inches long and 1¾ inches wide. Water feed is controlled by a notch lever valve; can be shut off when desired. Finished in black enamel. High grade rubber tube, covered with fabric, soft and pliable.

Complete with generator, headlight, rubber tube, belt and pins.

Burns 10 Hours on one Charge.

Per Dozen
No. J44—Complete, less cap (**For prices see Dept. 9**). $
One in a cardboard box; wt. 2 lbs.

One dozen in a carton, weight per doz. 2 lbs.

JUSTRITE ATTACHMENTS

LARGE REFLECTORS FOR JUSTRITE LAMPS

Large reflector; 3 inches in diameter; made of aluminum; highly polished; weight ½ ounce; suitable for drivers.

Increases the light to 16¾ candle power.

No. J1—Fits any Justrite Miners' Lamp. Per Dozen
Packed loose; weight per dozen 6 ounces. ✱$6 00

MATCHLESS REFLECTORS

For Justrite or Baldwin Lamps.

Made of polished brass. Held firmly around tip holder by means of tightening screw in collar. Will fit Justrite and Baldwin Miners' Lamps. The sparker or igniter on reflector makes matches unnecessary as sparks are produced by simply turning wheel.

Per Dozen
No. J26—Diameter 2½ inches $6 75
Packed loose; weight per dozen 12 ounces.

EXTRA FLINTS, For Matchless Reflectors.

Per Carton
No. J27—Carton contains 12 envelopes, each holding 1 flint $0 75

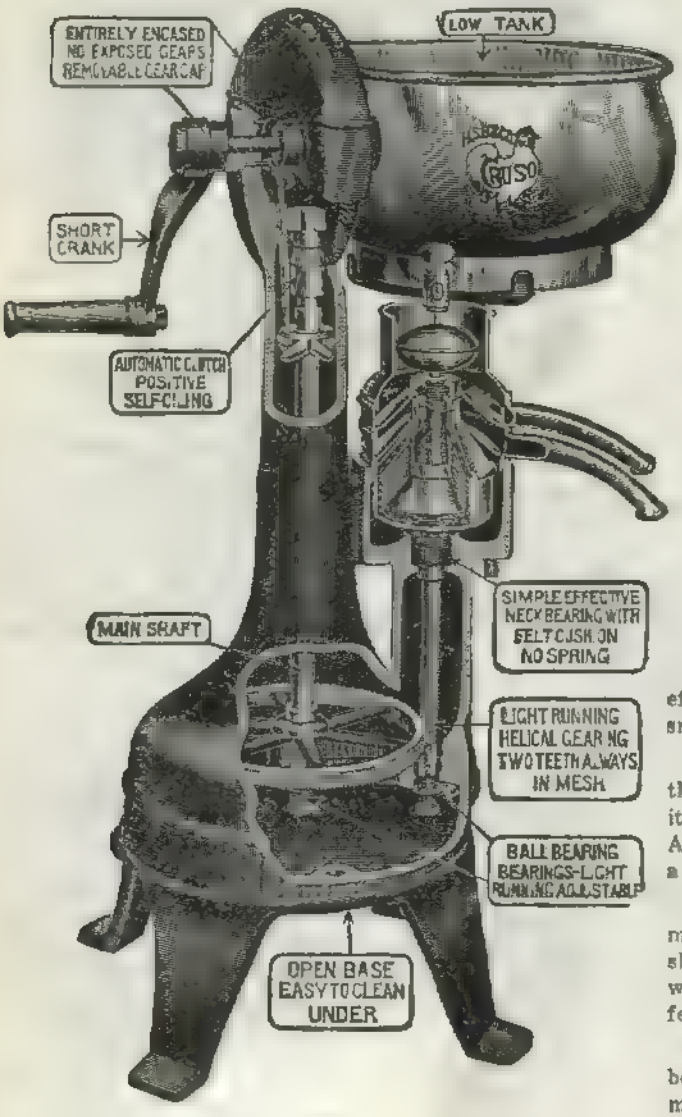
CRUSO CENTRIFUGAL CREAM SEPARATORS



Cutaway Illustration Showing Internal Mechanism.

H.S.B.&CO. CRUSO

MR. DEALER—

This is Your Proposition to Your Customers

ORDER AT HOME

SAVE FREIGHT, TIME AND MONEY

Call at our store for a practical demonstration of this efficient machine. See for yourself what a finely made, smooth-working separator the Cruso is.

Turn the crank—you will be surprised at the lightness of the action. Let us explain to you why the Cruso is noted for its thoroughness—why it is the easiest separator to clean. And let us show you what a high grade separator you get at a rock-bottom price.

The Cruso is easy running and easily cleaned. A Babcock milk test will convince you that the Cruso is the cleanest skimmer you ever saw. Gets all the butter fat with less work. You can take down a Cruso bowl in a jiffy—a big feature in the daily cleaning.

The Cruso has a speedometer, sanitary disked bowl, ball-bearing lower bearings, and sanitary base. The short crank makes easy work. Cruso saving in butter fat is money for you.

EVERY CRUSO IS GUARANTEED

Hibbard, Spencer, Bartlett & Company, the big Chicago wholesale house, are back of us in making an ironclad guarantee on the Cruso. When you buy a Cruso your investment is protected while paying handsome dividends in the form of butter-fat saving. Come in and let us show you the Cruso.

	To Retail F. O. B. Chicago. Each.
No. T375—Cruso, 360 to 375 lbs. (approx. 200 qts.) cap. per hr., without speed indicator, shipping w't each 165 lbs.	$60 00

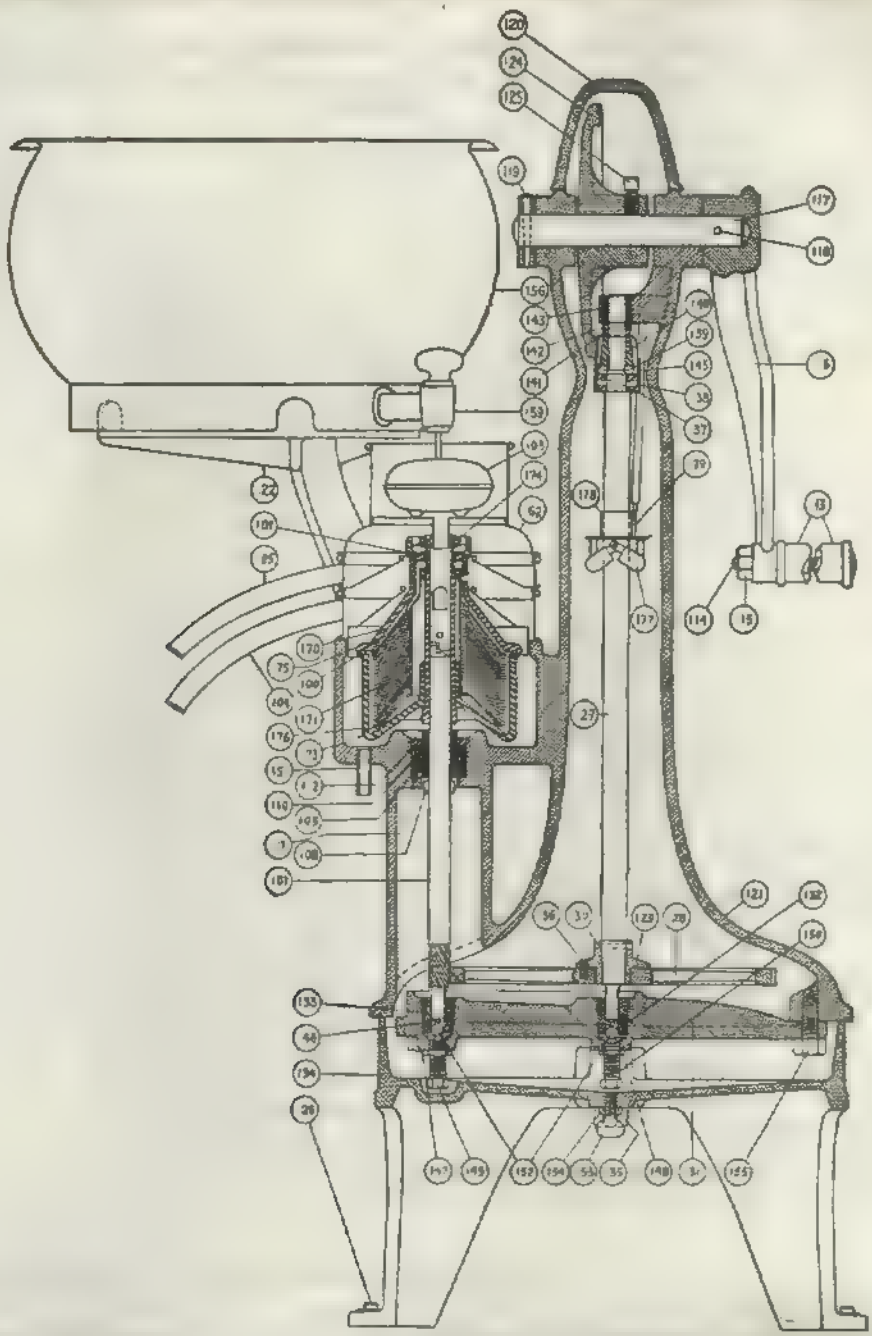
Boxed complete in substantial shipping cases. For Details See Book of Instruction with Each Separator.



MASTER CLUTCH PULLEYS FOR CRUSO SEPARATORS

Operate by tightening the hand wheel to start and loosening same to stop. Only four parts to the outfit. Can be driven by flat or round belt. In order to arrive at size of connecting pulley for Cruso Separator multiply the diameter of the pulley 14 in. by the speed 60 turns per minute. Divide the product by the speed of the line shaft and the answer is the diameter of the connecting pulley.

Diameter of wheel 14 in., width of face 2¼ in., w't each 15 lbs,

No. 37—Plain face for flat belt ..... each **$10.00**
No. 55—Flat and round belt ..... each **$10.50**

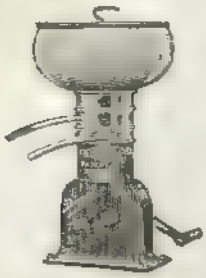
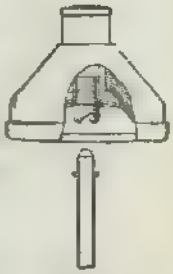
IMPROVED DOMO CREAM SEPARATORS

AN UNEXCELLED SKIMMER, PERFECTLY CLEANABLE, POPULAR PRICED



Nos. TAX and TBX.



No. 2.

The small "AX" and "BX" sizes, 10x13 in. base and 16 in. tall—for Domestic use only—not more than two cows, have an open solid one-piece bowl convenient to operate and as readily cleaned as a milk bottle. These "AX" and "BX" sizes will get more cream than is possible by setting the milk, skimming a single cow's milk, 8 to 12 quarts in 10 to 15 minutes. The "AX" and "BX" sizes are usually sold without stand, but the solid stand for No 10 also mounts the "AX" and "BX".

The Nos. 10, 11, 12 and 12C are equipped with the most efficient disced bowl, described below. They may be mounted on a table or bench to operate successfully, but must stand solid to skim perfectly and not wiggle or vibrate in operation. Any vibration hinders skimming the same as does shaking or stirring milk on which cream is rising.

Nos. T10, T11 and T12. Without Stand.

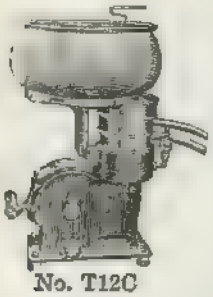
DOMO'S loose, overhung self-balancing, small, all pressed steel bowl, with gears running in a constant oil bath and with bronze brushed bearings insures the smoothest, easiest running.

DOMO'S bowl is most simple and compact as made of fewest parts possible to cleanest skimming, is quickly and completely taken apart to clean as perfectly as a china plate and as readily re-assembled, features of the utmost importance in its daily use.

DOMO'S unexcelled skimming which is of first importance, combined with its superior construction, accounts for its most satisfactory service and the success it enjoys.

DOMO'S bowl discs are mixable, but best skimming results from keeping the discs in the same order after it is put into service. It will also skim cool milk, which however, is discouraged as a wasteful practice.

Kept in condition and handled according to DIRECTIONS, DOMO pays for itself in a short time in the extra cream it takes out of the milk, skimming so perfectly that less than 2-100ths of 1% of fat remains in the skimmed milk, an amount imperceptible except by Babcock test.



No. T12C

DOMO is most handy in consequence of its compactness and simplicity, yet it has the capacity of larger, heavier separators, and excepting the small "AX" and "BX" sizes, has oil bathed gears as illustrated Fig 1, and with its small, light, highly efficient, loose overhung self-balancing bowl—Fig. 2—and bronze bushed bearings is easiest running.

No. TAX—Domo—Capacity 90 lbs. or 9 gals. per hour, w't boxed 35 lbs., without stand, each $27.50

No. TBX—Domo—Capacity 120 lbs. or 12 gals. per hour, w't boxed 40 lbs., without stand, each $30.00

No. T10—Domo—Capacity 180 lbs. or 18 gals. per hour, w't boxed 50 lbs., without stand, each $42.00

No. T11—Domo—Capacity 220 lbs. or 22 gals. per hour, w't boxed 55 lbs., without stand, each $46.00

No. T12—Domo—Capacity 300 lbs. or 30 gals. per hour, w't boxed 70 lbs., without stand, each $50.00

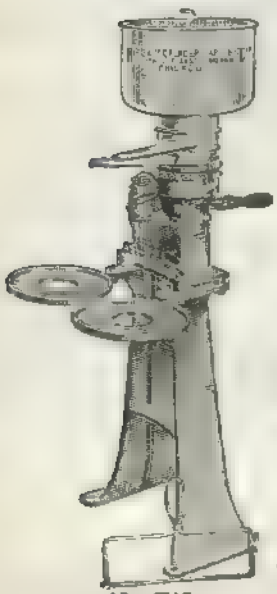
No. T12C—Domo—Capacity 340 lbs. or 34 gals. per hour, w't boxed 80 lbs., without stand, with tank bracket ..... each $60.00

EXTRA STANDS

No. T1—For Nos. AX, BX, 10 and 11 Domos, w't each 45 lbs., loose, extra ..... each $7.50

No. T2—For Nos. 12 and 12C Domos, w't each 50 lbs., loose, extra ..... each $7.50

For list of separate parts and details of operation, see DOMO DIRECTIONS with every separator.



No. T12, With Stand.

ASK FOR DOMO PRINTED MATTER FOR DISTRIBUTION

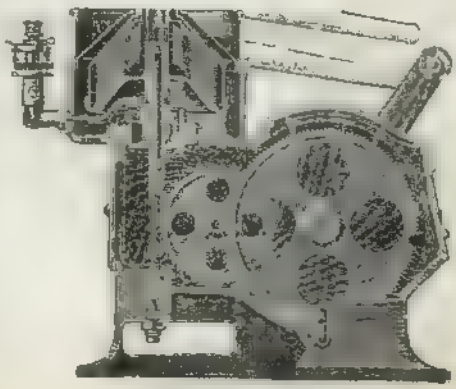
For Domo Repairs see Page 934B.

IMPORTANT

Every DOMO, when carefully set up so it runs smooth will skim perfectly if operated according to DIRECTIONS, kept in nice running condition and the bowl kept bright and sweet.

See description of DOMO'S details in DIRECTIONS packed with every separator.

Always URGE the purchase of a separator somewhat larger than is needed, as a larger size skims small lots of milk equally clean or when required, the milk of more cows, or the increased quantity of milk when cows are fresh.



No. 1.

ILLUSTRATIONS OF REPAIRS FOR DOMO SEPARATORS

Nos. 11, 12, 13, 23, 24, 25 and AX

In ordering always specify the number and name of the part and the size of the separtor.

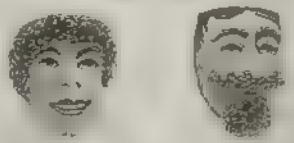
LADIES AND GENTS

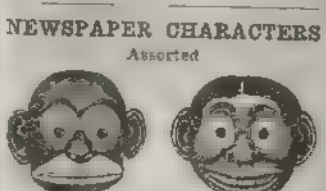
With Hair



F821—Assorted paper masks, full size, men with beards and mustaches, and women with hair; flesh color, nicely painted; 3 dozen in package. Dozen ..... .62

NEWSPAPER CHARACTERS

Assorted



F873--Popular newspaper characters, fine glazed white paper, as Gaston, Alphonse, Leon, Happy Hooligan, Policeman Hooligan, Gloomy Gus Mrs. Katzenjammer, The Kids, Uncle Heinie, Captain, Foxy Grandpa, Buster Brown; 1 dozen in a box. Dozen ..... .72

DEVILS

F932--Devils, assorted gauze 1 dozen in a box. Dozen .. .30

MASK WITH HAT

F819 — Large masks with hair and hats, assorted characters to the Dozen; ½ doz in box Dozen 1 98

ANIMAL MASKS

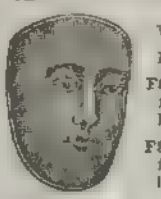
F880—Assorted paper animal masks, nicely made and finished; 1 dozen in box. Dozen..... .38

F882 — Full size; gauze mask, assorted animals- 3 dozen in a package. Dozen 2 00

MOTION MASKS

MOVING EYE AND JAW

F810 — Fine gauze mask, with natural hair and eye brows; hinged lower jaw, which can be made to open and close; left eyebrow on spring hinge which on pulling string as illustrated winks in a very ludicrous manner; six styles assorted. Dozen 1 95



WIRE MASKS

Men and Women

F884 Young men, full size Dozen 1 85

F885-Young ladies; full size. Dozen 1 85

CAMBRIC HOODWINKS

F894— Cambric Hoodwinks black; same as No. F886 Curtain Masks, without the curtain and the eyes not open; very clammy in appearance and used for lodge purposes. Dozen..... .60

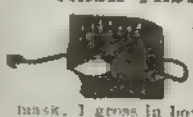
LULUS OR HALF MASKS

F891 Cambric Lulus; fine quality white, black and assorted colors; 1 dozen in pkgs. Gross..... 3.75 Dozen..... .34

F892—Same Sateen; 1 dozen in pkg Dozen 48

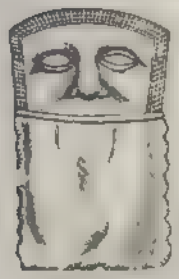
F893—Satin Lulus; colors white, black, red, pink, and light blue; sold either in solid colors or assorted. Dozen..... .70

MASK FASTENERS



F895 Made of elastic with metal fastener on end; will hold any mask, 1 gross in box Gross.. 78

CAMBRIC MASK
WITH CURTAIN



F888 — Cambric Curtain Masks or Dominoes in assorted colors, extra good quality, one dozen in bundle.
Gross . 4.25
Dozen .38

WIGS

F915

F917

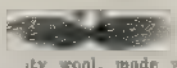
Good quality wool wigs assorted colors; ½ dozen in pkge.
F915—Gents, assorted. Dozen 2.25
F916—Negroes. Dozen 2.25
F917—Bald head. Dozen 2.25
F918—Ladies, assorted. Doz. 2.25

BEARDS

F910 — Combination beard and mustache, sewed and wired, assorted solid colors; 1 dozen in package.
Dozen .40

F909—Beards; assorted characters, Jews, Irish, Dagos, etc; 1 dozen in a box. Dozen .82

MUSTACHES



F907—Mustaches, good quality wool, made with wire to hold on nose; 1 doz. on a card assorted. Gross 2.75 Dozen .30

F908—Mustaches and Goatees extra heavy, stick on; one piece on a card; one dozen in an envelope.
Dozen .40

SANTA CLAUS MASKS

F934—Combination flat lithographed Santa Claus mask and hat, white honey comb tissue top forming hat; red band; 1 dozen in package. Dozen .72

Flax Beard

F935 — Santa Claus, very fine gauze painted, with flax beard; one doz. in a box. Dozen 1.10

Wool beard, moving mouth

F937—Good quality gauze, nicely painted; with wool beard and hinged moving mouth; 1 dozen in package. Doz. 1.92

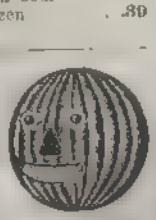
Wool beard, moving mouth, with hood

F938 Extra fine cut fit; natural painted quality gauze with selected wool beard and cloth hood; ½ dozen in box. Dozen...3.95

HALLOWE'EN MASKS

F928—Skull Masks; gauze; very highly finished; one dozen in a box.
Dozen .30

PUMPKINS



F927 — Pumpkin Masks; well modeled faces; good gauze; painted in natural colors; 1 dozen in a box.
Dozen .30

WITCHES WITH HAIR

F931 — Witch Mask with hair, fine gauze, nicely painted features; 1 doz. in a box.
Dozen .30

DEVILS

F932—Devil masks; bright red, gauze painted features and horns; 1 dozen in box. Dozen... 39

ASSORTED CHARACTERS

F924—Assorted paper juvanite masks, 6 kinds; 3 dozen in package. Dozen .38

F926—Grotesque characters; gauze finely painted; witch, skull, devil, pumpkin, etc; 6 kinds assorted; 3 dozen in box. Dozen..... 75

GAUZE WITH HOODS

F923 — Assorted gauze masks, skulls, devils, clowns, Chinese, negroes, Turks, etc.; extra well made wax finish; with hair, beards and mustaches, assorted cloth hoods; ½ dozen in box. Dozen 2.10

Our masks are all well made, not the cheap flimsy kind, and are the best good on the market, send us your order

TINSEL, COSTUME BELLS, CONFETTI, ETC.

CONCRETE MIXERS

LANSING, BRONCHO SPECIAL

The Broncho Special is a popular mixer which can easily be moved about from one job to another. It is a general utility machine and suitable for mixing common concrete, cinder concrete, top dressing or cement or lime mortar. The cost of operation is very small.

The engine and all sprockets and chain are completely housed in steel. With every mixer is included a 2 H. P. engine, steel housing and draw pole.

For Data see Page 367.

Each

No. 5BS Weight each about 1500 lbs ✚$1056 00

LANSING WITH STANDARD WHEELBARROW HOPPER

The compact, sturdy, substantial construction of this mixer insures against its being racked to pieces in long hauls over country roads or city pavements.

All bearings supplied with compression grease cups. Guards over exposed working parts. Trucks finished in black paint, balance of mixer two coats gray. A complete set of necessary tools furnished with each mixer.

For Data see Page 367.

Each

No. 5WSWH—Weight each about 1800 lbs ✚$1545 00

✚F. O. B. Michigan Factory Only.

CONCRETE MIXERS

LANSING, WITH POWER SIDE LOAD AND WATER TANK

This mixer is a great labor and time saver. It nearly doubles the output, as one batch is prepared while the other is mixing. There is no lost time, no waiting, as one batch follows another through the drum in quick succession.

The water tank is of the open type and 11 gallons capacity. It automatically measures the amount of water required for each batch.

The side loader is of the improved pivoted type. Open end skip, 36 in. wide. Skip lifted by double line cable, running over two steel pulleys at top of mixer frame. Skip bale drops back out of way when loading.

The drum is non-tilting type, gear driven and provided with splash rings to prevent spilling. Mixing blades, seven. Discharge buckets, five.

All bearings supplied with compression grease cups. Guards over exposed working parts. Trucks finished in black paint, balance of mixer two coats gray. A complete set of necessary tools furnished with each mixer.

For Data see Page 367.

	Each
No. 5PSL—Weight each about 2000 lbs.....	✣$2115 00

✣F. O. B. Michigan Factory Only.

CONCRETE MIXERS

LANSING, WITH POWER SIDE LOAD AND WATER TANK

This mixer is well balanced and handles a bag of cement at each batch. It is deservedly popular on small and medium sized jobs, where the expense of moving and operating a larger mixer is prohibitive. For convenience of operating, the levers are grouped. One man, without changing his position, readily attends to the charging, discharging and water supply.

The mixer drum is of the non-tilting type, gear driven; cast semi-steel heads joined by heavy boiler plate steel.

Pivoted type discharge chute, No. 10 gauge carbon steel. Discharges 10 to 12 seconds.

Improved pivoted type side loader. Closed end skip, 37 inches wide.

Water tank is positive measuring; capacity 12 gallons.

All bearings supplied with compression cups. Guards over exposed working parts. Trucks finished with black paint, balance of mixer two coats gray. A complete set of necessary tools furnished with each mixer.

For Data see Page 367.

No. 7—Weight each about 3000 lbs.....	✣$2625 00

✣F. O. B. Michigan Factory Only.

The reputation of LANSING CONCRETE MIXERS, STEEL PAVERS, MORTAR MIXTURES and HOISTING OUTFITS is universally known. There are no better made. Our Engineering Department will gladly furnish you with any desired information relative to these Mixers.

CONCRETE MIXERS

LANSING, WITH POWER SIDE LOADER AND WATER TANK

A single cable draw operates the loader. This increases speed of charging, reduces friction and eliminates multiplicity to cable and pulleys.

Pivoted type discharge chute of 10 gauge carbon steel; 10 gauge blue annealed steel batch charging hopper; 10 gauge blue annealed steel side loader, heavily reinforced.

Automatic closed pressure type water tank, 20 gallon capacity; tested under 125 lbs. working pressure.

All bearings supplied with compression grease cups. Guards over exposed working parts. Trucks finished in black paint, balance of mixer two coats gray. A complete set of necessary tools furnished with each mixer.

For Data see Below.

STEEL PAVER

LANSING, ONE-BAG LIGHT WEIGHT

With Distributing Chute.

The 12 foot distributing chute is provided with sectional gates for spreading the concrete over a large area without moving mixer, and has a maximum swing of 180 degrees. The power furnished is greatly in excess of ordinary requirements to insure satisfactory results in climbing hills and working on heavy grades.

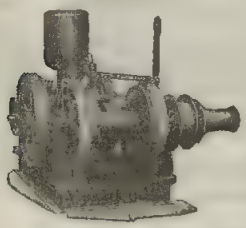
Traction forward and reverse. Cut steel sprockets. Diamond roller steel transmission chain. Gear driven drum. Twenty-gallon pressure tank. All operations—charging, mixing, discharging, spouting and moving under one man's control. Six horse power engine.

Frame 36x47 in.; front wheels 20 in. in diameter; rear wheels 30 in. in diameter. A complete set of necessary tools furnished with each mixer.

	Each
No. 7SP—Weight each about 5900 lbs.	✣$4605 00

HOISTING OUTFITS

LANSING, SINGLE DRUM, SINGLE SPEED REVERSIBLE



Popular size for building construction, car hauling, back filling trenches, etc. Drum can be operated alone in either direction with sheave standing still. Sheave can be operated alone in either direction with drum standing still. Both drum and sheave can be operated together in either direction.

A 4 H. P. engine will lift approximately 1200 lbs. with a single line and block; a 6 H. P. engine about 1600 lbs. For general purposes a 6 H. P. engine is recommended. The load can be practically doubled by using more blocks and decreasing speed to about 55 ft. per minute.

Floor space 32x55 in.; hoisting drum 14x8 in.; hoisting sheave 12 inches in diam.; nigger head 12 in. long by 6 in. in diameter. With 6 horse power engine.

MORTAR AND PLASTER MIXERS

LANSING

Architects, contractors and builders are realizing that hand mixed mortar is a thing of the past. Where economy and quality are important, the mortar mixer has taken the place of the hoe and the old wooden mortar box. The product is improved, improper mixing is avoided and a big percentage of labor cost is saved.

Powerful I. H. C. engine is furnished, with machine cut gears, friction clutch, driving chain, etc. All bearings babbited, insuring a smooth running machine, engine and transmission suitably housed.

The trough is of large capacity so as to provide for plenty of storage space for accumulation of mortar when not being taken out.

The method of mixing mortar is to shovel in three or four shovels of sand at the head of the trough, a shovel of lime slacked off to putty state, and add a little cement. This operation is continued as long as material is called for. The quantity of water can be gauged by the valves on the spray pipe. The proportions of material can of course, be changed to suit any work.

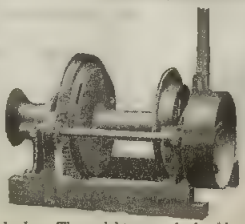
BELT HOISTS

LANSING, NON-REVERSIBLE



For hoisting wheelbarrow loads of brick, mortar and concrete, timbers and other materials.

Drum will run in either direction. Its maximum lifting capacity is 500 lbs. Operated by a belt drive. A 2 or 3 H. P. engine will run it.

Pushing lever forward engages the main drum, throwing it backward applies the brake. The weight on end of cable causes drum to reverse and unwind under brake control.

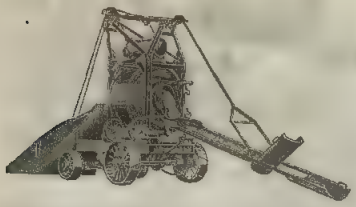
STEEL STREET PAVERS

LANSING



With Loader, Water Tank, Traction, Spout and Gasoline Power.

This Paver is meeting a growing demand for a high grade steel machine of medium weight and capacity. It maintains surprisingly large output and is operated at the highest possible efficiency.

Drum capacity 8 cu. ft. wet concrete per batch, 10 cu. ft. of dry material per batch. Rating 40 to 60 batches per hour. The mixer drum is of the non tilting type, gear driven; cast semi-steel heads joined by heavy boiler plate steel; machine finished tracks; inside dimensions 42x86 inches; speed 16 R. P. M.; drum gear 2½ inch face; drum opening 18 inches, and provided with splash rings to prevent spilling. Mixing blades, nine. Discharge buckets, six.

Water tank positive measuring pressure type 30 inches long, 14 inches diameter; 18 gallons capacity. Tested under 125 lbs. pressure.

All bearings supplied with compression grease cups. Guards over exposed working parts. Trucks finished in black paint, balance of mixer two coats gray.

Main frame 84 inches long by 45 inches wide. Two sides and five cross pieces 6 inch heavy channel steel. One 6 inch cross beam in center. Two upper 5 inch cross beams for trunnion bearings. Upper frame 3x3x¼ inch angle iron with ⅜ and ½ inch gusset plates. Front wheels 20 inches in diameter, 8 inch face; rear wheels 30 inches in diameter, 8 inch face.

Each

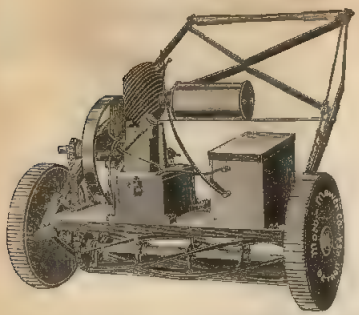
No. 100BR—Capacity 3½ cubic ft.; wt. ea. 65 lbs ... $20 40

Half dozen in a bundle, K. D.

◆F. O. B. Tennessee Factory Only.

MOTO-MOWERS



For use in parks, cemeteries, public grounds and private places where lawn is too large for hand mower. Will do as much work as five men with hand mowers.

Machine is made from best materials throughout and nicely finished and painted. Cutting Reel has 5 crucible steel blades, carefully tempered and hardened. The motive power is furnished by a 1½ H. P. reversible engine, fully guaranteed. There are no gears or clutches on the moto-mower. The power from engine is transmitted direct to cutting reel through chains and sprockets. The friction driven rollers on the ends of the reel-shaft are brought gently into engagement with the flange on the inner sides of the wheels by simply rotating the handle bars. This permits the machine to be started or stopped without shock or jar and allows you to turn to right or left or stop instantly. The Moto-Mower is provided with automatic friction release between the motor and cutting reel.

If a stone, root or other object becomes caught in the machine, this device by automatically slipping, protects the blades against injury or possible breakages.

The Machine cuts as close to trees and other objects, as a hand mower. It can operate on any terrace or hillside on which a man can walk.

FRAME

Width of Cut, 27 inches.
Cut Adjustable, ½ to 3 inches.
Cutting Speed, 2 to 3 mi. per hr.
Cutting Capacity, 5 acres per day.
Climbs, 35 per cent grade.
Color, French grey, gold striping.
Blades, 5, crucible steel.

MOTOR

Single Cylinder, Air Cooled.

Gasoline Consumption per day, About 1 gallon.
Bore, 2½ inches.
Stroke, 2½ inches.
H. P. (A. E. S. rating), 1½.
Speed, 600 to 1200.
Ignition, Battery.

No. W124—24 in. cut, w't each 160 lbs. ....each $300.00
No. W127—27 in. cut, w't each 180 lbs. ....each 360.00

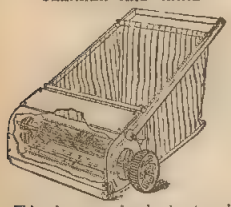
PENNSYLVANIA LAWN CLEANER AND RAKE



This cleaner and rake is strongly built, it has a revolving reel to which is fastened three rakes with short steel wire teeth, an adjustable roller in front for regulating height, a large canvas box for catching leaves and rubbish.

This machine will remove the cut grass, all sorts of leaves, litter and trash, its use has a beneficial result to the lawn as it raises up the low growing crab grass and other spreading weeds, so that the mower will cut them, thus preventing their going to seed. Very easy to operate, and with it one man will do as much work as three men with hand rakes.

"OLDHAM" Patent Safety Oil Lamp.

HOME OFFICE APPROVED TYPE.

The new "Oldham" Oil Safety Lamp has just been introduced, after exhaustive practical colliery tests by Mining Engineers against our own and other makes of single and double glass type oil lamps.

Embodies absolutely new principle of AIR FEED ARRANGEMENT, enabling a tested 2-candle power light to be maintained for 9 to 10 hours continuously WITHOUT EXCESSIVE HEATING.

Specially adapted for ACCURATE GAS TESTING. Contains two full-size inner gauzes. Lamp cannot be fitted together WITHOUT GAUZES.

Inner glasses liable to breakage and smoking up ENTIRELY ELIMINATED.

Special WICK ADJUSTING arrangement. Lamp fitted with either LEAD PLUG or MAGNETIC LOCK.

Embodies maximum features of SAFETY and FREEDOM FROM SHADOWS by reason of inner glasses and supports being dispensed with.

Handled with MINIMUM OF UNSKILLED LABOUR and maintenance costs.

WEIGHT: 3½ lbs.

DIMENSIONS: 11 in. long; 3½ in. diameter.

ADAPTED for use with Mineral, Colza Oil or Spirit.

Complete Lamp Room Equipment for the RAPID, EFFICIENT AND ECONOMICAL handling of large installations, either OIL or ELECTRIC.

For details of "OLDHAM" Patent Electric Safety Lamps see preceding pages.

LAMPE DE SÛRETÉ BREVETÉE "OLDHAM" A HUILE (PÉTROLE)

Modèle approuvé par le Ministère de l'Intérieur.

THE "OLDHAM" PATENT GRAVITY INCLINE BRAKE PULLEY.

As supplied to more than 400 BRITISH Colliery Firms alone. In use in ALL MINING COUNTRIES. Extremely powerful brake; can be applied in an EASY AND GRADUAL MANNER and enables tubs to be stopped at any time in any part of the incline without shock or liability to derailment.

NO FRAME necessary, only one prop required for fixing.
Suitable for CHAIN or FLEXIBLE WIRE ROPE.
PORTABLE. CERTAIN IN ACTION.
Made in VARIOUS SIZES from 12 in. up to 54 in. diameter at bottom of groove. 12 in. pulley will handle a gross load of about ONE TON on a gradient of ONE IN THREE. LARGER SIZES IN PROPORTION.

POULIE FREIN À POUR PLANS INCLINÉS (BREVET "OLDHAM").

Cette poulie à été fournie à plus de 400 Cies. de Mines de Charbon britanniques. Elle est en usage dans
C'est un frein extrêmement puissant dont la mise en action est aisée et graduelle. Il
à n'importe quel moment et sur n'importe quel point de la déclivité sans choc
ou
Aucun cadre n'est nécessaire à l'exception d'un pilier rigid pour le fixage
Convient également bien pour chaînes ou câbles flexibles. Portatif et d'une grande efficacité
Se fait en plusieurs grandeurs depuis 30 cm. jusqu'à 1,30 m. de diamètre au fond de la rainure de la poulie
Une poulie de 30 cm. peut servir pour une charge brut de une tonne environ sur une pente de 1 sur 3 de déclivité.

POLEA DE FRENO "OLDHAM" PARA PLANOS INCLINADOS PATENTADO.

Esta polea está en uso en 400 minas de carbón Británicas, y actualmente se emplea en todos
países mineros. Constituye un freno muy fuerte: se puede apretar de una manera suave y permite parar
los cubos á cualquier momento y en cualquier parte del plano inclinado sin ningún choque, y sin
exponerlos á la posibilidad de descarrilamiento.
No hay necesidad de armadura sino de un poste solamente
Adecuado para cadena ó cuerda de alambre flexible. Portátil: acción positiva
Fabricado en varios tamaños desde 30 cm. hasta 1,30 m. de diámetro al fondo de
Mediante una polea de 30 cm. se puede manejar un peso bruto de una tonelada m.ó.m. sobre un
de 1 en 3. Tamaños mayores en proporción.

One in a wood box.

GRINDER PASTE

This is a special compound that gives better results in sharpening the knives than any known substance. For use on Stewart grinding machine disc, in grinding blades for horse and sheep shearing machines.

Each

No. 25GP—In ½ pint tin cans $0 40 90
Packed loose; weight each about 1 lb.

TALKING MACHINES

MANAPHONES

The Manaphone is designed to meet the demands of the most discriminative purchasers; a talking machine whose superior tone quality will instantly appeal to the ears of the most critical listeners possessing educated musical tastes.

It is manufactured by the same factory and the same skilled artisans who for 68 years have been makers of world famous Clough & Warren pianos. It was designed by experts having a knowledge of the finest principles of acoustics, resulting in a machine which, for beauty and fidelity of tone production is rivaled only by nature itself.

The Manophone is a finished article, an ornament to the most richly furnished homes. It is built by master workmen, educated to turn out only a first-class product. Plays all makes of records (without an extra attachment), with a pleasing interpretation heretofore unequaled.

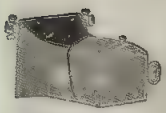
Packed loose; weight each about 1 ½ lbs.

AUTOMOBILE RAINCOATS OR COIL BOX PROTECTORS

CRAWFORD



For Ford Cars.

Made of enamel drill; designed to fit all models of Ford cars. Protects coil box from rain or snow. When not in use can be rolled up and held firmly under the windshield making it always ready for use.

	Each
No. A-510—Weight each ½ lb.	$1 35

One in a paper package.

COIL UNITS

K-W, FOR FORD CARS

Baked in a temperature of 250 degrees. At the end of that time a vacuum process removes all moisture from insulation. A special solution is then forced into the coil insulation, which insures against possibility of moisture, short circuits or breaking down of insulation.

Height 5 in.; width 3¼ in.; depth 2¼ in.

No.	A-104FU
Less than 50, Each	$4 95
50 or more, Each	4 65

Packed loose; weight each 2 lbs.

COIL CONTACT POINTS AND SPRINGS

TUNGSTEN POINTS, K-W, FOR FORD CARS

For K-W Vibrators.

Made of best quality blue steel and brass.

	Per Pair
No. A-73PS—Weight per pair ½ oz.	$0 42

One pair in an envelope.

K-W SPARKITE, FOR FORD CARS
For K-W Coil Units.

Sparkite points are larger than other points and of solid metal. Sparks at lower cranking speeds. Produces a hotter spark at any speed. Give long life and higher efficiency.

	Per Pair
No. A-1KWSC Weight per pair 1 oz.	$0 69

One pair in a sealed envelope.

SPARK PLUGS

All ½ inch plugs shown on this page are standard thread; all ⅞ inch 18 thread A. L. A. M.

CHAMPION "X" FOR FORD CARS

Adopted by the Ford Motor Co. as standard equipment on Ford cars since 1911.

No.	A-A15-X
Size, inches	½
Less than 100, Each	$1 50
100 or more, Each	1 38

One in a cardboard box; wt. each 4 ozs.

CHAMPION

For Studebaker cars made previous to 1920 models, and trucks, tractors, farm and stationary engines.

No.	A-A13

One in a cardboard box; weight each 9 ozs.

SPARK PLUG AND MAGNETO FILES

Best grade steel, finely milled; adapted for filing and cleaning platinum points. The chisel point permits opening contact points without disturbing adjustments.

Per Dozen

No. A-18PF—Length of cut 4½ in.; width ⅛ in; thickness 1/32 in.; shank ⅛ in. in diameter; length over all 6¼ inches $3 30

One dozen in a cardboard box; weight per dozen ½ lb.

SPARK PLUG CLEANERS

CHAMPION

It consists of a specially hardened glass tube, 5 inches long, with bushing at the open end into which the spark plug is to be screwed. Inside are fifty hardened steel needles that strike the points and inner surface of the plug and pick off the carbon.

Directions—Fill the tube about half full of gasoline, screw in the spark plug and shake vigorously for about a minute. The steel needles quickly removes the carbon and the gasoline dissolves the oil deposit, leaving the plugs clean, fresh, and good as new.

No.	A-100CC
In lots of less than 10, Each	$1 65
In lots of 10 to 100 Each	1 47
In lots of 100 and over, Each	1 35

One in a wood box; wt. each about 4 ozs.

Note—Spark Plug Cleaner Merchandise Case given free to dealer with an order for 10 cleaners. Cleaners shipped from stock, case from factory F. O. B. Toledo, Ohio.

LANTERNS

All Lanterns are made from Heavy Tin Plate, Heavily retinned and have special Globe Lift, Baked Globe Guards and Extra Heavy Rising Cone Tinned burners. All Lanterns have extra large oil hole with brass screw cap set at such an angle that the lantern can be easily filled without removing the globe. The large tinned bail is made to remain upright when desired.

Lanterns burn a clean and exceedingly white light. The flame is white to the very feather edge, and entirely free from smoke. All Lanterns can be filled without removing globe.

SUPREME

These lanterns have a new globe-holding device which permits of some variation in the height of the globe, and at the same time makes unnecessary the use of a spring in the top. The guard, the lift, and the reinforced bottom are exclusive features.

Large fount, burns 30 hours, extra heavy rising cone tinned burner, 1 in. wick, No. 616 selected crystal globe, height 14 in.

BRIGHT TIN, Retinned.

No. R162—Full half dozen case, per dozen $25.20

Bright Tin, Entirely RED ENAMELED, Baked on.

No. R163—Full half dozen case, per dozen $27.20

POLISHED BRASS, Fount and Top Cap, Heavy Steel Wire Grooved Under Bottom Edge.

No. R165—Full half dozen case, per dozen $40 80

No. 165—Less than case, per dozen $40 80

HALF DOZEN IN A CASE WT PER DOZEN 50 LBS.

MAMMOTH COLD BLAST

This lantern is truly the farmer's friend. The large fount and the perfect clean light, makes it require but little care, for which reason it is so popular, especially for a barn lantern.

Mammoth size, tin fount, full weight IX-AAA charcoal plate, heavily retinned, burns forty hours, No. 2 one inch wick, No. 2 selected crystal cold blast globe, No. 616, w't per doz. 44 lbs.

No. R192—Full half dozen case, per dozen $27.70

COLD BLAST

Large size fount, burns 30 hours, extra heavy rising cone tinned burner, 1 in. wick, No. 2 selected crystal cold blast globe No. 611.

Tin, fount, full weight IX-AAA charcoal plate, heavily retinned, w't per doz. 40 lbs.

No. R2—Full dozen case, per dozen $25.20

JUNIOR SUPREME

A handy lantern of the Cold Blast Type, compact and light weight. Gives twice as much light as the ordinary lantern of No. 0 Tubular Type although using the same size wick. Burns 18 hours. Equipped with No. 618 globe and No. 0 ⅞-inch wick.

No. R161—Per dozen $18.90

ONE DOZEN IN A BOX
WE DO NOT BREAK BOX

TUBULAR

Fount holds kerosene to burn eighteen hours, extra size funnel shape filler cap and screw, heavy steel burner, ⅞ in. wick, brass bound globe lift between tubes, substantial globe guard, tubular globe.

With crystal globe No. 600, heavily retinned, w't per doz. 30 lbs.

These lanterns are used by railroad companies and contracting companies

No. R242—Full dozen case, to signal danger. per dozen $15.70

No. R242½—Full half dozen case, per dozen $15.90

ONE DOZEN AND HALF DOZEN IN A CASE

ORDINANCE

This lantern is made to meet the requirements of various state and city laws. Throws a strong, white light forward, and the rear signal is visible many hundred feet from the rear. This lantern is a necessary road protection against speeding automobiles. The flat steel holder is made extra strong and with a very long tongue so that the lantern cannot jar off. It is the modern road lantern.

RED ENAMELED, height 12¼ in., corrugated bright tin reflector 2½ in., ruby lens rear signal, steel burner with ⅞ in. wick, bull's eye mounted on globe plate, crystal "Bantie" cold blast globe No. 610, extra strong steel side holder, w't per doz. 38 lbs.

No. R104—Full half dozen case, per dozen $37.20

No. 104—Less than case, per dozen $37.20

LANTERNS

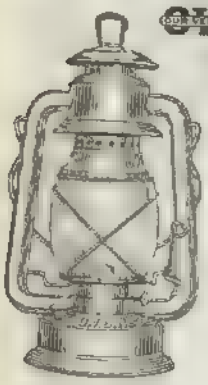
All Lanterns are made from Heavy Tin Plate, Heavily retinned and have special Globe Lift, Baked Globe Guards and Extra Heavy Rising Cone Tinned burners. All Lanterns have extra large oil hole with brass screw cap set at such an angle that the lantern can be easily filled without removing the globe. The large tinned bail is made to remain upright when desired.

Lanterns burn a clean and exceedingly white light. The flame is white to the very feather edge, and entirely free from smoke. All Lanterns can be filled without removing globe.



SUPREME

These lanterns have a new globe-holding device which permits of some variation in the height of the globe, and at the same time makes unnecessary the use of a spring in the top. The guard, the lift, and the reinforced bottom are exclusive features.

Large fount, burns 30 hours, extra heavy rising cone tinned burner, 1 in. wick, No. 616 selected crystal globe, height 14 in.

BRIGHT TIN, Retinned.

Fenders—8×13 in.
Stirrup Leathers—1¾ in.
Latigos—1 in. to tie.
Stirrups—4 in., Texas bolt.
Cinchas—16 strand Texas cotton.
No. R766H—Double cinch, w't about 12 lbs. .....each $53.00

No. 165H, Western Style.

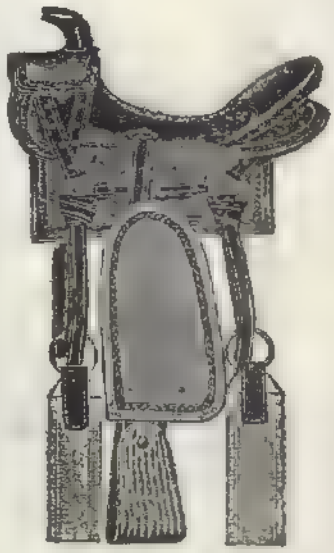
Tree—14½ in., steel fork.
Skirts—Felt lined, 10×20½ in.
Seat—Full, jockeys sewed on.
Fenders—7×14 in.
Stirrup Leathers—1¾ in.
Latigos—1¾ in., to tie.
Stirrups—California block 2 in. bottoms.
Cinchas—15 strand Texas cotton.

No. R165H—Double cinch, w't about 14 lbs. .....each $44.50

No. 167H Horn, Morgan.

Tree—14 in., Morgan.
Skirts—10½×22½ in., felt lined.
Seat—Full, jockeys and seat in one piece.
Fenders—6½×12 in.
Stirrup Leathers—1¾ in.
Latigos—1¾ in., to tie.
Stirrups—4 in., Texas bolt.
Cinchas—15 strand Texas cotton.

No. R167H—Dobue cinch, w't about 12 lbs. .....each $44.50



No. 168H Horn, Morgan.

Tree—Morgan, hide covered, 14 in.
Seat—Full.
Stirrup Leathers—1 in.
Tie Straps—1 in.
Cinchas—3 in., cotton back band.
Stirrups—4 in., Texas bolt.

No. R168H—Double cinch, w't about 10 lbs. .....each $29.00

RIDING SADDLES

No. 151H California style, nickel horn.

Tree—Nickel horn, hide covered, 14½ in., steel fork.
Skirts—Wool lined, 12x23 in.
Seat—Full, jockeys, seat and cantle in one piece.
Fenders—7½x15 in.
Stirrup Leathers—2 in.
Latigos—Long 1½ in., short 1¼ in.
Stirrups—Ox bow, 1½ in. bottoms.
Cinchas—20 strand Texas cotton, with buckle tongues.

No. R151H—Double cinch, w't about 21 lbs. .....each $80.00

No. 152H, Western styles.

Tree—Improved "Steinway," hide covered, 14½ in., steel fork.
Skirts—Felt lined, 11½x22½ in.
Seat—Full, jockeys, seat and cantle in one piece.
Fenders—7x14½ in.
Stirrup Leathers—2 in.
Latigos—Long 1½ in., short 1¼ in.
Stirrups—California block, 2½ in. bottoms.
Cinchas—18 strand Texas cotton, with buckle tongues.

No. R152H—Double cinch, w't about 18 lbs. .....each $62.00

No. 155H, Western Style.

Tree—14½ in., steel fork.
Skirts—11½x22½ in., unlined.
Seat—Full, jockeys, seat and cantle in one piece.
Fenders—8½x16 in.
Stirrup Leathers—2 in.
Latigos—Long 1½ in., short 1¼ in.
Stirrups—Ox bow, 1½ in. bottoms.
Cinchas—20 strand Texas cotton.

No. R155H—Double cinch, w't about 20 lbs. .....each $56.00

Western style.

Tree—14½ in., Improved Comanche, steel fork, hide covered.
Skirts—Full lined, 22½ in.
Seat—Full, seat, jockeys and cantle in one piece.
Cantle—Roll stitched.
Fenders—14½x7 in.
Stirrup Leathers—2 in., to lace, lined at points.
Rigging—1½ in. front, 1½ in. back, 1 in. connecting straps.
Latigos—1½ in. short, 1½ in. long.
Stirrups—California block, 2½ in.
Cinchas—18 strand Texas cotton with buckle tongues.

No. R950H—Double cinchas, w't 15 lbs. .....each $62.00

No. 154H, Western style.

Tree—Improved "Steinway," hide covered, 14½ in., steel fork.
Skirts—Felt lined, 12x23½ in.
Seat—Full, jockeys, seat and cantle in one piece.
Fenders—7x14 in.
Stirrup Leathers—1½ in.
Latigos—1½ in., to tie.
Stirrups—California block, 2½ in. bottoms.
Cinchas—15 strand Texas cotton.

No. R154H—Double cinch, w't about 17 lbs. .....each $70.00

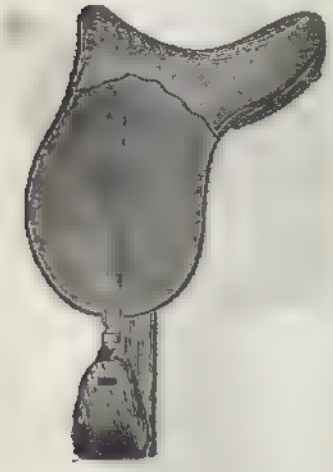
No. 159H, Western style.

Tree—14½ in., steel fork.
Skirts—11½x21½ in. felt lined.
Seat—Full, jockeys, seat and cantle in one piece.
Fenders—8½x16 in.
Stirrup Leathers—2 in.
Latigos—1½ in., to tie.
Stirrups—Ox bow, 1½ in. bottoms.
Cinchas—20 strand Texas cotton.

No. R159H—Double cinch, w't about 19 lbs. .....each $54.00

RIDING SADDLES AND BRIDLES

MEN'S SADDLES



Kentucky stitch down.

Tree—Kentucky stitch down, 16 in.
Skirts—Hog skin, impression.
Seating—Calf skin, silk stitched, hand raised.
Pad—Sheep skin and osnaburg.
Stirrup Leathers—1 in.
Girth—Corded, buckle.
Stirrups—4 in. wood.

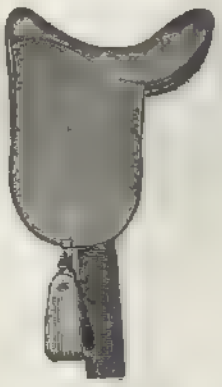
No. 323H—W't 17 lbs. ..each $33.00

Somerset, fair leather.

Tree—15½ in., Somerset.
Skirts—Hog skin impression.
Seating—Kip.
Pad—Enamel cloth.
Stirrup Leathers—⅞ in.
Girth—Fancy cotton, buckle.
Stirrups—2½ in., wood.

No. 368H—W't 7½ lbs. ...each $17.70

MEN'S SADDLES



No. 370H, Somerset fair leather.

Tree—15½ in., Somerset.
Skirts—Hog skin impression.
Seating—Kip.
Pad—Enamel cloth.
Stirrup Leathers—⅞ in.
Girth—Fancy cotton, buckle.
Stirrups—2½ in., wood.

No. 370H—W't 7½ lbs. ...each $13.70

BOYS'

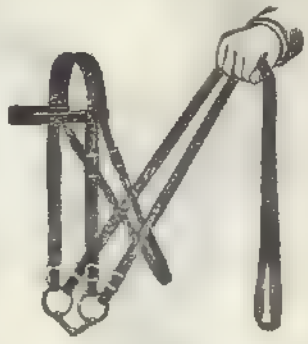
No. 374H, Somerset.

Tree—Somerset, 13½ in.
Seating—Kip.
Pad—Sheep skin, osnaburg lined.
Stirrup Leathers—⅞ in.
Girth—Cotton.
Stirrups—Wood.

No. 374H—W't 6½ lbs. ...each $13.70

All of our Saddles are made by skilled workmen from select stock and are correct in design and finely finished. Send us your mail orders and be convinced that we are offering the best Saddles on the market for the money.

RIDING BRIDLES



CX plate trimmed, flat, solid crown with bit.

No. 202R—¾ in., russet, per dozen $46.00

Russet leather XC trimmed, double head stall, 5 foot quirt reins to buckle, with bit.

No. 220R—¾ in. ....per dozen $60.00
No. 221R—⅞ in. ....per dozen 67.00
No. 222R—1 in. ....per dozen 75.00

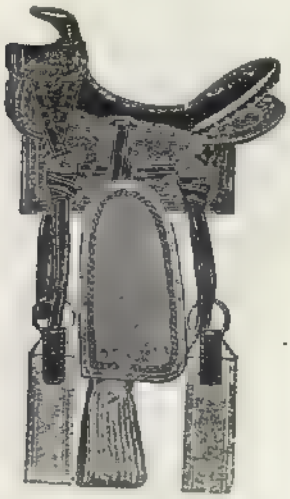
RIDING SADDLES

BOYS'

No. 175H Horn, Morgan.

Tree—Morgan, hide covered, 13 in.
Seat—Half.
Stirrup Leathers—1 in.
Tie Straps—1 in.
Stirrups—3 in., wood.
Girths—3 in., cotton back band.

No. R175H—Double cinch, w't about 9 lbs. .....each $22.00

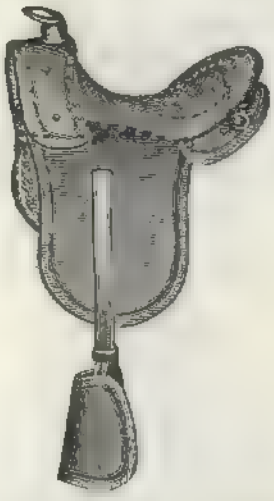


No. 195H Horn, Morgan.

Tree—Morgan, 12 in.
Seat—Full.
Stirrup Leathers—¾ in.
Tie Straps—¾ in.
Stirrups—Wood.
Girths—3 in., cotton back band.

No. R195H—W't about 8½ lbs., each $23.30

BOYS' OR GIRLS'

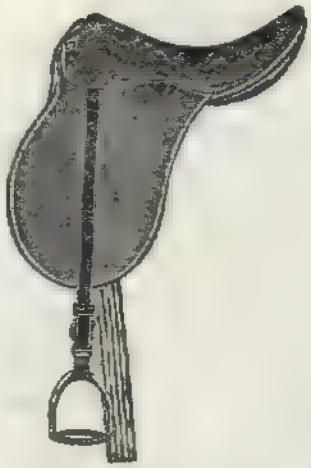


No. 199H, Boys' or Girls'.

Tree—11 in., Morgan.
Seat—Full, calfskin quilted.
Cantle—Bound.
Stirrup Leathers—⅝ in.
Billets—1 in.
Girth—Corded ring.
Stirrups—2¼ in., wood, hooded.

No. R199H—W't 6¾ lbs. ..each $23.70

MEN'S



English Cut Back.

Tree—15½ in., English cut back.
Skirts—Hog skin impression.
Seating—Plain pig skin.
Pad—Sheep skin and heavy linen.
Stirrup Leathers—1 in.
Girth—Corded, buckle.
Stirrups—Iron.

No. R352H—W't 10½ lbs., each $34.00

MEN'S

No. 214H, McClellan, Black Leather.

Tree—McClellan, with brasses and mantle straps, 14 in.
Seat—Perforated.
Stirrup Leathers—1 in.
Tie Straps—1 in.
Girth—Corded, ring, to tie.
Stirrups—3 in., wood, with boots.

No. R214H—W't 9 lbs. ..each $33.00

Carry a line of where the better goods upon which you can rely.

The dealer who carries H. S. B. & Co. Brands marks his store as a place goods are sold.

A house with over sixty-seven years' experience stands back of our brands.

J. SAMUEL WHITE & CO., Ltd., EAST COWES, ISLE OF WIGHT, ENGLAND.

SHIPBUILDERS AND ENGINEERS,

40 ft. MOTOR PILOT LAUNCH.

HULL.

DIMENSIONS:
Length, b.p. 40' 0"
Breadth, o.p. 8' 8"
Depth, moulded, 4' 9½"

SPEED: 8 knots.

CONSTRUCTED of two thicknesses of teak, with Canadian elm timbers; bottom coppered. Decked all over and divided into three watertight compartments. Cabin forward and cabin and cockpit aft.

For Coasting or Sea Work; also suitable as a Port Tender to Steamships, etc.

Code Word: "PILOT."

Strongly constructed for the heavy and continuous work, in all weathers, of going alongside vessels to put pilot aboard, also for towing pilot's rowing cutters.

MACHINERY.

Marine type petroleum motor, of 50 b.h.p. at 600 revolutions, complete with reverse gear, gunmetal propeller, naval brass propeller shaft, galvanized steel fuel and water tanks, all usual accessories and spare gear.

CHALOUPE AUTOMOBILE pour PILOTAGE de 12m 19.

Très adaptée pour Cabotages ou Voyages sur Mer, ainsi que pour servir de Patache de Port aux Grands Paquebots, etc.

De Construction très robuste spécialement étudiée pour Travaux durs et continuels par tous les temps, pour s'approcher des Vaisseaux afin de mettre à bord le Pilote.

Code Télégraphique: "PILOT."

COQUE. Dimensions:

Longueur entre PP.	12m.19
Largeur au fort	2m.65
Creux sur Quille	1m 46
Vitesse	8 *nœuds*

La Coque est construite en deux épaisseurs de Teck, avec Membrures en Ormeau fond doublé en cuivre. Le tout est ponté et divisé en trois compartiments étanches. Cabine en avant et fosse en arrière.

MACHINE. Moteur de Type Marin à Pétrole, de 50 Chev. Fr. et 600 tours par min., complet avec Appareil de Renversement, Hélice en Bronze, Arbre Extérieur en Bronze Naval, et tous les Accessoires et Pièce de Rechange ordinaires.

Моторная пилотная лодка въ 40 фт.

Для береговой или морской службы. Можетъ служить портовымъ баркасомъ для пароходовъ и т.д.

Прочной конструкціи для тяжелой и постоянной службы во всякую погоду бортъ съ бортомъ судовъ для доставки лоцмановъ.

Кодовое слово: «PILOT».

Корпусъ. Размѣры.

Длина между перпендикулярами	12.19 мт.
Ширина наибольшая	2.65 мт.
Глубина интрюма	1.46 мт.
Скорость 8 узловъ.	

Построенъ изъ тикового дерева и вязника двойной толщины. Дно обшито мѣдью. Весь покрытъ палубой и состоитъ изъ трехъ водонепроницаемыхъ отдѣленій. Каюта на носу; кокпитъ на кормѣ.

Машины. Керосиновый двигатель морского типа въ 50 лош. силъ при 600 оборотахъ, полностью съ приводомъ заднаго хода. Бронзовый винтъ; бронзовый ведущій валъ. Всѣ обыкновенныя принадлежности и запасной приводъ.

J. SAMUEL WHITE & CO., Ltd., EAST COWES, ISLE OF WIGHT, ENGLAND.

SHIPBUILDERS AND ENGINEERS.

93½ ft. MOTOR PASSENGER AND CARGO LAUNCH.

HULL.

DIMENSIONS:

Length on w.l.	93′ 6″
Breadth	16′ 0″
Depth	7′ 6″
Draught (loaded)	4 6″

SPEED, 10½ Knots.

CONSTRUCTED of galvanized steel, having good sheer with plenty of flare forward and generally similar to illustration.

ACCOMMODATION. — Saloon accommodation for first-class passengers and officers, containing w.c. and pantry, fitted on port and starboard sides respectively, panelled inside with polished teak and highly finished. Cabins provided for Engineers, &c., and suitable space for the crew.

For Mail and Passenger Service in South-West Africa.

Code Word: "MANATEE."

The vessel, as illustrated, was delivered under her own power to Akassa, West Africa, a distance of over 4,000 miles.

MACHINERY.

PROPELLING MACHINERY:

Two sets of 76-B.H.P. motors, driving twin screws, at about 265 revolutions per minute.

SHAFTING.—All of best forged steel.

BILGE PUMP. — A solid gunmetal pump of the plunger type, driven by a 3-H.P. engine, and capable of discharging about 3,000 gallons per hour.

ELECTRIC LIGHT ENGINE AND DYNAMO. A 3-B.H.P. Paraffin Engine and direct current Dynamo, capable of supplying current at 25 volts for "Osram" Lamps of a total candle power of not less than 800.

Chaloupe Automobile de 28m50 pour Marchandises et Passagers.

Code Télégraphique: "MANATEE."

COQUE.

Dimensions:

Longueur entre PP. 28m.50 *Creux sur Quille* ... 2m.29
Largeur au fort ... 4m.88 *Tirant d'Eau (chargée)* 1m.37

Vitesse, 10½ *nœuds.*

Pour le Service Postal et des Passagers en Afrique Sud-Occidentale. La Coque est en Acier galvanisé, généralement construite comme l'indique la Fig. ci-dessus. Aménagements pour Passagers de 1ère Classe et Officiers.

MACHINES.

Deux Series de Moteurs de 76 Chev. Fr., actionnant sur double Hélices faisant 265 tours par min. Un Moteur à Essence de 3 Chev. Fr. est accouplé à une Dynamo à C.C. de 25 Volts. Une Pompe de Cale avec Moteur de 3 Chev. d'un débit de 14 tonnes à l'heure.

La Chaloupe illustrée ci-dessus a été livrée à Akassa, Afrique Occidentale où elle a naviguée seule, parcourant une distance de plus de 4000 milles marins.

Моторныя, грузовыя и пассажирскія суда въ 28.50 мт.

Кодовое слово: «MANATEE».

Діам.: -
Лина, 28.50 мт. Глубина, 2.29 мт.
Ширина, 4.88 мт.
Осадка въ нагруженномъ состояніи, 1.37 мт.
Скорость, 10½ узла.

Для почтоваго и пассажирскаго сообщеній въ Юго-Западной Африкѣ.

Корпусъ изъ оцинкованной стали построенъ въ общемъ соотвѣтственно иллюстраціи. Салонное помѣщеніе для офицеровъ и пассажировъ перваго класса.

МАШИНЫ.

Два комплекта двигателей въ 76 лош. силъ управляютъ двухъ лопастными винтами при 265 оборотахъ. Керосиновый двигатель въ 3 лош. силы управляетъ динамо постояннаго тока въ 25 вольтъ. Осушительный насосъ въ 3 лош. силы выпускаетъ 3,000 галлоновъ въ часъ.

Судно показанное на иллюстраціи выше, было доставлено собственными средствами въ Акасса въ Западной Африкѣ, продѣлавъ для этого разстояніе, приблизительно, въ 4,000 узловъ.

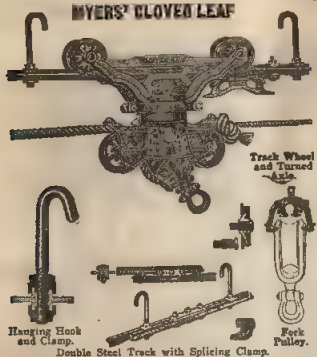
Независимый Бронзовые конденсаторъ.

Независимый центробѣжный циркуляціонный насосъ а также донка.

Валы ковкой стали. Бронзовые винты.

HAY CARRIERS

MYERS' CLOVER LEAF



Double Steel Track with Splicing Clamp.

This combination machine (both swivel and reversible) can be reversed by drawing the rope through from end to end or by turning the swivel.

It is constructed with flanged wheels revolving on ⅝ in. turned steel bearings. The lock is composed of three parts and has no springs. The carrier has a large, flaring mouth to receive the fork pulley. The pulley can swing backward or forward without becoming detached. This swinging fork pulley is a decided advantage when used for filling a mow above beams, as it relieves all side strain from car.

No. N114—Hay Carriers, for double steel track, malleable iron, aluminum finish, ⅝ in. turned steel axles, swivel and reversible, possible force lock, no springs, w't 27 lbs., each $12.75

Nos. T6446 and 64412—Double Steel Track, with splicing clamps, lengths 6 and 12 ft., w't per foot 2 lbs., per foot $0.35

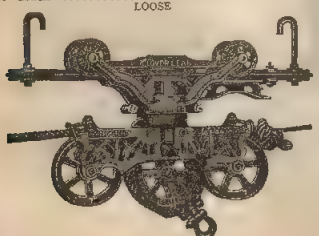
No. 302—Hanging Hooks, 6 in. measured after bending, with clamps, w't per doz. 8 lbs. ..... per dozen $2 50

No. 824—Extra Slicing Clamps, w't per doz. 14 lbs., per dozen $3.60

No. 1046—End Stops, for **double** steel track, per dozen $1.90

No. 1085—End Stops, for **single** steel track, per dozen $1.20

LOOSE



No. N124—7 in. sheaves, with 1 7/16 in. steel bearings with groove suitable for carrying wire cable or ⅝ in. Manila or Sisal draft rope, w't 37 lbs., otherwise same as No. 114, each $16.75

LOOSE

Showing No. 20 Track

No. 45 Rafter Bracket.

No. 25. Hanging Hook.

No. N4—Hay Carriers, for double angle steel track, malleable iron, painted red with two coats of baking enamel, turned iron bushings, swivel and reversible, open bell, for fork or sling, w't 24 lbs. ..... each $11.30

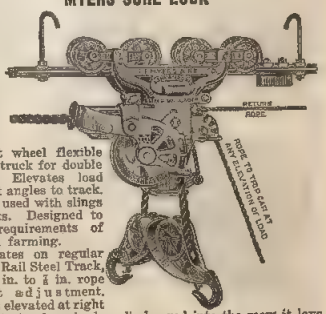
No. A20—Steel track, lengths of 6 and 12 ft., w't per foot 2 lbs. $0.35

No. 25—Hanging hooks, 5½ in., w't per doz. 4½ lbs., per dozen $2.40

No. 45—Rafter brackets, steel, w't per doz. 2½ lbs., per dozen $1.15

LOOSE

MYERS SURE LOCK



Eight wheel flexible engine truck for double track. Elevates load at right angles to track. Can be used with slings or forks. Designed to meet requirements of modern farming.

Operates on regular Double Rail Steel Track, uses ⅜ in. to ⅝ in. rope without adjustment. Load is elevated at right angles to track and when discharged into the mow it lays parallel with the load on the wagon requiring less labor in distributing hay over mow. Operates automatically, tripped by sling pulleys striking plate immediately under machine; also arranged with separate trip rope which allows load to be carried into mow at any elevation desired.

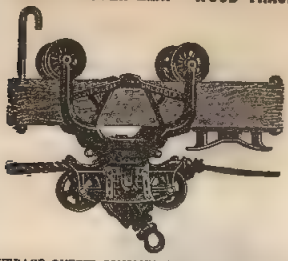
Construction—A long heavy wheel-base, truck with eight large truck wheels mounted on turned steel axles. Rope wheel 7 in. diam., fitted with 1 7/16 in. machined steel bearing. Rope lock arranged so that pressure on rope is proportional to weight of load, by which it is controlled. Rope lock so powerful that smooth faced rope jaws only are necesary, eliminating all wear on rope.

No. N40—Myers Sure Lock sling unloader, rope draft for double steel track ..... each $24.00

LOOSE

HAY CARRIERS

MYERS' CLOVER LEAF—WOOD TRACK



AN AVERAGE OUTFIT CONSISTS OF ONE CARRIER, TWELVE HANGING HOOKS, TWELVE RAFTER BRACKETS, FIVE PASS KNOT PULLEYS AND TWO FLOOR HOOKS

This carrier is identical in construction throughout with the steel track carrier, with the exception of the size of track. It is adapted for 4x4 in. wood track.

No. N120—Hay Carriers, malleable iron, aluminum finish, ⅜ in. turned steel axles, swivel and reversible, positive force lock, no spring, w't 32 lbs. ..... each $12.75

No. 267—Hanging Hooks, ¼x10 **in.,** measured after bending, w't per doz. 9 lbs. ..... per dozen $1.90

No. 268—Hanging Hooks, ¼x14 **in.,** measured after bending, w't per doz. 12 lbs. ..... per dozen $2.25

No. 301—Malleable Rafter Brackets, w't per doz. 3 lbs., per dozen $1.15

Directions for Making Wood Track.

The track may be hardwood or pine scantling, 4x4, dressed to about 3½ in. width. If not convenient to get this size for the full length, 4x2 or 4x5 may be used by nailing a piece on where the stop is placed, so as to fit the carrier and operate the lock properly. The pulley used to pull the carrier back in mow should be directly under and in line with the track. Always put an extra hook over the load near the stop.

All Myers hay carriers are made of malleable iron throughout. They are constructed with flanged wheels revolving on ⅜ in. turned steel bearings. The carriers have a large flaring mouth to receive the fork pulley when approaching from any direction. The swinging fork pulley is a decided advantage in drawing hay into a well filled mow or over a beam.

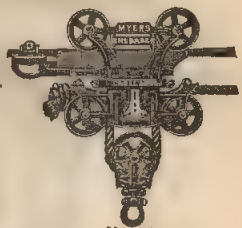
The locking device is composed of three pieces and is so arranged as to grasp the fork on both sides of the frame.

LOOSE

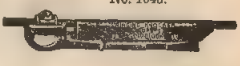
MYER'S CABLE OR ROD

No. 431.
Single Cable Clamp.

No. 432.
Double Cable Clamp.



No. 1043.



The knocker is one of the special features of this machine. It is so arranged that it swings loose on the track, and stands immediately under the cable, under any and all circumstances. It is held to the cable by means of a steel sleeve through which the cable passes. The sleeve is attached to the knocker by means of two bolts, and can be removed at any time without taking down the cable. The knocker is located at any desired point on the cable by means of an ordinary cable clamp.

AN AVERAGE OUTFIT CONSISTS OF ONE CABLE CARRIER, ONE HAY FORK, 150 FT. ½ IN. GALVANIZED CABLE, TWO SINGLE CABLE CLAMPS, TWO DOUBLE CABLE CLAMPS, TWO ⅝x20 IN CARRIAGE BOLTS FOR SECURING POLES TOGETHER, 150 FT. ¾ IN. MANILA ROPE, TWO PULLEYS AND FOUR POLES 4x4 IN. x 30 FT. LONG

No. N165—Hay Carriers, for cable or rod track, malleable iron, aluminum finish, with ⅜ in. turned steel axles, double lock, w't 31 lbs. ..... each $12.75

No. 431—Single cable clamps, 2 pieces, bolted, easily removed, w't per doz. 9 lbs. ..... per dozen $5.40

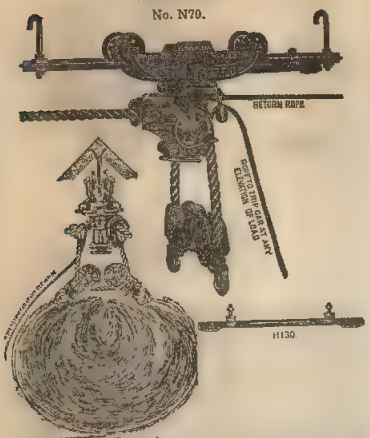
K. hay carrier, No. 19 for Haymaker, Imperial, and Myers' old style single rail hay carriers, No. 276 for Myers' new style hay carriers, double and single steel track, and No. 69 for Porter's Meadow King hay carriers.

All Nos. ..... each $0.75

MYERS' HAY CARRIERS

MYERS' RIGHT ANGLE FORK AND SLING ELEVATORS

No. N70.



In Operation.

Machine so arranged it elevates load at right angles with track, with the result that when load is discharged in mow it lies parallel with load on wagon, a feature not accomplished by sling carriers, unless they use special right angle pulleys which add one-half horse power to the draft.

If operator overloads carrier, rope slips through the lock, causing it to wear. This has been overcome on the right angle fork and sling elevator, as it is so arranged that tension of rope is regulated entirely by weight of load. The result is that it is impossible for rope to slip through lock, hence no chafing of the rope. Lock adjusts itself to any size rope, ¼ to 1 inch.

The right angle fork and sling elevator operates automatically and is tripped by the sling pulley striking a plate immediately under the carrier. It is also arranged with a separate trip rope, by the use of which the load may be carried into the mow at any elevation desired without drawing entirely to the top of the barn.

Many farmers prefer to use two forks, one attached to each pulley.

With Two Sure Grip Pulley Blocks, ¾ in. Turned Steel Bearing, Double or Triple Hoist.

No. N70—Sling Carriers, for double steel track, annealed malleable iron, improved rope lock and locking device, balance lock, w't 52 lbs. .....each $24.00

No. 130H—Knocker for No. N70 Sling Carriers, each $1.50

No. A844—Double Steel Track, with joint clamps, in lengths 6 or 12 ft., w't per ft 2¼ lbs.....per ft. $0.35

No. 824—Extra Joint Clamps, w't per doz. 14 lbs., per dozen $3.60

No. N1139—Triple Hoist Pulleys, for No. N70 Carriers, w't 60 lbs. .....per dozen $9.00

LOOSE

MYERS' CROSS DRAFT

The draft rope running direct from the carrier to the floor permits the use of a much shorter draft rope and less walking for the horse than is the case with the other style of sling carriers. The carrier is so constructed that a knocker or stop block is not required. Large rope sheave carrying the rope revolves on large steel axle. Extra heavy and long truck distributes the load over a greater portion of the track. The truck is adjustable in width. Can be used on any make of steel track except the Hunt, Helm & Ferris Co.

No. N60—For use on No. 844 double steel track, entire weight of load bears on locking device, therefore the heavier the load the greater the pressure on the lock, no chance for the rope to slip, main rope sheave fitted with lugs which engage the dogs, stopping the revolving of the wheels and assisting the rope lock, holds load at any elevation whenever team stops, and runs to mow from that point, track wheels 3½ in. in diam., and revolve on ¾ in. turned steel journals, frame or truck extra heavy and long, positive force lock, no springs, w't 34 lbs., each $24.00

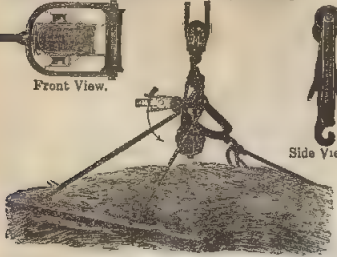
LOOSE

SLING PULLEYS

Showing Pulley with Fork Approaching.

Front View.

Side View.



Showing Pulley after Load Has Been Compressed.

Can be used with any make of hay carrier, except 7 in. Sheave Carrier, without a change of fork pulley or using a registering head. It is so arranged that it cannot be misplaced on the load as it can be used either side up and in connection with any shape or style of fork pulley

With this sling attachment the hay is deposited in the mow in the same relative position as on the wagon, and not crosswise as on many sling carriers

No. N1052—Myers' Universal, malleable iron, reversible, w't 10 lbs. ..... each $5.60

LOOSE

No. 806. Sling Pulley, Locked Together.

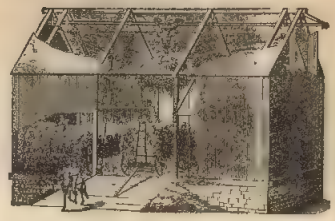
LOOSE

PARALLEL SLING PULLEYS

No. N1799—Malleable frame, with 4½ in. iron sheave, fitted for using ⅞ in. rope or ¾ or 1 in., 6 strand, 19 wire cable hoisting rope, for handling slings for stacking purposes, w't per. doz. 91½ lbs., per pair $4.50

LOOSE

DIRECTIONS FOR REVERSING CARRIER



Set fork in hay. Tie ends of rope together, to which horse and weight are attached. Pull on small rope until knot comes to the floor, then untie ropes. Fasten weight on small rope, change pulley to floor hook. This reverses carrier for opposite direction without leaving the floor or climbing up. Use all knot passing pulleys. For taking in hay at end barn use V-shaped brace for track support, as shown in cut.

MATERIAL REQUIRED FOR A STEEL TRACK OUTFIT FOR DIFFERENT LENGTH BARNS

For a 40-foot Barn—One Hay Unloader, 36 feet Steel Track, 19 Hanging Hooks, 19 Rafter Brackets, 5 Knot Passing Pulleys, 1 Fork, 6 Floor Hooks, 110 feet ¾-in. Manila Rope, 50 feet ⅜-in. Check Rope, 40 feet ⅜-in. Reverse Rope.

For a 50-foot Barn—One Hay Unloader, 48 feet Steel Track, 25 Hanging Hooks, 25 Rafter Brackets, 5 Knot Passing Pulleys, 1 Fork, 6 Floor Hooks, 130 feet ¾ in. Manila Rope, 55 feet ⅜ in. Check Rope, 60 feet ⅜ in. Reverse Rope.

For a 60-foot Barn—One Hay Unloader, 54 feet Steel Track, 28 Hanging Hooks, 28 Rafter Brackets, 5 Knot Passing Pulleys, 1 Fork, 6 Floor Hooks, 160 feet ¾ in. Manila Rope, 60 feet ⅜ in. Check Rope, 60 feet ⅜ in. Reverse Rope.

For a 70-foot Barn—Hay Unloader, 66 feet of Track, 34 Hanging Hooks, 3½ lbs. Bracket Nails, 5 Fig. 1120 Pulleys, 1 Fork, 6 Floor Hooks, 190 feet ¾-in. Draft Rope, 70 feet ⅜-in. Check rope, 70 feet ⅜-in. Reverse Rope.

For an 80-foot Barn—Hay Unloader, 78 feet of Track, 40 Hanging Hooks, 40 Rafter Brackets, 4 lbs. Bracket Nails, 5 Fig. 1120 Pulleys, 1 Fork, 6 Floor Hooks, 210 feet ¾-in. Draft Rope,80 feet ⅜-in. Check Rope, 80 feet ⅜-in. Reverse Rope.

Different lengths of barns will use track, hanging hooks and rope in same ratio as above.

If required to take hay in at end of barn and have rope pass down at far end to horse, same amount of draft rope. If draft rope be returned to same end of barn and then down, this requires about one-fourth more draft rope.

HAY RACK LOOPS, BRACKETS, ETC.

DOUBLE STEEL TRACK

Put Together Before Shipping.

All Double Steel Track is put together as shown in illustration before shipping. The advantage of this plan is that in erecting the only thing necessary is to attach the splice clamps. Instead of old method of breaking joints in center of rail, a long, heavy clamp is used. This plan is recommended, as it adds all the advantages of the single rail, and makes the double rail more desirable for dealers to handle.

How Track Should Be Placed.

Showing how track should be put up and how rope is tied from one rafter to the other close under the track to make stop for carrier at end of barn. Also how rafter brackets are placed, and how pulley should be fastened.

Directions for Erecting Myers' Patent Steel Track.

Scaffold, by placing rope from rafter to rafter, say 6 ft. from ridge pole or peak and about 10 ft. apart. Then place extension ladder across the ropes with board to stand on. Now nail one rafter bracket at each end of barn and draw a line from one end to the other and stretch tight. Then nail all rafter brackets even with this line. You are now ready to put up the track, which can be done either in sections or by clamping the entire length together. Hoist near to rafter brackets by ropes. Then place hanging hook over rafter bracket and finish by putting in bolt.

Material Required—One reversible carrier, track the required length of barn, one hanging-hook and rafter bracket for each rafter, five malleable knot passing pulleys, one fork, two floor hooks, one rope hitch, enough ¾ or ⅞ in. rope to operate the carrier—usually takes from 125 to 160 ft., but depends upon length of barn—¾ in. reverse rope the length of track, trip rope required length.

HAY RACK LOOPS

Showing Loop in Use.

These are designed to bolt on the ends of cross timbers of the hay rack, so that the side stakes of the basket of the rack will fit therein at the end of the timbers as shown in cut. Will hold the 2x4 in. stake securely having its lower end made tapering.

No. N42—[illegible] steel, painted blue, w't per doz. sets 96 lbs. .....per dozen sets $21.50

ONE SET OF EIGHT PIECES IN A BUNDLE, WIRED

HAY RACK BRACKETS

WENZELMANN

Furnished with ⅞ inch rod

A Set Consists of Wrought Steel Clamps, Brackets, Upper Washers, Lower Clips and Nuts.

The Intermediate Bracket adds much to the bearing surface at the cross section, and being studded and flanged, keeps the timbers from twisting or slipping.

The Clamps are placed astride the timbers and have double the strength of bolts.

The Bed Sills and cross pieces absolutely cannot twist out of shape when these fixtures are used, as is the case in the old method of construction with bolts, nails, etc.

The grooved Steel Upper Washer renders it impossible for the clamp to cut into the cross piece. The lower steel clip or washer keeps the bottom cross pieces from splitting.

By using the Wenzelmann Hay Rack Fixture boring of holes in timbers is not necessary. By their use the full strength of timbers is retained, and does away with the holes, which simply collect water and hasten their decay.

Nos.	N0T	N1T	N2T	N3T
Length of clamp, in.	12	14	16	18
W't per doz. sets, lbs.	145	168	180	
Per dozen sets	$27.75	30 00	32.25	34.50

ONE SET IN A BOX

TAKE-DOWN HAY RACK CLAMPS

Steel Bar Passes Through Malleable Iron Loop, Held in Place by Malleable Key.

The special advantage of this clamp over the Wenzelmann is that the hay rack is built in two sections and held together by two wedge shape pins, this enables one man to place rack on the wagon or remove it without assistance.

In addition to this, the lower part composed of sills and lower cross pieces making an ideal body for hauling wood, timber, lumber and such things not conveniently handled with an ordinary wagon box. By the use of a set of stake irons it may be transformed into a hog rack.

This is the most convenient form of hay clamp now on the market and is thoroughly recommended.

No. N06—Hay sills 2x8 in., cross timbers 2x4 or 2x6 in., w't per doz. sets 216 lbs., per dozen sets $45.00

No. N07—Hay sills, 2x10 in, cross timbers 2x8 in., w't per doz. sets 252 lbs. .....per dozen sets $48.00

ONE SET IN A BOX

WHEAT OR COTTON RACK CLAMPS

A set consists of eight clamps complete with upper washers, lower clips and nuts.

Used for building racks to haul sacked grain, baled hay or cotton in bales. When in place the sills and bottom cross pieces are securely clamped together, making a most substantial construction.

No. N1—Wheat or Cotton, sills 2x8 in., w't per doz. 144 lbs., per dozen sets $24.00

No. N2—Wheat or Cotton, sills 2x10 in., w't per doz. 156 lbs. .....per dozen sets $26.50

REV-O-NOC ELECTRIC AND POWER WASHERS

This is the same machine as the REV-O-NOC which we have handled so successfully for many years except that we have embodied in it the very latest improvements known to the manufacturers of power washing machines.

IMPORTANT FEATURES

Heavy angle iron platform with folding tub stand.

Large cedar, well seasoned and kiln-dried or copper tub with brass drain faucet.

The two bottom hoops are made of heavy wire. This is an improvement over the broad steel hoops which collect moisture and rust.

Motor and gearing placed underneath the tub on the platform, out of the way but still accessible.

Driving gears are all machine cut and have double bearings, insuring smooth and noiseless running.

Wringer swings all around the circle and locks at the four cardinal points.

Improved handy lever for controlling the wringer.

Driving gears are always in mesh (no clutch to be thrown in and out of mesh while running).

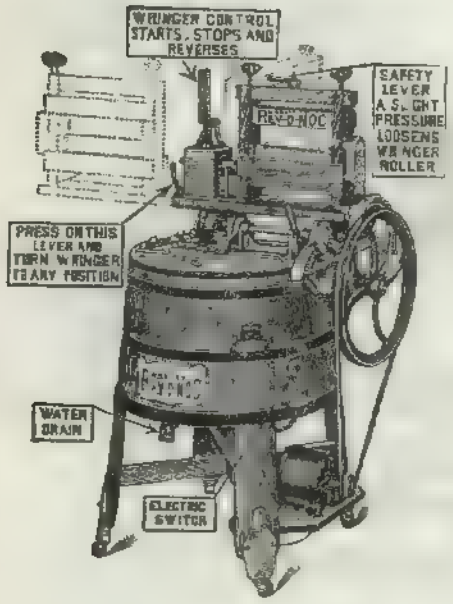
The Dolly is placed downward from the cover of the tub. This leaves the entire space in the bottom of the tub free from any shafts and stuffing boxes.

Latest improved safety features applied to washer wringer and motor.

Motor ½ horse power, 60 cycle, 110 volt, alternating current.

No. W180—Cedar tub, fitted with electric motor, w't 250 lbs. ..... each $128.00
No. W182—Copper tub, fitted with electric motor, w't 250 lbs. ..... each 142.00
No. W190—Cedar tub, fitted with pulley for gasoline power, w't 250 lbs. ..... each 88.00

REVONOC ELECTRIC WASHERS



The cheapest, most economical and most sanitary way to solve the problem of "Clean Clothes" is to have the family washing done in the home and by machine. This applies to families living either in city or farm homes. The scarcity of good household servants and the high wages that they are demanding is great, and the housewife's task of keeping the family clothes clean is her most difficult one.

THESE REVONOC WASHING MACHINES WILL SOLVE THIS PROBLEM

The REVONOC electric washing machine with swinging reversible wringer is efficient, practical, economical and durable, has machine-cut gears and babbitted bearings; strong electrical motor; Lowell wringer, made from best live rubber. Will retain the heat in the water, without which the fibres of the clothes will not swell exposing the dirt so it can be washed out. Gives great agitation to the clothes in the suds (85-90 turns of the dolly per minute). Dollyshaft covered by galvanized cap; geared so as to retain a uniform momentum from the flywheel, thereby relieving the motor of great strain and consequently saving current; has cut-off switch on the machine itself.

THE REVONOC ELECTRIC WASHER will wash clothes spotlessly clean in from eight to ten minutes. It will also do the wringing from the machine to the rinsing tub, from the rinsing tub to the bluing tub, and from the bluing tub to the clothes basket, while the machine is washing. Capacity of six sheets or equivalent.

Has an absolutely positive wringer shift that never misses and acts quickly; can be operated by hand utilizing the momentum from the flywheel as driving force; has ball bearing casters making it easy to move it into a corner after each washing. The simplest and easiest machine to understand, only one lever to attend to. Its first cost is less than that of other electric machines and it uses less current.

Height 28 in., Width at Top 19½ in., Width at Bottom 22 in., Depth of Tub 12½ in., Kiln Dried Cypress Tub, Grained, Corrugated Interior, Double Top, Hinged Cover, Cross Braced Legs. THE MOTOR is 1-5 H. P., 110 Volt, Either for Alternating or Direct Current., W't Crated, 200 Lbs.

In ordering state whether machine is wanted for direct or alternating current. If direct, give the voltage, if alternating, give both voltage and cycle.

No F18 REVONOC—For alternating current★ ..... each $114.80
No. F19 REVONOC—For direct current★ ..... each 114.80

★ **Items Marked Thus ★ Are Shipped From Factory Only.**

MAIL ORDER DEPARTMENT

Our constant attention in sixty-seven years of business has been given to the perfection of the system of handling mail orders. Our object has always been to handle them with the greatest possible speed, with the result that we are enabled, in most cases, to ship mail orders the same day they are received.

HSB&CO REV-O-NOC Hand Washers

Red Louisiana tub, grained, corrugated interior, double top, hinged cover, strong wringer attachment, double handle socket, cross braced legs, absolutely rigid.

Furnished with grooved fly wheel. Enables one change it to a power machine. Wheel makes seven revolutions to one downward thrust of the lever. The compound gearing together with the rapid motion of the fly wheel insures a uniform and non-jerking operation of the machine. The top is made double which eliminates warping.

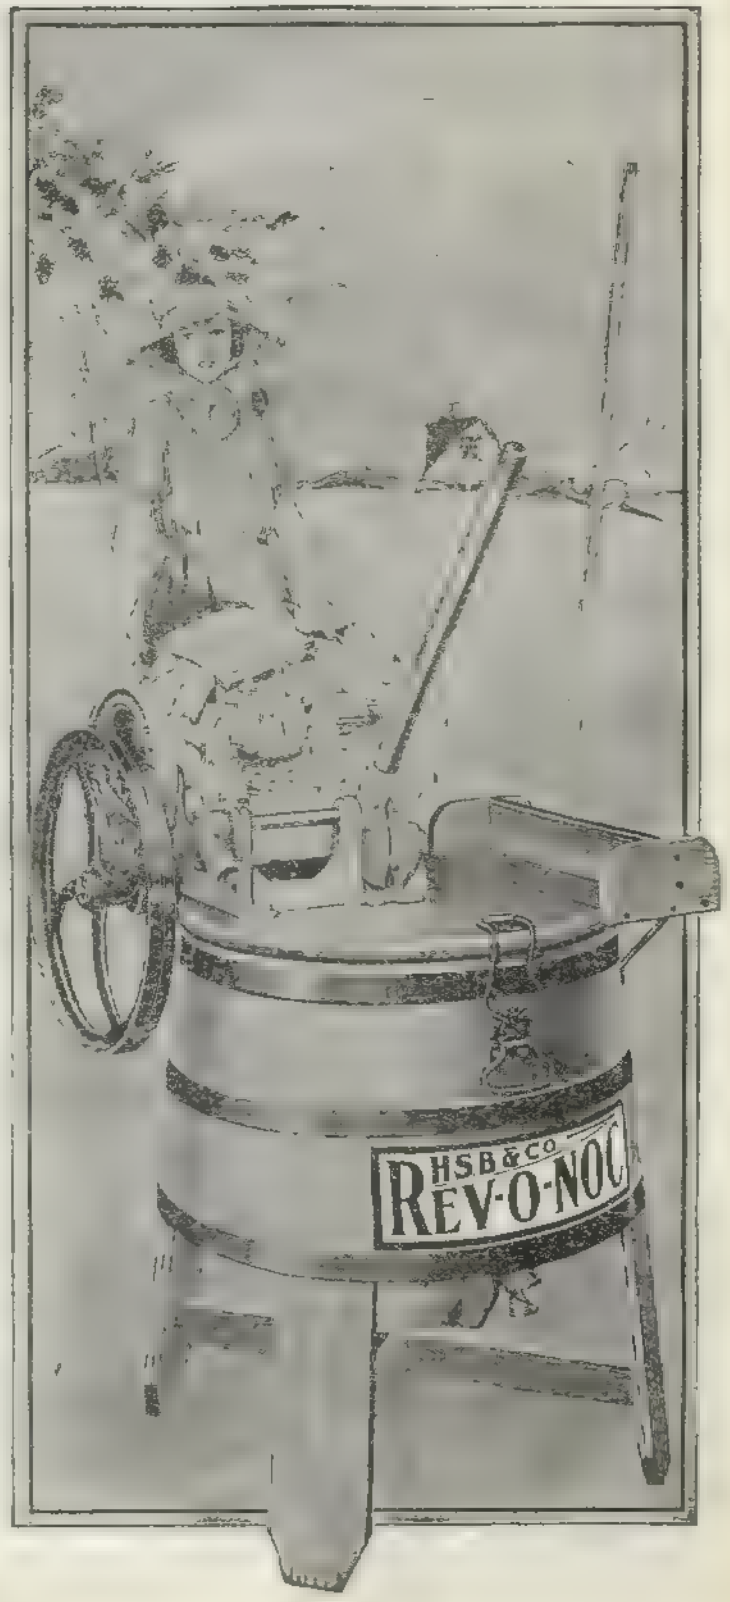
All gears are machine cut and covered.

The gearings are placed in such a position that the fly wheel remains stationary when the cover is opened or closed. It is not lifted with the cover, and for this reason it presents an ideal chance to connect the machine to gasoline or other power.

Brass drain faucet instead of wooden plug.

Height 30 in., width at top of tub 23 in., width at bottom of tub 25 in., diameter of fly wheel 17½ in.

No. W100—W't each 90 lbs., each $26.50



ONE IN A CRATE

REVONOC HAND WASHERS

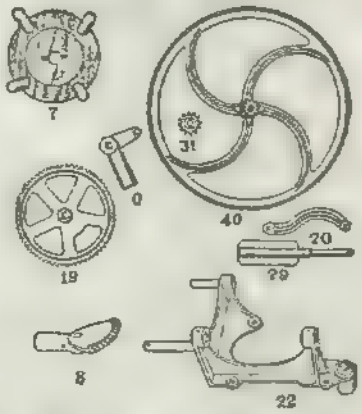
Easy Access to Tub.

Red Louisiana tub, grained, corrugated interior, double top, hinged cover, strong wringer attachment, double handle socket, cross braced legs, absolutely rigid.

The REVONOC lever arrangement is such, that the machine, when full, may be operated by a child, and the motion is such, as not to grow tiresome when continued. The fly wheel makes seven revolutions to one downward thrust of the lever. The compound gearing together with the rapid motion of the fly wheel insures a uniform and non-jerking operation of the machine. The top is made double which eliminates warping, and the metal parts are simple and strongly made.

No. W10 REVONOC—Height 30 in., width 23 in., diam. of fly wheel 19 in., w't per doz. 1080 lbs. .....each $22.00

REVONOC WASHER PARTS



For Nos. W10, F18, F19, F26

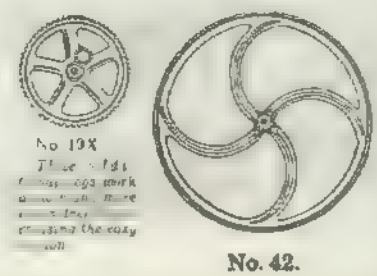
IMPROVED REVONOC PARTS



No. 42.

No. 19X—Gear wheel, 94 cogs, w't 3½ lbs. .....each $1.60

No. 42—Fly wheel, 15 cogs on pinion, w't 13½ lbs. .....each $5 00

Our OVB and REVONOC Tools are made by skilled workmen from Best Materials, with an Accurate Knowledge of the Requirements of each article.

That every Article bearing these brands shall be the Best of its kind on the Market has been our constant Aim.

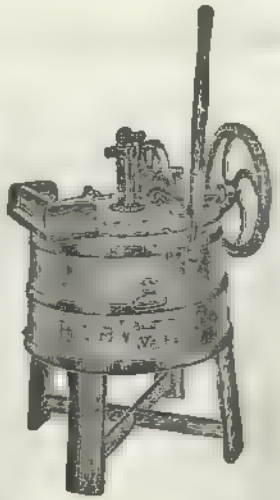
How well we have Succeeded is Shown by the Greater Number of Merchants who have Adopted these Brands as Their Standard and by the Increased Sales of Each.

Will you make these Slogans your Slogans?

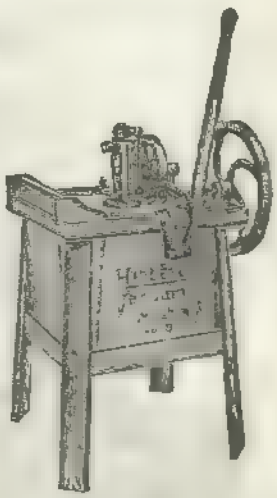
"Our Very Best is The Very Best."

"We Always Stand Behind the Brand."

HIBBARD BALL BEARING VACUUM WASHERS



No. W6.



No. W8.

Cold Rolled Steel Shafting, Best Quality Malleable and Gray Castings, and Brass Ferrules, Wood Parts of Selected Material, Natural Finish with Three Coats of Varnish, Metal Parts Finished in Bright Red Enamel Ornamented with Gold Bronze, Spiral Cut Gears, Extra Long Bearings on Counter Shaft.

The Hibbard is so designed that a small amount of effort will secure the maximum result in a very short time.

In use, hot suds are put in up to the marked water line together with the same quantity of clothes which are handled in the ordinary washer. The lid is closed, the lever set in motion and when the plunger head comes above the water line, its chambers are filled with air which is forced out through the fibers of the clothes on the downward stroke. On the upward movement a vacuum is formed in the plunger which sucks the suds back through the garments with a force which brings out all the dirt at a remarkable speed. This vacuum system is rapidly gaining recognition as the most efficient method of cleaning.

No. W6—Hibbard, Louisiana cypress tub, stave legs with cross braces double lids, reinforced wringer bottoms, inside of bottom and sides corrugated, height 36 in., width at top 22 in., at bottom 24 in., depth of tub 12½ in., w't each crated 90 lbs., each $27.00

ONE IN A CRATE

No. W8—Hibbard, 26 gauge galvanized metal tub, double lids, hinged cover, legs braced with steel truss rods, height 36 in., width at top 22 in., at bottom 24 in., depth of tub 12½ in., w't each crated 90 lbs., each $27.00

ONE IN A CRATE

POWER AND ELECTRIC WASHERS

No. W31.

No. W32.

The Horton washer with the new three way wringer is made on the Horton "Built on Honor" policy. Better made and has more special features than many machines selling at a higher price.

All driving gears are machine cut instead of cast reducing friction to a minimum and making it noiseless in operation. All exposed gears are covered to prevent accident.

Equipped with special two roll reversible ball bearing wringer rolls, 1¾×10 in., guaranteed 5 years, has a patent device to prevent injury. A simple movement of the hand swings wringer from one position to another to enable wringing between tubs and baskets.

Tub is made of highest grade Louisiana red cypress full corrugated on inside by a special process to avoid splinters.

Natural finish, mechanism gold bronze, fly wheel and hoops green enameled.

Hardwood dolly with four extra large pegs and guarded post, clothes cannot tear.

Brass drain faucet threaded and on bottom of tub.

HORTON ELECTRIC

No. W32—Height 31½ in., width at top 20¾ in., width at bottom 23 in., depth of tub 13¾ in., heavy ball bearing casters, specially designed Ft. Wayne motor has ample power to operate washer and wringer at the same time, best grade Tannate belt w't 200 lbs. ..... each **$120.00**

ONE IN A CRATE

Can also be operated by hand in case of temporary trouble with electricity.

HORTON FOR POWER

No. W31—Height 29½ in., width at top, 20¾ in., width at bottom 23 in., depth of tub 13¾ in., no tight or loose pulleys required as the pulley wheel stays in position when lid is opened, can be operated by hand, by interchanging pulley wheel with fly wheel, shipping w't 175 lbs. ..... each **$70.00**

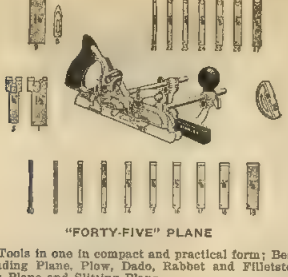
FANCY IRON PLANES



"FORTY-FIVE" PLANE

Seven Tools in one in compact and practical form; Beading and Center Beading Plane, Plow, Dado, Rabbet and Filletster, Match Plane, Sash Plane and Slitting Plane.

The Plane has two principal parts, a Main Stock and a Sliding Section. The Main Stock carries the Handle, Cutter Adjustment, a Slitting Tool, Depth Gauge, and forms a bearing for one edge of the Cutter. The Sliding Section slides on two Arms secured in the Stock and has a bearing for the other edge, allowing Cutters of different widths to be used. A Fence also slides on these Arms for use when working as a Plow, Beader or Filletster, to gauge the distance from the Cutter to the edge of the board, and to keep the Cutter at right angles to same. When used as a Filletster, the Fence slides under the Bottom of the Plane and determines the width of Cutter exposed to the work.

The Plane is fitted with spurs for use across the grain, etc., and can be used either right or left hand.

With each Plane are furnished 21 Cutters, all of which are shown in cut. Plane and Attachments packed in a neat Steel Box.

All Metal Parts are Nickel Plated. The Handle, Knob and Fence are made of Selected Rosewood.

STANLEY

Each

No. 89-45—Nickel Plated; Complete with 21 Cutters.....$20.80
Weight 9½ Lbs. Each

The Following Cutters Are Furnished With Each Plane; the Price Is Given In Case Duplicates Should Be Required

Nos.	Size	Style	Each
1—	1½ in.	Sash Tool	.$1.60
5—	¼ in.	Match Tool	1.00
8—		Slitting Tool	.60

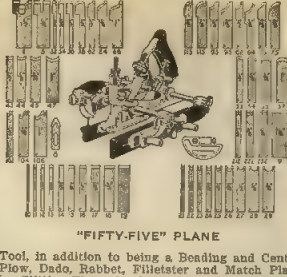
25—	⅜ in.	Beading Tool	.40
26—	½ in.	Beading Tool	.50
27—	½ in.	Beading Tool	.50



"FIFTY-FIVE" PLANE

This Tool, in addition to being a Beading and Center Beading Plane, a Plow, Dado, Rabbet, Filletster and Match Plane, a Sash Plane and a Slitting Plane, is also a superior Moulding Plane, and will accommodate Cutters of almost any shape and size; In fact, it is **"a planing mill within itself."**

The regular equipment sent with the Plane comprises 52 Cutters, all of which are shown in the cut. These Cutters, Plane and all its Attachments, are packed in a neat Steel Box.

All Metal Parts of the Plane are Nickel Plated. The Handle and Fences are made of Selected Rosewood, and every part is well finished.

STANLEY

Each

TRAUT ADJUSTABLE DADO, PLOW, ETC.

Each

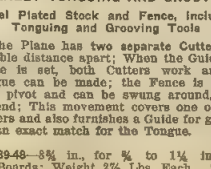
No. 89-46—Nickel Plated, with 11 Tools, Dado, Filletster, Plow, etc.....$14.70
Weight 5½ Lbs. Each

This Tool is accompanied by Eight Plow and Dado Bits, Sizes ⅛, ¼, ⅜, ½, ⅝, ¾ and 1¼ in., a Filletster Cutter, a Slitting Tool and a Tonguing Tool.

TRAUT ADJUSTABLE DADO ONLY

Each

No. 89-47—Has the same Stock and Arms as shown above, including Bits, Sizes ⅜, ½, ⅝, ¾ and 1¼ in., and Slitting Tool.....$11.60
Weight 4 Lbs. Each



STANLEY TONGUING AND GROOVING

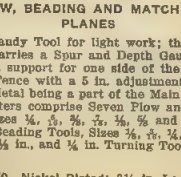
Nickel Plated Stock and Fence, including Tonguing and Grooving Tools

The Plane has two separate Cutters, a suitable distance apart; When the Guide or Fence is set, both Cutters work and a Tongue can be made; the Fence is hung on a pivot and can be swung around, end for end; This movement covers one of the Cutters and also furnishes a Guide for grooving an exact match for the Tongue.

Each

No. 89-48—8⅝ in., for ¾ to 1¼ in. Boards; Weight 2⅝ Lbs. Each...$7.80

No. 89-49—8 in., for ⅜ to ¾ in. Boards; Weight 2⅝ Lbs. Each..... 7.80



PLOW, BEADING AND MATCHING PLANES

A Handy Tool for light work; the Main Stock carries a Spur and Depth Gauge and forms a support for one side of the Cutter and a Fence with a 5 in. adjustment; Handle is Metal being a part of the Main Stock; the Cutters comprise Seven Plow and Dado Bits, Sizes ¼, ⅛, ⅜, ½, ⅝, ¾ and ⅞ in.; Seven Beading Tools, Sizes ⅛, ⅛, ¼, ⅛, ⅜, ⅛ and ½ in., and ¼ in. Turning Tool.

Each

No. 89-50—Nickel Plated; 9¼ in. Long; 15 Cutters.....$11.40
Weight 3½ Lbs. Each

FLOOR SCRAPERS

ZENITH

A Hand Rest relieves the strain on wrist and arm; The Blade is clamped between two Spring Plates and fastened with a Cam Lock; Any Length of Blade may be used; Ball and Socket Joint allows adjustment in any direction.

Each

No. 92E Polished Steel Frame and Blade; 7 in. Mahogany Finished Handle; Complete with one 3x5 in. Blade...$2.70

One in Box
Weight 21 Lbs. Dozen

Per Dozen

No. 92F—Extra Blades for Zenith Scrapers.....$8.00

UNIVERSAL

The Blade has eight sharp cutting edges and any one of them can be brought into use by means of the Handle with its Ball and Socket connection; the Hand Guard can be used on either end or side of Blade.

Each

No. 92H—Polished Blade, 5¼x3¼ in.; 15 in. Handle.$2.70

One in Box
Weight 1 Lb. Each

Each

No. 92J—Extra Blades for Universal Scrapers.....$0.40

PERFECTION

Per Dozen

No. 92K—3x3 in., 16 Gauge Steel Cutter; Polished Blade, Malleable Iron Holder, Nickel Plated, 12 in. Long; Polished Hardwood Handle, Brass Ferrule $15.30

Half Dozen in Box
Weight 10 Lbs. Dozen

Per Dozen

No. 92L—Extra Blades for Perfection Scrapers.....$3.30

Half Dozen in Box
Weight 1⅞ Lbs. Dozen

FOX

Each

No. P92N—White, Enameled Cast Frame; Heavy Rubber Cushion Tired Wheels; Selected Oak Wood Handle reinforced with heavy Wrought Steel Braces, Width Blade 9 in.; Length Handle 42 in., Adjustable; Blades made from Special Knife Steel, tempered and ground; Wheels work independently of each other and are Rubber Tired; Complete with Tools for keeping Scraper sharp and in perfect condition.....$52.50

One in Crate
Weight 85 Lbs. Each

Per Dozen

No. 92N4—Extra Blades, for Fox Scrapers.....$24.00

FLOOR PLANES

For Scraping Off Old Paint, etc.; Adjustable Scrapers

STANLEY

Blades adjustable endwise and for angle; Simple locking device holds them firmly in position desired; Rosewood Handle and Knob

Each

No. 92-112—9 in. Long, 3 in. Cutter; Weight 4 Lbs. Each.....$5.10

EXTRA CUTTERS

Each

No. 92-112A—For Veneering $0.45

Per Inch

No. 92-112B—For Toothing 60

22, 28 or 32 Teeth to the inch

STANLEY

For Fine Work; Adjustable to any angle; Rosewood Bottom, Japanned Cast Iron Frame, Face and Clamp; Steel Adjusting Screws; Tool Steel Cutter, Tempered and Polished; Polished Rosewood Handle.

Each

No. 92-12—Length 6¼ in., 3 in Cut $5.85

One in Box
Weight 3 Lbs. Each

VENEER SCRAPERS

STANLEY

Adjustable to any thickness Blade; Blade can be sprung to slight curve by Knurled Thumb Screw.

Per Dozen

No. 92-80—2¾ in. Cut; Japanned, Raised Handles; Length 11 in.....$24.60

One in Box; Weight 19 Lbs. Dozen

Per Dozen

No. 92-80A—Extra Blades.....$4.80

CABINET SCRAPERS

HAND

High Grade Steel, Special Temper, Polished

Nos.	92P	92R
Size, In.	3x4	3½x5
Weight Dozen, Lbs.	1½	2¼
Per Dozen	$2.00	2.20

One Dozen in Box

BURNISHERS

For putting an edge on Floor and Cabinet Scrapers, etc., Oval Blade; Natural Wood Handle, Metal Ferrule.

Per Dozen

No. 92S—Length of Blade 4½ in.; Length Over-all 8 in.....$7.80

Half Dozen in Box; Weight 2 Lbs. Dozen

FANCY IRON PLANES

STANLEY

BULL NOSE RABBET

For working close up into corners or other difficult places; The Mouth can be adjusted for different widths by means of the Set Screw on top of Plane.

Each

No. 86-75—Length 4 in.; 1 in. Cutter; Japan Trimmings.....$1.10

Weight ⅝ Lb. Each

With Two Seats for the Cutter, one for regular work and the other where a Bull Nose is required, With Spur and removable Depth Gauge. Adjustable Fence can be used on either side and slides under the bottom, regulating the width of cut; To work same as a Rabbet Plane, remove Fence and Arms.

Each

No. 86-78—Length 8½ in.; 1½ in. Cutter; Japanned..... ...$4.90

Weight 3 Lbs. Each

HANDLED IRON RABBET

These Planes will lie perfectly flat on either side and can be used equally as well with Right or Left Hand while planing into corners or up against perpendicular surfaces; Fitted with Detachable Depth Gauge.

With Spur for working across the grain of wood; Length 8 in.; Japanned

Nos.	86-190	86-191	86-192
Cut. In.	1⅛	1¼	1
Weight Each, Lbs.	2½	2¼	2
Each	$4.40	4.10	3.90

SKEW CUTTER FILLETSTER AND RABBET

Extra Wide Skew Cutter; Adjustable Spur fitted to each side, Fence and Depth Gauge can be attached to either side for Right or Left Hand work; The Adjustable Fence slides under the bottom regulating width of cut; A Skew Cutter Rabbet Plane is obtained by removing Arms and Fence.

Each

No. 86-289—Length 8½ in.; 1¾ in. Cutter; Japanned.....$5.70

Weight 3¾ Lbs. Each

SIDE RABBET

Convenient for Side Rabbeting in trimming Dados, Mouldings and Grooves of all sorts; Reversible Nose Piece gives the Tool a form whereby it will work close up into corners.

Each

No. 86-98—Right Hand; Length 4 in.; ⅛ in. Cutter; Nickel Plated Frame; Rosewood Knob.. ... . $2.90

Weight ½ Lb. Each

Plane Set for Inside Work

Plane Set for Outside Work

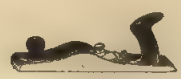
CIRCULAR

With Flexible Steel Faces which can be accurately adjusted for planing the inside or outside of Curved Surfaces; Face is fastened at its center to the Plane Body and adjusted at the ends by means of a Screw and Lever; A valuable feature is the Graduated Scale for setting the Face.

Each

No. 86-113—Length 10 in; 1¾ in. Cutter; Japanned.....$11 00

Weight 3½ Lbs. Each



LOW ANGLE JACK

Adapted for cutting across the grain on heavy work where more power is required than can be obtained by the use of the ordinary Block Plane.

Each

No. 86-62—Length 14 in.; 2 in. Cutter; Japanned Frame; Rosewood Handle and Knob $8.30

Weight 3⅝ Lbs. Each

SCRUB

For quickly planing down to a rough dimension any board that is too wide to conveniently rip with a Hand Saw; Has Heavy Cutter with a Rounded Edge instead of Square; Beech Handle and Knob, Japanned Frame

Nos.	86-40	86-40½
Length, In.	9½	10½

ADJUSTABLE WOOD PLANES

STANLEY

Every Carpenter needs two or more Wood Planes in his Kit for rough outside work; Bottom, Handle and Knob made from selected and well seasoned Beech; Cutters adjustable both endwise and sidewise; Tops Japanned Cast Iron. Frog held in place by two Machine Screws which pass through top Iron and screw into two Brass Lugs; These Lugs are screwed and securely pinned into Wood Bottom; They hold the Wood Bottom and Top Iron together firmly, which greatly strengthens the Plane.

IRON BENCH PLANES

STANLEY BED ROCK AND BAILEY

Stanley—Frog adjustable, either forward or backward, without removing Lever or Cutter; Cutter is adjustable endwise and sidewise; Japanned Cast Iron Frame; Rosewood Handle and Knob; Finest Quality English Thin Steel Tempered Cutter, Ground and Honed, ready for use.
Bailey—Width of Mouth may be regulated and made wider or narrower as Coarse or Fine work may require; Lever and Cutter must be removed to do this and Frog Screws adjusted to suit the requirement; Japanned Cast Iron Frame; Rosewood Handle and Knob; Finest Quality English Thin Steel Tempered Cutter; Ground and Honed, ready for use.

Shows Corrugated Bottom

SMOOTH PLANES

8 in. Smooth

A **Smooth Plane** is for finishing or smoothing off flat surfaces. Where the uneven spots are of slight area, its short length will permit it to locate these irregularities, leaving the work with a smooth surface when finished.

HAYING TOOLS

WOOD SHEAVE PULLEYS

Nos. 45-46-54

No. 43—Knot Passing

Malleable iron frame, with flanged edges to protect rope; hard maple sheaves, dipped in linseed oil; turn on 13/16-inch metal bearings; large swivel eye

No. 45—Pulley; 5 in. sheave; wgt. doz. 33 lbs. Doz $ 8 50
No. 46 Pulley; 6 in. sheave; wgt. doz. 40 lbs. Doz 11 25
No. 54 Pulley; 7 in. sheave; wgt. doz. 48 lbs. Doz 15 10
No. 43—Pulley; 6 in. sheave; wgt. doz. 45 lbs. Doz 12 80

IRON SHEAVE PULLEYS

No. 42 -With Eye

No. 42A—With Hook

Malleable iron frame; flanged edges; riveted top and bottom; iron sheave on ¼-inch roller bearing

No. 42 —Pulley; 5 in. sheave; wgt. doz. 63 lbs Doz. $17 95
No. 42A -Pulley; 5 in. sheave; wgt. doz. 64 lbs Doz. 17.95

BRACKET PULLEYS

Malleable iron frame and casing; iron sheave, on metal bearing; frame mortises into beam and permits draft to run down side of barn for hitch. Used with Advance equipment on end hoist barns, less rope is required than if run back to door for hitch, and carrier is easier to return to hoisting place. Weight 50 pounds per dozen.

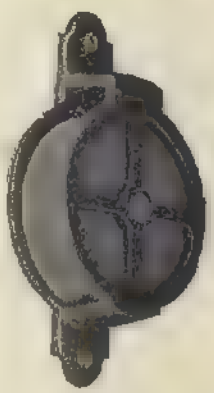
No. 70—Bracket Pulley; 6-in. sheave; malleable iron frame. Doz. $15.00

IRON SHEAVE PULLEY

Malleable iron frame, flanged edges; riveted at top; large swivel eye; iron sheave, on 5/16-inch steel roller bearings Weight 50 pounds per dozen

No. 45RB -Pulley; 5-in. sheave... Doz $15 40

SIDE PULLEYS



No. 47

No. 11

For balance weight ropes for raising and lowering doors

No. 47—Side Pulley; malleable frame; 4-in. hard maple sheave for 5/16-in. rope or smaller; wgt. per doz. 15 lbs..... Doz. $6.40
No. 11 Side Pulley; malleable frame; 3½-in. iron sheave for ⅛-in. cable or smaller; wgt. per doz. 24 lbs. ..... Doz. 6.40

GUIDE PULLEY

Required to run a carrier on a circular track; placed on inside of track in round barns to hold rope in line with track.

No. 30—Guide Pulley; wgt. 8 lbs..... Each $4.05

HAYING TOOLS

HAYING TOOLS FOR WIRE ROPE CABLE

No. 280.

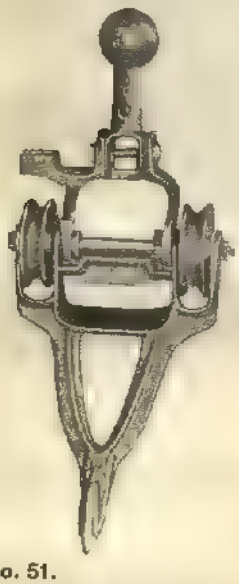
No. 50.

No. 280 Advance Compression Sling Pulley is the No. 51 main section used with No. 50 section; large wheels for $^3/_8$-inch or $^1/_2$-inch cable; for use with Nos. 1, 2, and 3 carrier when cable is used in place of fibre rope.

No. 280—Advance Compression Sling Pulley; complete with registering head; weight 19 pounds. Each $5 55

No. 50—Section Advance Compression Sling Pulley; used for end trip slings; weight 8 lbs. Each $3.40

CABLE FORK PULLEY



No. 51.

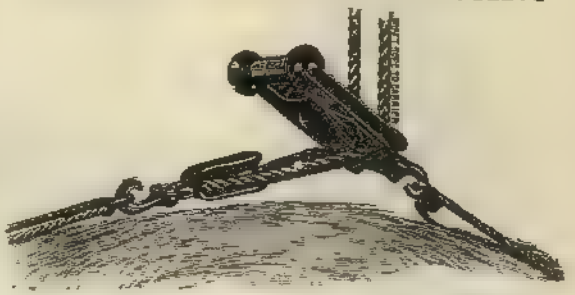
No. 52

No. 51 -Main Section used with No. 50 to make complete pulley No. 280

No. 51 -Main Section Advance Compression Sling Pulley; weight 11 pounds..... Each $2.35

No. 52—Cable Fork Pulley; has large iron sheaves suitable for $^3/_8$-inch or $^1/_2$-inch cable; for use with Nos. 1, 2 and 3 carrier; weight 8 pounds....Each $2 15

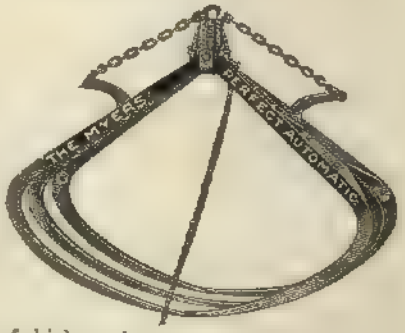
UNIVERSAL REVERSIBLE SLING PULLEYS



Can be used for slings with any make of hay carrier without a change of fork pulley for using a registering head; when bundle is compressed the fork pulley passes up against sling pulley trips and dislodges the center section and passes through, the bundle being tightly compressed; hay is deposited in mow in same relative position as on wagon. Weight 14½ pounds

Myers Universal Sling Pulleys . ... Each $3 75

AUTOMATIC GRAPPLE FORKS



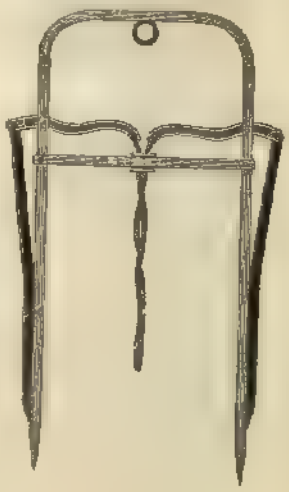
Made of high carbon spring steel; six tines; handles loose or baled hay; width of head 19 inches trips easily from any direction; has perfect balance; trip rope closes and locks fork, returns to load all ready to enter hay. Weight 48 pounds.

No. 1438—Myers Perfect Automatic Grapple Forks; six tines .....Each $12 00

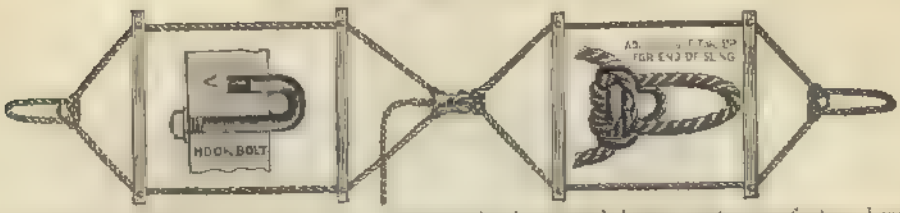
DOUBLE HARPOON HAY FORKS

Extra length, 31-inch tine; made from open hearth spring steel ¼x1¼ inches; strong steel cross bar; tripped from any direction. Weight 18 lbs.

No. 451 -Double Harpoon Hay Forks ..Each $5.00

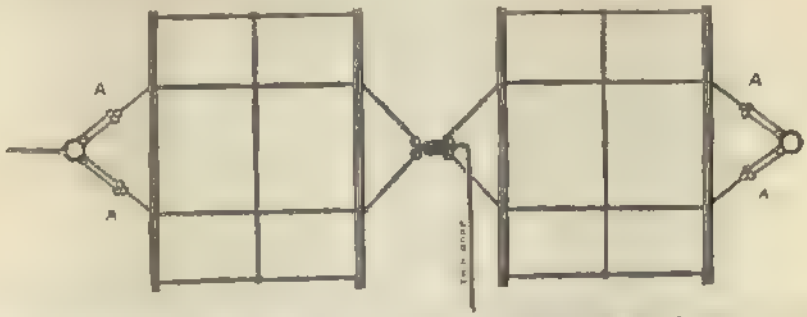


HAYING TOOLS



Center trip adjustable slings, 5 foot cross bars of seasoned Ash, 2½ inch Loose twist rope, fastened with Hook Weight 24 pounds.

No. 620—Center Trip Hay Slings; 5 ft. slats ..... Each $7.50



Utah center trip adjustable slings; has 6 foot cross bars which extend 18 inches beyond side ropes and to which is attached a double end rope, extra cross rope between slats Weight 51 pounds

No. 621 Utah Center Trip Slings; 6 ft. slats Each $8.60

"COMMON SENSE" ROPE SLINGS

No. 32

Showing Method of Attaching Extra Rope

Made from ½-inch pure Manila rope, two ropes 20 feet long; single eyelets one end; these are fastened by heavy metal after rope has been spliced in middle and reversed and made secure by clamping with rings around rope both ends shoulders on each of eyelets making it almost impossible for eyelets to pull out; other two ends fitted with large ring spliced in No slats necessary; will pick up all kinds of hay as clean as any style slat sling; a light, practical sling

No. 32 Common Sense Rope Hay Slings; sold in sets of three slings wgt per set 11 lbs. ..... Per set $4.90

No. 34 Third Ropes, for Common Sense Slings; has double eyelet one end and snap at other; attached or detached in an instant; sold in sets of three; wgt per set 6 lbs ..... Per set 2.35

No. 34

"COMMON SENSE" CHAIN SLINGS

Made of electric welded passing link chains, cannot tangle or kink; very smooth, will not stick under hay; tensile strength 2,000 pounds; length 20 feet. Weight 11 pounds each.

No. 36 Common Sense Chain Hay Slings; sold in sets of three Each $2.65

Third Chains, for Common Sense Chain Slings..... Each 1.05

HAYING TOOLS

TRACK COUPLER

Made from special rolled high carbon angle steel 1x¾x⅜ inch; two pieces, closely riveted with ⅜-inch rivets, separated by heavy square washers, making it exceptionally strong and rigid. Handy to install, as track hangers are inserted from under side and no bolts or rivets are required. Weight about 2¼ pounds per foot. In stock in 6, 8, 10 and 12 foot lengths.

No. 6—Steel Track; with couplings ..Per foot $0 22
Circular Track; for round barns, state radius of circle (when ordering send diagram and give radius of circle Per foot
Advance Track Coupler (when sold as extra Each 0 32

ADVANCE STEEL TRACK

TRACK HANGERS

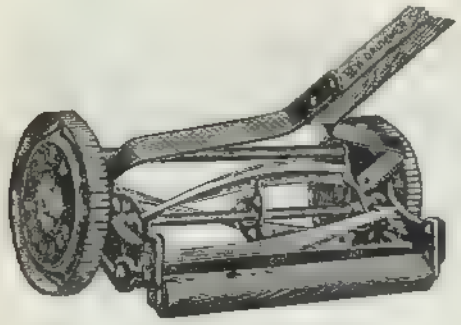
F. O. B. Albert Lea, Minn.

LAWN MOWERS

THE NEW DRUMMER



Guaranteed to be the best low-priced mower ever made. Design new and attractive, very popular on account of lightness of draught. All connecting points machined to exact dimensions, shoulders milled on ends of steel cross rod to produce rigid frame. Wheels made with spoked ring, making a raised tread. Reel shaft is made of best machinery steel, 9/16 in. in diameter and has adjustable brass brushings to make up wear.

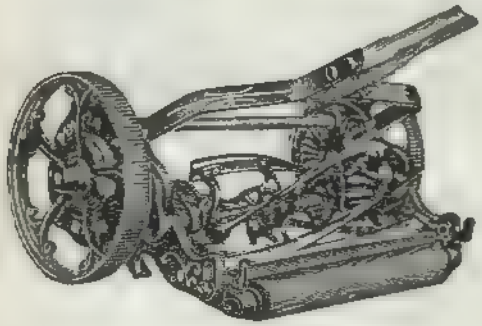
Decoration—Dark green wheels, apple green body and gold striping.

8½ in. wheels, 3 crucible steel blades carefully tempered and self-sharpening, reel 5½ in. in diameter, ⅝ in. cross-rod, screw adjusting cutter bar, malleable iron spiders, hard maple handle and roller.

Nos.	E812	E814	E816	E818
Cut, in.	12	14	16	18
W't, lbs.	40	42	45½	48½
Each	$10.40	11.00	11.70	12.40

ONE IN A CASE

PENNSYLVANIA JUNIOR BALL BEARING



10 inch driving wheels, five tempered crucible steel blades, self-sharpening dead knife, ball bearing, cylinder journals, 6 inch cylinder, train of gears each side, hardwood roller and handle.

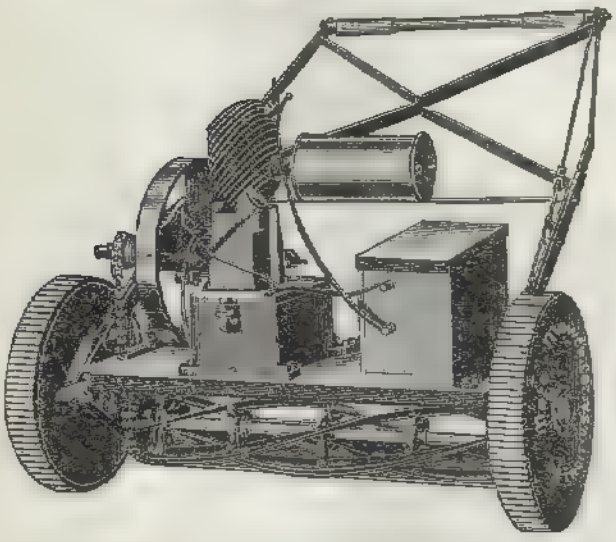
W't lbs.	78	82	85	97
Each	$40.50	45.90	51.30	56.70

ONE IN A CASE

MOTO-MOWERS



For use in parks, cemeteries, public grounds and private places where lawn is too large for hand mower. Will do as much work as five men with hand mowers.

Machine is made from best materials throughout and nicely finished and painted. Cutting Reel has 5 crucible steel blades, carefully tempered and hardened. The motive power is furnished by a 1½ H. P. reversible engine, fully guaranteed. There are no gears or clutches on the moto-mower. The power from engine is transmitted direct to cutting reel through chains and sprockets. The friction driven rollers on the ends of the reel-shaft are brought gently into engagement with the flange on the inner sides of the wheels by simply rotating the handle bars. This permits the machine to be started or stopped without shock or jar and allows you to turn to right or left or stop instantly. The Moto-Mower is provided with automatic friction release between the motor and cutting reel.

If a stone, root or other object becomes caught in the machine, this device by automatically slipping, protects the blades against injury or possible breakages.

The Machine cuts as close to trees and other objects, as a hand mower. It can operate on any terrace or hillside on which a man can walk.

FRAME

Width of Cut, 27 inches.
Cut Adjustable, ½ to 3 inches.
Cutting Speed, 2 to 3 mi. per hr.
Cutting Capacity, 5 acres per day.
Climbs, 35 per cent grade.
Color, French grey, gold striping.
Blades, 5, crucible steel.

MOTOR

Single Cylinder, Air Cooled.

Gasoline Consumption per day, About 1 gallon.
Bore, 2½ inches.
Stroke, 2½ inches.
H. P. (A. E. S. rating), 1½.
Speed, 600 to 1200.
Ignition, Battery.
No. W124—24 in. cut, w't each 160 lbs. ....each **$300.00**
No. W127—27 in. cut, w't each 180 lbs. ....each **360.00**

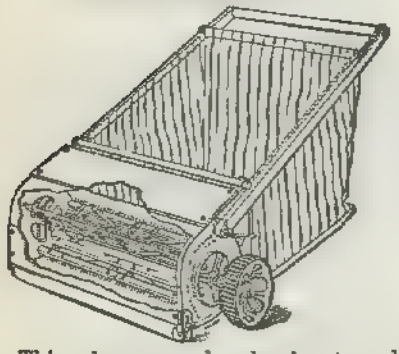
PENNSYLVANIA LAWN CLEANER AND RAKE



This cleaner and rake is strongly built, it has a revolving reel to which is fastened three rakes with short steel wire teeth, an adjustable roller in front for regulating height, a large canvas box for catching leaves and rubbish.

This machine will remove the cut grass, all sorts of leaves, litter and trash, its use has a benefical result to the lawn as it raises up the low growing crab grass and other spreading weeds, so that the mower will cut them, thus preventing their going to seed. Very easy to operate, and with it one man will do as much work as three men with hand rakes.

No. 618A or 618B—Cutter Bar complete $2.00
No. 620A or 620B—Cutter Bar complete $2.00
No. 10—Set Screw for regulating Cutter Bar ..... each $0.05
Flat Pawl, both alike, each $0.10
Wood Roller, all sizes, each $0.50
Wood Handle ..... each $1.60

REPAIRS FOR IL-A-NOY AND CRUSO LAWN MOWERS

No. 34 or 340—Wheel, each $1.60
No. 41 or 411—Side Plate, R. H., each $2.00
No. 42 or 422—Side Plate, L. H., each $2.00
No. 3—Pinion Cap ..... each $0.20
No. 5B—Pinion, R. H., each $0.25
No. 6B—Pinion, L. H., each $0.25
No. 614A or 614B—Cutter Bar complete $2.00
No. 616A or 616B—Cutter Bar complete $2.00
No. 618A or 618B—Cutter Bar complete $2.00
No. 620A or 620B—Cutter Bar complete $2.00

REPAIRS FOR IL-A-NOY AND CRUSO LAWN MOWERS. Continued—

Wheel Washer ..... each $0.10
Metallic Sleeve ..... each $0.30
No. 10—Set Screw for regulating Cutter Bar ..... each $0.05
Flat Pawls, both alike, each $0.10
Wood Roller, all sizes, each $0.50
Wood Handle ..... each $1.60

REPAIRS FOR SUBURB AND GLENCOE LAWN MOWERS

No. 34 or 340—Wheel, each $2.00
No. 31 or 311—Side Plate, R. H., each $1.60
No. 32 or 322—Side Plate, L. H. each $1.60
No. 3—Pinion Cap, ... each $0.15
No. 5B—Pinion, R. H., each $0.25
No. 6B—Pinion, L. H., each $0.25
No. 514A or 514B—Cutter Bar complete, Glencoe only, each $2.00
No. 516A or 516B—Cutter Bar complete, Glencoe only, each $2.00
No. 518A or 518B—Cutter Bar complete, Glencoe only, each $2.00
No. 614A or 614B—Cutter Bar complete, Suburb only, each $2.00
No. 616A or 616B—Cutter Bar complete, Suburb only, each $2.00
No. 618A or 618B—Cutter Bar complete, Suburb only, each $2.00
No. 10—Set Screw for regulating Cutter Bar ..... each $0.05
Flat Pawls, both alike, each $0.10
Wood Roller, all sizes, each $0.50
Wood Handle ..... each $1.60

REPAIRS FOR NEW DRUMMER

No. 20—Drive Wheel, each $1.60
No. 11 or 111—Side Plate, R. H., each $1.60
No. 12 or 122—Side Plate, L. H., each $2.25
No. 5B—Pinion, R. H. each $0.25
No. 6B—Pinion, L. H., each $0.25
No. 512A or 512B—Cutter Bar complete $2.00
No. 514A or 514B—Cutter Bar complete $2.00
No. 516A or 516B—Cutter Bar complete $2.00
No. 518A or 518B—Cutter Bar complete $2.00
Flat Pawls, both alike, each $0.10
Wood Rollers, all sizes, each $0.50
Wood Handle ..... each $1.60

ELECTRIC LIGHTING PLANTS

JUPITER

Specifications do not include Engines.

SYSTEM No. 13—110 VOLT

Battery. Sixty Faure type, 100 ampere hour, 11 plate Perfection, sealed in glass jar cells, dust proof. Size of plates 5x6 in.; continuous 8 hour discharge rate, 12½ amperes.

Generator. 3 K. W. 110-125 volt, 1700 R. P. M., 4 inch pulley.

Switchboard and Accessories. Type G, 30 ampere, 1 hydrometer testing outfit.

CAPACITY—

Battery. 1500 watts for 8 hours continuously or 75, 20 watt lamps. 2400 watts for 5 hours continuously or 120, 20 watt lamps.

Generator. 3000 watts continuously or 150, 20 watt lamps.

Battery and Generator Combined. 4500 watts for 8 hours continuously or 225, 20 watt lamps. Maximum capacity of battery on 72 hour intermittent discharge 16000 watt hours.

Engine. Requires a 5 H. P. engine. See general description.

ELECTRICAL WIRES

National Code Standard.

SINGLE CONDUCTOR WIRE

Rubber Covered, National 1911 New Code Standard.

Rubber Covered Wire, National 1911 New Code Standard is made to conform to the latest specifications of the National Board of Fire Underwriters, and MUST be used wherever the wiring is done under the inspection of this Board, or a local board of Fire Underwriters.

The quality of this wire is such as to make it an absolute standard for interior wiring and to give the best possible fire protection. Each foot is carefully inspected in the various stages of manufacture and, when completed, is finally inspected by an authorized representative of the National Board of Fire Underwriters.

Single Braid; Solid Wire.

ELECTRIC LIGHTING PLANTS

Illustrations below show a few Applications of Electricity to the Common Needs of the Country Home.

Lighting Outfit in a Country Home.

Ironing.

Electric portable lamp as compared with old style dirty oil lamp.

Vacuum Sweeping.

Washing.

Illumination.

Churning.

Jupiter Electric Lighting Plants consist essentially of an Engine (Gasoline or Kerosene), a Dynamo, a Switch Board and a Perfection Storage Battery. These plants are designed and built especially for people who have no knowledge of electricity. Detailed explanations and directions accompany every piece of apparatus, so that any man with ordinary mechanical intelligence can set up and operate any of these plants, small or large.

Jupiter plants are simple, economical and efficient, and are giving perfect satisfaction. They are built in several sizes and in a variety of combinations. In order that every plant sold may be perfectly adapted to the conditions under which it is to be operated, salesmen and prospective customers should send us with their orders the following data:

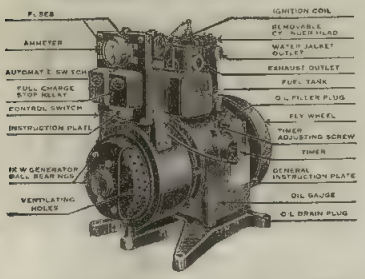
(Continued on next page).

ELECTRIC LIGHTING PLANTS

PERFECTION



Engine. 3¼ inch bore x 3¼ inch stroke, rating 3½ H. P. normal speed 1150 R. P. M., water cooled, L type motor governed electrically, all castings of highest grade semi-steel.

Piston. Semi-steel, with 3 high-grade piston rings, insuring perfect compression. Hollow ground piston. Drop forged connecting rod with high-grade die cast babbitt bearing.

Crank Shaft. Large drop forged steel connecting rod of extra length, which insures smooth running and minimizes vibration. The crank shaft is accurately counter balanced and supported in extra long bearings.

Cam Shaft. The cam shaft is large and massive and cast in one piece.

Gears. The time gears are made of hardened steel, one being integral with the cam shaft; cut in helical form to insure absolute quietness and long wearing qualities.

Carburetor. The carburetor used is designed especially for this engine; efficiency is very high on either gasoline, kerosene or alcohol.

The carburetor draws its air through crank case and maintains a slight vacuum in crank case, preventing leakage of oil through bearings, also eliminates bad smelling fumes from crank case.

Lubrication. Splash system. Only one place to oil.

Fuel Supply. Fuel tank supported on crank case arranged for suction feed to carburetor, which meets the requirements of the board of underwriters.

Cooling System. Thermo Syphon water cooled.

Ignition. 32-volt jump spark.

ELECTRICAL SPECIFICATIONS

Generator. 1150 R. P. M. normal speed, ball-bearing, guaranteed against defective workmanship and material for 1 year. Form wound armature coils, large commutator. Generator direct connected to crank shaft, eliminating belt losses. Wound for shunt operation while charging and compound with high torque for starting.

(Continued In Next Column)

ELECTRIC LIGHTING PLANTS

PERFECTION

Switchboard. Switchboard is bolted to top of generator. The board is made of slate, which is a material approved by the board of underwriters, equipped as follows:

Zero center ammeter registering charge and discharge of battery.

Automatic cut-in and cut-out switch, for generator circuit.

Automatic engine stop relay, to stop engine when battery is fully charged, or being charged at a high injurious rate.

Combination engine cranking and ignition switch. Generator and light fuses.

Battery. Perfection sealed-in type, high efficiency. Guaranteed for two years. Sizes and capacities as shown in table.

Closing starting switch starts engine electrically. When generator gets up to speed, battery charges automatically. Opening switch stops engine. High starting torque enabling engine to be cranked electrically while battery is in low state of charge.

Automatic electric stop positively stops engine when battery is fully charged. Also stops engine if battery is charged at a high injurious rate.

In case battery is discharged too low to crank engine electrically, battery spark is available for cranking engine by hand.

Engine will charge battery and supply current for lighting and motors, and deliver belt power at same time.

If most of engine capacity is required for belt power, electric load may be reduced to a few amperes, and 80 per cent of engine capacity delivered in the form of belt power.

In case battery wire should come loose or break, engine will not run away, as is the case with some other makes of plants, but will stop immediately.

Compare these features with those of any other make of plant.

Generating Unit for Following Systems, 32 Volts, 30 Amperes, Capacity Fifty 20 Watt Lamps. 1,200 Watts.

Complete with Water Tank Battery.

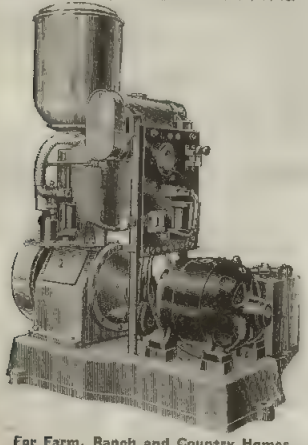
HOLT, 110 Volt Direct Current.



For Farm, Ranch and Country Homes.

110 volt Direct current standard equipment burns lights directly off generator. Uses no storage battery except small six volt battery for starting.

Simple, sturdy and strong. Built for a long life and continuous service. Will furnish power for thirty 110 volt lights of 25 watt capacity or thirty seven 20 watt lamps, or supplying current for ironing, washing, cleaning, operating water systems, etc.

✚F. O. B. Illinois Factory Only.

ELECTRIC LIGHTING PLANTS

HOLT, 110 Volt Direct Current.

The elimination of the storage batteries in the Holt allows it to deliver direct to the lights or other appliances every bit of the power created. Regardless of the number of lamps used up to the capacity of the plant, the flow of current is even, giving a steady white light at all times under all conditions.

The engine is controlled by a specially designed electric governor directly connected to the carburetor. In this way the voltage is maintained constantly and the light is without flicker. When additional lamps are turned on, the governor opens the carburetor to take care of the additional load. With this automatic governor, gasoline consumption is proportionate to the load, thus making the machine very economical.

Specifications.

Engine. Single cylinder, 4 cycle, 2¾ inch bore x 3 inch stroke, rating 1.7 H. P.; normal speed 1600 R. P. M., water cooled, valves in head, mounted in cages, built for heavy duty, continuous service and dependability.

Crank Shaft. Oversized and counter balanced.

Main Bearings. 1¼x4 inches; made of high speed babbitt.

Connecting Rod Bearings. 1¼x1.8 inches.

Oiling. Combined splash and force feed. Only one place to oil.

Ignition. Atwater-Kent "CC".

Carburetor. Schebler "AL"; special design for this plant.

Cooling. Water, by percolation with large surfaced copper tank "Radiator".

Fuel. Gasoline; supply for 8 hour at full load.

Coupling. Silent; of special design.

Generator. 750 watt capacity General Electric; duplex wound; 7 volt for charging battery; 110 volt for lighting and power.

Engine Starter. Included in generator winding.

Battery. None in lighting circuit; Columbia 3 cell 80 ampere hour for starting only.

Governor. Electro magnetic; designed especially for this plant.

Control Board. Holt semi-automatic and mounts voltmeter, main switch, fuses, battery protective device and automatic 6 volt switch. Mounted on two vertical standards. Complete plant assembled on substantial iron base.

Control. Plant may be started or stopped from any one of three different points by means of snap or push switches. It is not necessary to go to the engine in order to start or stop it.

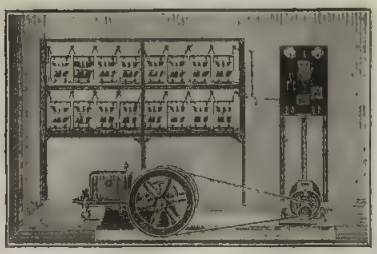
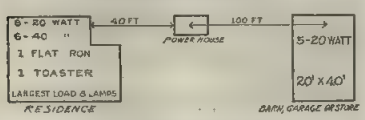
ELECTRIC LIGHTING PLANTS

JUPITER



1st—A sketch similar to the one below, showing the relative positions of the power plant and the buildings to be lighted, with the distance between them indicated.



2nd—The number of lamps of each size (wattage) to be wired in each building.

3rd—The maximum number of lamps that will be burned at any one time in each building.

4th—If a pump, washing machine, feed cutter, sewing machine, flat iron or other piece of electrical apparatus is to be operated, specify it.

5th—If the purchaser already has a engine, give us the make and speed of engine and diameter and face of hte flywheel.

The above data will enable us to make what-ever corrections may be necessary in the order, to advise the customer as to sizes of wire to be used between the power plant and the various buildings and to give him whatever information may be needed in addition to that accompanying the apparatus.

All of the plants listed are rated in terms of 20 watt, 16 candle power lamps. This standard has been adopted by nearly all the manufacturers of domestic lighting plants. 20 watt lamps are too small for most purposes where good illumination of a whole room is desired. 40 watt lamps are commonly used in homes that are supplied with current from municipal plants. In order to determine the capacity in 40 watt lamps of any of the plants listed, divide the listed capacity in 20 watt lamps by 2.

Selection of an Engine.

If lights are to be operated direct from the generator, an engine with **throttle governor must be used.** See Fuller and Johnson Engines, our Catalogue, page 438, and T. & M. Engines, page 434. If the lights are to be operated from battery only, a "hit and miss" governed engine may be used but we do not recommend it because of its varying speed. See Monarch Engines, pages 434 and 435.

ELECTRIC LIGHTING PLANTS

JUPITER

Specifications do not include Engines.

30 VOLT SYSTEMS

30 Volt systems are recommended when the distance from the plant to the lamps ranges from 60 to 250 feet.

SYSTEM NO. 1—30 VOLT

Battery. Sixteen Faure type, 40 ampere hour, 5 plate Perfection, sealed in glass jar cells, dust proof, size of plate 6x6 in.; continuous 8 hour discharge rate, 5 amperes.

Generator. 15 amperes 30-40 volt, 1850 R. P. M.; ball-bearing 4 inch pulley.

Switchboard and Accessories. Type FN. 30 ampere, 1 hydrometer testing outfit.

CAPACITY—

Battery. 160 watts for 8 hours continuously or 8, 20 watt lamps. 260 watts for 5 hours continuously or 13, 20 watt lamps.

Generator. 540 watts continuously or 27, 20 watt lamps.

Battery and Generator Combined. 700 watts for 8 hours, or 35-20 watt lamps. Maximum capacity of battery on 72 hour intermittent discharge 1840 watt hours.

Engine—Requires a 1½ to 2 H. P. engine. See general description.

		Each

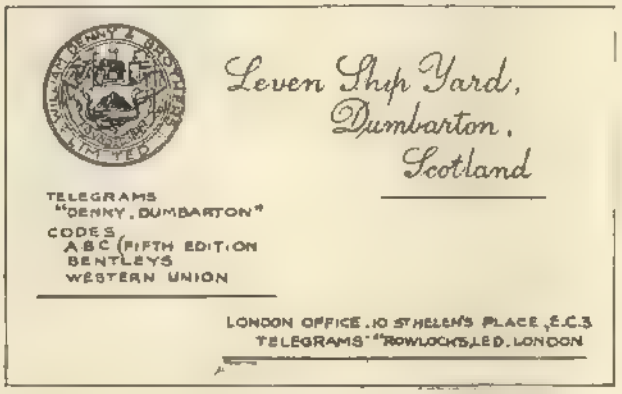
WILLIAM DENNY & BROTHERS, LTD.,

Telegrams / *Télégrammes* / Telegramas } "DENNY, DUMBARTON." **DUMBARTON, SCOTLAND.** Codes / *Codes* / Códigos } A B C (5th Edition). BENTLEY'S. WESTERN UNION.

The following eight pages are devoted to the products of the Firm of William Denny & Brothers, Ltd., Shipbuilders and Engineers. Their works are situated at Dumbarton, Scotland, and give employment to some 4,400 persons.

The firm was established in 1844, and the fourth generation is now engaged in carrying on the business. In 75 years they have constructed more than 1,140 vessels, their output including express passenger steamers, high class passenger and cargo ships, plain cargo boats, paddle craft, luxurious private yachts, tugs, light draught vessels of all types for inland waterways, crane lighters, train ferries, destroyers, submarines and many other interesting vessels for special service.



The firm possesses the first private Experimental Tank, which has enabled them to cope successfully with many of the difficult problems of economical and high speed propulsion.

To the credit of Dumbarton belongs the first ocean-going vessel constructed in mild steel, the first turbine merchant vessel, the first merchant ship with combined reciprocating and turbine machinery, the first geared turbine vessel for the British Navy and other notable craft.

The Firm specialises in light draught high speed passenger vessels and in shipment work for abroad, in both of which respects they have a long and varied experience.

See also our pages in Marine Engine and Marine Boilers Sections.

Les pages ci-après sont consacrées à l'énumération des produits de la firme William Denny & Brothers, Ltd., Constructeurs navals et Ingénieurs. Leurs usines sont situées à Dumbarton (Ecosse), et emploient un personnel d'environ 4,400 employés et ouvriers.

La Maison a été fondée en 1844 et c'est la quatrième génération qui continue les affaires en ce moment. Au cours de 75 années, elle a construit plus de 1,140 navires, parmi lesquels des paquebots rapides, des navires mixtes pour passagers et marchandises, des navires marchands ordinaires, des navires à aubes, de luxueux yachts privés, des remorqueurs, des navires de faible tirant d'eau, de tous types, pour navigation intérieure, des bateaux-grues, des bateaux-transbordeur, des contre-torpilleurs, sous-marins et de nombreux autres navires intéressants pour des services spéciaux.

La Maison a été la première à posséder un réservoir d'expérience, ce qui lui a permis de résoudre avec succès, un grand nombre de problèmes ardus de la propulsion économique à grande vitesse.

Dumbarton peut se vanter d'avoir construit le premier navire de haute mer, en acier doux, le premier navire marchand à turbines, le premier navire marchand avec machines alternatives et turbines combinées, le premier navire à turbines pour la Marine de guerre britannique, ainsi que d'autres bâtiments notables.

La Maison se spécialise dans la fabrication de paquebots rapides à faible tirant d'eau et de navires pour l'étranger, branches dans lesquelles elle a acquise une grande expérience.

Las 8 páginas siguientes están consagradas á los productos de la firma William Denny & Brothers, Ltd., Constructores navales é Ingenieros. Sus talleres están situados en Dumbarton, Escocia, en donde se emplean alrededor de 4,400 obreros.

La casa fué fundada en 1844, y la cuarta generación está hoy día al frente de aquellos negocios. En 75 años ellos han construido 1,140 buques, incluyendo vapores rápidos de pasajeros, vapores de carga y de pasajeros de alta clase, vapores de carga, buques á ruedas, remolcadores, buques de poco calado de todos los tipos para la navegación fluvial, yachts lujosos particulares, barcos-grúas, tren "ferry," destróyers, submarinos y muchos otros navíos interesantes para servicios especiales.

La casa posee el primer tanque experimental privado, lo cual ha facilitado con gran éxito una serie de problemas difíciles referentes á la propulsión económica y de gran velocidad.

Al crédito de la casa Dumbarton pertenece el primer buque transatlántico construido de acero dulce, el primer buque mercante con maquinaria alternativa y turbinas combinadas, el primer buque á turbina de engranaje para la flota Británica, y otros barcos notables.

La firma se especializa en los vapores de pasajeros de poco calado y de gran velocidad, y en trabajos de buques para el extranjero, operaciones en las cuales tienen una larga y variada experiencia.

DUMBARTON, SCOTLAND.

EXPRESS PASSENGER VESSELS.

The successful construction of this class of vessel calls for wide experience and technical skill of a high order. Each ship is a problem in itself; high powers must be produced on the minimum of weight, the best design of hull must be associated with suitable propellers, and the whole wedded to accommodation in which the comfort of the passenger is carefully studied.

The Firm took up the construction of such craft in 1894, and is at present engaged in turning out the largest and fastest Channel steamer in the world. Among their clients are the Union Steamship Coy. of New Zealand, the Canadian Pacific Railway Coy., Messrs. Huddart Parker, and most of the prominent railway companies in Britain. The development of these fast ships was made possible by the advent of the turbine, latterly geared, and by the Michel thrust block. In the introduction of these Messrs. Denny were pioneers.

The blocks show the "Paris" and the "Princess Margaret." Of these the former holds the blue ribbon of the English Channel, having steamed from England to France at an average speed of 25 knots. The "Princess Margaret" developed over 23 knots, and was luxuriously fitted up for a large number of passengers.

For machinery see our pages in Marine Engines and Marine Boilers Sections.

PAQUEBOTS RAPIDES.

La construction de ce genre de navire exige une grande expérience et une habileté technique consommée de la part des constructeurs. Chaque navire est un problème en lui-même: il faut produire le maximum de vitesse avec des machines présentant le minimum de poids; le meilleur modèle de coque doit être combiné avec les hélices les mieux appropriées; et le tout doit s'associer avec un aménagement réunissant les meilleures conditions de confort pour les passagers.

La Maison a entrepris la construction de navires de cette classe en 1894 et possède en ce moment sur chantier le plus grand et le plus rapide paquebot au monde entier. Parmi ses clients, citons la "Union Steamship Coy of New Zealand" la "Canadian Pacific Railway Coy," MM. Huddart Parker, ainsi que nombreuses des plus importantes compagnies de chemins de fer de Grande-Bretagne. L'extension qu'a prise la construction de ces navires rapides est due à l'invention de la turbine, ensuite de la turbine à engrenages et butée à collets Michel. La firme Denny a été le promoteur de l'application de ces brevets.

Les clichés ci-dessus représentent le "Paris" et le "Princess Margaret." Le premier peut être considéré comme le champion de la Manche, ayant voyagé d'Angleterre en France, à une vitesse moyenne de 25 noeuds. Le "Princess Margaret" a développé plus de 23 noeuds et est luxueusement aménagé pour un grand nombre de passagers.

Voir les pages dans les Sections "Machines de Marine" et "Chaudières de Marine."

BUQUES RAPIDOS DE PASAJEROS.

El éxito de la construcción de esta clase de buques, exige una amplia experiencia y una habilidad técnica de alto grado. Cada buque constituye él mismo un problema: es necesario producir una gran potencia en un mínimo de peso; el mejor diseño del casco debe estar combinado con propulsores apropiados y el todo unido á una acomodación, en la cual el confort de los pasajeros es cuidadosamente estudiado.

La Casa emprendió la construcción de estos navíos en 1894, y está en la actualidad produciendo los más grandes y rápidos vapores de travesía en el mundo. Entre sus clientes figuran la "Union Steamship Coy" de Nueva Zelandia, la compañía Canadiense ferroviaria del Pacífico, la firma Huddart Parker y las compañías ferroviarias más prominentes de la Gran Bretaña. El desarrollo de esos vapores rápidos se hizo posible con el advenimiento de la turbina, y más tarde del sistema de turbina á engranajes, y por el soporte de empuje de Michel (Thrust Block). En la intruducción de estas los Señores Denny tienen los empeñadores.

Los grabados muestran los vapores "Paris" y el "Princess Margaret" de los cuales el primero ostenta el galardón azul en el Canal de la Mancha, navegando marchando de Inglaterra á Francia, á una velocidad de 25 nudos. El "Princess Margaret" desarrolló alrededor de 23 nudos, estando lujosamente equipado para un gran número de pasajeros.

Para maquinarias, véase nuestra anuncio en la Sección Máquinas de Marina y Calderas.

WILLIAM DENNY & BROTHERS, LTD.,

DUMBARTON, SCOTLAND.

PASSENGER AND CARGO VESSELS.

The largest part of the ocean-going tonnage constructed by the Firm falls into this category. They are represented in the fleets of the British India Steam Navigation Coy., the Australasian United, the Russian Steam Navigation, the Compañia Trasatlántica of Barcelona, the British and Burmese, the New Zealand Shipping Coy, the United Steam Ship Coy. of New Zealand, and other famous lines.

The largest vessel of this type which the firm has built is the "Remuera" with a tonnage of 11,276, trading between Great Britain and New Zealand. Besides accommodation for first, second and third class passengers, she is completely refrigerated and carries immense quantities of mutton, butter cheese and other perishable goods.

An earlier vessel for the same company was the "Otaki," notable for being the first merchant ship ever fitted with combined turbines and reciprocating machinery.

The left-hand block shows the "Indarra," while the other illustrates the "Infanta Isobel de Borbon." The "Indarra" is a popular ship in Australian waters. She carries a large number of passengers in luxurious accommodation, which includes a passenger lift, a swimming bath and gynasium. The "Infanta Isobel" trades between Spain and South America, and also conforms to the exacting requirements of the present-day travelling public.

For machinery see our pages in Marine Engines and Marine Boilers Sections.

BATEAUX MIXTES POUR PASSAGERS ET MARCHANDISES.

La plus grande partie du tonnage de navires de haute mer, construite par la Maison, appartient à cette catégorie. Ils sont représentés dans les flottes de la "British India Steam Navigation Co.," la "Australasian United," la "Russian Steam Navigation," la "Compañia Transatlantica de Barcelona," la "British & Burmese," la "New Zealand Shipping Coy" la "United Steam Ship Coy of New Zealand" et autres lignes de navigation célèbres.

Le plus grand navire de ce type construit par la Maison est le "Remuera" de 11,276 tonnes, assurant le service entre la Grande-Bretagne et la Nouvelle Zélande. Outre les aménagements de première, deuxième et troisième classe pour passagers, il est entièrement refrigéré et peut donc porter d'immenses quantités de viande, beurre, fromage et autres marchandises de ce genre.

Un navire fourni précédemment à la même Compagnie le "Otaki" est un exemple remarquable parce qu'il était le premier bateau marchand muni de machines alternatives et à turbines combinées.

Le cliché de gauche représente le "Indarra," celui de droite le "Infanta Isobel de Borbon." Le "Indarra" est un navire très connu dans les eaux australiennes.

Il possède de luxueux appartements pour un grand nombre de passagers et, entre autres, un ascenseur, un bain de natation et un gymnase. Le "Infanta Isobel" fait le service entre l'Espagne et l'Amérique du Sud et possède tous les perfectionnements modernes.

Les machines font l'objet de sections spéciales de Machines de Moteurs et Chaudières.

BUQUES DE CARGA Y PASAJEROS

La parte más grande de tonelaje de navíos de ultra mar construido por la casa está dentro de esta categoría, y está representado por las flotas de la "British India Steam Navigation Co.," la "Australasian United," la "Russian Steam Navigation," la "Compañia Transatlántica de Barcelona," la "British & Burmese," la "New Zealand Shipping Co., la "United Steam Ship Co. of New Zealand" y otras líneas de vapores renombrados.

El buque más grande de este tipo construido por la casa es el "Remuera" con un tonelaje de 11,276 viajes entre la Gran Bretaña y Nueva Zelandia. Además de acomodación para pasajeros de primera, segunda y tercera clase posee cámaras frigoríficas para un gran cargamento de carnes, mantequilla, queso y otros víveres frescos.

Uno de los primeros buques para la misma compañía fué el "Otaki" notable por ser el primer buque mercante equipado con turbinas y máquinas alternativas combinadas.

El grabado á la izquierda muestra el "Indarra" y el otro grabado representa el "Infanta Isobel de Borbon." El "Indarra" es un buque popular en las aguas Australianas. Tiene alojamiento para un gran número de pasajeros en [illegible] Isobel" viaja entre España y América del Sur y también posee todas las ventajas de las modernas [illegible].

Las máquinas son objeto de secciones especiales de Máquinas de Marina y Calderas.

WILLIAM DENNY & BROTHERS, LTD.,
DUMBARTON, SCOTLAND.

PADDLE STEAMERS.

In the development of the high-speed paddle steamer the Firm's Experimental Tank played a large part. As long ago as 1888 the "Princess Henriette," built for the Belgian Government, attained the then remarkable speed of over 21 knots. The right-hand block illustrates the "Leopold II," a third order for the same Government. This ship attained a speed of over 22 knots.

The Paddle Steamer was a familiar craft in the early days of English Channel services, and the Dumbarton firm was called upon to supply ships for this traffic. In recent years, of course, the geared turbine has superseded paddles for this particular trade, but here again Denny's products were chosen to satisfy the requirements of continental traffic. (See page 19.)

The firm has also built numerous paddle steamers for the heavy excursion traffic of the Clyde and the Thames.

Denny's Paddlers are found further afield than in British waters however. For instance, the left-hand block shows the "Corumba," built for service in South America for Messrs. Mihanovich.

This page deals only with Paddle Steamers launched and delivered complete at Dumbarton for service in more or less open water.

For Paddle Vessels delivered in pieces for river service, see page 23.

NAVIRES À AUBES

Dans le développement des navires à aubes à grande vitesse, le réservoir d'expérience de la Maison a joué un rôle très important. Déjà en 1888, le "Princesse Henriette," construit pour le Gouvernement belge, atteignait la vitesse, très remarquable à cette époque, de 21 noeuds. Le cliché de droite représente le "Léopold II," troisième navire commandé pour le même Gouvernement. Ce navire a atteint une vitesse de plus de 22 noeuds.

Le navire à aubes était un bâtiment d'un modèle très populaire au début des services réguliers dans la Manche, et la Maison Denny a fourni de nombreux navires pour ce genre de trafic. Dans les dernières années, la turbine à engrenages a détrôné les navires à aubes, d'un modèle plutôt désuet pour ces services particuliers. Mais, cette fois encore, les bâtiments de las Maison Denny ont été choisis pour répondre à toutes les exigences du trafic continental. (Voir page 19.)

La Maison a également construit de nombreux navires à aubes pour le service d'excursions sur la Clyde et sur la Tamise.

Toutefois, on rencontre les navires à aubes Denny bien plus loin que dans les eaux britanniques, par exemple, le cliché de gauche représente le "Corumba," construit pour un service intérieur dans l'Amérique du Sud, pour MM Mihanovich.

La présente page ne trait qu'à des navires à aubes, lancés et fournis à Dumbarton, pour la navigation en eaux plus ou moins profondes.

Voir page 23 pour les navires à aubes fournis en pièces détachées pour la navigation intérieure.

VAPORES Á RUEDAS.

En el desarrallo de la gran velocidad en los vapores á ruedas, los tanques experimentales de la casa juegan un papel muy importante. Desde 1888 el vapor "Princess Henriette," construido por el Gobierno Belga, había obtenido la entonces notable velocidad de 21 nudos. El grabado de la derecha muestra el "Leopold II," el tercer pedido del mismo gobierno, este vapor desarrollaba una velocidad de 22 nudos.

El vapor á ruedas era una nave familiar en los primeros días del servicio regular de navegación en el Canal de la Mancha y la firma Denny fué entonces llamada para suministrar buques para este tráfico. En recientes años, naturalmente, la turbina á engranaje ha reemplazado las ruedas de paletas para este servicio, pero, he aquí, que de nuevo los productos Dennys fueron escogidos para las necesidades del tráfico continental. (Véase página 19.)

La casa ha construido también numerosos vapores á ruedas para el tráfico pesado de recreo de los ríos Támises y Clyde.

Los vapores á ruedas Dennys sin embargos, son encontrados aún más lejos que en las aguas británicas. Por ejemplo, el grabado de la izquierda muestra el "Corumba," construido para los Srcs. Mihanovich, para prestar servicios en las aguas de la América del Sur.

Esta página se refiere sólamente á los vapores á ruedas botados al agua y entregados completos en Dumbarton, para la navegación en ó menos, en aguas profundas.

Por buques á ruedas entregados en secciones para la navegación fluvial, véase página 23.

WILLIAM DENNY & BROTHERS, LTD.,
DUMBARTON, SCOTLAND.

FOREIGN RIVER SCREW VESSELS.

The craft described on this page are all shipment jobs, of which the Firm has made a speciality.

When the draught is not too restricted the screw ship is sometimes preferred to the paddler. In special instances, however, the screw is adopted for very small draughts in which case tunnels may be built aft, and the Firm have designed and constructed vessels of this type.

Denny's have designed and built more than 100 twin screw vessels for foreign river traffic, some for towing purposes, others for the carriage of passengers and general cargo. They have varied in length from 75 feet to 180 feet, and in draught from 3 feet up to 6½ feet.

The hull structure is often completely galvanised in order to prevent corrosion.

As feeders to large main line steamers this class of little vessel has proved most profitable, being largely run by native labour alone.

The left-hand block shows a vessel 165 feet long in the service of the Irrawaddy Flotilla Coy., while the companion block illustrates one of a large class of steamer, 100 feet long, also plying in Burmese waters. Both these craft have accommodation for Europeans as well as for cargo and native passengers.

For machinery see our pages in Marine Engines and Marine Boilers Sections.

NAVIRES À HÉLICES POUR NAVIGATION FLUVIALE ÉTRANGÈRE.

Les bâtiments décrits dans la présente page constituent des travaux pour l'exportation dans laquelle la Maison s'est spécialisee.

Le bateau à hélice est souvent préférable au bateau à aubes, lorsque le tirant d'eau n'est pas trop réduit. En certains cas, cependant, le type à hélice à été adopté même pour de très faibles tirants d'eau, et dans ces cas, l'hélice est placée dans un tunnel aménagé à l'arrière. La Maison a étudié et construit de nombreux navires de ce type.

La Maison Denny a étudié et construit plus de 100 bateaux à double hélices pour la navigation fluviale à l'étranger, parmi lesquels quelques remorqueurs, les autres pour marchandises et transport de passagers. Leur longueur varie de 22,50 m. à 54 m., et leur tirant d'eau est de 0,90 m. à 2 m.

La coque est parfois complètement galvanisée pour prévenir la rouille

Ces petits bâtiments sont d'un emploi très avantageux pour l'approvisionnement des grands paquebots, car leur équipage peut se composer presqu'exclusivement d'indigènes

Le cliché de gauche représente un navire de 50 m. de long dans le service de l'Irrawaddy Flotilla Coy., tandis que le cliche de droite représente un des nombreux bâtiments de cette classe, de 30 m. de long, navigant également dans les eaux Birmanes. Ces deux bateaux sont pourvus d'installations pour passagers européens, ainsi que pour le transport de marchandises et de passagers indigènes

Voir Sections "Machines de Marine" et "Chaudières de Marine."

NAVÍOS Á HÉLICES PARA LA NAVEGACION FLUVIAL EXTRANJERA.

Los buques á los cuales se refiere esta página son trabajos para la exportación que es la especialidad de la casa.

El vapor á hélices es comunmente preferible al de ruedas, cuando el calado no es demasiado reducido. En circunstancias especiales, sin embargo las helices son adoptadas para calados muy pequeños, en cuyo caso, se llevan túneles posteriores. La firma ha diseñado y construido navíos de este tipo.

La casa Denny ha diseñado y construido más de cien barcos de doble hélice para la navegación en ríos extrangeros, algunos para el remolque y otros para pasajeros y carga general, aquellos han variado en eslora desde 22,50 m hasta 54 m., y calado desde 0,90 m. hasta 2 m.

El casco es a menudo completamente galvanizado para evitar la corrosión.

Como auxiliares para los vapores trasatlánticos principales esta clase de barco pequeño ha desmostrado ser muy satisfactorio siendo manejados solamente por brazos indígenas.

El grabado de la derecha muestra un buque de 50 m. de eslora que presta servicios para la Irrawaddy Flotilla Coy., mientras que el grabado que le acompaña enseña uno de los vapores de la clase más grande de 30 m de eslora, que también está navegando en las aguas Burmeses. Ambos buques poséen acomodación para pasajeros y carga, tanto europeos como indígenos.

Por maquinarias véanse nuestras páginas de anuncios de la Sección Máquinas de Marine y Calderas.

WILLIAM DENNY & BROTHERS, LTD.,
DUMBARTON, SCOTLAND.

FOREIGN RIVER PADDLE STEAMERS.

Denny's have built nearly two hundred examples of this class of vessel, delivered in pieces. Their output includes large express passenger ships, towing steamers (see page 24 for illustration), small despatch vessels, stern wheelers, and other paddle craft for special service. Their experience ranges from vessels of 326 feet in length, carrying 200 tons of cargo and 2,600 passengers, and steaming 18 miles per hour, down to the smallest units with the minimum of draught. An example of the former type is shown in the left-hand block. Of stern wheelers also a long list could be given. The right-hand block shows an example of the class. This particular ship was launched at Dumbarton for the purpose of running full trials. Much valuable data was obtained on the design of suitable wheels before she was finally dismantled and shipped to her destination.

The Firm is conversant with the peculiar difficulties which have to be met in the design of river paddle craft. Provision is made to guard against the ill effects of rapid corrosion, frequent grounding, muddy water, uneven loading, inferior fuel and the presence of snags and weeds in shallow waters.

For machinery see our pages in Marine Engines and Marine Boilers Sections.

NAVIRES À AUBES POUR LA NAVIGATION FLUVIALE ÉTRANGÈRE

La Maison Denny a construit environ 200 spécimens de ce genre de navires, qui ont été livrés, démontés. Ce nombre comprend de grands paquebots rapides, des remorqueurs (voir gravure à la page 24), des petites vedettes, des sternwheelers et autres bateaux à aubes pour usage spécial. L'expérience de la Maison s'étend à des bâtiments mesurant jusqu'à 99.36 m., et pouvant transporter 200 tonnes de marchandises et 2,500 passagers, d'une vitesse de 15 [illegible] à l'heure, jusqu'aux plus petits bâtiments pour le tirant d'eau le plus réduit. Le cliché de gauche représente un bateau de la première catégorie citée ci-dessus. Nous pourrions également donner une longue liste de sternwheelers, dont le cliché de droite représente un spécimen. Ce dernier fut lancé à Dumbarton en vue d'épreuves complètes; ces épreuves permirent de recueillir de précieux renseignements et données au sujet des meilleures roues à aubes à employer, avant que ce navire soit démonté et expédié à sa destination.

La Maison est parfaitement au courant de toutes les difficultés qui se présentent dans la construction de bâtiments à aubes pour la navigation fluviale. Des dispositions spéciales sont prises en vue d'éviter les effets désastreux de la corrosion rapide, de fréquents [illegible] contre le fond des rivières, des eaux boueuses, le manque d'équilibrage du chargement, de l'emploi de combustible de qualité inférieure, et de la présence de souches et lianes dans des eaux peu profondes.

Voir aussi Sections Machines de Marine et Chaudières de Marine

VAPORES Á RUEDAS PARA LA NAVEGACIÓN EN RIOS EXTRANGEROS.

La Casa Denny ha construido cerca de 200 ejemplares de esa clase de buques, los cuales han sido entregados en piezas. Entre su producción están incluidos buques grandes rápidos de pasajeros, remolcadores (véanse grabados en página 24), pequeños buques avisos, buques de rueda á popa y otros navios á rueda para servicios especiales. Su construcción comprende buques de 99.36 m. de eslora llevando 200 toneladas de carga y 2,500 pasajeros, marchando á una velocidad de 15 millas por hora, hasta las unidades más pequeñas con un mínimo de calado. Un ejemplo de los primeros modelos está representado en el grabado de la izquierda. También se puede dar una larga lista de los de rueda á popa. El grabado de la derecha muestra un ejemplo de los de esta clase. Este buque fué botado al agua en Dumbarton para las pruebas de marcha, las cuales permitieron que se obtuvieran datos muy importantes en el diseño conveniente para las ruedas, antes que fuera desarmado y embarcado para su destino.

La Casa conoce las dificultades especiales que se presentan en el diseño de buques fluviales á ruedas. Se han tomado disposiciones especiales para evitar los efectos desastrosos de la rápida [illegible] varadas frecuentes por las aguas fangosas [illegible] empleo de combustibles inferiores y por la presencia de [illegible] y yerbas nocivas en las aguas de poco calado.

Véanse también secciones, Máquinas Marinas y Calderas Marinas

WILLIAM DENNY & BROTHERS, LTD.,
DUMBARTON, SCOTLAND.

BARGES.

From express high-powered passenger vessels to the humble barge is a big step, yet a large part of the Firm's output of shipment work is made up of this latter class of craft. The Firm has designed and built barges of various types and for many waters. Their output ranges from small types of only 65 feet in length to craft of 285 feet long for the carriage of oil in bulk on the Irrawaddy river.

For one company alone the Firm has constructed more than 100 barges.

Though a few barges have been launched, by far the greater number have been "shipment" jobs, that is to say, the vessels are erected complete in Dumbarton, then dismantled and shipped abroad for erection and launching at their destination. Great care is taken to mark all parts clearly, and fully detailed plans are supplied to ensure ease in re-erection.

Much of the Firm's output of barges has been put together by native labour without difficulty.

The Firm has executed work for service in Russia, Burma, Persia, India, Mexico, and Siberia, as well as for use in home waters.

The left-hand block shows a Denny built paddler towing two oil flats, also products of Dumbarton.

BARGES

Du grand paquebot rapide à [illegible] il y a un grand pas, et cependant, une grande partie des [illegible] pour l'exportation de la Maison [illegible] à cette [illegible]

La Maison a étudié et construit de [illegible] variés, pour la navigation dans toutes les eaux. Ses modèles comprennent tous les types, depuis la petite barge de 19,50 m. jusqu'à des bâtiments de 77,70 m. tels que ceux employés sur l'Irrawaddy pour le transport des huiles brutes.

La Maison a construit plus de 100 barges pour la même compagnie. Quoiqu'un petit nombre d'entre elles aient été [illegible] dans nos chantiers, pour la plus grande partie, nos barges [illegible] montées complètement à Dumbarton, ensuite démontées et expédiées à l'étranger pour y être remontées et lancées à leur destination.

Le plus grand soin est apporté dans le marquage des pièces séparées, et des plans détaillés sont fournis pour le remontage facile de ces bateaux.

La plupart [illegible] de ces barges ont été réassemblées par un [illegible] exclusivement composé d'indigènes, et ce, sans la moindre difficulté.

La Maison a construit des bâtiments pour la navigation en Russie, Birmanie, Perse, Inde, Mexique, et Sibérie, aussi bien que pour la navigation fluviale dans le pays.

Le cliché de gauche représente un remorqueur à aubes "Denny" remorquant deux barges à huile, produits exclusifs des chantiers navals de Dumbarton.

LANCHONES

Desde el paquebote rápido de gran poder para pasajeros hasta el humilde lan[illegible]n existe un paso inmenso, y sin embargo una gran parte de las construcciones para la exportación de la Casa pertenece [illegible] categoría.

La Casa ha diseñado y construido lanchones de diversos tipos desde hace muchos años para distintos calados. Su producción varía entre las clases pequeñas de 19,50 m. de eslora y naves de 77,70 m., tales como las empleadas en el transporte de aceite en el río "Irrawaddy."

La Firma ha construido para una casa solamente más de 100 lanchones. No obstante que sólo una pequeña cantidad de lanchones han sido botados en nuestras aguas, la gran mayoría ha sido construida completamente en Dumbarton, luego desarmados y embarcados para el extranjero para ser re-armados y botados a su destinación.

Se toma gran cuidado para marcar claramente todas las partes, y se suministran detalles y croquis completos para el montaje fácil de estos lanchones.

Un buen número de los lanchones construidos por esta Casa ha sido armado por mano de obra indígena sin ninguna dificultad.

La Casa ha ejecutado trabajos para el servicio de navegación en Rusia, Burma, Persia, India, Méjico, y Siberia, así como para la navegación en nuestras aguas.

El grabado de la izquierda muestra uno de nuestros remolcadores á ruedas "Denny," conduciendo dos chatas de aceite, también construidas en Dumbarton.

AUTOMOBILE CLOCKS

Eight Day Movement.

Steel case black enameled finish, polished nickel plated bezel; 2½ in. iveroid dial with second hand; depth 3⅛ inches.

Made in the latest model with up-to-date features, this clock combines an attractive appearance with remarkable timekeeping qualities. Convenient to use, with outside wind and set.

Each

No. A-2—Complete with necessary screws and complete directions for using $12 00

One in a cardboard box; weight each about 2 lbs.

Eight Day Movement.

Steel case, nickel plated; brass rim and bezel, highly nickel plated and polished; 2½ in. iveroid dial with second hand; extreme diameter of rim 3½ in.; depth 2½ inches.

Designed to be sunk into the dash and makes a very neat appearance. Has a new patent spring catch, which holds the movement firmly in position. The face of the clock lies very close to the dash as no part need project for winding purposes. Each

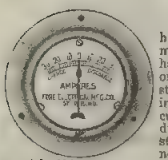
No. A-3—Complete with necessary screws and complete directions for using $12 00

One in a cardboard box; weight each about 2½ lbs.

AUTOMOBILE AMMETERS

FORE

Flush Type.



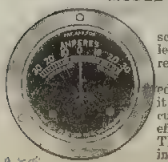
The movement of the indicator hand being extremely dead-beat, all moving parts being assembled to a hardened steel shaft which is mounted on pivots, with this means of construction the indicator hand will instantly follow the smallest change of current flow, and as the tongue produced by the magnetic field is very strong the vibration of the car will not affect the reading of the instrument in any way.

The scale board on the scale plate as well as the figures and letters are raised which enables you at a glance to get the reading. The instant the motor stops the indicator hand returns to zero. Each

No. A-541—Standard range 30-0-30; diameter case 2 inches; diameter flange 2¾ inches $5 85

One in a carton; weight each ½ lb.

MODLE DA FLUSH TYPE



Nickel plated flange; black japanned scale board with white enamled raised letters and figures which enable correct reading at a glance.

The indicator hand is so constructed and being extremely sensitive it will follow the smallest change of current flow. Vibration will not effect the reading of the instrument. The instant the motor stops, the indicator hand returns to zero.

Each

No. A26A—Standard range 30-0-30; diameter of case 2 1/16 inches $2 00 3 00

One in a carton; weight each ¼ lbs.

HUB ODOMETERS

VEEDER

For Ford Cars and Trucks.

Especially adapted to show how far a Ford car or truck travels per gallon of gasoline, per pint of oil, per battery renewal, etc.

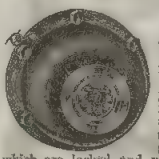
Made of hardened steel, black japanned. Studs upon which the dials revolve are of copper nickel alloy which will not rust or corrode. A special stuffing box prevents oil or grease from leaking in on the dials, which are locked and prevented from turning except when driven by the mechanism. Each

No. A-15VHO—Weight each 4 lbs. $35 40

One in a carton.

VEEDER

For Trucks Other Than Fords.



Especially adapted to tell what distance is possible to run on a gallon of gasoline, a pint of oil, a battery renewal, a tire life, etc.

Made of hardened steel; black japanned. Studs upon which dials revolve are of copper-nickel alloy and will not rust or corrode. A special stuffing box prevents oil or grease from leaking in on the dials, which are locked and prevented from turning except when driven by the mechanism.

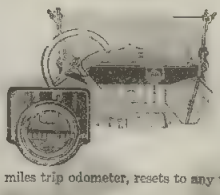
Note—When ordering specify make, model, year of car and size of front wheel. Each

No. A-16VHO—Weight each about 6 lbs. ..... ✣$47 25

One in a carton.

SPEEDOMETERS

STEWART'S FOR FORD CARS



Black enameled flange, with nickeled rim; black dial with large indicating figures. Tungsten steel magnet. Fully jeweled. French plate dial glass. Beveled odometer openings make figures easily read from driver's seat.

Rotating speed dial, 60 miles capacity, 100,000 miles season and 10 miles trip odometer, resets to any tenth mile.

Each

No. A-160A—For 1919 and 1921 models Ford Cars, that are equipped with instrument or cowl boards by the Ford Company. Board not furnished ... $30 00

No. A-160B—For 1918 or previous year model Ford Cars, that are not equipped with instrument or cowl boards; complete with instrument board ... ✣ 32 51

No. A-160C—For closed cars, Sedans and Couplets; complete with instrument board ..... ✣ 32 51

No. A-160D—For Ford Cars, where no board is used; equipped with adjustable bracket for installation on the dash ..... ✣ 30 00

One in a cardboard box; weigh each 10 lbs.

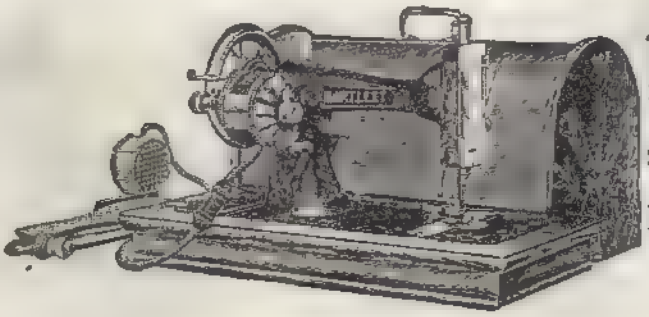
The "Bartlett" Electric Sewing Machine

Vibrating shuttle—
Automatic Tension Release—
Automatic Bobbin Winder—



Just a pressure of the foot on the foot control starts the Motor, regulates its speed or stops it.

No. W110—W't each 60 Lbs. ..... each $69.40

The Bartlett Electric is a marvel of Efficiency, Convenience and Economy. It is compact and simple, occupies only a small amount of space and is conveniently used on any table or stand.

Small Cost of operation.—Two to four cents daily is but a trifle when compared to the saving in health and energy.

Adapted to Direct or Alternating Current, 110 volt, 60 cycle.—It makes no difference whether the electric current available is direct or alternating. The Motor is universal—that is, it can be operated, and satisfactorily so, in connection with either direct or alternating current.

The Bartlett Electric Portable Sewing Machine is a first-class, ten year warranted sewing machine of the highest quality. It is well finished in black enamel, makes the Double Lock Stitch and has many desirable and practical features, including: disc tension, automatic release, positive takeup, positive double width feed, automatic bobbin winder, improved stitch regulator and self threading shuttle. All working parts are made of best quality hardened steel, while all bright parts are heavily nickel plated.

The cabinet Work is designed with a view to convenience, compactness and durability. The hansomely designed bent cover is built of choice quarter-sawed oak, and is equipped with a substantial nickel plated metal handle. The wooden case on which the sewing head rests is also built of quarter sawed oak. The cover is attached to base by a convenient locking device.

The Complete Nickel Plated Steel Attachments of highest quality are supplied **FREE** of extra charge. They are packed in a neat paste-board box. It is a real pleasure to use these attachments on the **Bartlett-Electric,** as the operator's attention is not distracted by the necessity of operating the machine because **"The Motor Does the Work."**

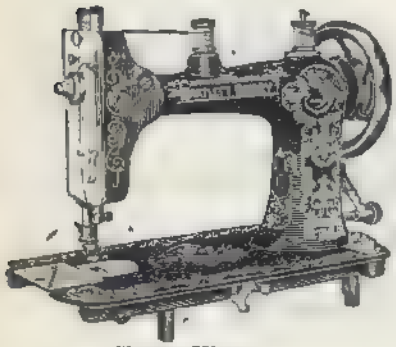
OVB Bartlett Rotary Sewing Machines

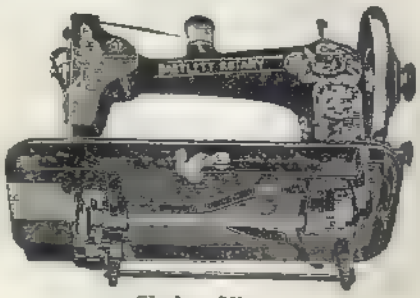


Upper View.

Equipped With All Latest Time and Labor Saving Devices.

Smooth and Easy Running Without Friction or Vibration.

Fully Guaranteed For Ten Years



Under View.

The OVB Bartlett Rotary Sewing Machine is an innovation in the sewing machine world, as it is the only machine of the rotary type that is so simply constructed, so easily understood and operated and so self guarded against trouble attending other machines of like type that it may be safely marketed by dealers who have no mechanical knowledge of sewing machines and who heretofore have been unable to successfully sell a Rotary machine because of their troublemaking proclivities. It is universally acknowledged that the rotary type of machine is superior to all others in easy running qualities and in speed. This is due to the fact that the under-stitch forming mechanism revolves continuously, and has no lost motion on which account the rotary machines are geared higher than vibrating machines, consequently more work can be done with them in the same amount of time.

FEATURES—Among the many important features of the Bartlett Rotary sewing machine is the automatic tension which is a feature exclusive to this machine. This feature enables you to sew on any class of work without changing the tension. In other words, it automatically adjusts itself to a perfect stitch on all classes of work from the flimsiest chiffons to the heaviest woolens—on other machines it is necessary to change the tension when sewing on different classes of goods. Some of the other features are. self-setting needle, self-threading shuttle, automatic bobbin winder, two spool pins, a steel capped needle bar, which prevents dust and grit from entering bearings, positive cam driven takeup and automatic gear releasing device.

STITCH—Is known as double lock stitch and is formed by two threads being drawn together and locked in the center of the goods, and presents a finished and smooth appearance on both sides, in fact it is hard to distinguish the under side—which is commonly known as the wrong side—from the upper.

SEWING HEAD—Is most attractive in appearance and substantial in construction. It is well finished in highest quality black enamel, and decorated with an imported decalcomania of Egyptian design, covered by a glass hard, smooth, transparent varnish of very best quality.

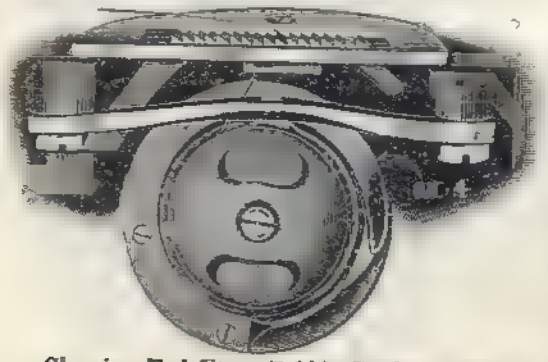
THE ARM Is of generous size, the clear space underneath for sewing being 5¼x3 inches. There are two spool pins on the arm.

THE NEEDLE BAR—Is round, accurately finished and thoroughly hardened. It is equally rigid in every direction, has no lost motion and consequently operates freely, easily and without noise. The upper end of the needle bar is covered and protected by a handsome nickel plated steel cap which insures absolute cleanliness in the bearings, thereby preventing the accumulation of dust and grit and the ensuing hard and noisy running which is common to other machines less fortunately equipped. The needle is short, strong and self-setting. It is so made that it is impossible for one to place it in the needle bar incorrectly, thereby causing trouble.

THE UNDER STITCH FORMING MECHANISM—Consists of a hook which rotates around bobbin case, the latter answering the same purpose as a shuttle. This rotating movement is responsible for the easy running qualities of the OVB Bartlett Rotary, in which respect, as in others, it is superior to vibrating machines. A splendid feature of this is that under no conditions can it clog of choke up—in this respect it is an innovation, as all other rotary machines are handicapped by the clogging complaint.

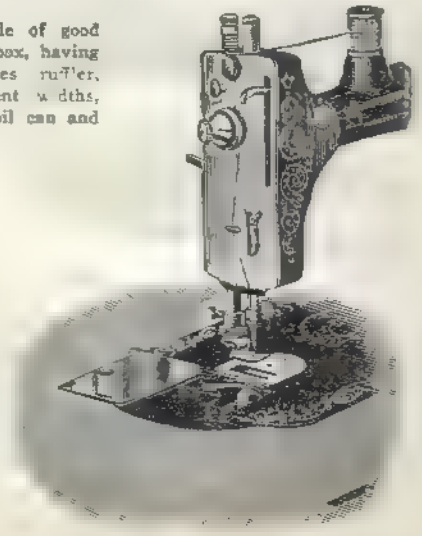
THE BOBBIN CASE—May be removed handily from above by opening the hinged plate shown in illustration, which is provided for that purpose. The tension is in the bobbin case—accompanying bobbin holds 500 yards of ordinary sized thread, so the user is not annoyed by the necessity of changing or refilling the bobbins at frequent intervals.

ATTACHMENTS—The attachments furnished free of charge with each machine are made of good quality spring steel and are packed in a neat and substantial black enameled velvet lined metal box, having metal racks for holding each individual attachment. The full set consists of the following pieces ruffler, tucker, binder, braider-foot, under braider plate, shirring plate, feller, four hemmers of different widths, quilter, cloth guide, thread cutter, two screw drivers, twelve assorted needles, six bobbins, filled oil can and well illustrated book of instructions.



Showing End View, Bobbin Hook and Race

The OVB Bartlett Rotary is an ideal family sewing machine. Its price is moderate, and because of its very many good points, we are confident it will soon be a leader in sales and popularity of the entire Bartlett line.



Showing Face Plate and Hook Cover.

Bartlett Rotary Sewing Machines

This Bartlett Rotary sewing machine is without a doubt the most handsome and magnificently equipped machine that the present market affords. The case is substantial in construction and different in appearance from all others. It is built on beautiful lines, which immediately appeal to the eye of the discriminating. It has six full length side drawers which are encased in dust proof panels. The beautiful paneled drop front piece, and the hand rubbed mirror finish of the quarter sawed oak case are exclusive features which are not incorporated in other machines. It is equipped with a tested steel chain automatic lifting device which with one motion of the hand lifts the sewing head to position and at the same time automatically pulls back the front panel thereby leaving ample knee room for the operator.

THE STAND on this machine is ball bearing type, a marvel of simplicity, noiselessness and speed. The new steel pitman has non-binding easily adjusted connections at either end. The belt retaining guard is a device of much merit and eliminates all fussing and straining incident to belting machines less fortunately equipped

THE ATTACHMENTS are packed in an elaborate velvet lined metal box and consist of the following: tucker, ruffler, braider, binder, four hemmers of different widths, shirring slide, feller, quilter, cloth guide, four bobbins, six needles, two screw drivers, filled oil can and illustrated book of directions.

No. W91R—6 drawer, w't 135 lbs. ....each $75.30

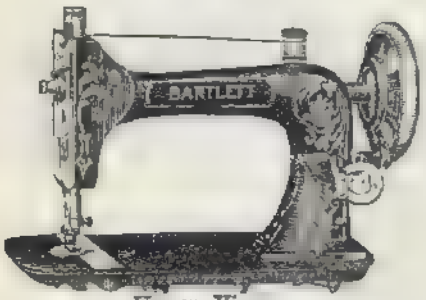
This attractive model of the Bartlett Rotary sewing machine has four side drawers, with most attractive embossed pulls. These drawers are encased in solid panels which have ornamentation, in harmony with that of the center panel. The entire case throughout is made of choicest selected quarter sawed oak, which is given a high finish. There is an 18-in. tape measure transferred on the front of table, handy for the operater. It is equipped with a tested steel chain automatic lifting device which automatically lifts sewing head to position, and at the same time moves the center panel back, leaving sufficient knee room for the operator.

THE STAND is finished in best quality enamel and is ball bearing type which makes it noiseless and speedy. It has the steel pitman and also the belt retaining guard, which prevents machine from becoming unbelted.

THE ATTACHMENTS which are supplied with this model are complete in every detail and are of best nickeled steel. They consist of the following: tucker, ruffler, braider, binder, four hemmers of different widths, shirring slide, feller, quilter, cloth guide, four bobbins, six needles, two screw drivers, filled oil can and illustrated book of directions.

No. W81R—4 drawer, w't 130 lbs. ....each $72.70

CVB Bartlett Sewing Machines

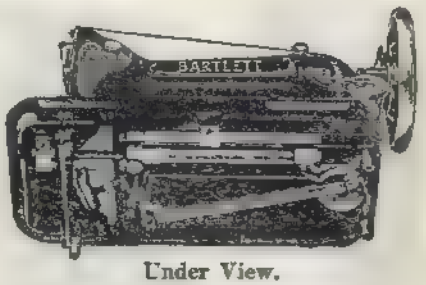


Upper View.

Fully Guaranteed for Ten years

Full size arm, Automatic Tension and Double Lock stitch Regulator.

Full Set of Attachments.



Under View.

The CVB Bartlett is a family sewing machine of the very highest grade embracing the most complete combination of modern time and labor-saving improvements ever combined in one machine and is presented to the trade and public as an ideal embodiment of the very best in modern sewing machine manufacture.

The basic construction is on the gear principle. These gears are so accurately fitted and adjusted that they operate most quietly and easily. They are riveted to the shafts by steel pins and cannot become loose. In this particular alone, the CVB Bartlett has a great advantage over other sewing machines, which make us of eccentric shafts with many screws and parts, any one of which, if loosened will destroy the perfect action and cause a poor stitch to be made. In a large measure, the gears are responsible for the wonderfully easy running qualities and the almost entire absence of the objectionable noise accompanying other machines. The clever adoption of the gear principle gives the CVB Bartlett a simplicity of construction which makes it ideal for family use. Not only is the user assured that the CVB Bartlett will always operate correctly, but the necessity of constant payment of money to sewing machine repair men is done away with. It is interesting to know that no other high grade up-to-date family sewing machine has this form of construction.

The CVB Bartlett head has 15 per cent less parts than any other sewing machine on the market. The result is obvious; less wear, less friction, and less power required to operate.

SPECIFICATIONS

THE STITCH—Formed, is what is known as the double lock stitch, made by two threads which are firmly locked in the center of the goods, presenting a smooth and finished appearance on either side. It is recognized to be the best all around, serviceable stitching for family sewing.

THE SEWING HEAD—Is unusually handsome and well proportioned—it is elaborately finished in three durable coats of hand rubbed and polished baking japan with handsome imported decalcomania decorations in gold and bright colors covered with an imported English varnish, hard baked.

THE ARM—Is of the largest size furnished with a family sewing machine and is very strong and perfectly proportioned. The clear space underneath is 5½x8 inches, thus permitting the easy and convenient handling of the bulkiest materials.

AUTOMATIC SELF-REGULATING TENSION—Is absolutely automatic in its action and is a special exclusive feature of the CVB Bartlett machine.

Unlike the common form, it is not necessary to adjust the CVB Bartlett tension to the different classes of goods which are being used from time to time. This tension makes a perfect and even stitch on the lightest chiffons without puckering and at the same time will produce equally good results on the heaviest woolens without any changing of the adjustment whatever. The convenience and importance of this great feature will be best appreciated by actual test by those who have had their troubles with the ordinary form of tension.

The release of the CVB Bartlett tension is entirely automatic and is put into operation when the pressure foot is raised to permit removal of work. When this is done, there is absolutely no tension on the upper thread and the goods may be removed without bending or breaking the needle.

FEATURES—Among many of the features exclusive to the Bartlett sewing machine are the following: positive double width steel forged feed, self-threading shuttle, positive cam driven takeup, automatic bobbin winder, and automatic gear releasing device.

CABINET STYLE

The full cabinet Bartlett machine is without a doubt the best in construction and equipment that the present market affords. It is of the highest grade throughout and handsome in design. It is compact and solid and takes up but a comparatively small amount of floor space. The door has hand carving of neat design. On inside of door there is a handy pocket for holding attachments, etc. It is equipped with the automatic lifting device which raises sewing head to position, and locks it firmly in place.

THE STAND mechanism which is inclosed in the case is simple and noiseless. There is ample knee room for the operator.

THE ATTACHMENTS, which are complete in every detail are packed in a well finished metal box, and consist of the following:

Tucker, ruffler, braider, binder, four hemmers of different widths, shirring slide, feller, quilter, cloth guide, four bobbins, six needles, two screw drivers, filled oil can and illustrated book of directions.

No. W64—Cabinet, w't 150 lbs. .....each $69.30

CYB Bartlett Sewing Machines

This handsome model is of exclusive design, and is constructed throughout of the highest quality hand polished quarter sawed oak. It has six side drawers with embossed pulls. These drawers are encased in solid dust proof panels, which design is in complete harmony with the design on the front panel. An 18 in. tape measure is transferred on front of the table. It is equipped with the tested chain automatic lifting device which automatically lifts the sewing head to position.

THE STAND is finished in best quality enamel, and is ball bearing type. It has the steel pitman and runs quietly and smoothly. It is equipped with the belt retaining device, which keeps machine belted at all times.

THE ATTACHMENTS are packed in a substantial velvet lined metal box, and consist of the following: tucker, ruffler, braider, binder, four hemmers of different widths, shirring slide, feller, quilter, cloth guide, four bobbins, six needles, two screw drivers, filled oil can and illustrated book of directions.

No. W71—6 drawers, w't 125 lbs. .....each $65.40

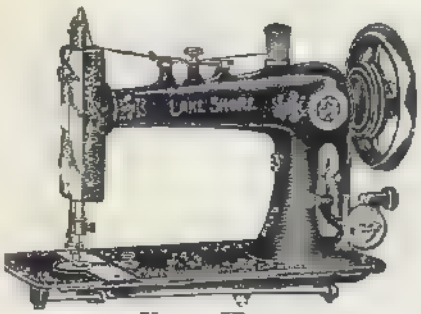
This Colonial design Bartlett machine is built on graceful and beautiful lines. It has four full length side drawers which are fitted with lock and key. The beautiful carved drop front piece is in complete harmony with the rest of this exclusive design, and the entire case is built of best hand rubbed mirror finish quality quarter sawed oak. It is equipped with the automatic lifting device which automatically lifts sewing head to position and at the same time raises the front panel, to allow ample knee room for the operator.

THE STAND is noiseless and speedy, well braced, simple yet strong in construction. It has the steel pitman, and the device for keeping machine belted at all times.

THE ATTACHMENTS consist of a complete set which are neatly packed and are as follows: tucker, ruffler, braider, binder, four hemmers of different widths, shirring slide, feller, quilter, cloth guide, four bobbins, six needles, two screw drivers, filled oil can and illustrated book of directions.

No. W49—4 drawers, w't 120 lbs., each $62.90

The Lake Shore Sewing Machines



Upper View.

Full Size Arm Improved Stitch Regulator. Automatic Bobbin Winder. Well Finished with all Exposed Parts Heavily Nickel Plated.

Under View.

In The Lake Shore machine we have a medium grade, thoroughly dependable, well equipped machine, which compares most favorably with other machines sold at much higher prices. The machine througout is constructed of good sound material, and with proper care should last a long term of years.

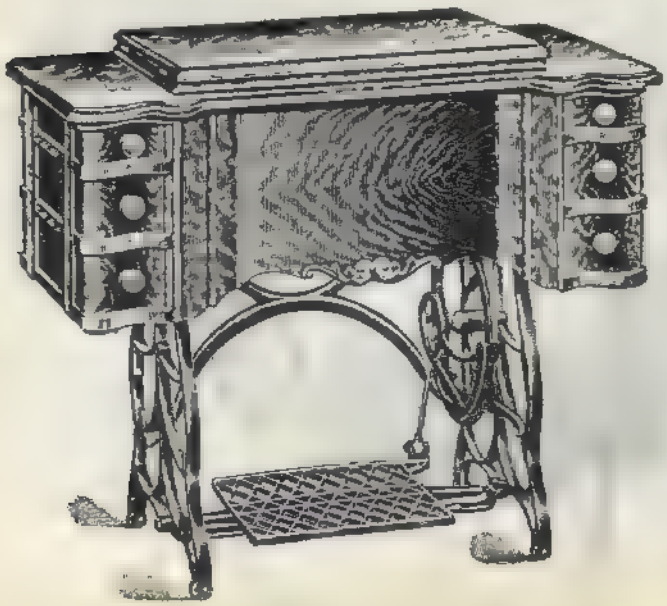
SPECIFICATIONS

The Stitch is known as a double lock stitch, which is formed by two threads being drawn together, and locked in the center of the goods, and finished alike on both sides.

The Sewing Head has full sized arm, well finished in best black enamel, relieved by attractively designed decorations. All exposed metal parts are heavily nickel plated.

The Working Parts are made of best quality steel hardened in oil, and with proper care will last a life time.

The Features of this machine compare very favorably with those of machines of much higher value, and consist in part of the following: Automatic gear releasing device, which automatically throws it out of gear when winding bobbins, automatic bobbin winder, which winds bobbins evenly and smoothly, improved stitch regulator, providing for any length of stitch, self setting needle, positive steel forged four motion feed, and a device for producing the proper stitch for any class of goods.



DROP FRONT

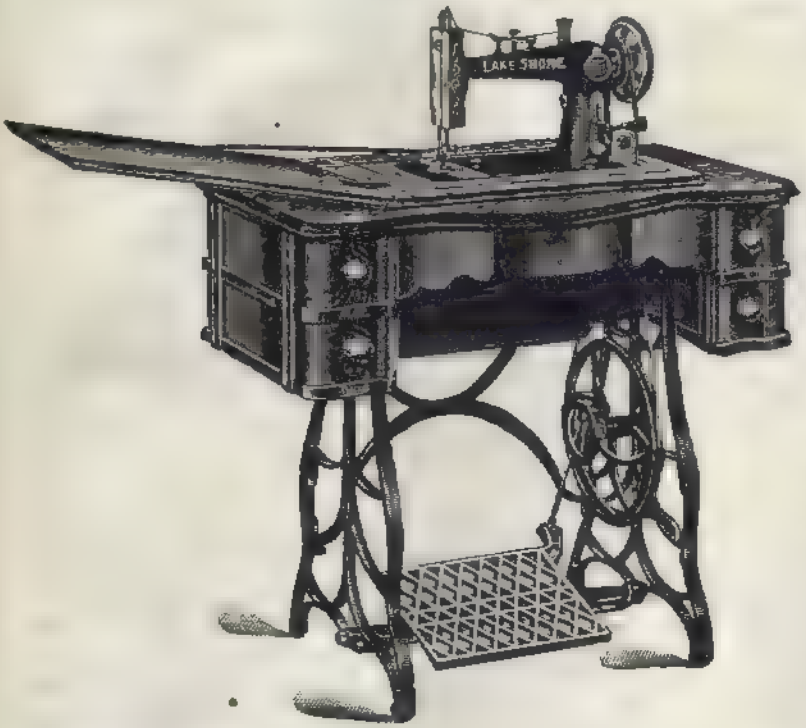
This attractive Lake Shore model is attractively designed and built throughout of well finished oak, and has six large well built side drawers. These drawer fronts together with front panel and lid are made of selected quarter sawed oak, which gives the machine an unusually attractive appearance. It is equipped with the chain automatic lifting device which automatically raises the sewing head to position with one motion of the arm.

THE STAND is ribbon design, well finished in best black baking enamel. It is quiet and easy running. The pitman connecting the treadle and wheel has non-binding ball and socket connections. It is equipped with belt retaining wheel guard which keeps machine belted when not in use.

THE ATTACHMENTS are packed in a velvet lined metal box, complete in every detail and consist of the following: tucker, ruffler, braider, binder, four hemmers of different widths, shirring slide, feller, quilter, cloth guide, four bobbins, six needles, two screw drivers, filled oil can, and illustrated book of directions.

No. 328—6 drawer, w't 130 lbs. .....each $60.40

The Lake Shore Sewing Machines



This Lake Shore model which we term medium grade to distinguish it from the strictly high grade models. It is complete and up-to-date in all respects, so far as sewing qualities are concerned.

THE CASE is attractive in appearance and substantial in construction. It is equipped with four side drawers and handy center drawer. These drawer fronts are made of quarter sawed oak. An 18 in. tape measure is transferred on table for the convenience of the operator. It is equipped with the automatic lifting device, which automatically raises the sewing head to position.

THE STAND is well braced and simple in construction. It runs exceedingly easy and smooth. The belt retainer on wheel guard is so made that it holds belt on wheel at all times.

THE ATTACHMENTS, which are exceedingly good for a machine of this grade are equipped in a metal box, and consist of the following: tucker, ruffler, braider, binder, four hemmers of different widths, shirring slide, feller, quilter, cloth guide, four bobbins, six needles, two screw drivers, filled oil can, and illustrated book of directions.

No. W226—5 drawers, w't 120 lbs. ..... each **$53.80**

La Belle Sewing Machines

This model is the best low priced machine that the present market affords. It is strictly dependable and within its limitations will perform good work, and give excellent service for a number of years.

THE CASE, which is in the form of a semi-drop cabinet, is plain and substantially built of a very good grade of oak, which is given a high varnish finish. It has four large side drawers equipped with wood pulls, and a handy center drawer. An 18 in. tape measure is inlaid on the front of table.

THE SEWING HEAD is raised to position by hand and locked in place by a simple device provided for that purpose.

THE STAND, while lighter than our better grade machines, is nevertheless strong and well braced and of excellent finish.

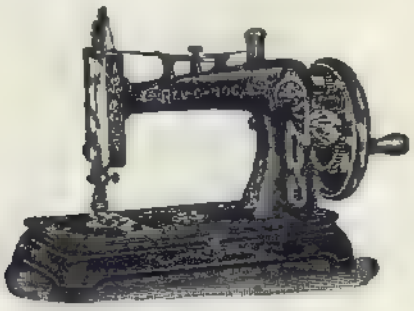
THE ATTACHMENTS furnished with this machine are packed in a neat box and consist of the following: tucker, ruffler, braider, binder, four hemmers of different widths, shirring slide, feller, quilter, cloth guide, four bobbins, six needles, two screw drivers, filled oil can and illustrated book of directions.

No. W226—5 drawers, w't 110 lbs. ..... each **$44.80**

REVONOC

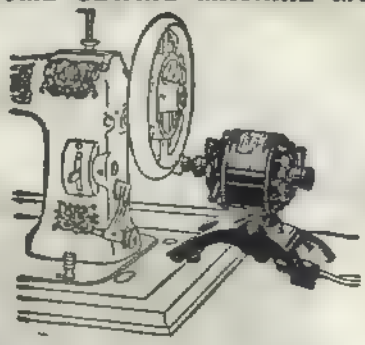
Description—These are reliable Hand Machines that may be operated by hand at high speed, as it makes three complete stitches to each revolution of the handle. Well finished with black enamel and transfer decorations and equipped wth a complete set of hemmers and accessories, including hemmer and feller, 4 hemmers of different widths, cloth guide, quilter, 6 needles, 3 bobbins, filled oil can, thread cutter and illustrated instruction book.

The mechanism of the head is the same as the La Belle, see preceding page.



No. W1000 REVONOC—W't 35 lbs. .....each $22.90

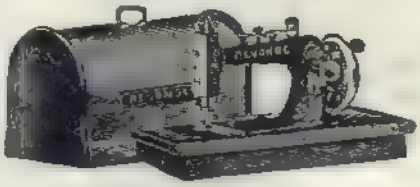
HOME SEWING MACHINE MOTORS



Easily adjusted, no tools or screws. Just place Sew-E-Z on your machine next the wheel. Attach the plug to any electric light socket and place the little pedal on the floor. A slight pressure of your foot starts the wheel.

Don't work your foot, just press a bit harder to go faster. No effort is required; no exertion whatever. So simple a child can operate it. Makes such light work that Grandma can use it. You never touch the wheel; Sew-E-Z makes it turn automatically right. No broken threads; no jerks—just a silent, steady motion which stops the instant you remove foot from pedal— and you sit in any position you please.

No. 10E—Instantly attached to any standard make sewing machine, plain or drop head cabinet style, will operate on either direct or alternating current, 60 cycles, 110 volts, consumes no more current than an ordinary lamp, 10 ft. cord and plug, w't each 10 lbs., each $26.00



Equipped with hand polished oak base and cover. Cover is fitted with a substantial metal handle so the machine may be conveniently carried.

No. W1100 REVONOC—W't 49 lbs. .....each $35.80

The spool keeps the belting in good condition and prevents waste.

BROAD CROSS CUT SAWS

Handles must be ordered separate from saws.

—BLUE GRASS—

Blue Grass Cross Cut Saws are made of the same extra quality materials and the same infinite care characterizes their production as with other Blue Grass tools.

The needs of the Lumbermen and the peculiarities of the different timbers have been carefully studied in order to make the Blue Grass Cross Cut saw a tool that in real use would respond readily and constantly to the demands of the user under any and all conditions.

All Blue Grass Cross Cut saws are ground an even gauge throughout the entire tooth edge, and then tapered to an extra thin back, which insures quick cutting and ease of operation, with just the right flexibility and stiffness to prevent buckling.

Each saw is beautifully polished and etched altogether a tool in a class by itself —unequaled in appearance—unapproachable in performance, and covered from tip to tip with our guarantee.

Extra quality crucible spring steel, evenly tempered, polished and etched. Ground gradually thinner from teeth to back, filed and set ready for use.

BROAD CROSS CUT SAWS

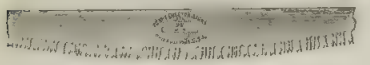
Handles Must Be Ordered Separate From Saws.

DISSTON

First quality crucible steel, evenly tempered, polished and etched; ground gradually thinner from teeth to back; filed and set, ready for use.

DISSTON SUWANEE



Lance Tooth, Perforated. 14 gauge at tooth edge, 20 gauge at back. Being 6 gauges thinner on back than on cutting edge, insures free running and fast cutting.

Nos.	35½	36	36½
Length, feet	5½	6	6½
Width at center, in.	6½	7	7¾
Width at ends, in.	3¾	3¼	3⅜
Weight each, lbs.	5½	7	8
Each	$16 20	18 45	21 75

Shipped fastened to board.

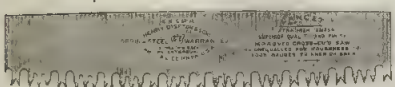
DISSTON BUZZ

Lance Tooth, Perforated. 14 gauge at tooth edge, 19 gauge at back. 5 gauges thinner on back than on cutting edge.

Nos.	470-5½	470-6	470-6½
Length, feet	5½	6	6½
Width at center, in.	5¾	6	6¼
Width at ends, in.	3¼	3¼	3¼
Weight each about, lbs.	6	7	8
Each	$16 20	18 45	21 75

Shipped fastened to board.

DISSTON



Lancet Tooth, 14 gauge at tooth edge, 18 gauge at center of back; thin back.

Nos.	363-5½	363-6	363-7
Length, feet	5½	6	7
Width at center, inches	6⅞	7⅛	7¾
Width at ends, inches	3½	3⅝	3⅞
Weight each about, lbs	6½	8	9½
Each	$13 50	14 70	15 90

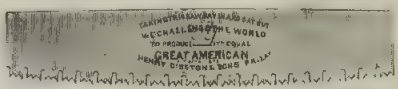
Shipped fastened to board.

BROAD CROSS CUT SAWS

Handles Must Be Ordered Separate From Saws.

DISSTON

First quality crucible steel, evenly tempered; polished and etched; ground gradually thinner from teeth to back; filed and set, ready for use.

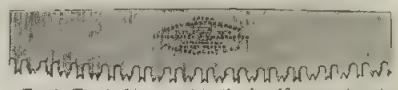


Great American Tooth, 14 gauge at tooth edge, 18 gauge at center of back; thin back.

Nos.	1GA-5	1GA-5½	1GA-6
Length, feet	5	5½	6
Width at center, inches	6¾	7	7¾
Width at ends, inches	3⅜	3½	3⅝
Weight each about, lbs.	5½	7	7½
Each	$11 25	12 45	13 50

Shipped fastened to board.

DISSTON

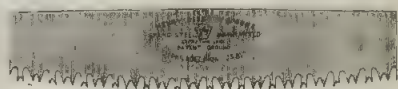


Tuttle Tooth, 14 gauge at tooth edge, 18 gauge at center of back; thin back.

Nos.	DT18-5½	DT18-6	DT18-7
Length, feet	5½	6	7
Width at center, in.	7	7¼	7¾
Width at ends, in.	3½	3⅝	3⅞
Wt. each about, lbs.	6½	8	9
Each	$11 40	12 45	14 55

Shipped fastened to board.

DISSTON

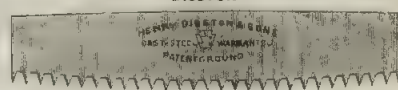


Tuttle Tooth, 14 gauge at tooth edge, 16 gauge at center of back; thin back.

Nos.	2-5½	2-6	2-6½
Length, feet	5½	6	6½
Width at center, inches	7	7¼	7½
Width at ends, inches	3½	3⅝	3½
Weight each about, lbs	6½	8	8½
Each	$9 90	10 80	11 70

Shipped fastened to board.

DISSTON



Plain or Peg Tooth, 14 gauge at tooth edge, 16 gauge at center of back; thin back.

Nos.	2P-5½	2P-6
Length, feet	5½	6
Width at center, in.	7	7¼
Width at ends, in.	3⅜	3⅝
Wt. each about, lbs.	5½	7
Each	$9 90	10 80

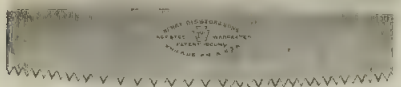
Shipped fastened to board.

BROAD CROSS CUT SAWS

Handles Must Be Ordered Separate From Saws.

DISSTON

First quality crucible steel, evenly tempered, polished and etched, ground gradually thinner from teeth to back; filed and set, ready for use.



Tenon Tooth.

Fourteen gauge at tooth edge, 16 gauge at center of back; thin back.

Nos.	2T-4½	2T-5	2T-5½	2T-6

Ford Wrench Sets

Five sizes of sockets that fit the nuts that need the most adjustments and handles especially designed for this work. Two sizes of these sockets are tapered to fit nuts otherwise difficult to adjust: 17-32 hexagon socket for rear axle housing nuts, and 19-32 hexagon for engine base bolts. Set consists of 1 double end vertical or offset handle; 17-32 tapered hexagon socket; 19-32 tapered hexagon socket; 21-32 cylinder head cap screws; 25-32 hexagon; oval for main bearing bolts. Rust-proof black finish.

MOSSBERG SOCKETS AND BRACES

MOSSBERG SOCKETS

These sockets are drawn from flat steel cold, and therefore embody and keep the long straight grain that is so desirable in a wrench—to resist a twisting strain. They are accurate to size stamped upon each one, and are guaranteed. The material and workmanship are the best that can be had.

In specifying, dimensions of nuts should be taken measured "across the flats," or, in other words, the smallest diameter of nut or bolt head, and unless actual size of socket is ordered, we allow .030 inch for clearance.

MOSSBERG BRACE WRENCHES

Speed Brace Socket

The sockets are drawn from cold rolled strip steel, with accurate hex. openings, but are perfectly round outside. The addition of this extra metal across outside faces of sockets causes these sockets to be virtually indestructible. All sockets are case hardened. Handle of ½ inch bar steel, with bell-shaped steel swivel top handle 19½ inches long. Black rust-proof finish. Sizes and price as given in table below. Weight each, approximately 1¾ pounds.

MOSSBERG WRENCHES

6 in. Handle

T Handle Socket Wrenches

The heavy duty indestructible sockets which are a part of these wrenches are drawn from steel of analysis that is scientifically determined as the best possible for resisting a twisting strain, which is the exact work demanded of these wrenches. All sockets are case hardened. Handle made of ¾-inch steel bar, rust-proof black finish. Weight each approximately 1½ pounds.

SIX OF A KIND IN A CARDBOARD CARTON

Offset Socket Wrenches

The indestructible steel sockets and 10-inch handle of these wrenches give them strength and leverage sufficient for all work. The sockets are made from drawn flat steel, round outside, with no more clearance needed than the other types, but with about twice the strength. Guaranteed for accuracy and strength. All sockets are case hardened. Finished rust-proof black. Weight each approximately 1 pound.

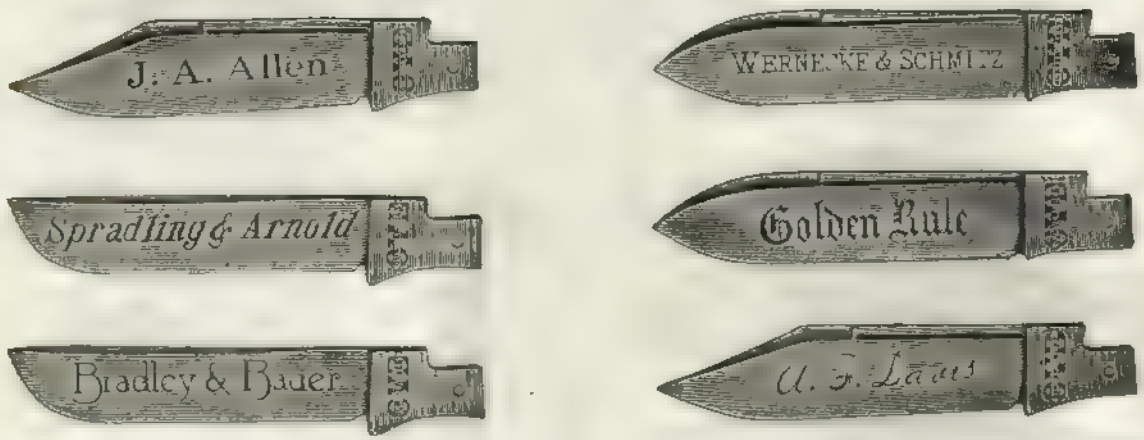
We do not carry pocket knife blades in stock. The illustrations shown on this page being reproductions of the different styles used in [redacted] pocket knives. Slight variations are made to adapt them to the different knives of which they form a part. All are made from Wardlow's Celebrated English crucible steel. Each blade is forged in the most approved manner by expert workmen. Great care is taken to avoid overheating the metal, the forging being done at a very low heat, thereby condensing the metal and making it extremely tough. The tempering is done by a new method which insures a uniform and lasting edge. All blades bearing the [redacted] trademark are carefully ground and finished. The shank is carefully shaped and finished. Every blade is inspected, whetted to a fine cutting edge and warranted to be free from flaws and neither too hard or too soft.

In material, workmanship and design, the [redacted] pocket knife blades are equal, if not superior to any made in this or any other country. They are and always have been the product of an American factory which has in its employ cutlers who have served thirty, forty and fifty years in their service.

ETCHING CUTLERY

Etching Department.

STYLES OF ETCHING



The very best way of increasing trade in pocket cutlery is through the dealer's advertisement on the large blade of his best knives. If this is done wisely, it establishes a reputation for all knives bearing the dealer's name, adding his reputation to that of the maker, and thus is a convincing argument to the quality of the article. The consumer is sure of a double guaranty, and if the brand is unknown, he at least knows that the dealer would not have his name on inferior goods. It is also a strong safeguard against theft. Several times every year we hear of stolen goods recovered which had been etched by us, the name on the blade identifying the knives and establishing evidence to convict the thieves. Numbers of our customers have informed us that they have been robbed, the thieves leaving the etched knives untouched.

Our etching department, beginning in 1896 in a very modest way, has grown to an important adjunct to our cutlery business. Our etchers have become artists in their work, having every appliance necessary or desirable to produce fine results.

Etching has become popular, and the public is quick to notice the enterprise of a dealer who has something new to offer.

We make no charge whatever for this work, feeling that we are amply repaid by the increased business the dealer is sure to give us in consequence of adding to the selling quality of his knives. Our only requirements are that a sufficient—not a large—quantity is ordered each time to warrant it, and that the goods are such that we as a firm would care to affix our guaranty.

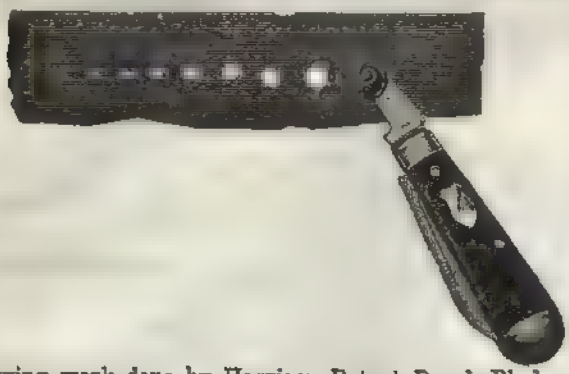
We shall be glad to explain more fully through our representatives or by letter our position in this matter and show samples of the work.

OVD POCKET KNIVES

FULLY GUARANTEED TO GIVE PERFECT SATISFACTION

Made by American workmen. Blades are finest quality Crucible Steel, TEMPERED BY A NEW METHOD WHICH INSURES A UNIFORM AND LASTING EDGE. Sharpened ready for use. In whetting, hold at an angle of 18 degrees on an OIL STONE, not a grindstone.

WE ETCH YOUR NAME, FREE OF CHARGE, ON THESE KNIVES WHEN REQUESTED



Showing work done by Harrison Patent Punch Blade.

All the pocket knives on this page are supplied with a **Harrison patent punch blade** as illustrated above. **It is the only knife ever made that will cut perfectly round and smooth holes** in leather. Will cut holes of any size up to ¾ inch in diameter, and can be used to enlarge holes already made. Much more convenient to use than a punch, being always at hand, and making just the right size hole wanted every time.

Invaluable for Belting, etc. An invaluable tool for repairing belting, for mending harness or making buckle holes. The curling upper face of the punch extending slightly over the end of the knife making it easy to open, even if the user has on gloves. **It is very strong and will hold its sharp-cutting edge a long time** without re-sharpening. **This is the only punch blade** manufactured **that will cut a perfectly round, smooth hole of any desired size without damaging the leather.**

The Very Best Quality. Both the patented punch blade, and the other blades are hand **forged from the finest grade of crucible steel, highly tempered and warranted free from flaws. These knives are positively without equal for practicability.**
